INSTRUCTIONS.

1. *Dhubri route to Assam.*—If the batch proceeds to Assam *viâ* Dhubri, the person in charge, if taking the Magra and Kanchrapara route, must place the emigrants for inspection with this way-bill before the Magistrate of Hooghly, and on arrival at Dhubri before the Embarkation Agent at that place, who will endorse his remarks on the way-bill, and then either make it over to the master of the steamer, should the batch proceed to destination by water, or return it to the person in charge, should the batch proceed to destination by land. In the former case the master must, after complying with the requisition at foot of way-bill, make over the document to the debarkation or final inspecting officer concerned, to be returned with his remarks endorsed thereon to the peon or other person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta. In the latter case the person in charge must, on arrival in the district or sub-division in which the garden where the labourers are to work is situate, place the emigrants with this way-bill before the Magistrate, who will, after endorsing his remarks on the way-bill, and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta.

2. *Goalundo route to Assam, Káchár, or Silhat.*—(*a*.)—If the batch proceeds to Assam *viâ* Goalundo, the person in charge, if taking the Magra and Kanchrapara route, must place the emigrants for inspection with this way-bill before the Magistrate of Hooghly, and on arrival at Goalundo before the Embarkation Agent, or in his absence the Magistrate at Goalundo, who will endorse his remarks on the way-bill and then make it over to the master of the steamer in which the batch is embarked. The master, on the steamer's arrival at Dhubri, must place the way-bill before the Embarkation Agent at Dhubri for his endorsement after inspection of coolies; and on the completion of the voyage must, after complying with the requisition at foot of way-bill, make over the document to the debarkation or final inspecting officer concerned, to be returned with his remarks endorsed thereon to the peon or other person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Goalundo for information and transmission to the Superintendent of Emigration at Calcutta.

(*b*) If the batch proceeds to Káchár or Silhat, the person in charge must place the emigrants with this way-bill before the Embarkation Agent or Magistrate at the place of embarkation, and also before the Magistrate or Sub-divisional officers of all stations passed on the way, where such officers are readily accessible, and also before the debarkation officer at the place of their final landing, or should this not be possible, then, without fail, before the Magistrate of the district or sub-division in which the garden where the labourers are to work is situate, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent or Magistrate concerned in the embarkation for information and transmission to the Superintendent of Emigration at Calcutta.

3. *Calcutta route to Chittagong.*—If the batch proceeds to Chittagong or the Chittagong Hill Tracts the person in charge must place the emigrants with this way-bill before the Magistrate at the place of disembarkation, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Superintendent of Emigration at Calcutta for information.

4. *Treatment of emigrants on the journey.*—The person in charge must take every care of the emigrants during the journey. He must give them a cooked meal before they start; and if the journey is likely to occupy more than six hours, he must distribute biscuits and sugar in the proportion of two biscuits and one ounce of sugar to each emigrant of and above ten years of age, and one biscuit and half an ounce of sugar to each emigrant under the age of ten years; and if more than eight hours dry provisions must be supplied, such as choora, suttoo, and the like, in such quantity as may be determined by the Superintendent of Emigration or other authorized officer. It must be seen that the clothing provided is worn by the emigrants whenever the weather renders such a precaution necessary. At the close of every day's march, or of a train journey, the emigrants must be properly housed, and provided with a cooked meal and wholesome supply of water for drinking and ablution purposes.

5. *Any special instructions.*—

6. *Obedience to instructions.*—The instructions on the way-bill must be strictly complied with; and any failure to do so, or ill-treatment of any emigrant, will render the person in charge of the batch liable to punishment under the provisions of section 148 of Act I of 1882, or, in case he is a licensed person, to cancellation of license if needed.

Name of Station.	Date.	Remarks which inspecting officers may desire to record.

CHAPTER III.

GARDEN-SARDARS' SYSTEM OF RECRUITMENT.

Application for local agent's license.

73. Every employer of labour, in charge of any estate in a labour district, desiring to obtain, under section 59 of the Act, a license (form No. 24) for any person to be a local agent for the purpose of representing him in the recruiting districts, and supervising the collection of labourers by his garden-sardars, shall apply to the Superintendent of Emigration authorized to grant such license, either directly or through his agent.

Application for local agent's special license.

74. If any employer applies for a special license under section 62 (form No. 25) on behalf of any local agent, in order to enable him to engage labourers without the intervention of a garden-sardar, and such local agent is at the time representing other employers by virtue of a license under section 59, the written consent of all such other employers to the grant of such special license shall invariably be obtained and furnished with the application.

75. Every local agent shall be held responsible for the proper conduct of recruitment by garden sardars working under his supervision; and shall see that their recruiting operations are in all respects distinct and apart from those of contractor's and their employés.

Responsibilities of local agents in respect to selection of labourers.

76. In every case in which the physical fitness for labour of intending emigrants is required by any employer in his sardar's certificate (form No. 23) to be determined previous to registration, the local agent, if any, or the sardar of such employer, shall ensure the necessary medical examination in form (No 27) and be otherwise directly responsible for the class of labourers engaged to proceed to the labour district.

Inspection of places of accommodation for sirdari labourers.

77. It shall be the duty of the District Magistrate to see that every place approved for the accommodation of intending emigrants recruited by garden-sardars is regularly and thoroughly inspected by the officers charged with that duty.

Provision of way-bill for journey.

78. The way-bill (form No. 28) required by section 76 to be provided for the journey shall be carefully and correctly filled in with all the necessary particulars regarding the labourers forming the batch by the sirdar or other person appointed to accompany them to their destination; and local agents, if any, shall be held responsible for the garden-sirdar's fulfilment of this duty.

Return of way bills by employers.

79. On the arrival of a batch of labourers at its destination, or port of disembarkation as the case may be, the sardar or other person in charge shall make over the way-bill of the batch to the employer of such labourers, who, after endorsing thereon his remarks, shall forward it to the district or sub-divisional magisterial officer for information and transmission to the Emigration Agent, or the Superintendent of Emigration concerned, in the despatch of the labourers.

No. 23.

FORM OF GARDEN-SARDAR'S CERTIFICATE.

Certificate authorizing the garden-sardar to enter into labour-contracts with intending labourers recruited on behalf of his employer.

Name of garden sardár.	Father's name.	Caste.	Age.	HEIGHT.		Full particulars as to general appearance and characteristic marks, for purposes of identification.	Name of place, and description of lands on which labour is to be performed.	Local area of recruitment.	Number of natives the sardár is authorized to engage.	Name of local agent, if any, to whom garden-sarbarah is to report himself for orders.	The time within which the sardár is to return to the garden of his employer.	Any special instructions that employer may desire to give to sardár for his guidance.	Whether emigrants are to be medically examined as to fitness for labour under section 70.	Signature of sardár in acceptance of certificate.	REMARKS.
				Feet.	Inches.										

N.B.—This certificate shall not be considered to be in force unless or until it has been accepted and signed by the garden-sardár, and countersigned by the Inspector of Labourers or Magistrate of the district.

THIS certificate may at any time be cancelled by any Magistrate, Superintendent, or Inspector within the local limits of whose jurisdiction the garden-sardar is employed, if the holder contravenes any of the provisions of the Inland Emigration Act, 1882, or is guilty of any other misconduct.

Countersigned (under section 54) on the 188 .

This certificate will cease to be in force on the expiry of twelve months from the date of countersignature.

NOTE.—Columns 1 to 9 should be filled in by the registering officer; column 10 by the local agent, if any, or garden-sardar; and column 11 by the inspecting officers *en route*, who should enter in that column the names of those lost to the batch, and the causes of the losses as ascertainable from an examination of the batch and person in charge. Each inspecting officer recording an entry should sign the way-bill.

The abstract should be filled in by the employer, who thereafter should dispose of the way-bill as indicated in the annexed instructions.

INSTRUCTIONS.

1. *Dhubri route to Assam.*—If the batch proceeds to Assam *viâ* Dhubri, the person in charge, if taking the Magra and Kanchrapara route, must place the emigrants for inspection, with the way-bill, before the Magistrate of Hooghly, and on arrival at Dhubri, before the Embarkation Agent at that place, who will endorse his remarks on the way-bill, and then either make it over to the master of the steamer, should the batch proceed to destination by water, or return it to the person in charge, should the batch proceed to destination by land. In the former case, the master must be careful, when emigrants are being finally landed, to make over the way-bill to the debarkation or final inspecting officer concerned, to be returned with his remarks endorsed thereon to the sardár or other person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Embarkation Agent at Dhubri, for information and transmission to the Superintendent of Emigration at Calcutta. In the latter case, the person in charge must, on arrival in the district or sub-division in which the garden where the labourers are to work is situate, place the emigrants with this way-bill before the Magistrate, who will, after endorsing his remarks on the way-bill, and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Embarkation Agent at Dhubri, for information and transmission to the Superintendent of Emigration at Calcutta.

2. *Goalundo route to Assam, Káchár, or Sylhet.*—(*a*) If the batch proceeds to Assam *viâ* Goalundo, the person in charge, if taking the Magra and Kanchrapara route, must place the emigrants for inspection, with the way-bill, before the Magistrate of Hooghly, and, on arrival at Dhubri, before the Embarkation Agent, or in his absence the Magistrate at Goalundo, who will endorse his remarks on the way-bill, and then make it over to the master of the steamer in which the batch is embarked. The master, on the steamer's arrival at Dhubri, must place the way-bill before the Embarkation Agent at Dhubri for his endorsement after inspection of the emigrants, and on the completion of the voyage, or when any batch is about to be landed at its destination, make over the document to the debarkation or final inspecting officer concerned, to be returned with his remarks endorsed thereon to the sardár or other person in charge of the batch, for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Embarkation Agent at Goalundo for information and transmission to the Superintendent of Emigration at Calcutta.

(*b*) If the batch proceeds to Káchár or Sylhet, the person in charge must place the emigrants, with this way-bill, before the Embarkation Agent or Magistrate at the place of embarkation, and also before the Magistrate or Sub-divisional Officers of all stations passed on the way, where such officers are readily accessible, and also before the debarkation officer at the place of their final landing; or should this not be possible, then, without fail, before the Magistrate of the district or sub-division in which the garden where the labourers are to work is situate, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch, for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Embarkation Agent or Magistrate concerned in the embarkation, for information and transmission to the Superintendent of Emigration at Calcutta.

3. *Calcutta route to Chittagong.*—If the batch proceeds to Chittagong or Chittagong Hill Tracts, the person in charge must place the emigrants, with this way-bill, before the Magistrate at the place of disembarkation, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch, for delivery to the employer. After perusal and entry of casualties in the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Superintendent of Emigration at Calcutta for information.

4. *Treatment of emigrants on the journey.*—The person in charge must take every care of the emigrants during the journey. He must give them a cooked meal before they start; and if the journey is likely to occupy more than six hours, he must distribute biscuits and sugar in the proportion of two biscuits and one ounce of sugar to each emigrant of, and above, ten years of age, and one biscuit and half an ounce of sugar to each emigrant under the age of ten years; and if more than eight hours, dry provision must be supplied, such as choora, sattu, and the like, in such quantity as may be determined by the Superintendent of Emigration or other authorized officer. It must be seen that the clothing provided is worn by the emigrants whenever the weather renders such a precaution necessary. At the close of every day's march, or of a train journey, the emigrants must be properly housed, and provided with a cooked meal and wholesome supply of water for drinking and ablution purposes.

5. *Any special instructions.*—

6. *Obedience to instructions.*—The instructions on the way-bill must be strictly complied with, and any failure to do so, or ill-treatment of any emigrant, will render the person in charge of the batch liable to punishment under the provisions of section 153 of Act I of 1882, or, in case he is a sardar, to refusal of certificate thereafter.

Name of station.	Date.	Remarks which inspecting officers may desire to record.

CHAPTER IV.

TRANSPORT.

Section 1.—General Rules.

Supervision of embarkation depôts.

80. The Medical Inspector at every place of embarkation shall see that the embarkation depôts are kept in proper order, and shall exercise the same powers in respect of them as are exercised in respect of depôts by Medical Inspectors, reporting, for the information of the Superintendent concerned, any failure of contractors or their employés to attend to his orders. Water and conservancy arrangements shall receive special attention.

Measurement of deck space.

81. Exclusive of hospital, gangways, ventilating hatches, and space for crew and attendants, and in respect of boats for rowing and bailing out, properly sheltered deck space shall be provided on board steamers, flats, or boats at the rate of ten superficial feet to each emigrant, computed with reference to section 92 of the Act, during the months of November, December, and January, and of twelve superficial feet for the remaining months of the year. In steamers of the daily mail service, besides suitable and available space on main deck, fore and after cabins also may be measured for the accommodation of emigrants, at an increased rate per emigrant of twelve and fourteen superficial feet respectively.

Measurement of hospital space.

82. Hospital space shall be provided for five per cent. of the total number of emigrants to be carried, computed with reference to section 92 of the Act, but such space shall be allotted at double the rate allowed for healthy adults, viz. twenty or twenty-four superficial feet to each statute adult, according to season, making reasonable allowance for space occupied by other requirements.

Section 2.—Fittings of Steamers and Flats.

Engineers and shipwright surveyors' certificates.

83. It shall be ascertained that the term for which the engineers and shipwright surveyors' certificates were granted to the vessels has not expired, or will not expire during the passage.

Situation of fittings of emigrant vessels.

84. All fittings shall be provided entirely on board that vessel which is to convey the emigrants to their destination; but, if necessary, and with the Medical Inspector's consent, the hospital may be provided on an upper deck of the adjoining flat or steamer, if it accompany for the entire journey.

Roofs of emigrant vessels.

85. The roof of every vessel shall be strong, watertight, and not less than five feet in height at its junction with the stanchions on either side. If of corrugated iron, the roof must not only be lined or thatched with matting, &c., as a protection against heat, but, on steamers, must also be fitted either with skylights or ridge-ventilators, which shall have a ventilating area of not less than ten superficial feet to every hundred emigrants, computed as in section 92 of the Act, accommodated on board, and shall be so constructed as to exclude rain and allow the free escape of heated air. In steamers of the daily mail service, the ventilating area may be reduced to not less than six superficial feet to every hundred emigrants.

Enclosure of deck space for emigrants.

86. The space measured off for emigrants shall be fitted along the sides of the vessel, with a boarding three feet high, rising from the planksheer of the vessel, and with thick and sound canvas curtains hanging from roof to deck, with ventilating space under the eaves, and fastening closely to the deck below. But from the months of October to March, both inclusive, the three feet boarding shall completely enclose the emigrants' deck space, and, besides the side curtains, there shall be similar curtains hung, one at each end of the deck, so as to convert the entire space allotted to emigrants into a thoroughly sheltered compartment, with ventilating spaces near the roof for the exit of heated and unwholesome air. This large compartment shall, moreover, be subdivided into three smaller compartments by a couple of intermediate curtains stretched right across the deck space, from one side of the vessel to the other; but these two curtains, instead of extending almost up to the roof, as those at the sides and ends must do, shall be raised to a height of six feet only, measuring from the deck upwards, the space above being left clear and open for the purposes of free ventilation. In steamers of the daily mail service, the height of the boarding may be reduced to not less than two feet nine inches, and such boarding may not be continued round the stern of the vessel; but a suitable removable curtain following the iron rail may be substituted therefore.

Protection of emigrants' deck space against wet.

87. The space for emigrants shall be protected also against spray from the paddle-wheels; otherwise the space opposite the paddleboxes on both sides of steamer, and on one side of a flat, if it is to be lashed alongside during the voyage, shall not be measured for the accommodation of emigrant passengers.

Casing of funnel.

88. In order to prevent the heat of the funnel from raising the temperature of the emigrants' deck, in all steamers, in which the space immediately over the engines is neither excluded and railed off, nor ventilated above by skylights or other means, that portion of the funnel between such passengers' deck and the roof shall be enclosed at a distance of at least eighteen inches all round, by a strong wooden air-shaft or casing, which shall be carried through the deck at the lower end, and through the roof at the upper, so as to afford free exit above the roof for the body of warm air immediately surrounding the funnel. In steamers of the daily mail service, such

wooden casing may be dispensed with, if the iron casing provided for exit of warm air is found to be sufficiently protective, but not otherwise.

Situation of hospital.

89. The space intended for hospital purposes shall be provided on the upper deck of the steamer or flat, and a canvas screen shall divide it off from the rest of the deck space.

Compartment for dispensary.

90. A suitable compartment, approved by the Medical Inspector, shall be set apart for a dispensary; and bamboos shall be fastened, fore and aft, along the central stanchions within the emigrants' deck space, in order to enable the emigrants to hang up their bundles and blankets for the day.

Railing in of unprotected openings.

91. All dangerously exposed places near hatches, ladders, bathing places, latrines, communication and landing stages, shall be securely railed in against accidents.

Embarkation and landing stages.

92. Embarkation, landing, and all communicating stages likely to be used by emigrants, shall be at least three feet wide, well fastened, and provided with hand-rails—a requirement that shall be strictly complied with whenever emigrants are to be embarked or landed. In steamers of the daily mail service, the width of the stages may not be less than two feet.

Cabooses for emigrants.

93. One or two fire-proof cabooses, fitted inside with brick and plaster, and sufficiently large to accommodate the full number of boilers, according to scale, shall be firmly secured in the after part of the vessel, and so placed as to prevent any risk of contamination from the hospital.

Iron tanks for drinking water.

94. Four iron water-tanks, each capable of containing four hundred gallons of water, shall be provided on board, and each such tank shall be fitted with at least three moderate-sized taps, of simple construction, capable of being secured against use when desirable, and with a padlocked iron cover, besides a canvas over-all to exclude dust, &c. A ship's force-pump, with hose complete shall also be provided for the exclusive purpose of supplying water to the tanks, and shall on no ground whatever, excepting an outbreak of fire on board, be otherwise used. These tanks shall be conveniently placed, and filled before the arrival of the steamer at the place of embarkation, with the best water available, for the exclusive use of the emigrants. The water of two of the tanks only shall be in use at the same time, the remaining two tanks being reserved as settling tanks. In steamers of the daily mail service, the tanks may be reduced to two, each capable of containing 200 gallons of water, and may be placed below, with a pump arrangement on deck, for the supply of water for drinking and looking purposes through three moderate-sized taps.

Troughs for washing purposes.

95. Every vessel licensed to carry emigrants shall be provided with a covered trough, fitted with at least six large and simple taps, placed at such distances apart as to admit of six persons abreast washing their clothes at the same time, and connected with a fixed pump for the constant supply of water therein. Two such troughs shall be provided when the number of emigrants to be carried exceeds three hundred, computed with reference to section 92 of the Act.

Arrangements for bathing of emigrants.

96. A sufficiently large and well protected space for bathing shall be set apart for the use of the emigrants, and shall be fitted with a suitable showerbath of simple construction, and capable of distributing the shower over a large area, with a moveable canvas screen, to be invariably used when women are bathing, and with a suitable pump for supplying water thereto, which may be utilized also for filling the trough.

Latrines for emigrants.

97. Latrines with doors in front shall be securely fitted as far aft as possible, and at some distance from the deck space for emigrants from their drinking water, and from the cooking places, &c., and in every compartment a metal vessel, secured by a chain, shall be provided for drawing river water for washing purposes. The inside of every compartment, as well as the metal vessel and chain, shall be painted with coal-tar—a process that shall be repeated at the close of every trip after the compartment has been thoroughly cleaned. In steamers of the daily mail service, three latrines may be provided in one of the sponson-deck houses, to be set apart exclusively for the purpose.

Size and number of latrines.

98. There shall be two separate sets of latrines for males and females respectively placed, if possible, on opposite sides of the deck, and each set shall consist of at least four compartments for the use of any number up to two hundred emigrants, and of one additional compartment for every hundred in excess of the first two hundred, reference in counting numbers being had to section 92 of the Act. In steamers of the daily mail service, the deck-house set apart for the latrines shall have at least three compartments for males and three compartments for females.

Lanterns.

99. Lanterns shall be hung up in their places ready for use.

Boats and life-buoys.

100. Two life-buoys shall hang over or near the stern of every vessel, and the boats shall be in good working order, and fitted with requisites for immediate use, when necessary. In steamers of the daily mail service, the number of buckets may be reduced to ten.

Provision of fire-engine and appliances.

101. All emigrant passenger vessels shall have on board a fire-engine, with a sufficiently long flexible hose, that would be capable of discharging water over every part of the vessel; fire-buckets, and all other appliances needful in case of fire. The fire-buckets shall be twenty in number, and they, as well as all other fittings, shall always be kept in a proper place, in good order, and be ready for use on the shortest notice.

N.B.—There should be a separate form in duplicate for each separate batch of emigrants, and the particulars under each head should be carefully filled in by the officer concerned. One of the statements should then be forwarded by the debarkation or inspecting officer to the Magistrate of the district for his countersignature and submission to the Embarkation Agent at Dhubri, for information and transmission to the Superintendent of Emigration concerned, and the other (duplicate) should be delivered to the peon or sardar in charge of the batch for delivery to the contractor concerned, if a contractor's batch, or to the manager of the garden, if a sardar's batch.

SCHEDULE B.

Scale of provisions for emigrants in transit in steamers.

ARTICLES.	DAILY ALLOWANCE TO EACH EMIGRANT, Of and above 10 years of age.	DAILY ALLOWANCE TO EACH EMIGRANT, Between 2 and 10 years of age.	Mode of shipment in bulk.	REMARKS.
	Srs. c.	Srs. C.		
Rice	0 9½	0 4½	In bags	Quality to be that ordinarily eaten by labouring classes.
Arhar dal	0 2	0 1		
Flour	0 8	0 4	In barrels or bags ...	To be given to flour-eaters in lieu of rice.
Vegetables	0 3	0 1½	.....	Such as are ordinarily eaten by labouring classes and are obtainable in the markets.
Salt	0	0	In bags.	
Mustard oil (October to March) ..	0	0	In tin.	
Ditto (April to September)	0	0		
Condiments: Onions, and garlic	0	0	In bags, separately.	
Condiments: Tamarind ...	0	0		
Condiments: Coriander seed ...	0	0		
Condiments: Turmeric ...	0	0		
Condiments: Chillies	0	0		
Tobacco (for smoking)	0	.....		
Firewood	1 8	0 12	.....	Coal may be substituted for firewood in the ratio of one to two of wood.

N.B.—(*a*) *Rice* in the case of emigrants located in depôt, or marched to garden, or place of labour, should be increased to 12 and 6 chittacks respectively per emigrant; and *firewood*, in the case of emigrants conveyed to destination in boats, should be increased to 2 seers and one seer respectively per emigrant; but *tobacco* in the case of emigrants while located in depôt should be decreased to 3 chittack per emigrant of and above 10 years of age.

(*b*) The above scale should not be deviated from except under the orders and on the responsibility of the medical officer.

Bed-pans (for 100 persons and under) ...	2	Six yards bandage for 100 persons and under ...	2
To every additional hundred persons ...	1	For every additional hundred persons ...	2

Tow (country), a sufficient quantity, to be approved by the Medical Inspector.

c.—Scale of medical comforts for emigrants in transit.

ARTICLES.	Quantity.	Mode of shipment.	REMARKS.
Arrowroot	5 lbs. }	In tin	To be of ordinary quality but good and clean.
Sago	5 lbs. }		
Sugar	2½ lbs. } every per-	In wooden case.	
Liebig's extract of meat ...	3 lbs. }		
Rum	Nine pints } To 100 sons.	Bottles in wooden case	To be of good country manufacture.
Preserved milk	One tin to every 10 persons	In wooden case ..	One pound mixed with half a gallon of tepid water makes good milk for use with or without sago, &c., for infants, nursing mothers, or invalids. If under exceptional circumstances an extra quantity be needed, the Master may be required by the medical officer to supply it.
Feeding bottle	One to every four infants.		
Nipples	Four to each feeding bottle.		

SCHEDULE D.

a.—Scale of cooking utensils, &c., for emigrant vessels.

ARTICLES.	Quantity to every 100 persons calculated as in section 92 of the Act.	REMARKS.
Soap (Country)	100 balls.	
Boilers with covers (iron)	2	To be used on steamers only.
Rice pans (iron)	25	Ditto on boats only.
Ladles (iron)	2	
Spoons (iron)	2	
Rice drainers (iron)	1	
Soop (bamboo)	4	Ditto for cleaning rice.
Buckets and ropes	2	
Curry-stone with muller	1	
Knife	1	
Broom	1	
Scale and weights	1 set	Ditto generally.
Saucepans	2	Ditto for hospital purposes only.
Metal spoons	2	Ditto for hospital purposes only.
Hookahs	25	
Chillums	50	
Lanterns with wicks (Europe)	2	To be supplied to steamer. One extra lantern to be shipped for every additional 100 persons.
Ditto ditto (Country)	1	To be supplied to boats only.
Lamp oil	2 chittacks per lantern per night according to length of passage.	Extra oil to be supplied for at least one-fourth of the prescribed length of passage.

SCHEDULE E.

Scale of attendants for emigrants in transit.

ATTENDANTS.	Number to every 100 persons calculated as in section 92 of the Act.	REMARKS.
Sardárs	4	Accompanying emigrants to garden.
Peons	2	Appointed by contractors to proceed with emigrants.
Cooks	2	Provided by the master of the steamer, or in the case of boat despatches, by the contractor concerned.
Topasses	2	
Mehtranees	1	

Section 3.—Embarkation Agent.

Notice of readiness to embark emigrants.

102. Emigrants shall not be embarked unless everything is perfectly ready, and the vessel is prepared to start, of which timely notice shall be sent to the Embarkation Agent.

Presence of emigration officers at embarkation.

103. The Embarkation Agent, the Medical Inspector, the contractor concerned or his agent, the medical officer, and the peon or other person in charge of labourers, shall be present at every embarkation of emigrants. If the number to be embarked be small, a competent assistant may be deputed by the Embarkation Agent and the Medical Inspector to supervise the embarkation.

Stoppage of traffic during embarkation.

104. During embarkation, all traffic, unless carried on by means of a separate stage and gangway, and every kind of work interfering with embarkation, shall be stopped.

Tally of emigrants at embarkation.

105. Two men shall be stationed at the gangway, one to count and the other to keep a careful tally of the number of emigrants as they come on board, one by one, in answer to their names.

Examination of emigrants on board in bad weather.

106. The emigrants shall be mustered and examined under shelter on board, if the weather at the time of embarkation be unfavourable.

Identification of emigrants with their way-bills.

107. The emigrants, divided into batches under their peons and sirdars, shall be called on board by name, one at a time, and identified with those on the way-bills of the batches to be embarked.

Detention of sick emigrants.

108. Any emigrant taken ill and unfit to go shall be detained and sent to the hospital depôt, and such of his relatives and dependents, if any, as desire to remain, or where it is, for sufficient reason, deemed proper to retain, shall be detained.

Mustering of establishment on board.

109. When all are on board, the embarkation stage shall be removed, and the establishment of peons, sirdars, and topasses shall be mustered in order to see that they are present according to scale. Then all embarkation papers shall be carefully corrected, signed, and delivered; after which the vessel shall leave as speedily as possible, the Embarkation Agent or his assistant remaining at the ghát till she starts.

110. As soon as possible after a vessel leaves, the Embarkation Agent shall forward, duly completed up to date of embarkation, the copies of the way-bills of the despatched batches to the Labour District Officer and to the Superintendent of Emigration respectively for information. The Embarkation Agent shall also forward a deferred telegram to each head-quarter station of a district or sub-division, within whose jurisdiction any emigrants are to be disembarked, informing the Magistrate of the name of the steamer, name of the debarkation port, the number of emigrants to be landed there, and the names of gardens of destination.

Despatch of copies of way-bills to officers concerned.

Section 4.—Masters of vessels.

111. The master of any vessel intending to apply for a license to carry more than twenty emigrant passengers shall provide the permanent fittings as prescribed in the rules 81 to 101; and shall thereafter apply in writing to the Superintendent of Emigration, or other officer duly empowered by the local Government for an inspection of such fittings, and of the legal capacity of the deck space for the accommodation of such passengers.

Provision of fittings in licensed vessel.

112. The Superintendent or other officer shall thereupon examine the fittings; and, after satisfying himself that the requirements of the rules have been complied with, shall grant a certificate of approval in form (No. 29), specifying the number of emigrant passengers that the vessel may carry.

Superintendent's certificate of approval of fittings.

113. The master of any vessel intending to carry labourers as emigrant passengers under his license shall provide the following:—

Provision by master against carrying labourers.

(*a*) Stores, medicines, medical comforts, and cooking utensils in accordance with the requirements of Schedules B, C, and D.

(*b*) A medical officer licensed by the Medical Inspector or other officer so empowered.

(*c*) The establishment of attendants as prescribed in Schedule E.

114. On arrival at Goalundo, the master desiring a license shall make a written application to the Embarkation Agent, or other officer duly empowered by the local Government, and shall in such application state the following particulars:—

Master's application for license.

(*a*) Whether the terms for which the shipwrights and engineer surveyor's certificates were granted have expired, or will expire during the passage.

(*b*) Whether any accident to the vessel for which license is desired, or epidemic among the passengers, occurred during the previous trip.

(*c*) Whether the permanent fittings prescribed by the rules governing transport have been provided, and the requisite certificate of their approval obtained from the officer so authorized.

(*d*) Whether it is intended to carry labourers, and if so, whether the medical officer, the establishment of attendants, and the stores as prescribed in the rules and schedules have been provided.

(*e*) Whether the deck space intended for the accommodation of native passengers has been cleared of cargo; and the stores for labourers, if any, conveniently arranged for survey.

He shall at the same time be prepared for survey by clearing the whole or such portion of the deck space as may be intended for the accommodation of emigrant passengers; and, if labourers are to be carried, by having the prescribed provisions and other stores arranged conveniently for examination.

115. The Embarkation Agent or other officer as aforesaid, on receipt of the application for license, shall, in consultation with the Medical Inspector, hold the survey of the vessel's fittings and available space; and, if labourers are to be carried, of the requisite stores, at which both master and medical officer are to be present. The certificate of approval granted under Rule 80 shall be produced by the master at such survey; and the Embarkation Agent or other officer as aforesaid shall accept the permanent fittings as therein described, on satisfying himself that they have not since been altered or damaged. He shall also, in the event of the entire deck space being reserved for emigrant passengers, accept and enter in the prescribed form of license (form No. 30 or 31), which he may in his discretion grant to the master, the number such space is stated in the certificate to be capable of accommodating; but if only a part of such space be reserved, he shall, after ascertaining the number that may be accommodated therein, specify in the license such number only.

Survey of vessel's fittings and stores.

116. A special examination shall invariably be made by the Medical Inspector of any vessel in which much sickness has occurred on the voyage immediately preceding; and the license applied for by the master shall not be granted unless the master carries out such measures of cleaning, disinfecting, deck-caulking, &c., as the Medical Inspector may think

Special examination of unhealthy vessels.

necessary. If a vessel is found to be recurringly unhealthy for emigrants after material alterations and improvements have been made in her accommodation, a license shall be refused her.

Grant of licenses on approval of arrangements.

117. After everything has been examined and approved, the master and the medical officer shall sign the prescribed provision and medical store lists and final landing statements (forms Nos. 32, 33, and 34 respectively), and when the Embarkation Agent is satisfied that all is correct, and that the master of the steamer has a copy of the Act and Rules, he shall license the vessel.

Location of all passengers on the same deck.

118. Free emigrants and passengers other than labourers may be accommodated on board the same vessel with labourers, and on the same deck, provided that the total number under conveyance does not exceed the maximum number specified in the license: but such passengers shall on *no consideration* be permitted to locate themselves within the spaces specially allotted for the use of emigrant passengers proceeding under the Act.

Exclusion of animals from the emigrants' deck.

119. Horses, pigs, and other animals shall not be allowed on the same deck with the emigrants. Vicious animals shall not be allowed on the same vessel with the emigrants.

Freedom of emigrants' deck from cargo.

120. Masters shall see that the deck space for emigrants is kept clear of cargo, &c., so long as emigrants are under conveyance, and that ladders, stages, &c., are safely secured and railed with a double railing.

Joint responsibilities of master and medical officer.

121. The master of an emigrant vessel and the medical officer in charge, whose professional training and capacity must be equal to that of an apothecary or Assistant Surgeon, shall conjointly be responsible for the care and good treatment of the emigrants during the passage. The medical officer shall strictly carry out the special instructions contained in the form (No. 35) delivered to him by the Embarkation Agent for his guidance.

Assistance of master to medical officer.

122. The medical officer shall insist upon the establishment specially entertained for attendance on the emigrants discharging their duties punctually and properly; and the master shall render all the assistance in his power to the medical officer, in order that he may maintain discipline on board, and conform strictly with all the requirements of the rules regulating transport.

Duties of establishment for emigrants.

123. Peons, garden-sardars, or other persons in charge of emigrants, shall obey the instructions of the master and the medical officer; and shall immediately report to them any neglect of duty or occurrence of disease, or accidents or disagreements affecting the emigrants. The master and the medical officer shall thoroughly investigate the matter under report as soon as possible thereafter.

Appointment of watchers for hospital.

124. Peons and sardars shall have their day and night duties fairly divided and clearly defined. When there are sick emigrants in hospital, peons, sardars, and topasses shall be deputed to hospital duty, so that the sick may constantly be cared for; and the attendants on duty shall be regularly relieved by others in rotation. Careful night-nursing of the sick by the attendants shall be strictly insisted on, and looked to by the medical officer.

Destruction of objectionable articles found with emigrants.

125. As soon after the embarkation as possible, the emigrants shall be comfortably berthed, and their bundles searched for any indigestible food, grain, or old rags they may have contrived to take with them, all of which shall be thrown overboard. This precaution shall receive repeated attention throughout the passage.

Protection of emigrants against interference by crew.

126. The emigrants' deck space shall not be encroached upon in any way by either crew or passengers other than emigrants, nor shall they be permitted to interfere with the emigrants. The topasses shall sweep the decks morning and evening and after every meal, and shall keep them always clean and dry.

Cleaning of emigrants' deck.

127. The decks shall be cleaned by the emigrants daily; but shall be washed only when weather, time, and other circumstances permit, the emigrants being landed or accommodated on another deck till their deck is thoroughly dry.

Disinfection of latrines.

128. The latrines shall be constantly cleaned and disinfected, and occasionally fumigated. Attention shall also be paid to the cleanliness and disinfection of the bed-pans when in use.

Promotion of ventilation of emigrants' deck.

129. Whenever the weather permits, the side curtains shall be raised to admit of free perflation of air, and under all circumstances thorough ventilation shall be promoted by every available means.

Disposal of emigrants' blankets.

130. The emigrants on rising in the morning shall, after well shaking them, fold and sling their blankets out of the way.

Daily mustering of emigrants.

131. The emigrants shall be mustered every morning, and examined by the medical officer. Those who are well shall, weather permitting, bathe daily, and wash their clothes at least twice a week.

Airing of emigrants' clothing.

132. Emigrants' clothes, mats, and blankets shall be aired and put in the sun as often as possible, especially after damp weather.

133. Rations shall be issued daily by the medical officer according to the scale prescribed in schedule B, and sufficiently early to admit of the food being prepared for distribution punctually at 9 o'clock in the forenoon and 4 o'clock in the afternoon; and all such issues, as well as those of medical comforts, shall immediately thereafter be entered by such officer in the prescribed provision and other lists, and certified by him and the master concerned. Boiling rice in bad water shall not be permitted; and when the food is ready, the medical officer shall invariably satisfy himself as to its being properly cooked, and shall see that it is fairly distributed. Stale food shall not be kept by either cooks or emigrants; and all utensils shall be cleaned out and shewn to the medical officer after each meal. Motherless infants and invalids shall have suitable and freshly prepared food (milk, soup, sago, &c.) ordered for them every three or four hours.

Attention to emigrants' food by medical officer.

134. In the event of any pilfering of stores being detected, immediate enquiry shall be made by the medical officer and master, and the offender prosecuted at the first convenient station arrived at thereafter.

Prosecution for theft of stores.

135. A constant supply of good drinking water shall be kept up in the tanks. These shall be used alternately, the water in each being allowed to settle after the addition of alum in the proportion of six grains to the gallon; and every effort shall be made to prevent emigrants from drinking the river water fresh drawn from the side of the vessel. The water shall be pumped directly into the tanks from the river in mid-stream, and clear from all possible risk of pollution from the latrine, &c.

Drinking water for emigrants.

136. Emigrants on board steamers and flats shall not be allowed to draw water from the river over the sides of the vessels, and thereby to incur the risk of accidents.

Protection against emigrants drawing river water.

137. The master of every steamer towing a flat and the medical officer in charge shall strictly prohibit all emigrants or other native passengers from crossing over from one vessel to another; and, with this object in view, shall not permit communicating stages between the vessels to be placed where they favour ready intercourse. Any communicating stages that may be absolutely necessary for the use of the officers and crew shall be constantly watched, in order to prevent accidents and the spread of disease.

Prevention of passengers from crossing over to another vessel.

138. The emigrant passengers as a rule shall not be required to labour during the passage, but in exceptional cases of urgent necessity only such of them as are considered by the medical officer to be well fitted for work may be employed, provided that such work is free from extraordinary risk to life, and that the master supplies those so employed with extra rations at the rate of two and a half chittacks of rice and half a chittack of dâl for each man *per diem*. The emigrants should always be encouraged to occupy their time with reasonable amusements.

Engagement of labourers in work.

139. They shall be properly arranged at night, and prevented from crowding together: and padlocked lanterns shall burn all night in the dispensary, and near latrines and gangways.

Distribution of emigrants at night.

140. The master of every licensed vessel, on arrival at every place where a Magistrate is stationed, shall report to such Magistrate the number of passengers and crew on board, the general state of their health, and the number of deaths that occurred on the passage; and omission to do so shall entail prosecution or refusal of license to carry emigrants thereafter.

Intimation of vessel's arrival at each station to Magistrate.

141. The master or the medical officer shall place the way-bill (form No. 38) of the vessel received from any Emigration Agent before the inspecting officers at each station, in order that they may enter their remarks on the several points indicated in such way-bill.

Remarks in vessel's way-bill by inspecting officers.

142. The master and the medical officer shall furnish to inspecting officers all necessary information, and shall afford them every facility for the satisfactory discharge of their duties under the provisions of the Act and rules.

Facilities for inspection of vessels.

143. After the last official inspection at the place of final debarkation, the master or medical officer shall forward the vessel's way-bill, in original, together with the medical diary, cholera register, and issue lists of provisions and medical comforts relating to the emigrants embarked at Gealundo to the Emigration Agent at that place for his remarks, and for transmission to the Superintendent of Emigration, Calcutta, for submission of the way-bill with his remarks to the local Government.

Disposal of vessel's way-bill after last inspection.

144. Emigrants shall not be permitted by the master to land finally at any place excepting that named in the vessel's way-bill as their destination, save under circumstances of necessity provided for in the Act and rules.

Landing of emigrants as per vessel's way-bill.

145. The master of a licensed vessel at the close of every trip shall forward to the Emigration Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta a mortality return in the prescribed form (No. 39) shewing the deaths that occurred during the trip among the crew and passengers other than emigrants under the Act.

Report of mortality by master.

No. 35.

FORM OF INSTRUCTIONS TO MEDICAL OFFICER.

Instructions to medical officer proceeding in charge of labourers to labour-districts.

, in view of his appointment by , to proceed in medical charge of emigrants under conveyance to , per , is requested to strictly carry out the instructions hereto subjoined for his guidance.

DATED AT
The 188 .

Emborkation Agent.

INSTRUCTIONS.

The memorandum on the reverse should be accurately filled in for the information of the Emigration Department.

2. All the noteworthy events, occurrences, and incidents of the voyage should be duly reported to the officers who may visit the vessel for the purposes of inspection.

3. A journal recording accurately and briefly the daily occurrences of the voyage should be daily written up, and the initials of the master obtained at the close of each day, and those of the inspecting officers on the dates of their inspections. Such journal, together with the special cholera report, if any, a complete way-bill of the Goalundo and Dhubri shipments, and any other papers relating to the passage, should be posted under cover of a forwarding letter to the Embarkation Agent last concerned in the embarkation of the emigrants under conveyance for endorsement of any remarks he may desire to offer and for transmission, through any other Embarkation Agent concerned, to the Superintendent of Emigration at Calcutta.

4. The emigrants during the winter months should be made to wear their warm clothing, whenever the conditions of the weather render such a precaution necessary.

5. The effects of the emigrants under conveyance to the labour-districts should be searchingly examined under personal supervision after embarkation and at intervals during the voyage, and all improper articles of food and dirty rags found amongst them should be at once removed and destroyed.

6. Every care should be taken to secure the serving out of properly cooked food to the emigrants, and special and continuous attention should be paid to the regular and proper feeding of infants and children and the sick with milk and other suitable and nourishing diet. Strict attention should also be paid to the maintaining of a constant supply of good drinking water, as well as to the carrying out of the arrangements for the supply of water for bathing and washing purposes.

7. At the close of the voyage the debarkation officer should be requested to examine the quality of the stores supplied on the passage, and to countersign the provision and medical stores lists, if satisfied that the stores have been issued according to scale.

8. On the landing of emigrants at their destinations the medical officer should see that disembarkations are not effected at any but authorized landing-places, and should also carefully fill in health certificates and the abstract on the way bill of each batch.

9. When cholera or any other disease in an epidemic form breaks out, a special report should be prepared showing, if possible, the probable cause of such an occurrence. The prescribed register of cholera cases should be carefully filled in, and the medical diary should show the details of treatment of each case from day to day. Every precaution should be taken to prevent the spread of the disease, and its occurrence should be reported to the Magistrate of the first station arrived at thereafter.

10. Any emigrant attacked by small-pox on the passage should be landed at the first opportunity, unless there are strong reasons to the contrary.

Medical Officer.

Section 5. Medical Officers.

Keeping of medical diary and ordinary journal by medical officer.

146. Every medical officer proceeding in charge of emigrants shall keep a medical diary in the prescribed form (No. 37), as well as a journal of the principal events of the passage, and shall write them up daily and carefully. He shall, moreover, on arrival at every inspection station place the above documents before the inspecting officers for their initials against the latest entry. Every death shall be reported immediately to the master of the steamer, who, if there be no relatives on board entitled thereto, shall take over charge of any property or money left by the deceased, and shall deliver the same to the Magistrate at the next station, or at the last place of debarkation for disposal.

Liability of medical officers to dismissal.

147. Every medical officer proceeding in charge of emigrants shall, in case of misconduct or neglect of his duties, or of the requirements of the rules regulating transport, be liable to dismissal on the requisition of any Medical Inspector or other officer so empowered.

Regulation of change of diet by medical officer.

148. All extra food and any change in diet shall be regulated by the medical officer only on his own responsibility.

Utilization of deck of flat in case of epidemic

149. In the event of an epidemic of dangerously communicable disease occurring on the passage, the master, if required by the medical officer, shall give up the upper deck of an available flat for the better distribution of the emigrant passengers.

Treatment of sick emigrants.

150. Emigrants suffering from slight illness may be attended in their berths; but all serious cases shall be treated in hospital. Patients attacked by cholera or small-pox, or other dangerously communicable disease, with all that belongs to them, shall be instantly and thoroughly isolated from the healthy; and the family or batch in which such disease occurred shall be kept on another deck, or as far apart as possible from the rest of the emigrants without exciting alarm.

Measures of disinfection of deck.

151. Places originally occupied by emigrants removed on account of communicable disease shall be instantly cleaned, and the deck shall be thoroughly scraped and scrubbed with hot sand and disinfecting powder, and, if circumstances admit, fumigation with burning sulphur shall also be carried out.

Measures for prevention of an epidemic.

152. Besides the immediate isolation and treatment of the first case of dangerously communicable disease, every precaution shall be taken to prevent an epidemic, strict attention being paid to premonitory symptoms, general and personal cleanliness, careful disinfection and disposal of excreta, disinfection and destruction of infected articles, free ventilation, and care of the healthy. On the occurrence of cholera a register of the cases shall be kept in the prescribed form (No. 36).

Destruction of infected clothing.

153. All clothes, blankets, mats, &c., that have been in any way in contact with those suffering from serious communicable disease, or have been soiled, or are suspected of infection or impurity, shall be burnt on shore in the presence of the medical officer, who should take special care to have them burnt invariably to leeward; or thrown overboard, whenever burning is impracticable.

No. 36.

FORM OF CHOLERA REGISTER.

Register of Cholera cases on board the , left on the 188 .

1	2	3	4	5	6	7	8	9	10	11						12	13	14		15	16	17
										WHETHER SYMPTOMS NOTED BELOW WERE PRESENT, AND WHICH MORE MARKED THAN OTHERS.								LANDED ILL.				
Serial number of the case.	Number of batch in vessel's way-bill.	Name of patient.	Age.	Sex.	Native place or district.	If related to any previous patient on register, and what relation.	Date and hour of attack.	How many days or hours after embarkation.	Whether suddenly attacked, or after previous, and what disease.	Premonitory diarrhœa and its duration in days and hours.	Vomiting and purging.	Cramps.	Collapse.	Suppression of urine.	Reaction and secondary fever.	Date and hour when brought under treatment.	Date of recovery.	Date.	Cause.	Date of death.	Remarks.	Signature and remarks of Civil Surgeon at stations en route.

N.B.—Particular care should be taken to ascertain, firstly, whether any cholera had occurred among the batch on its way to the place of embarkation, or while in the embarkation depôts: and if so, what interval of time had elapsed between the occurrence of such a case and the date of embarkation: and, secondly, whether any and what connection is traceable between the first case and those that occurred subsequently on board the vessel. The information obtained should be recorded in the column of remarks, and if should also be noted on which vessel the disease first broke out, and what was done to segregate the patients.

MEMORANDUM.

Dated at *the* *of* 18

To

In furnishing you with the above form, the undersigned invites your careful attention to the following instructi which must be strictly complied with.

Embarkation Agent.

INSTRUCTIONS.

(*a*.)—Masters of steamers and manjees in charge of boats are particularly warned against omitting to report their arrival at each inspecting station to the senior magisterial officer and to the civil medical officer. Omission to do so will entail prosecution, or deprivation of license for the future.

(*b*.)—The master or medical officer should place this form before the inspecting officers at each station, in order that they may enter their replies against the several questions therein.

(*c*.)—At the end of the voyage after the last inspection at the place of final disembarkation, the master or medical officer must forward this way-bill to the Embarkation Agent at the last place of embarkation for his remarks, and for transmission to any other Embarkation Agent concerned in the shipment for his remarks, and for ultimate submission to the Local Government through the Superintendent of Emigration concerned.

Results of inspection.

Questions.	Dhubri.	Gauhati.	Tezpur.	Dibrughur.
1. *Deck space.* (*a*) Whether the number of passengers exceeded that entered in the master's license; and if so, by how many? (*b*) Whether there was any apparent overcrowding, or whether the accommodation in this respect seemed sufficient?				
2. *State of Decks.* Whether the decks were thoroughly clean? If found to be foul, what orders were passed for their purification, and whether detention of the vessel was necessary?				
3. *Personal cleanliness of the Emigrants.* Whether the emigrants were fairly clean and free from offensive smell? If particularly dirty, what orders were passed, and whether detention of vessel was necessary on this account?				
4. *Water-supply for drinking purposes.* (*a*) How and when were the water-tanks last filled? (*b*) Had they enough water in them? (*c*) Whether the water was clean or muddy? (*d*) Whether the taps were sufficient in number, simple in construction, and in good working order? (*e*) Whether the lids were fastened down so as to prevent access to the water?				
5. *Water-supply for ablution purposes.* (*a*) What facilities were there for personal ablution, washing of clothes, pots and pans, &c.? (*b*) Whether the structural arrangements for the supply of ablution water were sufficient for the number of emigrants on board? (*c*) Whether these arrangements were in good working order? (*d*) Whether an abundant supply of ablution water had been provided on the passage?				
6. *Latrines.* (*a*) Whether the latrine accommodation was sufficient? (*b*) Whether the latrines were clean and free from offensive smell?				
7. *Hospital.* (*a*) Whether the hospital accommodation was good and sufficient? (*b*) Whether the hospital was clean and free from offensive smell? (*c*) How many patients were under treatment, and for what diseases?				
8. *Ventilation.* Whether there was sufficient ventilation for the decks, and whether ventilation is provided for at night when the purdahs are dropped?				
9. *Clothing.* Whether the emigrants had the prescribed amount and description of clothing?				
10. *Food.* Whether the food was of proper quality? Whether any complaints were made? Whether medical officer in charge sees that the food is properly cooked? If opportunity offered of seeing cooked food, whether it was found properly cooked?				
11. *Medical Stores.* Whether the issue register of medical stores was duly written up? and whether in comparison with register of patients under treatment, the issue seemed adequate?				
12. *Medical Diary.* Whether the medical diary was duly written up to date?				
13. *Mortality.* What number of deaths had occurred since leaving the last station, among adult and non-adult emigrants, and from what causes?	Causes of death. / Adults. / Infants and children. Cholera ... Other causes	Causes of death. / Adults. / Infants and children. Cholera ... Other causes	Causes of death. / Adults. / Infants and children. Cholera ... Other causes	Causes of death. / Adults. / Infants and children. Cholera ... Other causes
14. *Epidemics.* If any epidemic was prevalent on board, whether any special measures had been called for under sections 102 and 103 of Act I of 1882?				
15. *General observations on subjects not noticed above.*				
Signature of inspecting officer, and date and hour of inspection.

FORM OF MORTALITY RETURN.

Statement of mortality among the crew and passengers other than emigrants entered in way-bill on board the , trip number commencing from 188 .

Date of death.	Name.	Sex.	Age.	Religion.	Occupation.	Date of embarkation.	Cause of death.	REMARKS.

N.B.—This return should be forwarded by the Master at the close of the trip to the Embarkation Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta.

No.

Forwarded to the Superintendent of Emigration for information.

DATED AT

The 188

Master.

Section 6—Country boats.

Appointment of head manjee.

154. When emigrants are to be conveyed to any labour district in boats, an intelligent head manjee shall be selected by common consent of the others, and appointed by the Embarkation Agent to exercise general control over them in keeping the boats together, preserving order, and assisting the medical officer or other persons in charge during the passage. The appointment of a head manjee, however, shall not lessen the responsibility of each individual manjee. Under the law each one shall be personally liable for every offence or neglect of duty.

Appointment of medical officer when emigrants exceed fifty souls.

155. If the number under conveyance in a fleet of boats exceeds fifty emigrants, the despatchers of such emigrants shall conjointly provide a medical officer—duly licensed by the Medical Inspector or other officer so empowered—to take charge of the boats, and to supply the medicines that may be required for the treatment of the sick during the passage.

Observance of rules for steamers when applicable to boats

156. A medical officer or other person proceeding in charge of emigrants in boats shall be guided by the rules relating to steamers, so far as they are applicable to boats.

Samples of emigrants' stores for examination.

157. In the case of boat despatches, the contractor or his agent shall place samples of the stores intended for the emigrants before the Embarkation Agent in time to admit of his examining and approving of them prior to holding the final survey of stores on board.

Grant of license after approval of arrangements

158. After everything required under the Act and Rules has been approved, the manjee and the medical officer or other person in charge shall sign the provision lists; and when the Embarkation Agent is satisfied that every requirement has been met, and that the head manjee in charge of the flotilla has a copy of the Act and Rules, he shall license the boats.

Description of boats for emigrants.

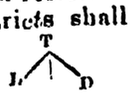
159. Boats for the conveyance of emigrants shall be of uniformly moderate size, and strong and water-tight, and shall be provided with side windows having moveable jhamps. The machan or plank decks, masts, sails, oars, rudders, and all other requisites for the efficient management of boats shall be in thoroughly serviceable order; and all bamboo machan decks shall be matted.

Increase of roof for additional accommodation not ordinarily allowable.

160. No temporary addition to the size of the roof shall be allowed as a plea for carrying more persons than the boat was originally intended to accommodate, unless there be ample space, and the additional accommodation is in every respect satisfactory.

Hospital boat.

161. A moderate-sized boat shall be selected for a hospital; but if it be insufficient to provide the prescribed hospital space, two or more similar sized boats according to requirement shall be selected in preference to a large one for facility of movement. They shall be particularly well ventilated, fitted with plank decks, and subject to the same general conditions as the rest of the boats. Emigrants' stores of whatever kind shall on no account be placed in any hospital boat, which shall be distinguished from the passenger boats by a red flag prominently placed.



Medical officer's boat.

162. A small and swift boat shall be provided for the medical officer in charge and medical stores. The medical officer shall always be near the hospital boat, and a call for him from any passenger boat shall be signalled by the waving of a white cloth. The Embarkation Agent shall see that simple means of rapid communication are understood by all before they start.

Boats for emigrants' stores.

163. The strongest and driest boats, lined with dunnage, shall be selected for the conveyance of the stores for emigrants, and the manjees of the boats shall be held responsible for the proper care of such stores.

Marking of boats passed for emigrants.

164. All boats approved for the transport of emigrants to the labour districts shall be marked and numbered (stencilled in paint) thus:— 

on the bow, stern, or other prominent part, and the mark and number shall invariably be entered in each boat's license.

Lanterns.

165. Each boat shall be provided with a strong and serviceable lantern.

Report of accidents to boats to nearest Magistrate.

166. In the event of any of the boats being disabled by accident, the medical officer or other person in charge shall report such accident, or any other untoward circumstance, to the Magistrate at the nearest civil station, so that remedial measures may be taken and assistance rendered as soon as possible.

Control of boats by medical officer.

167. The medical officer shall endeavour to keep the boats forming the flotilla together, and shall keep the hospital boat following the fleet. He shall take care that the boats are not changed, and that the hospital boat is used only for the purpose intended.

Measures on outbreak of dangerously communicable disease.

168. In the event of seriously communicable disease occurring on the passage, the sick shall be removed to the hospital boat and the healthy shall be landed and made to bathe and wash their clothes, while the boat including its bilge is being thoroughly cleaned and disinfected. The emigrants shall not be allowed to re-enter their boat till everything is clean and dry about them.

General supervision by medical officer.

169. Besides constant attention to the sick, the medical officer shall see that the boats and their bilges are kept clean; that the emigrants are generally clean and well cared for; that foul or infected villages

or places are avoided, and that at night the boats are not fastened to any defiled or unwholesome bank.

Disposal of surplus stores.

170. The surplus of emigrants' stores on board of boats shall at the end of the passage, or after the emigrants for whom they were shipped have been landed, be made over under certificates of delivery to the agents appointed by the contractors to dispose of such surplus. But this shall be done only after such stores have been examined by the inspecting officers, and checked by means of the provision issue statement filled in by the medical officer or other person in charge on the passage, and certificates to this effect shall be signed by the medical officer or other person in charge and the Debarkation Officer. The medical officer or other person in charge shall not take part in the sale of surplus stores, nor have any interest whatever in the proceeds of such sales, or in the transmission of such proceeds to the contractors concerned. Any infringement of this rule by the medical officer or other person in charge shall render him liable to dismissal and non-employment thereafter.

Forms for use in the Chittagong District and Chittagong Hill Tracts under Chapter VI of the Inland Emigration Act I of 1882.

No. 1.

EMPLOYER'S FORM.

Register (A) of Imported labourers on contract, under section 32 *or* 66 *of Act I of* 1882, *for the year* 188 .

Annual serial number	Name of labourer.	Father's name.	Age.	Sex.	Caste.	RESIDENCE.			Date of contract.	Period of contract.	Name of contractor, if labourer imported under section 32.	Name of garden-sirdar, if labourer imported under section 66.	Date of arrival at tea estate or place of labour.	Date of desertion.	Date of expiry of contract.	Period of service.	Reason of determination of contract.—(a) Death. (b) Cancellation for permanent unfitness, under section 122. (c) Cancellation for maltreatment, under section 140. (d) Cancellation for desertion, under section 177. (e) Redemption of contract, under section 142. (f) Expiry of contract, under section 141.	DEPENDENTS.				Date of death.	REMARKS.
						Native district.	Thana.	Village.										Name of	Age of	Sex of	Date of transfer from minor to adult, or from infant to minor.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24

REMARKS.—*Column* 3.—"Father's name" helps towards indentification.
Columns 12 and 13.—Name of contractor or garden-sirdar would be useful in connection with enquiries.
Column 14.—"Or place of labour" provides for cases where labourers are employed by others than managers of tea gardens.
Column 17.—"Period of service" would be preferable to column 13 of Assam form, as shewing whether the period of contract was completed or exceeded, or fell short of it by any of the contingencies stated in column 17.
Columns 19 to 23.—It would be preferable to enter the dependents of each class of labourers in the register of the class to which they belong.

No. 2.

EMPLOYER'S FORM.

Register (B) of locally-engaged labourers on contract, under section 111 *or* 112 *of Act I of* 1882, *for the year* 188 .

Annual serial number.	Name of labourer.	Father's name.	Age.	Sex.	Caste.	Residence.			Whether newly imported (N).	Or previously settled in the province (P).	Date of contract.	Period of contract.	Whether contract executed independently (I) under section 111.	Or executed before Magistrate (M) under section 112.	Date of arrival at tea estate or place of labour.	Date of desertion.	Date of expiry of contract	Period of service.	Reason of determination of contract:— (*a*) Death. (*b*) Cancellation for permanent unfitness, under section 122. (*c*) Cancellation for maltreatment, under section 140. (*d*) Cancellation for desertion, under section 177. (*e*) Redemption of contract, under section 142. (*f*) Expiry of contract, under section 141. (*g*) Unwillingness, under section 111.	Dependents.					Remarks.
						Native district.	Thana.	Village.												Name of	Age of	Sex of	Date of transfer from minor to adult, or from infant to minor.	Date of death.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26

REMARKS.—This form is based on form No. 1, and differs only in distinguishing the mode of recruitment of the two classes of local labourers.
Columns 21 *to* 25.—The dependents should be entered in the same register as the labourers on whom dependent.

No. 3.

EMPLOYER'S FORM.

Register (C) of free labourers, not on contract, under Act I of 1882, *for the year* 188 .

Annual serial number.	Name of labourer.	Father's name.	Age.	Sex.	Caste.	RESIDENCE.			Whether newly imported (N).	Or previously settled in the province (P).	Date of arrival at tea estate or place of labour.	Date of removal from tea estate or place of labour.	Date of death.	Date of desertion.	DEPENDENTS.					REMARKS.
						Native district.	Thana.	Village.							Name of	Age of	Sex of	Date of transfer from minor to adult, or from infant to minor.	Date of death.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21

REMARKS.—*Columns* 10 *and* 11.—This information would help to determine the number of free labourers sent for annually, and their proportion to contract labourers imported under the Act.
Columns 16 *to* 19.—Particulars of dependents should be entered in the same register as the class of labourers on whom dependent.

No. 4.

EMPLOYER'S FORM.

Register (D) of births, among all classes of labourers, for the year 188 .

Annual serial number.	Date of birth.	Name of infant.	Sex.	MOTHER.						REMARKS.
				Name of	Birth-place of	Date of arrival in the province of	Whether belonging to the imported Act I of 1882 labourer class (Register A).	Or to the locally-engaged labourer class (Register B).	Or to the free-labourer class (Register C).	
1	2	3	4	5	6	7	8	9	10	11

REMARKS.—*Column* 3.—Infant's name may be usefully recorded.
Columns 8 *to* 10.—The classes of labourers among whom the births take place should be noted for statistical purposes.

No. 5.

EMPLOYER'S FORM.

Register (E) of sick, among all classes of labourers, for the year 188 .

Annual serial number.	Date of commencement of treatment.	Name of patient.	Age.	Sex.	Disease.	Treatment.	Date of discharge.	Particulars of discharge.	Date of death.	REMARKS.
1	2	3	4	5	6	7	8	9	10	11

N. B.—All in-door patients and all persons who are certified by the Medical Officer to be too sick to labour, should be entered in this register.

REMARKS.—A column of "Date of death" is obviously needful.

No. 6.

EMPLOYER'S FORM.

Register (F) of deaths, among all classes of labourers, for the year 188 .

Annual serial number.	Date of death.	Name of deceased.	Age.	Sex.	Birth-place.	MOTHER OF DECEASED, IF A CHILD UNDER 16 YEARS.		Date of arrival in the the province.	Cause of death.	Whether labourer or dependent.	Whether belonged to the imported Act I of 1882 labourer class (Register A).	Or to the locally-engaged labourer class (Register B).	Or to the free-labourer class (Register C).	REMARKS.
						Name of.	Birth-place of.							
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

REMARKS.—The Assam forms 5, 6, and 7 have been amalgamated, in order to avoid a multiplicity of death registers.

No. 7.

EMPLOYER'S FORM.

Register (G) of vaccinations, among all classes of labourers, for the year 188 .

Annual serial number.	Date of vaccination.	Name of person vaccinated.	Age.	Sex.	RESULT OF VACCINATION.			RESULT OF RE-VACCINATION, IF BEFORE VACCINATED.			REMARKS.
					Successful.	Doubtful.	Unsuccessful.	Successful.	Doubtful.	Unsuccessful.	
1	2	3	4	5	6	7	8	9	10	11	12

REMARKS.—This form is nearly the same as the Assam form.

No. 8.

EMPLOYER'S FORM.

Register (H) of daily attendance and wage of labourers for the month of——————188 .

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 3rd December 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, if no valid objections be raised within one month from this date, to approve of the following rules to regulate the account of expenditure on drainage schemes sanctioned under Act VI (B.C.) of 1880 :—

Rules for the account of Expenditure on Drainage Schemes sanctioned under Act VI (B.C.) of 1880.

1. In the following rules the word "scheme" means any project or portion of a project sanctioned by the Government under section 54 of the Act as a separate scheme.

2. Expenditure on any scheme for the drainage and improvement of any tract of land under Act VI (B.C.) of 1880 will be incurred on estimates adopted by the Commissioners appointed under the Act and sanctioned by Government.

3. The expenditure will be incurred partly by the Public Works Department and partly by the Civil Department. The expenditure in the Civil Department will be in respect of compensation for lands taken for the purposes of the Act, and for damage inflicted in carrying out the scheme, salaries of officers, servants and establishments, and cost of surveys and valuations (other than those made by officers of the Public Works Department), whether antecedent or subsequent to the preparation of the scheme and plans.

4. On the vouchers on which such expenditure is incurred it will be distinctly stated for what particular scheme the payments are made, and no voucher shall be paid at the treasury unless it is first passed by the Collector of the district as a charge to a particular scheme under the Act.

5. The expenditure will be passed by the Accountant-General to charge of a special advance head to be opened for each scheme upon his accounts, and an account of all the transactions under each such account (opening and closing with a balance) will be forwarded by him to the Collector at the end of each quarter for communication to the Commissioners. The account should be made up in such detail as to show the *general* nature of the expenditure included in it, such as "surveys," "compensation for land," "payment of drainage," &c.

6. The accounts of expenditure in the Public Works Department will similarly be kept separately for each "scheme," the charges being in the first place passed to debit of a special advance head to be opened upon the books of the Examiner.

7. A quarterly account of the expenditure so charged will be prepared by the Examiner, and by him transmitted to the Accountant-General for communication to the Collector and the Commissioners. This account will show the general nature of the expenditure only, such as "establishments," "works," "stores" or any other similar particulars.

8. At the final closing of the account of each year, but not till then, the total charge upon the Examiner's books will be transferred to those of the Accountant-General, which will then show, under a separate advance account for each scheme, the total expenditure in each year, both in the Civil and in the Public Works Department.

9. At the end of each quarter, until the work is finally completed, the officer in charge of the works will, as required by section 27, make a detailed report to the Drainage Commissioners, through the Collector, of the progress of the works and the expenditure thereupon, so far as known to him, from the date to which the next preceding report has been brought down.

10. The quarterly account received from the Accountant-General by the Commissioners will be received as the statement of the accounts of Government in respect of each scheme. They will, on receipt, be examined by the Commissioners against the register of sanctioned charges (for Civil Department), and be compared with the quarterly report of the officer in charge of the works (for Public Works Department). The Commissioners will report to the Accountant-General objections they may have to raise to the accounts whether in respect of their completeness in point of the detail required for their purposes or in respect of their accuracy.

11. It shall be the duty of the Accountant-General to meet such criticisms, as far as consistent with the facts, by adjustments which will appear in the succeeding quarterly accounts. But the Accountant-General is the final authority in respect of the correctness of the account.

12. A copy of the certificate of completion of work required by section 28 of the Act will be sent by the officer in charge of the work to the Accountant-General, who will thereupon calculate the interest due up to date of completion, and add it to the total cost charged in his books to the advance head, for recovery from the persons concerned.

13. The interest shall be made up by reckoning for interest the total of the net expenditure shown in each quarterly account from the end of the quarter to which it appertains.

14. A complete account will now be made up by the Accountant-General in such detail as the Drainage Commissioners may require, but not in greater detail than that of the quarterly account. This complete account shows the total recoverable under the Act.

15. The Accountant-General will at the same time draw up a statement, agreeing with the above, showing the quarterly totals in the following form :—

QUARTER ENDING.	AMOUNT OF EXPENDITURE.			Amount of interest till (a specified date.)
	Civil.	Public Works.	Total.	

The complete account, together with this statement, will be communicated by the Accountant-General to the Collector for communication to the Commissioners, and will be subscribed by the Accountant-General as a certificate under section 27 of the Act.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]
NOTIFICATION.

The 4th December 1883.—The following Notice to Mariners is published for general information.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 53).

AFRICA—EAST COAST.

RED SEA—COAST OF ABYSSINIA.

Shoal off Ras Dumeirah.

NOTICE is hereby given that a dangerous shoal patch has been discovered lying about five miles north of Rás Dumeirah, and about 30 miles South-West of Mokha in the Red Sea.

This danger was reported by the master of the S. S. *Helmsley*, which vessel struck on it on the 16th October last, whilst on her passage to Bombay.

The *shoal* consists of sand about 530 feet long, and has a depth of about 18 feet on it at low water spring tides.

Position as given :—Latitude 12°56′ N. Longitude 43°0.′ E.

By direction of the Government of Bengal,
J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 27th November* 1883

[Second Publication.]
NOTIFICATION.

The 26th November 1883.—In exercise of the powers conferred on him by Act XII of 1875 (The Indian Ports Act), the Lieutenant-Governor sanctions the addition of the following rules to the Rules for the Port of Calcutta, published in the *Calcutta Gazette* of the 20th August 1879 :—

From the lower boundary of the Port to Tuitah Reach on the river Hooghly a deep navigable channel not less than 200 yards in width, shall always be left clear for the passage of sea-going vessels, and between the hours from daylight to dark no fisherman shall obstruct the same by mooring or casting a stake-net therein. At Saukrail, Peer Sarang, and below Budge-Budge, where the deep water channel lies close to the shore, land-marks have been erected to define the channel to be left clear, and no fishing boats shall be moored, nor nets of any description cast, between the line indicated by these marks and the shore.

Between the hours from daylight to dark no stake net nor drift-net shall be cast by fishermen in any part of Garden Reach within port limits.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

The 27th November 1883.—It is hereby notified for general information that the Lieutenant-Governor intends to submit to the Government of India for sanction the following application from the Commissioners of the Howrah Municipality for permission to raise a loan of Rs. 50,000, bearing interest at 5½ per cent. per annum, unless good reasons to the contrary be shown within one month from the date of the publication of this notification within the said municipality.

This application is published for general information under Rule 8 of the rules under the Local Authorities Loan Act, 1879.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 26th November 1883.—The following revised rules framed under the provisions of sections 130 and 133 of Act VIII of 1878 (the Sea Customs Act), to regulate the transhipment of goods at the ports of Calcutta and Chittagong, having been approved by His Excellency the Governor-General in Council, are published for g neral information, as required by section 201 of that Act. These rules will take effect from the 1st December 1883, and supersede those published in the *Calcutta Gazette* of the 30th March 1881 and the 26th October 1881 :—

1. Applications for the transhipment of free goods should be presented to the proper officer of Customs before 3 P.M., and such goods will be allowed transhipment under the pass issued, without any charge.

2. Applications for the transhipment of dutiable goods should be presented to the proper officer of Customs before 3 P.M. on the day prior to that on which the transhipment is required, accompanied by the fees payable under section 133 of the Act, on the following scale for the port of Calcutta :—

For each transhipment between the hours of 8 A M. and 5 P. M.—

		Rs.	A.	P.
On packages not exceeding 50 in number, each	...	0	4	0
On every ten or less than ten packages in excess of 50	...	1	0	0

3. When transhipments of dutiable goods are not completed before 5 P. M , an additional fee of Rs. 4 will be charged.

4. *Chittagong.*—The transhipment fees payable on dutiable goods are as follow :—

	Rs.	A.	P.	
For single packages ...	... 0	8	0	per package.
For goods in bulk ...	.. 6	4	0	per 100 maunds.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 15th November 1883.—The following Notice to Mariners is published for genera information.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 52).

INDIA—WEST COAST.

MALABAR COAST.

Baboo Harihar Charan Lall, Munsif of Lohardugga, in Chota Nagpore, is allowed leave for one month, under Section 127, Chapter X of the Civil Leave Code, in extension of the leave granted to him under the orders of the 14th November 1883.

Baboo Kali Krishna Chowdhry, Additional Munsif of Cuttack, on deputation at Pooree, returned to duty on the forenoon of the 1st October 1883.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

ERRATUM.

The 3rd December 1883.—In the notification of Government published in the *Calcutta Gazette* of the 28th ultimo, Part I, page 1037, appointing Moulvie Abdul Wali to be the Rural Sub-Registrar of Magurah, in the district of Jessore, *for* Magurah read Narail.

F. B. PEACOCK.
Secretary to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 16th November 1883.—It is hereby notified that the Rangers and Foresters in charge of the following revenue stations in the Sunderbuns Forest Division, viz :—

(1) Lower Bhola	(5) Sheepsah
(2) Upper Bhola	(6) Koyrah
(3) Pussur	(7) Cobaduk
(4) Bhuddur	(8) Isrcepore (Ishamuttee)

are authorized to pay, for the period of one year, with effect from 1st November 1883, an extra reward of Rs. 25 for each full-grown tiger, and of Rs. 10 for each tiger cub that can be proved to their satisfaction to have been shot or destroyed in any other way in the Sunderbuns reserved forests, in addition to the authorized rewards payable by district officers.

The skin and skull of each tiger and cub will be forwarded by the Ranger or Forester who disburses the extra reward to the district officer, with a report giving the name and residence, &c., of the person to whom the ordinary authorized reward is payable, and the locality in which the tiger or cub was destroyed, a copy of each such report being simultaneously despatched to the Divisional Forest Officer for information.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 17th November 1883.—It is hereby notified, under the provisions of section 15, Act V, of 1861, that whereas the villages of Ghagra, Chak Nazoo, Pan Ghagra and Chorkhae, within the jurisdiction of the Kotwali Police Station, in the district of Mymensingh, being still in a disturbed and dangerous state owing to the existence of disputes regarding the measurement of lands and collection of rents, the Lieutenant-Governor has sanctioned the retention for a further period of six months, from 17th November 1883, of a special police force of one head-constable and eight constables, to be quartered in the above-mentioned villages.

The cost of the force, as noted below, will be assessed on and levied from the proprietor and the inhabitants of the abovenamed villages by the Magistrate of the district in proportion to their respective means :—

	Rs.	A.	P.
One head-constable, third grade, at Rs. 15 per month ...	15	0	0
Four constables, third grade, at Rs. 7 each per month ...	28	0	0
Four constables, fourth grade, at Rs. 6 each per month ...	24	0	0
Pensionary charges at 2 annas per rupee	8	6	0
Contingent charges at Rs. 10 per cent.	7	9	0
Stationery	1	0	0
Oil for lighting	1	0	0
House rent at Rs. 10 per cent. per month	10	0	0
Total monthly cost ...	94	15	0
Total cost for six months ...	569	10	0
Cost of clothing at Rs. 4 per man per annum for six months	18	0	0
Total cost for six months ...	587	10	0

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT.—BENGAL.

Declaration.—No. 439.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose viz. for the extension of Batra cemetery, in the village of North Batra, pergunnah Khosalpur, zillah Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, 11 beegahs 10 cottahs 2 chittacks of standard measurement, bounded on the south by Jagutbullabhpur road ; on the east by a lane ; on the north by Ekrumooddee's tank's pahar, gardens of Jadu Chinea and Panchu Tandel, Hem Coondoo's land, Hori Dey's house, Hori Bacooley's land and tank and Gagon Ghose's land ; and on the west by Hem Coondoo's land, Hori Dey's land, Shourav Bewa's land, Nobin Das' land, Hori Bacooley's land, Gagon and Sham Ghose's land is required within the aforesaid village of north Batra.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. M. HEYWOOD, *Lieut.-Col.*, R.E.,
Offg. Joint-Secy. to the Govt of Bengal, P. W. D.

The 4th December 1883.

No. 440.—*Notification*—The Lieutenant-Governor of Bengal directs, under Section 63 of Act II (B.C.) of 1882, that an estimate shall be framed of the probable cost to be incurred in respect of the repairs, maintenance, and works connected therewith, of the Gunduck tuccavee embankment, in the district of Chumparun, for 20 years commencing from the 1st of April 1883. The embankment referred to above is 65 miles in length, comprising from 5½ to the 33rd mile and from 47 to 84½ miles of the existing tuccavee embankment.

No. 441.—*Notification.*—It is hereby notified for general information that the telegraph office at Hajeepur, on the Tirhoot State Railway, is opened for the receipt and despatch of public messages between the hours of 10 A.M. and 4 P.M.

No. 442.—*Leave.*—Mr. J. Ramsay, Executive Engineer, first grade, Nagpore Railway Surveys, is granted by the Secretary of State an extension of three months' leave on medical certificate, in continuation of the furlough granted him in Notification No. 231 of the 18th June 1883.

No. 443.—*Transfer.*—Mr. C. J. K. Watson, Executive Engineer, fourth grade (temporary rank), is transferred in the interests of the public service from the Mahanuddy to the Brahmini-Byturni Division.

No. 444.—*Reversions.*—The following reversions in the Engineer Establishment take effect from the date specified against each name :—

Names.	From	To	Date.
Mr. T. E. Curry ...	Executive Engineer, fourth grade (temporary rank).	Assistant Engineer, first grade	12th November 1883.
„ A. G. Bremner ...	Ditto ditto ...	Ditto ditto ...	19th „ „
„ Mr. J. P. Cleghorn ...	Ditto ditto ...	Ditto ditto ...	20th „ „
„ B. W. Cantopher ...	Ditto ditto ...	Ditto ditto ...	20th „ „
„ Mr. A. E. Behrmann...	Ditto ditto ...	Ditto ditto ...	22nd „ „

No. 445.—*Posting*—With reference to notification No. 403 of the 13th November 1883, Mr. A. E. Silk, Assistant Engineer, 2nd grade, is posted to the Mahanuddy Division, which he joined on the forenoon of the 24th idem.

No. 446.—*Posting*—With reference to notification No. 404, dated 13th November 1883, Mr. T. H. Clowes, Assistant Engineer, 2nd grade, is posted to the Brahmini-Byturni Division, which he joined on the afternoon of the 23rd idem.

RAILWAY.

The 4th December 1883.

No. 447.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is likely to be required to be taken by Government at the public expense for a public purpose, viz. for the construction of the Tirhoot State Railway extension from Jhanjarpur to Buloea Bazar, it is hereby declared that for the above purpose a strip of land measuring more or less 47¾ miles in length, with an average width of 181 feet, is likely to be required in the villages specified below in Durbhunga and Bhagulpore districts.

This declaration is made under the provisions of section 4 of Act X of 1870 to all whom it may concern.

Village.	Pergunnah.	District.	Village.	Pergunnah.	District.

Reserve of 1881-82 ...	4,282	
Supply from 1882-83 ...	21,068	
		25,350
Total ...		47,550

2. The dates on or about which the sales will be held, and the total quantity of opium as well as the respective quantities manufactured at the Patna and Ghazeepore factories, which will be brought forward for sale every month, are specified below. The Board of Revenue reserve to themselves the right of altering the dates should circumstances render it expedient to do so. In accordance with the notification of the Government of India, No. 1763, dated 30th June 1883, 2,000 chests of Patna and 2,450 chests of Benares opium will be sold monthly from January to

March 1884, and 1,800 chests of Patna and 2,000 chests of Benares opium will be sold every month from April to December 1884, both inclusive:—

On or about Monday, 3rd November ,, ...	1,800	2,000	3,800
On or about Tuesday, 2nd December ,, ..	1,800	2,000	3,800
Total ...	22,200	25,350	47,550

The following are the conditions of sale:—

1.—The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

2.—The opium will be ordinarily offered for sale at an upset price of Rs. 800 per chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by clause 13 of these Conditions of Sale. The bids must advance by Rs. 5 at a time.

3.—The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M.; but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or, if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale.

4.—Each lot shall contain five chests.

5.—A promissory note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such Promissory Notes shall be redeemed on the part of the purchasers at this Office by Bank of Bengal Receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M. in the afternoon of the fifth day after the sale provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

DEPOSIT.
When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest.
On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest.
On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.
And so on, Rs. 100 being added to the deposit for every bid additional, to the extent of Rs. 400.

6.—The said promissory notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

7.—The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M. if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8.—No tender of money, Bank of Bengal Receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the fifth day following the day of sale, will be afterwards accepted, provided always that money so subsequently tendered may be taken in payment of the said

Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. 5 and No. 6.

9.—The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10.—Purchasers taking out certificates or orders for the delivery of opium after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots, or of a different number of lots or chests, whether more or less, than the number of lots or chests originally required to be included in each certificate or order.

11.—No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12.—The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand tender at the time a deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these conditions.

13.—With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained; and the first *bonâ fide* bidder for a lot after it has been offered for sale in the mode here described shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

14.—The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether twenty-five lots, provided always that there remain a sufficient number of lots of the opium to complete the said twenty-five.

15.—In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16.—The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Board of Revenue:—No. 1, certificate of the opium advertised for sale; No. 2, report of the examination of such opium.

17. The public are hereby informed that in providing the investment of the opium manufactured at the Patna factory and the opium manufactured at the Ghazeepore factory for the year 1882-83, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug when packed at the Patna and Ghazeepore factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue.

18. The public are hereby informed that the opium manufactured at the Patna factory in season 1882-83 consists of opium made at consistences of 73°, 74°, and 75°, and that the opium manufactured at the Ghazeepore factory in the same season consists of opium made at consistences of 70°, and 75°. The consistence of the opium which will be sold each month will be mentioned in the sale notification of that month.

19. Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of

opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

20. It is hereby further notified that under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand that out of the quantities of opium manufactured at the Patna and Ghazeepore factories declared as above for sale at the twelve sales of the year 1884, there shall be delivered to them, at the average of the particular sale or sales to which the opium so applied for may belong, a quantity not exceeding in the aggregate 300 chests, and the Agents of the French Government must make requisition specifying the quantity of opium required by them at any particular sale within thirty days from the advertisement of such intended sale: provided, however, that the Agent of the French Government may make such requisition for the whole quantity within thirty days from the publication of this notification. If the Agent of the French Government shall not make the requisition for opium within the time above mentioned, the entire quantity of about 47,550 chests of opium manufactured at the Patna and Ghazeepore factories, as above estimated, will be brought to sale in the usual manner; and if they shall make application for a quantity of opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve sales above-mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the opium which the French authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing after the date fixed for payment, or by selling such opium, or any portion of it, at any subsequent monthly sale in addition to the quantity which in this advertisement is approximately mentioned as the quantity to be sold at such sale; or by selling such opium at a sale to be held expressly for the purpose.

	Chests.
Opium manufactured at the Patna Factory	22,200
Opium manufactured at the Ghazeepore Factory ...	25,350
Total ...	47,550

Article of the Convention above referred to.

"*Article VI.*—With regard to the trade in opium, it is agreed between the high contracting parties that at each of the periodical sales of that article there shall be reserved for the French Government, and delivered upon requisition duly made by the Agents of His Most Christian Majesty, or by the persons duly appointed by them, the number of chests so applied for, provided that such supply shall not exceed three hundred chests in each year, and the price for the same shall be determined by the average rate at which opium shall have been sold at every such periodical sale, it being understood that if the quantity of opium applied for at any one time shall not be taken on account of the French Government by the Agents of His Most Christian Majesty within the usual period of delivery, the quantity so applied for shall nevertheless be considered as so much in reduction of the three hundred chests hereinbefore mentioned. The requisitions for opium, as aforesaid, are to be addressed to the Governor-General at Calcutta within thirty days after notice of the intended sales shall have been published in the *Government Gazette*."

By order of the Board of Revenue, L.P.,
C. E. BUCKLAND,
Offg. Secretary.

FORT WILLIAM, *the 27th November* 1883.

No. 1306B.

NOTICE is hereby given that the First Sale of Opium, the Provision of 1881-82, will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Wednesday, the 2nd January 1884, at 11 A.M., and will comprise 4,450 chests, viz.—

	Chests.
Opium manufactured at the Patna Factory of 77° consistence ...	2,000
Opium manufactured at the Ghazeepore Factory consisting of 1 chest of 70°, 426 chests of 72°, 1,978 chests of 75°, and 45 tin-lined chests, of which 23 chests are of 75° and 22 chests of 72° ...	2,450
Total ...	4,450

2nd. The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 27th November 1883, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd. The latest dates for deposit and clearance will be the 7th and 17th January 1884, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the Sale-room will be received after 3-30 P.M. of Monday, the 7th January 1884, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Thursday, the 17th January 1884.

4th. In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazeepore Factories will be brought to sale in the ensuing year, about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates, should circumstances render it expedient to do so.

By order of the Board of Revenue, L. P.,
C. E. BUCKLAND, *Offg. Secretary.*

BOARD OF REVENUE, L.P., FORT WILLIAM, *the 27th November* 1883.

The Calcutta Gazette.

WEDNESDAY, DECEMBER 5, 1883.

PART IA.

Orders and Notifications by the Government of India, &c.

[*Reprinted from the Gazette of India.*]

The following orders, issued by the Government of India in the Home Department, are republished for general information.

F. B. PEACOCK,
Secy. to the Govt. of Bengal.

NOTIFICATIONS.—PUBLIC.

Calcutta, the 28th November 1883.

No. 1722.—With reference to paragraph 5 of Home Department Resolution Nos. 26—953 to 963, dated the 19th July 1883, it is hereby notified that the examination prescribed for the filling up of vacancies in the clerical establishments of the Secretariat Offices of the Government of India and the Departments directly attached thereto, will be held at Calcutta, in the Senate House of the Calcutta University, on Tuesday, the 15th January 1884, and following days The hours of examination will be from 10 A.M. to 1 P.M., and from 1-30 P.M. to 4-30 P M., daily.

The probable number of vacancies to be competed for is 4 in the Upper Division of Clerkships and 30 in the Lower Division. These figures represent the number of vacancies which may be expected to occur during the year 1884 in the two Divisions, respectively; but it is not possible to estimate with absolute accuracy the number of vacancies which will actually occur.

Candidates should pay the prescribed fees* into the nearest Treasury, and forward the Treasury receipt to the Secretary to the Board of Examiners. Candidates paying their fees in Calcutta should pay them into the Bank of Bengal.

	Rs
* For Upper Division ...	20
For Lower Division ...	10

Application for permission to appear at the examination should, as directed in the Home Department Resolution of 19th July last, be made to the Secretary to the Board of Examiners, Calcutta, between the 1st and 15th days of December next (inclusive).

The attention of intending candidates is called to paragraphs 7 and 8 of the Resolution of 19th July last prescribing the particulars and documents† which should accompany the application for permission to appear at the examination.

† (1) Evidence that the candidate is not less than 18 and not more than 24 years of age.

(2) A certificate that the candidate is of good moral character from the head of the institution in which he has last been educated, or (when a year or more has elapsed since his education terminated) from some respectable householder, to whom he is well known in private life, and who is himself personally known to the head of some Government Office—this last fact being certified by the countersignature of the officer in question.

ESTABLISHMENTS.

The 27th November 1883.

No. 232.—The services of Mr. J. Kennedy, B.C.S, are placed at the disposal of the Chief Commissioner of Assam.

JUDICIAL.

The 27th November 1883.

No. 1552.—The services of Mr. W. Macpherson, of the Bengal Civil Service, are replaced at the disposal of the Government of Bengal, with effect from the 17th instant.

No. 1554.—The Hon'ble C. D. Field, a Judge of the High Court of Judicature at Fort William in Bengal, resumed his seat on the Bench of the High Court on the forenoon of the 17th instant.

Mr. Field is granted subsidiary leave for four days, *viz.*, from the 13th to the 16th instant, both days inclusive.

No. 1557.—The Hon'ble C. J. Wilkinson, an Officiating Judge of the High Court of Judicature at Fort William in Bengal, has obtained privilege leave for three months, with effect from the 19th instant.

ECCLESIASTICAL.

The 28th November 1883.

No. 316.—Privilege leave for six weeks is granted to the Venerable B. T. Atlay, Officiating Archdeacon of Calcutta, with effect from the 15th ultimo, or from such subsequent date as he may have availed himself of it.

The 30th November 1883.

No. 322.—The services of the Rev. T. B. Speedy, B.A., Chaplain of Nowgong, Bundelcund, are placed at the disposal of the Government of Bengal, with effect from the date of giving over charge to the Reverend F. Horton, B.A.

A. MACKENZIE,
Secy. to the Govt. of India.

The following order, issued by the Government of India in the Department of Finance and Commerce, is republished for general information.

F. B. PEACOCK,
Secy. to the Govt. of Bengal.

NOTIFICATION.

Fort William, the 29th November 1883.

No. 1659.—The following addendum to the Codes of the Financial Department is published for general information :—

CODES OF THE FINANCIAL DEPARTMENT.

Definitions.

Page iii.

Insert the following under ACTIVE SERVICE :—

In the case of Engineers appointed from the Royal Indian Engineering College at Cooper's Hill who passed out of the College from the years 1878 to 1886, inclusive, Active Service includes also the whole period from date of appointment to the service to date of joining their appointments in India, provided they fulfil the conditions in regard to date of landing in India specified in Section 64 (*a*) of the Civil Pension Code.

[NOTE.—The exception in favour of officers of these years is made in consequence of an error in the letters of appointment and in the College prospectus which affected students of these years, as ruled in Secretary of State's Despatch No. 24, dated 26th April 1883.]

J. WESTLAND,
Offg. Secy. to the Govt. of India.

ECCLESIASTICAL.

The 30th November 1883.

The Venerable Brownlow Thomas Atlay, M.A., of St. John's College, Cambridge, has been appointed by the Lord Bishop of Calcutta Archdeacon in the Archdeaconry and Diocese of Calcutta, with effect from 15th September last.

A. B. MILLER,
Registrar of the Diocese.

Backergunge Collectorate, the 29th November 1883. J. KENNEDY, Covd. Dy Collr in charge.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned land situate in the district of Hazaribagh will be put up to sale at the Hazaribagh Collectorate on Saturday, the 5th January 1884, corresponding with 22nd Pus 1291 Fasli. The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The land to be sold revenue-free to the highest bidder above the upset price. The purchaser of this land will be considered as the proprietor of the land, and the entire proprietary right of Government in such land will be transferred to him.

2*nd*.—If the amount of purchase-money do not exceed Rs 100, the whole amount to be paid down at once.

3*rd*.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government and the land to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Name of village and pergunnah in which the land is situated.	Description of land.	Area.	Upset price.	REMARKS.
		A. R. P.	Rs.

Bogra, the 1st December 1883. (1716—2)

Notification.

IT is hereby notified for information of the public that a duplicate receipt for an amount exceeding Rs. 20 is liable to a stamp duty of one anna under Article 23 (*a*), Schedule I of Act I of 1879, and should, under section 16 of the Act, be stamped before or at the time of execution. If the duty payable on the duplicate receipt is denoted by an adhesive stamp, such stamp should be cancelled *so that it cannot be used again*. Any person signing a duplicate receipt when the amount exceeds Rs. 20 without the same being duly stamped, is liable to be criminally prosecuted under section 61, Act I of 1879, and punished with a fine which may extend to Rs. 500; and any person neglecting or omitting *to effectually cancel the adhesive stamp* and in payment of stamp duty renders himself liable to a fine which may extend to Rs. 100.

The attention of banking, mercantile, and trading community is especially drawn to the requirements of the law on this point.

G. M. GOODRICKE, Collector of Calcutta.

Calcutta Collectorate, the 13th September 1883.

Commissioners for making Improvements in the Port of Calcutta.

PAPER CURRENCY DEPARTMENT, the 4th Dec. 1883.

Notification.

THE annual Chutia Fair will be held at Chutia, near Ranchee, the head-quarters of the Chota Nagpore Division. It will commence on the 11th February 1884, and continue for about a fortnight.

RAI CHARAN GHOSE, Pers. Asst. to Commr.,
for Commr. of Chota Nagpore.

Commissioner's Office, Ranchee, the 13th November 1883.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine and can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanical Garden, Calcutta, *for cash only*, at the following rates:—per four ounce tin, *Rs.* 4 *ans.* 8; per eight ounce tin, *Rs.* 8 *ans.* 8; per pound tin, *Rs.* 16 *ans.* 8. The general public can be supplied by the Superintendent, Botanical Garden, *for cash only*, at the undernoted rates:—per four ounce tin, *Rs.* 5 *ans.* 8; per eight ounce tin, *Rs.* 10 *ans.* 8; per pound tin, *Rs.* 20. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage eight annas per 4 and 8 oz. tins, and twelve annas per pound tin, in addition to the foregoing rates.

Forest Department, Bengal.

SUNDERBUNS DIVISION.

Notice.

THIRTEEN pieces of teak planks are now lying at the Government Timber Depôt of Satorhog station.

Any person having claim upon the same is requested to come forward and prove his claim within two months from this date to the officer in charge of the depôt, or at the office of the undersigned, and after paying salvage, &c., upon the planks to remove the same.

No claims will be admitted after two months from this date, when the timber will be sold for the benefit of Government.

W. E. D'ARCY, Dy. Conservr. of Forests,
Sunderbuns Divn.

Dated Calcutta, the 30th November 1883.
No. 3, Hungerford Street.

Notice.

Oudh Forest Department.

BYRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHUND RAILWAY.

FROM this date the prices of sâl beams and scantlings supplied from this depôt will be as follows:—

BEAMS.—21 feet in length, at Rs. 2-10 per cubic foot.
22 ,, ,, 2-12 ,,
23 ,, ,, 2-14 ,,
24 ,, ,, 3 ,,

Above the lengths given two annas per foot run will be charged.

Any inches over the foot will be charged as a foot.

SCANTLINGS.—From 12 to 20 feet, at Rs. 2-8 per c. ft.
Under 12 and over 7, at ,, 2-4 ,,
Under 7 feet, at ,, 2 ,,

The above prices are for ordinary building purposes.

For *Planking*, *Sleepers*, &c., special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

Second and Third Class Timber will be sold and price fixed by agreement.

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, Oudh Circle.

KANHYA LAL, in charge Byramghat Depôt.

The 22nd May 1879.

Notice.

PRIYANATH CHATTERJI, B.L., intends to apply for enrolment as Vakil, High Court, Calcutta.

(1659—4)

Notice.

I HAVE admitted Mr. Raoul Quillet as partner in my firm from the 1st instant, and the name and style of the said firm will be Th. O'Toole & Co. from this day.

TH. O'TOOLE.

The 15th November 1883. (1663—3)

WE beg to notify that the partnership hitherto existing between Mr. Gustav Zielfelder and Mr. Otto Weylandt has been dissolved by mutual consent from 31st July 1883, and that the firms are now liquidated by Mr. Gustav Zielfelder in Calcutta.

ZIELFELDER AND WEYLANDT.

Agra, Calcutta, Cawnpore, 10th November 1883.

I have this day established myself as Produce Merchant in Agra and Cawnpore under the style and firm of Otto Weylandt & Co.

OTTO WEYLANDT.

Agra, 10th November 1883. (1712—3)

The Bengal Coal Company, "Limited."

THE Half-yearly Ordinary General Meeting of the Shareholders will be held at the registered office of the Company, No. 1, Garstin's Place, Calcutta, on Saturday, the 8th December 1883, at 11 o'clock A.M., for the purpose of receiving and passing the Directors, Report and Accounts for the Half-year ended 31st October last, declaring a Dividend, and transacting any other business which may be brought forward.

By order of the Board,
H. H. MACLEOD, Superintendent.

Calcutta, 20th November 1883. (1670—3)

India General Steam Navigation Company, "Limited."

NOTICE.

AN Extraordinary General Meeting of Shareholders will be held at the registered office of the Company, No. 4, Fairlie Place, Calcutta, at noon, on Saturday, the 15th December 1883, for the purpose of passing the following resolutions:—

That the capital of the Company be increased from Rs. 33,00,000 to Rs. 55,00,000 by the issue of 22,000 additional shares of the nominal value of Rs. 100 each.

That 11,000 of such additional shares be offered as contributory shares to the persons whose names are on the register of the Company on the 1st day of January next in the proportion of one new share to each three old shares of Rs. 100 each. Rs. 50 in respect of each new share shall be paid on the issue of such share, and the remaining Rs. 50 shall be paid at such time as the Directors may determine.

That the remaining 11,000 additional shares be issued as fully paid-up shares by way of bonus to the persons whose names are on the register of the Company on the 1st day of January next, in the proportion of one new share to each three old shares.

By order of the Directors,
G. J. SCOTT,
Secretary, I. G. S. N. Co., Ld.

Calcutta, the 30th November 1883. (1708—2)

Particulars of Sale.

TO be sold by public auction in separate lots at Pauchooriah Indigo Factory near Goalundo in the district of Furreedpore, at 11 o'clock, on Saturday, the 15th December 1883, by order of the Administrator-General of Bengal.

Various shares in the following valuable zemindaries and the Pauchooriah Indigo Factory belonging to the Estate of the late Louis Ramey, Esq., of Pauchooriah Factory.

LOTS 1 TO 14.

On Thursday, the 22nd day of November instant, it was ordered that the matters of the petition of the said insolvent be heard on Wednesday, the 6th day of February next, and that the said insolvent do then attend to be examined before the said court.

Insolvent in person. (1701—2)

Chief Clerk's Office, the 27th day of November 1883.

In the matter of TOON TOON KOUNSON, an insolvent.

On Wednesday, the 21st day of November last, it was ordered that the hearing of this matter do stand adjourned until Wednesday, the 5th day of December instant, with liberty to the said insolvent to amend her schedule filed in this matter, and that the said insolvent do then attend to be examined before the said Court.

C. A. Smith, Attorney. (1713—1)

In the matter of PETER THOMAS MOORE PALMER, an insolvent.

Notice that an application for an *ad interim* protection order has been this day made by the said insolvent and that such application will be heard and disposed of by the Acting Commissioner of the Insolvent Court on Wednesday, the 12th day of December instant, at the hour of 10 o'clock in the forenoon.

☞ "Any creditor of the said insolvent desirous of opposing such application must appear before the said court at the time and place aforesaid."

W. F. Gillanders, Attorney. (1714—1)

In the matter of WILLIAM ALFRED MOORE PALMER, an insolvent.

Notice that an application for an *ad interim* protection order has been this day made by the said insolvent and that such application will be heard and disposed of by the Acting Commissioner of the Insolvent Court on Wednesday, the 12th day of December instant, at the hour of 10 o'clock in the forenoon.

☞ "Any creditor of the said insolvent desirous of opposing such application must appear before the said court at the time and place aforesaid."

Insolvent in person. (1715—1)

In the matter of BONOMALLY DUTT and NUNDOLOLL DUTT, insolvents.

Notice that an application for an *ad interim* protection order has been this day made by the said insolvents and that such application will be heard and disposed of by the Acting Commissioner of the Insolvent Court on Wednesday, the 12th day of December instant, at the hour of 10 o'clock in the forenoon.

☞ "Any creditor of the said insolvents desirous of opposing such application must appear before the said court at the time and place aforesaid.

Sittanauth Doss, Attorney. (1717—1)

Chief Clerk's Office, the 4th day of December 1883.

Notice.

WHEREAS Attendronuthdun Tagore has applied to the High Court, Calcutta, to be declared an insolvent under section 344 of the Code of Civil Procedure, the creditors of the said applicant are hereby informed that the application of the said petitioner will be heard before one of the Judges of the said Court, on Saturday next, the 8th day of December 1883.

WILSON & CHATTERJEE, Petitioner's Attorneys.

(1709—1)

May, 31st 1883.

Now ready, one Volume, half-bound, Quarto, Fifty-eight Plates, Rs. 38.

ILLUSTRATIONS OF ANCIENT BUILDINGS IN KASHMIR prepared at the India Museum, London, under the authority of the Secretary of State for India in Council, from photographs, plans, and drawings taken by order of the Government of India by Henry Hardy Cole, Lieutenant, R.E., to be obtained from Messrs. Thacker, Spink and Co., Calcutta; Messrs. Higginbotham and Co., Madras; and of Messrs. Thacker, Vinning and Co., Bombay.

The illustrations in this work have been produced in carbon from the original negatives, and are therefore permanent.

Notice.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1*st*.—Bay of Bengal Daily Report giving observations taken at 17 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by noon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2*nd*. Bengal Daily Report containing observations taken at 30 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i.e.* from May, 15th, to November, 15th. Price Rs. 2-8 per mensem, including postage.

3*rd*.—A Weekly and Monthly Statement of Meteorological Observations taken at 38 observing stations, and of rainfall recorded at 160 sub-divisional stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

JOHN ELIOT,
Meteorological Reporter to the Govt. of Bengal.

Meteorological Office, Bengal, the 3rd July 1883.

PART IV.

Bill of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

THE following Bill was read in the Council of the Lieutenant-Governor of Bengal for the purpose of making Laws and Regulations on the 1st December 1883, and was referred to a Select Committee, who are to report thereon in one month :—

A Bill to amend "The Estates' Partition Act, 1876"

WHEREAS it is expedient to amend "The Estates' Partition Act, 1876;"

It is enacted as follows :—

Construction and commencement of Act.

1. This Act shall be read with, and taken as part of, "The Estates' Partition Act, 1876," and it shall come into force from the date on which it may be published in the *Calcutta Gazette* with the assent of the Governor-General.

Repeal of section 11, Bengal Act VIII of 1876.

2. Section 11 of "The Estates' Partition Act, 1876," is hereby repealed.

No partition of a permanently-settled estate allowed, if separate estate liable for less than ten rupees annual land revenue.

3. For section 11 of the said Act the following section shall be substituted :—

"11. No application for the partition of a permanently-settled estate shall be admitted, and if the application shall have been admitted, no partition shall be carried out in accordance with any such application, if any separate estate to be created by such partition would be liable for an annual amount of land revenue not exceeding ten rupees."

STATEMENT OF OBJECTS AND REASONS.

THE Partition of Estates under the existing law now makes such demands on the time and attention of Revenue Officers in some Districts as seriously to interfere with the discharge of their other duties.

Of late years the Legislature has provided means short of a complete separation of the liability for land revenue by which a joint proprietor can, to a great extent, protect himself against the consequences of default by his co-parcener.

The object of the Bill is to relieve Revenue Officers of the duty of making partitions of which the effect will be to create separate estates liable for an annual amount of land revenue not exceeding Rs. 10, as the public inconvenience caused by their employment in this duty now outweighs its advantages.

The proprietors of joint interests in estates, who will be precluded from applying for Partition by Revenue Officers, will now be placed, in respect of separation of their shares, in the same position as the joint holders of a tenure who have no right against their landlord of splitting up the tenure.

H. L. DAMPIER.

APPOINTMENT OF A COMMISSION TO REPORT UPON THE SYSTEM OF EXCISE ON COUNTRY SPIRITS.

FINANCIAL DEPARTMENT—EXCISE.

Calcutta, the 4th December 1883.

RESOLUTION.

IN the Resolution on the last annual Excise Report of the Board of Revenue, the Lieutenant-Governor stated that he had satisfied himself that in some districts an increase in drinking had taken place which was larger than the increase of revenue, if properly distributed, would indicate, and he announced his intention of appointing a Special Commission to consider and report upon the subject of the system of excise on country spirits in all its aspects after careful local enquiry. It is unnecessary here to recapitulate all that has been said against, and in favour of, the outstill system, which is now in force over practically the whole area of the province outside Calcutta and its environs. One thing is clear, that there has been a serious increase in drinking among the people. That increase is not confined to the area under the outstill system; but that it has taken place throughout a great part of that area, is not open to question. Whether the causes in operation are the same as those which have caused the increase in the smaller area under the sudder distillery, or whether there are special causes, either inherent in the system or brought into force by its present application, it is impossible for Government to allow this increase in drinking to continue without making

every effort to ascertain those causes and, if possible, to remove them. No considerations of revenue can be allowed to outweigh the paramount duty of Government to prevent the spread of intemperance, so far as it may be possible to do so. The Lieutenant-Governor has received the sanction of the Government of India to his proposal to appoint a Special Commission, and he directs that it be constituted as follows:—

Mr. J. Ware Edgar, C.S.I.	...	*President.*
Baboo Krishna Bihari Sen, M.A.	...	*Member.*
Mr. H. R. Reily	...	,,
Baboo Obhoy Chunder Das	...	,, *and Secretary.*

The Commission will understand that they are invited to examine and report upon the whole question of the excise on country spirits, and to make any suggestions for its administration in all its branches that may occur to them as the outcome of their enquiries and deliberations. They should visit every district in the Patna and Bhagulpore Divisions, and selected districts in the Chota Nagpore, Burdwan, and Presidency Divisions, and should give timely notice of the dates on which they will hold sittings at the different places, in order that all who may wish to give evidence upon the subject of their enquiry may have an opportunity of doing so. The Lieutenant-Governor desires that the record of the evidence taken, and of the general proceedings of the Commission, may be made as full as possible. It is important that the report to be submitted shall contain all that has to be urged on all sides of the question, in order that Government may be able to come to a definite conclusion on a matter which has long formed the subject of public controversy. It is hoped that the report of the Commission may be submitted by the 1st April.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Govt. of Bengal.

DISTRICT ROAD FUND.

PUBLIC WORKS DEPARTMENT,—ROAD CESS.

Calcutta, the 28th November 1883.

No. 4101R.C.

READ—

Letter from the Accountant-General, Bengal, No. 870L F., dated the 21st November 1883, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending the 30th June 1883.

RESOLUTION.

THE Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees for the third quarter of the cess year 1882-83 be published in the *Calcutta Gazette* and be circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded to all Commissioners of Divisions, to all Superintending Engineers of Public Works Circles in Bengal, and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

G. F. E. S. NEILL, *Major*, M.S.C.,

Under-Secretary to the Govt. of Bengal.

CESS DISTRICTS.

NON-CESS DISTRICTS.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 1st December 1883.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
	BENGAL.		
	Western Districts.		
Burdwan Divn. 1	Burdwan, Dec. 1 '83	Nil	Weather—fine and cold. Harvesting of *amun* in progress. *Rubbee* crops continue to suffer from want of rain. Rice selling at from 17 to 19½ seers per rupee. General health indifferent.
2	Bankoora, „ 1 „	Nil	Weather—seasonably cold. The people are fully employed in reaping what is certainly on the whole an 8-anna crop. In the southern part of the district it is not unusual to find large tracts irrigated which will give a 16-anna yield, and unirrigated tracts not less than 10 annas. Stocks appear to be plentiful, but exportation is going on.
	Bishenpore ...	Nil	
	Maliara ...	Nil	
	Khatra ...	Nil	
3	Beerbhoom, „ 1 „	Nil	Weather—cold and clear. Harvesting of *amun* in full progress. Average outturn will not be more than eight annas. Prices slightly lower owing to sale of new rice. General health satisfactory.
	Rampore Haut ..	Nil	
4	Midnapore, „ 1 „	Nil	Weather—seasonable. Prospects of paddy unfavourable. Winter crops promise well in some parts of the district. Public health fair.
5	Hooghly, „ 1 „	Nil	Weather—cold Prospects of all crops continue to be bad. *Amun* will not be more than six annas taking the whole district. Sugarcane and potato are not thriving. There is fever in different parts of the district.
	Howrah, „ 3 „	Nil	Weather—clear and fine. *Amun* crop is being reaped. Prospects of winter crops are unfavourable. Sugarcane is good. Cocoanuts and betel-nuts are doing well. Common rice is selling at Rs. 2-7 per maund. Public health is good.
	Ooloobariah ...	Nil	
	Central Districts.		
Presidency Divn. 6	24-Pergunnahs, Dec. 3 '83	Nil	Weather—seasonable. Prospects of both late paddy and winter crops continue unfavourable. Stray cases of cholera reported from most parts of the district.
7	Nuddea, „ 1 „	Nil	Weather—clear and cold. Except in Kooshtea, the *amun* has been almost entirely destroyed, and the outturn for the whole district is expected to be only from two to four annas. Rain is much wanted for all winter crops. *Arhar* and *teel* are very promising. Average price of common rice is Rs. 2-8 per maund. Fever is on the increase everywhere. Cholera reported from Kooshtea and Choondanga.
	Kooshtea ...	Nil	
	Meherpore ...	Nil	
	Choondanga ...	Nil	
	Ranaghat ..	Nil	
8	Khoolna, „ 1 „	Nil	Weather—dry and cold. Rice is being cut. The earlier kind of rice is about a 4 or 6-anna crop. Price of rice is stationary. Fever continues here and there. Some cases of cholera in Bagirhat.
9	Jessore, „ 1 „	Nil	Weather—bright, cold. Harvesting of *amun* continues; outturn is estimated at about eight annas Winter crops bad. Coarse rice is selling at from 15 to 16 seers per rupee Fever prevalent in the district; 290 deaths from fever reported from Bongong.
	Jhenida ...	Nil	
	Magura ...	Nil	
	Narail ...	Nil	
	Bongong ...	Nil	
10	Moorshedabad, „ 1 „	Nil	Weather—bright and cool. *Amun* is being reaped; an 8-anna crop is expected on an average. Winter crops are suffering from want of rain, but those on dearah lands are doing well. Fever still prevails in the town of Jungypore and cholera is reported to have broken out in thana Shamshirgunge.
Rajshahye and Cooch Behar Divn. 11	Dinagepore Nov. 30 '83	Nil	Weather—cold. Sugarcane is doing fairly well. Mustard is in flower, but rain is wanted for it in the drier parts of the district Rice selling at from 13 to 18 seers per rupee.
12	Rajshahye, Dec. 1 „	Nil	Weather—cold and generally bright. *Amun* has been reaped in parts of the district. *Rubbee* on the dearah lands is said to be a good crop. Prices easier.
	Nattore ..	Nil	
	Nowgong ...	Nil	
13	Rungpore Nov. 30 „	Nil	Weather—seasonable. *Amun* paddy is being reaped. The crop on high lands is almost a total failure. Transplanting of tobacco is going on. Fever prevalent.
	Kurigram ..	Nil	
	Nilphamari ..	Nil	
	Gaibanda ..	Nil	
14	Bogra, Dec. 1 „	Nil	Weather—cold and bracing. Outturn of the *amun* crop will be about four annas. Prospects of the *rubbee* crops are not favourable. Public health fair.
15	Pubna, „ 1 „	Nil	Weather—cold and seasonable. *Amun* is being cut. It will be a very short crop. *Rubbee* crops are promising. Fever prevalent.
16	Darjeeling, „ 1 „	Nil	Weather—cold and cloudy. Harvesting of *murwa* and *haimanti* rice continues.
17	Julpigoree, „ 1 „	Nil	Weather—cold and seasonable. Harvesting of the *amun* crop has commenced. Outturn will be much below average. Winter crops (such as *kalai*, mustard sugarcane) are reported to be in good condition.
	Cooch Behar	...	Report not received.

	No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—*concld.*				
		Eastern Districts.		
Dacca Divn.	18	Dacca, Dec. 1 '83	Nil	Weather—cold. Cutting of sugarcane and paddy continues. Pulses and *rubbee* crops are being sown. Prospects good, but rain is wanted for the cold-weather crops.
		Manickgunge ...	Nil	
		Moonshigunge ...	Nil	
		Naraingunge ...	Nil	
	19	Furreedpore, „ 2 „	Nil	Weather—seasonable. *Amun* harvest is going on; outturn will be fair in the south, but poor elsewhere. Rain is much wanted for the *rubbee*. Fever is extremely prevalent, except in the south. Prices are rising in the north.
		Goalundo ...	Nil	
		Madaripore ...	Nil	
	20	Backergunge, Nov. 29 „	Nil	Nights cool; days hot and cloudy. Prospects of *amun* on low lands good. Cholera has appeared in some villages within the police station of Patuakhali; otherwise public health good.
	21	Mymensingh, „ 30 „	Nil	Weather—cool and pleasant. State and prospects of the crops are bad. Pr has suffered greatly in many places from the continued drought. P olic health fair, except in the south-west, where fever is prevalent.
		Jamalpore ...	Nil	
		Kishoregunge ...	Nil	
		Atia ...	Nil	
		Netrokona ...	Nil	
Chittagong Divn.	22	Chittagong, Dec. 4 '83	0·11*	Weather—alternately cloudy and fair. Outturn of rice crop not promising. Cold-weather crops doing well. Prices stationary. Cattle-disease has abated. General health good.
	23	Noakholly, Nov. 29 „	Nil	Weather—fair and cold; wind northerly *Amun* crop is being reaped; the outturn does not appear very favourable, as a 12-anna crop at most is expected.
	24	Tipperah, „ 30 „	Nil	Weather—fair and seasonable. *Amun* is being harvested; outturn reported good.
		Brahmunberia ..	Nil	
		Chandpore ...	Nil	
	25	Chittagong Hill Tracts. „ 27 „	Nil	Weather—seasonable. Cold and foggy in the mornings. Gathering of cotton still continues. Prospects of paddy on lands under plough cultivation and sugarcane are good. Mustard and other cold-weather crops are being sown, and are germinating in some places.
		Hill Tipperah „ 28 „	Nil	Weather—seasonably cold. *Shail* paddy is being reaped; a fair harvest is expected. Prospects of winter crops not favourable. Public health good.
BEHAR.				
Patna Divn.	26	Patna, Dec. 1 '83	Nil	Weather—cold. Paddy is being reaped. It will be a poor crop. *Rubbee* sowings are still going on, but if no rain falls there will be a very poor outturn. Public health good.
	27	Gya, „ 1 „	Nil	Weather—cold and very dry. Paddy is being harvested. Sowing of *rubbee* crops has been completed. The *rubbee* must fail if rain does not fall soon. The rise in prices continues. Public health good.
	28	Shahabad, „ 1 „	Nil	Weather—cool. Prospects of *rubbee* crops fair, but rain is wanted.
		Buxar ..	Nil	
	29	Durbhunga, „ 1 „	Nil	Weather—seasonable. Very poor rice crop is being harvested. The *rubbee* is withering for want of moisture. Fever is not increasing.
	30	Mozufferpore, „ 1 „	Nil	Rice harvest is proceeding; average outturn will be about four annas. Except on high lands, the *rubbee* is still healthy, though backward, but without rain the yield will be very small. Prices have not risen generally during the week. A good deal of fever is reported.
		Hajipur ..	Nil	
		Seetamurhi ...	Nil	
	31	Sarun, „ 1 „	Nil	Weather—cool and clear; no sign of rain. Paddy is being harvested. *Rubbee* is coming on well where irrigation is practicable. Rain much wanted. Prices stationary. Public health good.
		Sewan ...	Nil	
		Gopalgunge ...	Nil	
	32	Chumparun, „ 1 „	Nil	Weather—cold. Rain is much wanted. In many places the *rubbee* is withering. Public health good.
Bhagulpore Divn.	33	Monghyr Dec. 1 '83	Nil	Weather—seasonable. Rice crop will not exceed four annas. There is little likelihood of more *rubbee* being sown. Prices have fallen.
		Begusarai ..	Nil	
		Jamui ..	Nil	
	34	Bhagulpore, „ 1 „	Nil	Weather—cold in the commencement of the week, but considerably warmer during the last two or three days. The *aghani* harvest has commenced. The rice crop in the high lands has almost altogether failed. In the low lands it is expected to yield an outturn of from 4 to 8 annas, though in a few places the yield will come to from 10 to 14 annas, while in others it will not exceed two annas. The *rubbee*, wherever it has been sown, is still green and strong, and, if rain falls, may yield a fair outturn, but a good quantity of the lands usually sown with these crops has this year remained unsown.
	35	Purneah, „ 1 „	Nil	Cold weather has set in with westerly winds. Prospects of crops not favourable. *Rubbee* crops are suffering much from want of moisture. Common rice is selling at 15 seers per rupee. Fever prevalent all over the district.
	36	Maldah, „ 1 „	Nil	Weather—first two days of the week cloudy; cloudless since. Prevailing wind north-north-west. The scanty *rubbee* crops that have come up are much in need of moisture. Common rice is selling at 13 and 14 seers per rupee Prices are getting easier. General health good.
	37	Sonthal Pergha., „ 1 „	Nil	Weather—bright, clear, and seasonable. The rice has failed on an average for the whole district to the extent of at least eight annas. In the continued absence of rain, the prospects of winter sowings are bad.
		Deoghur ..	Nil	
		Godda ..	Nil	
		Rajmehal ...	Nil	
		Jamtara ..	Nil	
		Pakour ...	Nil	

* For the week ending the evening of the 3rd instant.

	District, and date of return.				Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
ORISSA		ttack,	Nov.	30 '83	Nil	Weather—cool. Sky overclouded at times The earlier kind of the *sarad* rice crop is being cut; the later kind is ripening. Winter crops are doing well. Common rice selling at 20 seers per rupee. Public health generally good.
		Pooree,	„	29 „	Nil	Weather—getting cooler gradually. Prospects of the *sarad* rice crop are good.
		Khoorda ...			Nil	The earlier kind of the crop is being harvested. Winter crops are doing well. Sugarcane is being crushed. Prices of food-grains are rising on account of the exportation of rice. Common rice selling at from 21 to 32 seers per rupee.
	40	Balasore,	„	30 „	Nil	Weather—seasonable. The rice harvest has now everywhere begun. The lowest estimate for the three northern thanas (Jellasore, Basta, and Baliapal) is an 8-anna crop, and that for the two central thanas (Balasore and Soro) is from ten to twelve annas. But, in the opinion of the Collector, the general average of these five thanas (forming more than one-half of the district) will be up to a 10-anna crop. The estimate for the Bhudruck sub-division is a 12-anna crop. Prices are very steady. Public health normal.
CHOTA NAGPORE.						
South-West Frontier Agency.						
	41	Hazaribagh,	Nov.	30 '83	Nil	Weather—clear and cold. Paddy is being harvested; outturn unfavourable. Prospects of *rubbee* crops are not good. Cases of small-pox reported from some of the thanas in the district. General health good.
	42	Lohardugga	Dec.	1 „	Nil	Weather—seasonable. Harvesting of paddy continues. The crop will probably average eight annas for the whole district. *Rubbee* sowings still in progress. Prices inclined to fall at head-quarters; stationary at Palamow. Public health good.
	43	Singbhoom,	Nov.	30 „	Nil	Weather—cold and seasonable. Rice crop is expected to give an outturn of from 10 to 12 annas. *Rubbee* crops, especially oilseeds, are suffering from drought. Sugarcane is doing well. Price of rice is lower than last week. It is selling at 28 seers per rupee. General health good.
	44	Manbhoom,	Dec.	1 „	Nil	Weather—fine and cool. Reaping continues. Outturn of paddy is estimated at
		Govindpore ...			Nil	from 8 to 14 annas in the sudder and from 6 to 12 annas in the sub-division. The lowest estimates are from Pandra in the north-east and Patcoom in the south-west corners of the district. *Rubbee* crops promise fairly well, though want of rain has necessitated more irrigation than usual. Coarse rice selling at Purulia at 22 seers per rupee. Cholera reported from Jaipur; small-pox from Barabhoom; cattle-disease from Jaipur and Baghmundi; and slight fever from Baghmundi.

Published for general information.

CALCUTTA, STATISTICAL DEPT.,
The 4th December 1883.

COLMAN MACAULAY,
Secy. to the Govt. of Bengal.

MEMORANDA.

The following summary is deduced from the annexed table exhibiting the vital statistics of the first class Municipalities in Bengal for the week ending 17th November 1883:—

(1.) That births and deaths were recorded in these Municipalities in the proportions, respectively, of 23·4 and 34·5 per 1,000 of their population, against 24·5 and 31·8 per 1,000, respectively, during the preceding week ending 10th November, indicating a considerable advance in the registration of deaths, with a small falling off in that of births.

(2.) That the following Municipalities returned the highest proportions of births and deaths:—

Births.

	Ratio per mille.
Burdwan ..	42·7
Bhagulpore ..	38·9
Uterparah ..	37·7
Dacca ..	37·6
Naraingunge ..	33·1

Deaths.

	Ratio per mille.
Purneah ..	72·7
Suburbs of Calcutta ..	57·9
Poori ..	55·7
Burdwan ..	53·4
Midnapore ..	43·4
Serampore ..	41·2
Gya ..	41·0
Uterparah ..	37 7
Hughli ..	34·9
Santipore ..	34 5
Dacca ..	34·4
Bhagulpore ..	34·4
Durbhanga ..	31 4
Howrah ..	27 5
Chittagong ..	25·8

(3.) That, while no death was recorded under the head of small-pox, the mortality from cholera is stated to have amounted to 2·9 per 1,000 of the population of the Municipalities under notice, against 2·1 per 1,000 in the preceding week; from fever 18 per 1,000 against 17·1 per 1,000; from bowel-complaints 5·2 per 1,000 against 4 per 1,000; from violence ·03 per 1,000 against ·4 per 1,000; and from all other causes 8·4 per 1,000 against 8·1 per 1,000. These figures indicate that there was a rise in the fatal results from all the death causes, except injury.

(4.) That of the above indicated diseases, excluding small-pox, from which, as before stated, no death was reported, and injury, which proved fatal only in the Naraingunge town at the rate of 4·1 per 1,000 of its population, cholera, fever, bowel-complaints and other causes, caused the highest mortality in the undermentioned Municipalities:—

Cholera.

	Ratio per mille.
Beauleah ..	13·1
Howrah ..	8·4
Suburbs of Calcutta	8·1
Bhagulpore ..	4·5

Fever.

	Ratio per mille.
Purneah ..	62·3
Midnapore ..	37·2
Santipore ..	32·3
Burdwan ..	30·5
Suburbs of Calcutta ..	27·9
Durbhanga	23·6
Hughli ..	20·1

Bowel-complaints.

	Ratio per mille.
Uterparah	18·9
Gya ..	13·7
Serampore	11·8
Burdwan	9·2

Other causes.

	Ratio per mille.
Poori ..	36·4
Suburbs of Calcutta ..	15·3
Dacca ..	14 3
Burdwan ..	13·7
Gya ..	12·3
Serampore ..	9 8
Hughli ..	9·4

(5.) That the death-rates under the heads of *Sex*, *Class* and *Age* stand as follows:—

According to Sex.

	Ratio per mille.
Males ..	32·7
Females ..	36 5
Ratio of male deaths to every 100 female deaths ..	101

According to Class.

	Ratio per mille.
Christians ..	42·5
Hindus ..	33·4
Mahomedans ..	36·8
Budhists ..	48·4

According to Age.

	Ratio per mille.
Under 1 year ..	214·2
1 and under 5 years ..	42·0
5 and under 10 „ ..	16·6
10 and under 15 „ ..	12·6
15 and under 20 „ ..	21·9
20 and under 30 „ ..	23·7
30 and under 40 „ ..	24·6
40 and under 50 „ ..	28·9
50 and under 60 „ ..	46·5
60 years and upwards ..	82·6

F. W. A. DEFABECK,
Officiating Sanitary Commissioner for Bengal.

The total fall from 1st January to 1st December 1883	...	50·04
The average fall of the corresponding period for 24 years, S. G.'s Office ...	..	65·15

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≡ fog, ☁ dew.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

METEOROLOGICAL OFFICE, INDIA.
The 3rd December 1883.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL

No. 2813A.

GENERAL.—*The 6th December* 1883.—Mr. E. H. Ruddock, Magistrate and Collector, Rajshahye, reported his return from furlough on the 1st instant.

Mr. J. C. Veasey is appointed to act temporarily as Magistrate and Collector of Burdwan, with effect from the date on which he assumed charge.

The 7th December 1883.—Mr. C. T. Metcalfe, C.S.I., Magistrate and Collector, Patna, is appointed to be an Additional Commissioner in the Patna Division for three months, with effect from the date on which he assumes charge of his office.

Mr. C. H. Vowell is appointed to act as Magistrate and Collector, Patna, during the absence, on deputation, of Mr. C. T. Metcalfe, C.S.I., or until further orders. Mr. Vowell is appointed to act in the second grade of Magistrates and Collectors.

Mr. F. H. B. Skrine, Temporary Joint-Magistrate and Deputy Collector, Moorshedabad, is allowed leave for two months, under Section 71, Chapter V of the Civil Leave Code, with effect from the 10th instant, or from such subsequent date as he may avail himself of it.

The 8th December 1883.—Baboo Sita Nath Mookerjee, Sub-Deputy Collector, Dinagepore, is allowed leave for seven weeks, under Rule 2, Section 136, Chapter X of the Civil Leave Code, with effect from the 1st December 1883, or such subsequent date as he may avail himself of it.

Baboo Futick Chunder Das is appointed to act as Sub-Deputy Collector, Dinagepore, during the absence, on leave, of Baboo Sita Nath Mookerjee, or until further orders.

Mr. G. K. Lyon, Officiating Joint-Magistrate and Deputy Collector, Sewan, Saran, is allowed leave for fourteen days, under Section 71, Chapter V of the Civil Leave Code, with effect from the date on which he availed himself of it.

Baboo Hem Chunder Mitter, Sub-Deputy Collector, Bongong, Jessore, is allowed leave for six months, under Section 127, Chapter X of the Civil Leave Code, in extension of the leave granted to him under the order of the 6th February last.

Mr. A. W. Paul, Joint-Magistrate and Deputy Collector, 24-Pergunnahs, on special duty, returned from leave on the forenoon of the 12th ultimo.

Mr. C. J. O'Donnell, Assistant Magistrate and Collector, and Munsif, who reported his return from furlough on the 2nd instant, is posted to the sudder station of the Chittagong district.

The services of Major H. C. Creak are replaced at the disposal of the Government of India in the Military Department.

The 10th December 1883.—Mr. L. C. Abbott, C.S., has been granted by Her Majesty's Secretary of State for India an extension of furlough for six months on medical certificate.

Mr. T. M. Kirkwood, District and Sessions Judge, Mymensingh, is appointed to act as District and Sessions Judge, Moorshedabad, during the absence, on leave, of Mr. A. J. R. Bainbridge, or until further orders.

The 11th December 1883.—Mr. A. Manson, Officiating Magistrate and Collector, Chittagong, is allowed furlough for eight months, under Section 49, Chapter V of the Civil Leave Code, with effect from such date in February next as he may avail himself of it.

In modification of the order of the 22nd October last, Mr. G. J. B T. Dalton is appointed to act, until further orders, in the second grade of Magistrates and Collectors in the district of Dinagepore.

Baboo Hurro Kali Mookerjee, Deputy Magistrate and Deputy Collector, Khoolna, is allowed leave for 24 days, under Section 71, Chapter V of the Civil Leave Code, from the 18th September to the 11th October last, both days inclusive.

The services of Baboo Nolin Chunder Roy, Sub-Deputy Collector, Serajgunge, Pubna, are placed at the disposal of the Board of Revenue for employment on settlement work in the district of Pubna.

Baboo Nolin Chunder Roy is vested with the powers of a Deputy Collector.

In modification of the order of the 20th ultimo, Mr. H. F Matthews, Officiating Joint Magistrate and Deputy Collector, and Munsif, 24-Pergunnahs, is transferred to Durbhunga, and is posted to the Sudder Station of that district.

Mr. F. H. Barrow is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, and is posted to the Sudder Station of the district of Midnapore, with effect from the date on which he joined his appointment.

Mr. A. Borooah, Joint Magistrate and Deputy Collector, Chittagong, is transferred to Jessore.

Mr. C. R. Marriott, Officiating Joint Magistrate and Deputy Collector, Rungpore, is allowed leave for one day, under Section 71, Chapter V of the Civil Leave Code, in extension of the leave granted to him under the order of the 15th October 1883.

Baboo Bunkim Chunder Chatterjee, Deputy Magistrate and Deputy Collector, Howrah, is allowed leave for ten days, under Section 71, Chapter V of the Civil Leave Code, with effect from such date as he availed himself of it.

POLICE.—*The 10th December* 1883.—Mr. J. P. Sneyd, Assistant Superintendent of Police, is posted temporarily to the district of the 24-Pergunnahs, with effect from the date on which he joined that district

The 11th December 1883.—Mr. W. H. Cornish, District Superintendent of Police, is posted to Noakholly.

This cancels the order of the 16th ultimo, posting Mr. J. Patch, District Superintendent of Police, on leave, to Noakholly.

ECCLESIASTICAL.—*The 6th December* 1883.—The Reverend W. Ulyat, Junior Chaplain of St. Paul's Cathedral, and Chaplain of the Presidency Jail, is appointed to be Chaplain of Dacca, with effect from the date on which he may join his appointment.

The Reverend T. B. Speedy is appointed to be Chaplain of Dum-dum with effect from the 30th ultimo.

The 11th December 1883.—The Rev. A G. A. Robarts, Chaplain of Dacca, is allowed furlough for thirteen months, under Section 113 (*a*), Chapter IX of the Civil Leave Code, with effect from the date on which he may avail himself of it.

REGISTRATION.—*The 5th December* 1883.—Moulvi Mahomed Abdul Mogni, Rural Sub-Registrar of Bahera, in the district of Durbhunga, is transferred to Madhubani, in the same district, *vice* Moulvi Ishan Ali Khan, deceased.

Munshi Ram Prasad Lal, Officiating Rural Sub-Registrar of Madhubani, in the district of Durbhunga, is appointed to be Rural Sub-Registrar of Bahera, in the same district, *vice* Moulvi Mahomed Abdul Mogni, transferred.

The 11th December 1883.—Baboo Kamala Kumud Mukherjee is appointed on probation for six months, to be Rural Sub-Registrar of Uluberiah in the district of Howrah, with effect from the 1st January 1884, from which date the Sub-divisional Officer of Uluberiah will cease to be in charge of the registration office.

OPIUM.—*The 11th December* 1883.—Mr. H. G. C. Clarke, Assistant Sub-Deputy Opium Agent, acted as Sub-Deputy Opium Agent of Patna from the 25th September 1883 to the date on which he was relieved by Mr. A. H. Turnbull.

Mr. A. H. Turnbull, Sub-Deputy Opium Agent, Patna, is allowed leave for two months, under Section 71, Chapter V of the Civil Leave Code.

Mr. W. T. Ryves, Assistant Sub-Deputy Opium Agent, is appointed to act as Sub-Deputy Opium Agent of Patna, during the absence, on leave, of Mr. A. H. Turnbull, or until further orders.

Mr. J. L. Fawcus, Assistant Sub-Deputy Opium Agent, Benares Opium Agency, was on privilege leave from the 13th to the 21st November 1883, inclusive.

EDUCATION.—*The 10th December* 1883.—Mr. H. H. Locke, Principal, Government School of Art, Calcutta, has been granted by Her Majesty's Secretary of State for India an extension of furlough for six months on medical certificate.

The 11th December 1883.—Baboo Radha Nath Ray, Joint Inspector of Schools, Orissa Division, is allowed leave for three months, under Section 71, Chapter V of the Civil Leave Code.

Baboo Madhu Sudan Ray, Deputy Inspector of Schools, Cuttack, is appointed to act as Joint Inspector of Schools, Orissa Division, during the absence, on leave, of Baboo Radha Nath Ray, or until further orders.

Total number of furloughs which may be expected to be available before the 1st April 1884		19

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 7th December 1883.—Under section 4 of Act VII of 1871 (the Indian Emigration Act), the Lieutenant-Governor approves the appointment of Mr. De La Mare as Emigration Agent at Calcutta for the Colonies of Mauritius and Fiji.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTICE.

The 27th November 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, after one month from the date of publication, if no valid objections shall have been raised, to confirm the following bye-laws, which have been framed by the District Road Committee of Bogra, under section 180 of the Cess Act IX (B.C.) of 1880.

BYE-LAWS.

1. No person shall damage or encroach on any part of a district road or its side ditches by taking earth from, cultivating crops, or placing a fence on, it or them.

2. No person shall tether any cattle on any district road, and the owner of any cattle found tethered on any district road shall be held to have allowed his cattle to be tethered there.

3. No person shall, without the special permission of the Chairman or Vice-Chairman, cut any part of any district road.

4. No person shall wilfully destroy or damage any tree on any district road, or any fence erected for the protection of such tree, and no person shall remove or damage any post or fence erected on any district road.

COLMAN MACAULAY,
Secretary to the Government of Bengal.

NOTICE.

The 27th November 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, after one month from the date of publication, if no valid objections shall have been raised, to confirm the following bye-laws which have been framed by the District Road Committee of Rungpore under section 180 of the Cess Act IX (B.C.) of 1880.

BYE-LAWS.

1. WHOEVER encroaches on any part of a district road by cultivating crops or otherwise, and the owner of any cattle found grazing within the boundary of any such road, shall be liable to a fine under clause 2 of section 180 of Act IX (B.C.) of 1880.

2. Whoever, without the special permission of the Chairman or Vice-Chairman of the Committee, causes an obstruction to the traffic on any district road by cutting the same wholly or partially, shall be liable to a fine under clause 2 of section 180 of Act IX (B.C.) of 1880.

3. Whoever wilfully causes the destruction of or damage to, any tree planted on a district road, or to any gabion erected for the protection of the same, or whoever removes any post erected on a district road, shall, when the act does not amount to an offence under the Indian Penal Code, be liable to a fine under clause 2 of section 180 of Act IX (B.C.) of 1880.

4. Any cartman leaving his cart and bullocks to wander along the road without due care shall be liable to a penalty of two rupees.

5. Drivers of elephants shall move off the district roads to a reasonable distance whenever they see a horse approaching, and any person committing a breach of this bye-law shall be liable to a fine under clause 2 of section 180 of Act IX (B.C.) of 1880.

COLMAN MACAULAY,
Secretary to the Government of Bengal.

NOTICE.

The 27th November 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, after one month from the date of publication, if no valid objections shall have been raised, to confirm the following bye-laws which have been framed by the District Road Committee of Rajshahye under section 180 of the Cess Act IX (B.C.) of 1880:—

BYE-LAWS

1. No person shall damage or encroach on any part of a district road or its side ditches by taking earth from, cultivating crops, or placing a fence on, it or them.

2. No person shall tether any cattle on any district road, and the owner of any cattle found tethered on any district road shall be held to have allowed his cattle to be tethered there.

3. No person shall, without the special permission of the Chairman or Vice-Chairman, cut any part of any district road.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 1st December 1883.—Whereas a notification was published at page 710, Part I of the *Calcutta Gazette* of the 22nd August 1883, declaring the intention of the Lieutenant-Governor to confirm the following bye-laws framed by the District Road Committee of Chittagong under section 180 of the Cess Act IX (B.C.) of 1880, and whereas no objections have been raised to the said bye-laws, it is hereby notified for general information that they are confirmed:—

(1)—Whoever encroaches on any part of a district road by cultivating crops or otherwise, and the owner of any animal found grazing within the boundaries of any such road, shall be liable to a fine not exceeding Rs 10.

(2)—Whoever, without the special permission of the Chairman or Vice-Chairman of the Road Cess Committee, causes an obstruction by cutting any part of a road, or by erecting any bank for the purposes of irrigation or drainage, shall be liable to a fine not exceeding Rs. 10.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

ROAD CESS NOTIFICATION.

DISTRICT OF BALASORE.

The 30th November 1883.—It is hereby notified that the District Road Committee of Balasore have determined to levy road cess for the cess year commencing from the 1st October 1883 at the maximum rate of six pies, or two pice on each rupee of the annual value of lands, and the said rate having been approved by the Commissioner of the Division is hereby published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 30th November 1883.—Whereas a notification was published in the *Calcutta Gazette* of the 5th September 1883, declaring the Lieutenant-Governor's intention to extend the provisions of Act IV (B.C.) of 1865 (an Act for the prohibition of the practice of inoculation) to thanas Sudharam and Bamni in the district of Noakholly, and whereas no objection has been raised to the measure, it is hereby notified for general information that, in the exercise of the powers conferred upon him by section 3 of the Act, the Lieutenant-Governor extends the above Act to thanas Sudharam and Bamni with effect from the 15th December 1883.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 1st December 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, in accordance with the recommendation made at a meeting of the Commissioners of the Serajgunge Municipality in the district of Pubna, to extend the provisions of Part VII, Chapter II of Act V (B.C.) of 1876, to that municipality, unless good reasons be shown to the contrary within one month from the date of publication of this notification within the municipality.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 5th December 1883.—It is hereby notified for general information that, in the exercise of the powers conferred upon him by section 314 of Act V (B.C.) of 1876, the Lieutenant-Governor intends to confirm the following bylaws, which have been framed by the Commissioners of the Jessore Municipality under section 313 of the Act, unless good reasons to the contrary be shown within one month from the date of the publication of this notification within the above Municipality.—

1. No hut or other building, the external roof or walls of which are made of unprotected grass, leaves, mats or other inflammable materials, shall be erected, renewed or thoroughly repaired in the parts where the conservancy tax is levied, and in Puranakusba within the limits of the municipality, except with the sanction of the Commissioners.

Any one infringing this bye-law shall be liable to a fine not exceeding Rs. 20 and to a daily fine of Rs. 5 for continued infringement.

2. No person shall erect a hut, or any range or block of huts or sheds, or add any hut or shed to any range or block already existing, unless the huts or sheds be so built as to stand in regular lines, with a free passage or way in the front of and between every two lines, of eight feet in width, or unless the permission of the Commissioners be obtained.

Any one infringing this byelaw shall be liable to a fine not exceeding Rs. 20, and to a daily fine of Rs. 5 for continued infringement.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

ERRATUM.

The 11th December 1883.—In line 17 of the schedule attached to the notification dated 28th August 1882, published at page 746, part I of the *Calcutta Gazette* of the 30th idem, declaring the Jeet and Chee Chu forest, in the Dumsong sub-division of the Darjeeling district, to be a reserved forest under section 19, Act VII of 1878, *for* the words "and then north-east and then south-east," *read* "and then north-east, south-east and south."

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

The 3rd December 1883.—The Lieutenant-Governor sanctions the undermentioned changes in the district of Moorshedabad, with effect from the 1st of January 1884:—

I. Thanas Kalianganj and Gokurn, which have hitherto been included in the Berhampore or Sudder sub-division, shall be transferred to the sub-divisions of Lalbagh and Kandi respectively.

II. The villages mentioned in list A, which were transferred under a notification dated the 27th September 1879 from thana Bharatpur to thana Barwa, shall be retransferred to thana Bharatpur.

III. The villages mentioned in list B, which were transferred under a notification dated the 30th December 1879 from the district of Burdwan to thana Barwa of the Moorshedabad district, shall be transferred to thana Bharatpur.

IV.—The villages mentioned in list C, which were transferred under a notification dated the 30th December 1879 from thana Gokurn to thana Barwa, shall be retransferred to thana Gokurn.

V. The revised arrangement of the various sub-divisions in the district of Moorshedabad, and the revised boundaries of thanas Gokurn, Barwa, and Bharatpur, shall be as follow :—

Sub-divisions.	Thanas.
Berhampore (headquarters at Berhampore).	Sujaganj.
	Gorabazar.
	Barwa.
	Goas.
	Nowada.
	Hariharpara.
	Daulatbazar.
	Jellinghi.
Lalbagh (head-quarters at Lalbagh).	Kalianganj.
	Shahanagar.
	Manullabazar.
	Assanpur.
	Bhagwangola.
	Sagardighi (independent outpost).

Sub-divisions.	Thanas.
Jungypur (headquarters at Jungypur).	Dewansarai.
	Raghunathganj.
	Mirzapur.
	Sooti.
	Shamsherganj.
Kandi (headquarters at Kandi).	Gokurn.
	Khargaon.
	Bharatpur.
	Kandi.

BOUNDARIES OF THANA GOKURN.

On the North and West.—The boundary remains unchanged.

On the South.—The boundaries of villages Kayemnagar and Chur Kayemnagar eastward to the Bhagiruttee River.

On the East.—The west bank of the Bhagiruttee River northward to the village of Boodhurpara.

BOUNDARIES OF THANA BARWA.

On the North.—The boundary remains unchanged.

On the West.—Thana Gokurn and the west bank of the Bhagiruttee River as far south as the village of Bidupara Chak.

On the South.—The boundary of the district from the village of Bidupara Chak eastward to Andulbaria.

On the East.—The boundary remains unchanged.

BOUNDARIES OF THANA BHARATPUR.

On the North.—Thanas Gokurn and Kandi.

On the West.—The boundary remains unaltered.

On the South.—The boundary of the district from the village of Asundi-o-Sonarundi eastward to that of Kadkhali on the Bhagiruttee River.

On the East.—The boundary of the district and thana Barwa.

Note.—In the above description the villages named are included within the boundaries of the thanas to which reference is made

A.

List of Villages transferred from Thana Barwa to Thana Bharatpur.

44	Gopalpur	68	Ditto.

C.

List of Villages transferred from Thana Barwa to Thana Gokorn.

1	Chur Kyemnagar	177	Mahlundi.
2	Sona Dear	178	Ditto.
3	Chur Dear	181	Radhaballabpur.

In the above lists the names given are those of the villages as demarcated and surveyed by the Revenue Survey Department, and as shown on their maps and records.

A. P. MACDONNELL,

Secretary to the Government of Bengal.

[First Publication.]

NOTIFICATION.

The 6th December 1883.—In exercise of the powers conferred upon him by section 19 of the Indian Forest Act VII of 1878, the Lieutenant-Governor hereby declares the lands described below (which on the 4th July 1882 were notified as proposed reserves) to be reserved forests with effect from the 1st January 1884:—

District.	Pergunnah or other sub-division.	Name of forest.	Boundaries.
Tributary Mehals of Orissa.	Ungool ...	Eastern Range	*North.*—From a point near the boundary between Hindole and Ungool, south-east of Konja, along a demarcated line running at the foot of the hills to Koradasinga, passing to the south of Konja Navagum, Navakhaita, Bodokuntakul, Harodi, Kantamago, Tologodo. *West.*—From Koradasinga along a demarcated line round that village and passing southward to Hidisinga, and skirting round that village to Pamposorra, round which the demarcated line runs, and on and round three sides of Tokorosinga to, and skirting round, the village of Kulmgi, at which point it meets a demarcated line and joins the western range. From Kulmgi to the north of Purankote the eastern and western ranges join, and from the north of Purankote a demarcated line runs to Tikurpara on the Mohanuddy, passing to the east of Hatibari, Korodapada and Tikurpara. *South.*—The Mohanuddy river to the boundary of Daspalla. *East.*—The boundary between Ungool and Daspalla, Nursingpur, and Hindole to the starting point. *Note.*—From the above are excluded the village sites and permanently cultivated lands of the following villages, together with a sufficient and reasonable extent of land for grazing of cattle and the supply of agricultural implements and building materials for the sole use of residents of those villages:— Saleer. Raiguda. Jokoba. Badakheta. Bolingo. Taluka. Kotarang. Nadimi. Chotokoi. Chota Kotarang. Talisora.
.....	... ..	Western Range	*North.*—From a point near the boundary between Ungool and Athmalik along a demarcated line running south-east of Dolki, Dolasinga and Kumura to Bagnamda, and skirting round to the south and east of that village and turning north-east to Noapoda and on along the same continuous demarcated line passing near Noapara and Injadole Hingagora to Jagonathpur, and skirting past that village on its south to Takorasinga and Kolmgi, near which the demarcated boundary line meets the eastern range. *East.*—The boundary of the eastern range to the north of Purankoti, and from thence along a demarcated boundary line to the Mohanuddy river, passing first southward and turning westward to the old village site of Mahsai, and again turning and running south, passing to the west of Mojipoda. *South and West.*—The Mohanuddy river and the boundary between Ungool and Athmalik. *Note.*—From the above is excluded by boundary marks the village site and permanently cultivated lands of the Torba village.
.. ...	.....	Northern Range, Tabada block.	*West.*—From a point on the path leading from Wontullia to Ugi along a demarcated line passing to the east of Ingili, and *South.*—Turning east passing to the north of Injagola, and *East.*—Passing northward along a continuous demarcated line. *North.*—A demarcated line to the starting point. *Note.*—From the above is excluded by demarcated boundary marks the village site, grazing ground and permanently cultivated lands of the Tabada village.
.....	.....	Wontullia block	*South.* *East and North.* } A demarcated boundary line running round the forests on these three sides. *West.*—The boundary between Ungool and Athmalik.
.....	.....	Kotoda block ..	*West.*—The boundary between Ungool and Athmalik. *South.*—A demarcated boundary line. *East.*—A demarcated boundary line. *North.*—A demarcated boundary line.
.....	.....	Simlipoda block	*West.*—The boundary between Ungool and Athmalik. *South.*—A demarcated boundary line. *East.*—A demarcated boundary line. *North.*—A demarcated boundary line.
.....	.....	Konoloi block...	*North and West.*—The boundary between Ungool and Radakhol. *South.*—The boundary between Ungool and Athmalik. *East.*—A demarcated boundary line.

A. P. MACDONNELL,
Offg Secretary to the Govt. of Bengal.

NOTIFICATION.

The 4th December 1883.—In exercise of the powers conferred on him by section 7 of Act XII of 1875 (the Indian Ports Act), the Lieutenant-Governor sanctions the following rules, in modification of and addition to the rules for the regulation of Passenger-boats in the Port of Calcutta, published under date of the 20th June 1879 in the *Calcutta Gazette* of the 25th June 1879, page 589.

Rules for ascertaining the number of passengers which passenger-boats are to carry.

(*a*) For ordinary passenger boats, dinghees, green, and other open boats in which passenger space is not protected by bulwarks—

Divide the superficial area in square feet of the floor space available for the accommodation of passengers by 6, and the result will be the number of passengers the boats may be licensed to carry.

(*b*) For steamers and barges having cabin or 'tween deck floor space and deck space protected by rail, netting, or other sufficient bulwarks—

Divide the superficial area in square feet of the deck floor space available for the accommodation of passengers by 4·5, and the superficial area in square feet of the cabin or 'tween deck floor space available for the accommodation of passengers by 9, and the aggregate result of the quotients shall be the number of passengers the boat may be licensed to carry. In such vessels the spaces on bridges and tops of houses shall only be measured and included in the floor space, when, in the opinion of the surveyor, the beam and general stability of the vessels are sufficient to permit passengers being carried on such spaces in safety.

Rule 22A.

Any passenger on board any registered passenger-boat or steam-ferry plying within the limits of the port, which shall have on board passengers in excess of the number the boat or steam-ferry is licensed to carry, shall, upon being requested by the owner or person in charge of said boat or steam-ferry to leave the boat or steamer before the same has quitted the landing place at which such person embarked, and upon having the full amount of his fare (if he has paid the same) returned or tendered to him, forthwith leave the vessel; and any passenger refusing so to leave shall incur the penalty prescribed for any breach of these port rules.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

The 8th December 1883.—Plans and an estimate amounting to Rs. 50,000, for the construction of two landing stages, one at Meerbohur ghât and the other at Chandpal ghât, for the use of passenger boats and steamers plying in the port, having been submitted by the Vice-Chairman of the Commissioners for making improvements in the Port of Calcutta, with his letter No. 2561, dated the 28th September 1883, the Lieutenant-Governor sanctions the expenditure under the provisions of section 35 of Act V (B.C.) of 1870.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 8th December 1883.—In exercise of the power conferred upon him by section 7 of Act XII of 1875 (the Indian Ports Act), the Lieutenant-Governor sanctions the following addition to Rule 23 of the Rules for the Port of Calcutta, published in the *Calcutta Gazette* of the 20th August 1879:—

23A. The river between the lower buoy of the College Sand and Matea Brooz Ghât shall be kept clear for turning inward or outward bound vessels, and no vessels shall anchor within these limits. All vessels intending to anchor in Garden Reach shall be moored below Matea Brooz Ghât moorings in a clear swinging berth, as close to the south bank as the length and draught of the vessels will admit. Inward bound vessels proceeding above Matea Brooz Ghât shall moor in the stream between Fort Point and Tolly's Nullah, leaving the clear channel of 200 yards prescribed by Port Rule 23.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 6th December 1883.—The following Notice to Mariners is published for general information.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 6th December* 1883.

[Second Publication.]

NOTIFICATION.

The 3rd December 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, if no valid objections be raised within one month from this date, to approve of the following rules to regulate the account of expenditure on drainage schemes sanctioned under Act VI (B.C.) of 1880:—

Rules for the account of Expenditure on Drainage Schemes sanctioned under Act VI (B.C.) of 1880.

1. In the following rules the word "scheme" means any project or portion of a project sanctioned by the Government under section 54 of the Act as a separate scheme.

2. Expenditure on any scheme for the drainage and improvement of any tract of land under Act VI (B.C.) of 1880 will be incurred on estimates adopted by the Commissioners appointed under the Act and sanctioned by Government.

3. The expenditure will be incurred partly by the Public Works Department and partly by the Civil Department. The expenditure in the Civil Department will be in respect of compensation for lands taken for the purposes of the Act, and for damage inflicted in carrying out the scheme, salaries of officers, servants and establishments, and cost of surveys and valuations (other than those made by officers of the Public Works Department), whether antecedent or subsequent to the preparation of the scheme and plans.

4. On the vouchers on which such expenditure is incurred it will be distinctly stated for what particular scheme the payments are made, and no voucher shall be paid at the treasury unless it is first passed by the Collector of the district as a charge to a particular scheme under the Act.

5. The expenditure will be passed by the Accountant-General to charge of a special advance head to be opened for each scheme upon his accounts, and an account of all the transactions under each such account (opening and closing with a balance) will be forwarded by him to the Collector at the end of each quarter for communication to the Commissioners. The account should be made up in such detail as to show the *general* nature of the expenditure included in it, such as "surveys," "compensation for land," "payment of drainage," &c.

6. The accounts of expenditure in the Public Works Department will similarly be kept separately for each "scheme," the charges being in the first place passed to debit of a special advance head to be opened upon the books of the Examiner.

7. A quarterly account of the expenditure so charged will be prepared by the Examiner, and by him transmitted to the Accountant-General for communication to the Collector and the Commissioners. This account will show the general nature of the expenditure only, such as "establishments," "works," "stores" or any other similar particulars.

8. At the final closing of the account of each year, but not till then, the total charge upon the Examiner's books will be transferred to those of the Accountant-General, which will then show, under a separate advance account for each scheme, the total expenditure in each year, both in the Civil and in the Public Works Department.

9. At the end of each quarter, until the work is finally completed, the officer in charge of the works will, as required by section 27, make a detailed report to the Drainage Commissioners, through the Collector, of the progress of the works and the expenditure thereupon, so far as known to him, from the date to which the next preceding report has been brought down.

10. The quarterly account received from the Accountant-General by the Commissioners will be received as the statement of the accounts of Government in respect of each scheme. They will, on receipt, be examined by the Commissioners against the register of sanctioned charges (for Civil Department), and be compared with the quarterly report of the officer in charge of the works (for Public Works Department). The Commissioners will report to the Accountant-General objections they may have to raise to the accounts whether in respect of their completeness in point of the detail required for their purposes or in respect of their accuracy.

11. It shall be the duty of the Accountant-General to meet such criticisms, as far as consistent with the facts, by adjustments which will appear in the succeeding quarterly accounts. But the Accountant-General is the final authority in respect of the correctness of the account.

12. A copy of the certificate of completion of work required by section 28 of the Act will be sent by the officer in charge of the work to the Accountant-General, who will thereupon calculate the interest due up to date of completion, and add it to the total cost charged in his books to the advance head, for recovery from the persons concerned.

13. The interest shall be made up by reckoning for interest the total of the net expenditure shown in each quarterly account from the end of the quarter to which it appertains.

14. A complete account will now be made up by the Accountant-General in such detail as the Drainage Commissioners may require, but not in greater detail than that of the quarterly account. This complete account shows the total recoverable under the Act.

15. The Accountant-General will at the same time draw up a statement, agreeing with the above, showing the quarterly totals in the following form :—

Quarter ending.	Amount of expenditure.			Amount of interest till (a specified date.)
	Civil.	Public Works.	Total.	

The complete account, together with this statement, will be communicated by the Accountant-General to the Collector for communication to the Commissioners, and will be subscribed by the Accountant-General as a certificate under section 27 of the Act.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 4th December 1883.—The following Notice to Mariners is published for general information.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 53).

AFRICA—EAST COAST.

RED SEA—COAST OF ABYSSINIA.

Shoal off Rás Dumeirah.

NOTICE is hereby given that a dangerous shoal patch has been discovered lying about five miles north of Rás Dumeirah, and about 30 miles South-West of Mokha in the Red Sea.

This danger was reported by the master of the S. S. *Helmsley*, which vessel struck on it on the 16th October last, whilst on her passage to Bombay.

The *shoal* consists of sand about 530 feet long, and has a depth of about 18 feet on it at low water spring tides.

Position as given :—Latitude 12°56′ N. Longitude 43°05′ E.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 27th November* 1883

[Third Publication.]

NOTIFICATION.

The 26th November 1883.—In exercise of the powers conferred on him by Act XII of 1875 (The Indian Ports Act), the Lieutenant-Governor sanctions the addition of the following rules to the Rules for the Port of Calcutta, published in the *Calcutta Gazette* of the 20th August 1879 :—

From the lower boundary of the Port to Fultah Reach on the river Hooghly a deep navigable channel not less than 200 yards in width, shall always be left clear for the passage of sea-going vessels, and between the hours from daylight to dark no fisherman shall obstruct the same by mooring or casting a stake-net therein. At Sankrail, Peer Sarang, and below Budge-Budge, where the deep water channel lies close to the shore, land-marks have been erected to define the channel to be left clear, and no fishing boats shall be moored, nor nets of any description cast, between the line indicated by these marks and the shore.

Between the hours from daylight to dark no stake-net nor drift-net shall be cast by fishermen in any part of Garden Reach within port limits.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 26th November 1883.—The following revised rules framed under the provisions of sections 130 and 133 of Act VIII of 1878 (the Sea Customs Act), to regulate the transhipment of goods at the ports of Calcutta and Chittagong, having been approved by His Excellency the Governor-General in Council, are published for general information, as required by section 204 of that Act. These rules will take effect from the 1st December 1883, and supersede those published in the *Calcutta Gazette* of the 30th March 1881 and the 26th October 1881 :—

1. Applications for the transhipment of free goods should be presented to the proper officer of Customs before 3 P.M., and such goods will be allowed transhipment under the pass issued, without any charge.

2. Applications for the transhipment of dutiable goods should be presented to the proper officer of Customs before 3 P.M. on the day prior to that on which the transhipment is required, accompanied by the fees payable under section 133 of the Act, on the following scale for the port of Calcutta :—

For each transhipment between the hours of 8 A. M. and 5 P. M.—

	Rs.	A.	P.
On packages not exceeding 50 in number, each ...	0	4	0
On every ten or less than ten packages in excess of 50 ...	1	0	0

3. When transhipments of dutiable goods are not completed before 5 P. M., an additional fee of Rs. 4 will be charged.

4. *Chittagong.*—The transhipment fees payable on dutiable goods are as follow :—

	Rs.	A.	P.	
For single packages	0	8	0	per package.
For goods in bulk	6	4	0	per 100 maunds.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 7th December 1883.—Under section 3, Act I (B.C.) of 1876 (an Act to provide for the voluntary registration of Mahomedan marriages and divorces), the Lieutenant-Governor has been pleased to grant a license to Moulvie Abdullah, authorizing him to register Mahomedan marriages and divorces, and to exercise the other functions of a Mahomedan Registrar within the police-station of Comillah, in the district of Tipperah, with retrospective effect from the 14th September 1883.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT,—BENGAL.

The 5th December 1883.

No. 448.—*Leave.*—Mr. M. H. Maw, Assistant Engineer, Second Grade, Bengal Nagpore Railway Surveys, is granted one year's furlough on medical certificate, with effect from the 1st July 1883.

The 11th December 1883.

No. 449.—Mr. F. Lepper, Assistant Engineer, Second Grade, Buxar Division, is granted two days' privilege leave under section 73 of the Civil Leave Code and chapter II, paragraph 27 of the Public Works Department Code, in extension of the leave granted him in notification No. 289 of 14th August last.

No. 450.—*Posting.*—With reference to notification No. 372, dated 3rd November 1883, Mr. J. P. Coy, Assistant Engineer, Second Grade, is posted to the Buxar Division, which he joined on the afternoon of the 22nd November 1883.

No. 451.—*Transfer.*—Baboo Russick Lall Roy, Assistant Engineer, First Grade, is transferred from the Diamond Harbour Extension of the Calcutta and South Eastern State Railway to the Howrah-Ampta Survey.

No. 452.—*Corrigendum.*—In notification No. 403 of the 13th November 1883, *for* Mr. A. E. Sill, *read* Mr. A. E. Silk.

No. 453.—*Notification.*—With reference to notification No 440, dated the 4th instant, published at page 1232, Part I of the *Calcutta Gazette* of the 5th idem, it is hereby notified for general information that the estimate of the probable cost to be incurred in respect of the repairs and maintenance of the 65 miles of the Gunduck tuccavee embankment and the works connected therewith in the district of Chumparun during 20 years commencing from the 1st April 1883, amounts, at the rate of Rs. 200 per mile per annum, to Rs. 2,60,000, and that the Lieutenant-Governor proposes, under section 63 of Act II (B.C.) of 1882 to fix the aforesaid total sum of Rs. 2,60,000 as payable during the said 20 years by the zemindars of the estates benefited by such repairs, maintenance and works, should no valid objections thereto be preferred. Any person interested who desires to object to the above-mentioned order is required to prefer, within three months of the date of its first publication in the *Calcutta Gazette*, such objection as he may think proper to the Collector of Chumparun for consideration by the Lieutenant-Governor.

No. 454.—*Notification.*—The following notification of the Government of India, Public Works Department, is republished for information :—

No. 287, *dated the 7th December* 1883.—Mr. R. B. Buckley, Executive Engineer, second grade, Bengal, is appointed to officiate as Under-Secretary to the Government of India in the Public Works Department, during the absence, on furlough, of Major G. F. L. Marshall, R.E., or until further orders.

No. 455.—*Notification.*—Mr. D. B. Horn is appointed to officiate as Executive Engineer of the Circular and Eastern Canals Division from the afternoon of the 30th November 1883.

IRRIGATION.

Dated 11th December 1883.

J. M. HEYWOOD, *Lieut-Col.*, R.E.,

Offg. Joint-Secretary to the Govt. of Bengal, P. W. Dept.

JAIL DEPARTMENT.

No. 11024, *dated 5th December* 1883.—Surgeon E Bovill made over charge of the Jessore Jail to Surgeon D. W. D. Comins in the forenoon of the 29th November 1883.

No. 11087, *dated 6th December* 1883.—Mr. E. W. Payne made over charge of the Alipore and Russa Jails to Lieutenant-Colonel R. Beadon on the afternoon of the 1st December 1883.

A. S. LETHBRIDGE, *Inspector-General of Jails, Bengal.*

TREASURY NOTICES.

BABOO NOBIN CHUNDER SEN, Deputy Collector, has been placed temporarily in charge of the Treasury at Bhagulpore, during the absence of Baboo Ram Narayan Banerjee at the Exhibition.

S. P. CHATTERJEE, *Personal Assistant to the Commissioner, for Commissioner.*

COMMISSIONER'S OFFICE, BHAGULPORE DIVISION, *the 7th December* 1883.

EDUCATIONAL NOTICES.

Government Engineering College, Howrah.

CANDIDATES for admission to the Engineer Classes should apply to the Principal before the 31st January 1884. The Session begins on Monday, the 4th February 1884. Candidates for this class must furnish proof that they have passed the Calcutta University Entrance Examination.

An examination for admission to the Mechanical Apprentice Classes will be held at this College on Wednesday and Thursday, the 30th and 31st January. The subjects for examination are—

Arithmetic (the whole).
Algebra (to Simple Equations, inclusive).
Euclid (Book I and II).
English (Grammar and Composition).

Applications for permission to appear at the examination should reach the Principal not later than the 25th January 1884.

Ten scholarships will be awarded to students entering the Engineer Class, not being already holders of junior scholarships. The scholarships will be awarded with general reference to the place taken by candidates at the Entrance Examination. Applications for scholarships will be received by the Principal up to the 30th January.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eye-sight.

Further particulars will be supplied on application to the Principal.

G. BELLETT, *Offg. Director of Public Instruction.*

THE next Pleadership and Mookhtarship Examination will be held on Thursday, Friday and Saturday, the 14th, 15th and 16th of February 1884, instead of on Thursday and Friday, the 7th and 8th of February, as originally notified.

The written portion of the examination of the Mookhtarship candidates will be held on Thursday, the 14th, and the Pleadership candidates will be required to attend on that day for their *viva voce* examination only.

The written portion of the examination for the Pleadership candidates will be held on Friday and Saturday, the 15th and 16th of February.

HENRY T. HYDE,

Secretary to the Board of Examiner for Pleadership and Mookhtarship.

The 20th November 1883.—The following correspondence and regulations for the Matriculation Examination of the University of London are published for general information.

A. P. MACDONNELL,
Secretary to the Govt. of Bengal.

No. 105P., dated India Office, London, the 20th September 1883.

From—Her Majesty's Secretary of State for India,
To—His Excellency the Most Hon'ble the Governor-General of India in Council.

I FORWARD herewith a packet of Regulations for the Matriculation Examination of the University of London, transmitted to this office by the Clerk to the Senate of the University, in order that candidates for the Gilchrist Indian Scholarship in the divisions of the Bengal Presidency may be informed of the requirements of that examination.

2. I take this opportunity of forwarding a copy of a letter received from the Secretary to the Trustees of the Gilchrist Educational Trust, in which it is stated that, owing to the very limited competition among natives of India for the Gilchrist Scholarships provided for their benefit, the Trustees have decided to admit candidates from Ceylon to compete with those of India for the single scholarship of £150 per annum to be henceforth annually awarded.

Dated 21st August 1883.

No. 4, dated Broad Sanctuary, London, the 21st August 1883.

From—W. B. CARPENTER, ESQ., Secretary to the Trustees of the Gilchrist Educational Trust,

To—Her Majesty's Secretary of State for India.

GILCHRIST EDUCATIONAL TRUST.

Trustees:

CHARLES HOLLAND, ESQ., M.D., F.R.S. | ROBERT VERITY, ESQ., M.D.
SIR JOHN BOWRING, LL.D., F.R.S. | WILLIAM BURNLEY HUME, ESQ.

GEORGE GROTE, ESQ., D.C.L., F.R.S.

Secretary:

W. B. CARPENTER, ESQ., M.D., F.R.S.

Standing Counsel:

F. H. BOWRING, ESQ.

Solicitors:

MESSRS. F. J. AND G. J. BRAIKENRIDGE.

I HAVE the honour of informing you that in consequence of the very limited competition among natives of India for the Gilchrist Scholarships provided for their benefit (only a single candidate having appeared at the last examination, although there were then two scholarships each of £100 per annum), the Trustees have decided to admit candidates from Ceylon to compete with those of India for the single scholarship of £150 per annum to be henceforth annually awarded in accordance with my previous communication to you.

In making the increase to the annual stipend of the single scholar, the Trustees desire to place him beyond the necessity of supplementing their allowance from private resources. They have no doubt that, with due economy, the sum of £150 per annum will suffice to meet the necessary expenses of their scholar's maintenance and education during his residence in this country.

EXAMINATIONS IN 1883-84.

THE following are the dates at which the several examinations in the University of London for the year 1883-84 will commence:—

MATRICULATION.—Monday, June 18, 1883; and Monday, January 14, 1884.

MASTER OF SURGERY.—Monday, December 3.

DOCTOR OF MEDICINE.—Monday, December 3.

SUBJECTS RELATING TO PUBLIC HEALTH.—Monday, December 10.

BACHELOR OF MUSIC.—Intermediate, Monday, December 10; B. Mus., Monday, December 17.

DOCTOR OF MUSIC.—Intermediate, Monday, December 10; D. Mus., Monday, December 17.

ART, &c., OF TEACHING.—Tuesday, March 4, 1884.

REGULATIONS.

MATRICULATION.

[CANDIDATES for any degree in this University must have passed the Matriculation Examination. No exemption from this rule is allowed on account of degrees obtained or examinations passed at any other University.

This examination is accepted (*a*) by the College of Surgeons, (*b*) by the incorporated Law Society, in lieu of their preliminary examinations. It also exempts candidates for admission to the Royal Military College from the preliminary test, except in Geometrical Drawing. And it is among those examinations of which some one must be passed (1) by every medical student on commencing his professional studies; and (2) by every person entering upon Articles and Clerkship to a Solicitor, any such person matriculating in the First Division being entitled to exemption from one year's service.

This and all other examinations of the University, together with the prizes, exhibitions, scholarships, and medals depending upon them, are open to women upon exactly the same conditions as to men.]

There shall be two examinations for Matriculation in each year—one commencing on the second Monday in January, and the other on the third Monday in June.[1]

No candidate shall be admitted to the Matriculation Examination unless he have produced a certificate showing that he has completed his sixteenth year.[2] This certificate shall be transmitted to the Registrar at least *fourteen days* before the commencement of the examination.

A fee of two pounds shall be paid at Matriculation. No candidate shall be admitted to the examination unless he have previously paid this fee to the Registrar.[3] If, after payment of his fee, a candidate withdraws his name, or fails to present himself at the examination, or fails to pass it, the fee shall not be returned to him, but he shall be allowed to enter for any subsequent Matriculation Examination upon payment, at every such entry, of an additional fee of one pound, provided that he gives notice to the Registrar at least *fourteen days* before the commencement of the examination.

The examination shall be conducted by means of printed papers; but the Examiners shall not be precluded from putting, for the purpose of ascertaining the competence of the candidates to pass *viva voce* questions to any candidate in the subjects in which they are appointed to examine

Candidates shall not be approved by the Examiners unless they have shown a competent knowledge in each of the following subjects, according to the details specified under the several heads:—

1. Latin.
2. Any two[4] of the following languages:—(*a*) Greek, (*b*) French, (*c*) German, and (*d*) either Sanskrit or Arabic.[5]
3. The English Language, English History, and Modern Geography.
4. Mathematics.
5. Natural Philosophy.
6. Chemistry.

The following are the particulars of the foregoing subjects of examination:—

LANGUAGES.

LATIN—

One Latin subject to be selected by the Senate one year and a half previously from the works of the undermentioned authors[6]:—

Virgil.—One book of the Georgics and one book of the Æneid.

Horace.—Two books of the Odes.

---

[1] These examinations may be held not only at the University of London, but also, under special arrangement (*see* Appendix I), in other parts of the United Kingdom or in the Colonies.

[2] A certificate from the Registrar-General in London or from the Superintendent Registrar of the district, or a certified copy of the baptismal register, is required *in every case in which it can possibly be obtained*. In other cases a declaration of the candidate's age, and that he is unable to procure his certificate of birth or baptism, made before a Magistrate by his parent or guardian, or by himself if of full age, will be accepted. The certificate of each candidate is returned to him when he inscribes his name on the register of the University either in London or in the provinces. Information respecting the time for such registration will be sent to each candidate when the receipt of his certificate of age is acknowledged.

[3] The fee must be paid when the candidate inscribes his name on the register of the University, and should not be sent in advance.

[4] No credit will be given for more than two of these languages.

[5] Candidates desiring to be examined in either Sanskrit or Arabic must give at least *two calendar months'* notice to the Registrar, and must mention the other optional language which they select

[6] The LATIN subjects for 1884 and 1885 will be—

For January 1884—*Sallust*, Catiline.
For June 1884—*Cicero*, De Amicitiâ, with Oration I against Catiline.
For January 1885—*Virgil*, Georgics, Book IV, and Æneid, Book I.
For June 1885—*Cæsar*, The Gallic War, Books V and VI.

Sallust.—The Conspiracy of Catiline, or the War with Jugurtha.
Cæsar—Two books of the Gallic War.
Livy.—One book.
Cicero.—De Senectute or De Amicitiâ, with one of the following Orations: Pro Lege Manilia, one of the four Catilinarian Orations, Pro Archiâ Pro M. Marcello.
Ovid.—One book of the Metamorphoses and one book of the Epistles or Heroides.

The paper in Latin shall contain passages to be translated into English, with questions in History and Geography arising out of the subjects of the book selected. Short and easy passages shall also be set for translation from other books not so selected. A separate paper shall be set containing questions in Latin Grammar, with simple and easy sentences of English to be translated into Latin.[1]

GREEK[2]—

One Greek subject to be selected by the Senate one year and a half previously from the works of the undermentioned authors[3]:—

Homer.—One book. | *Xenophon.*—One book.

The paper in Greek shall contain passages to be translated into English, with questions in Grammar,[4] and with questions in History and Geography arising out of the subjects of the book selected. Short and easy passages shall also be set for translation from other books not so selected.

FRENCH—

The paper in French shall contain passages for translation into English, and questions in Grammar, limited to the Accidence.

GERMAN—

The paper in German shall contain passages for translation into English, and questions in Grammar, limited (except when German is taken as an alternative for Greek[2]) to the Accidence.

SANSKRIT[5]—

One Sanskrit subject to be selected by the Senate one year and a half previously from the undermentioned works[6]:—

Hitopadésa, Books II to IV.
Pañchatantra, Books II to V.
Sâhityaparichaya, Parts I and II, pages 1-93.
Râmâyana, Book I.
Mâhâbhârata (Story of Nala, Story of Sâvitrî, Bakavadhaparvan, S'akuntalopâkhyâna).
Manu, Books II to VII.

The paper in Sanskrit shall contain passages to be translated into English, with questions in Grammar. A passage or short passages shall also be set for translation from other books not so selected.

ARABIC[4]—

The paper in Arabic shall contain passages for translation into English, and questions in Grammar.

THE ENGLISH LANGUAGE, ENGLISH HISTORY, AND MODERN GEOGRAPHY—

Orthography: Writing from Dictation: The Grammatical Structure of the Language.
History of England to the end of the Seventeenth Century, with questions in Modern Geography.

MATHEMATICS.

ARITHMETIC—

The ordinary Rules of Arithmetic.
Vulgar and Decimal Fractions.
Extration of the Square Root.

ALGEBRA—

Addition, Subtraction, Multiplication, and Division of Algebraical Quantities.
Proportion.
Arithmetical and Geometrical Progression.
Simple Equations.

GEOMETRY—

The first four Books of Euclid or the subjects thereof.

---

[1] Special stress is laid on accuracy in the answers to the Grammar questions and on the correct rendering of English into Latin.

[2] Candidates may substitute German for Greek.

[3] The GREEK subjects for 1884 and 1885 will be—
For January 1884—*Homer*, Odyssey, Book VII.
For June 1884—*Xenophon*, Cyropædia, Book V.
For January 1885—*Homer*, Odyssey, Book IX.
For June 1885—*Xenophon*, Hellenics, Book II.

[4] Special stress is laid on accuracy in the answers to the questions in Greek Grammar.

[5] That is, on the Tuesday morning (*see* Time Table, page 58).

[6] *See* the third note in page 2.
The SANSKRIT subjects for 1884 and 1885 will be—
For January 1884—Pañchatantra, Book IV; Mâhâbhârata, Nala, chapters 1-13; Manu, Book II.
For June 1884—Hitopadésa, Book II; Mâhâbhârata, Nala, chapters 14-26; Manu, Book III.
For January 1885—Sâhityaparichaya, Part II, pages 20-51; Râmâyana, Book I, chapters 5-16; Manu, Book IV.
For June 1885 Sâhityaparichaya, Part II, pages 52-93; Râmâyana, Book I, chapters 51-65 Manu, Books VI and VII.

NATURAL PHILOSOPHY.[1]

MECHANICS—

Composition and Regulation of Statical Forces.
Simple Machines (*Mechanical Powers*).—Ratio of the Power to the Weight in each.
Centre of Gravity.
General Laws of Motion, with the chief experiments by which they may be illustrated.
Law of the Motion of Falling Bodies.

HYDROSTATICS, HYDRAULICS, AND PNEUMATICS—

Pressure of Liquids and Gases, its equal diffusion, and variation with the depth.
Specific Gravity, and modes of determining it.
The Barometer, the Siphon, the Common Pump and Forcing Pump, and the Air-Pump.

OPTICS—

Laws of Reflexion and Refraction.
Formation of Images by Mirrors and Simple Lenses.

HEAT—

Its sources; expansion; thermometers—relations between different Scales in common use; difference between Temperature and Quantity of heat; Specific and Latent heat; Calorimeters; Liquefaction; Ebullition; Evaporation; Conduction; Conviction; Radiation.

CHEMISTRY.

Chemistry of the Non-Metallic elements; including their compounds as enumerated below—their chief physical and chemical characters—their preparation—and their characteristic tests.
Oxygen, Hydrogen, Carbon, Nitrogen; Chlorine, Bromine, Iodine, Fluorine; Sulphur, Phosphorus, Silicon.
Combining Proportions by weight and by volume; General nature of Acids, Bases, and Salts; Symbols and Nomenclature.
The Atmosphere—its constitution; effects of Animal and Vegetable life upon its composition.
Combustion; Structure and properties of Flame; Nature and composition of ordinary Fuel.
Water; Chemical peculiarities of Natural Waters, such as rain-water, river-water, spring-water, sea-water.
Carbonic Acid; Carbonic Oxide; Oxides and Acids of Nitrogen; Ammonia; Olefiant Gas, Marsh Gas; Sulphurous and Sulphuric Acid; Sulphuretted Hydrogen.
Hydrochloric Acid; Phosphoric Acid and Phosphuretted Hydrogen; Silica.

The examinations shall be conducted in the following order:—

MONDAY—

Afternoon, 2 *to* 4.—Latin.
4 *to* 6.—Latin Grammar and Composition.

TUESDAY—

Morning, 10 *to* 1.—Greek, German, Sanskrit, or Arabic.
Afternoon, 3 *to* 6.—French or German.

WEDNESDAY—

Morning, 10 *to* 1.—Arithmetic and Algebra.
Afternoon, 3 *to* 6.—Geometry.

THURSDAY—

Morning, 10 *to* 1.—English Language.
Afternoon, 3 *to* 6.—English History and Modern Geography.

FRIDAY—

Morning, 10 *to* 1.—Natural Philosophy.
Afternoon, 2 *to* 5.—Chemistry.

On Monday morning at 9 o'clock in the week next but two after the examination, the Examiners shall publish a list of the candidates who have passed, arranged in alphabetical order. And on the Monday morning next following at 9 o'clock, the Examiners shall publish a list of the candidates who have passed arranged in three Divisions—in the Honours Division in the order of proficiency[2]; in the First and Second Divisions in alphabetical order.

A pass certificate signed by the Registrar shall be delivered to each candidate who shall apply for it after the report of the Examiners shall have been approved by the Senate.[3]

---

[1] The questions in Natural Philosophy will be of a strictly elementary character.

[2] The places of candidates in the Honours Division are determined by their respective degrees of proficiency in the subjects of the examination taken collectively.

[3] Certificates cannot generally be issued until about three weeks after publication of the classified pass list of each examination. A candidate may apply for his certificate personally or by letter; or may furnish some other person with written authority (which must be produced) to receive it on his behalf.

If in the opinion of the Examiners any candidates in the Honours Division of not more than twenty years of age at the commencement of the examination shall possess sufficient merit, the first among such candidates shall receive an exhibition of thirty pounds per annum for the next two years; the second among such candidates shall receive an exhibition of twenty pounds per annum for the next two years; and the third shall receive an exhibition of fifteen pounds per annum for the next two years; such exhibitions to be payable in quarterly instalments, provided that on receiving each instalment the Exhibitioner shall declare his intention of presenting himself either at the two examinations for B.A., or at the two examinations for B.Sc., or at the INTERMEDIATE EXAMINATION IN LAWS, or at the PRELIMINARY SCIENTIFIC and INTERMEDIATE EXAMINATIONS IN MEDICINE, within three academical years[1] from the time of his passing the MATRICULATION EXAMINATION.

Under the same circumstances, the fourth among such candidates shall receive a prize to the value of ten pounds in books, philosophical instruments, or money; and the fifth and sixth shall each receive a prize to the value of five pounds in books, philosophical instruments, or money.

Any candidate who may obtain a place in the Honours Division at the MATRICULATION EXAMINATION in January shall be admissible to the INTERMEDIATE EXAMINATION either in ARTS or in SCIENCE in the following July.

APPENDIX.

I.

PROVINCIAL EXAMINATIONS.

THESE examinations are appointed by the Senate from time to time upon the application of any City, Institution, or College desiring to be named as a local centre for one or more examinations; and are carried on simultaneously with the examinations in London, under the supervision of Sub-Examiners also appointed by the Senate.

Candidates wishing to be examined at any Provincial centre must give notice of entry (naming the centre they select, and inclosing their certificates) to the Registrar of the University of London, who will make all necessary arrangements.

A fee varying from £1 to £2 is usually charged by the local authorities in addition to the University fee.

Both fees are payable on registration, which takes place at the Provincial centres at a time and place of which due notice will be sent to candidates.

The answers of the candidates at the Provincial examinations are reviewed by the Examiners at the same time with the answers of the candidates examined in London; and a list of the candidates who have passed at each Provincial examination is published, at the time fixed by the Regulations, at the place where such examination has been held.

The MATRICULATION EXAMINATION of JUNE 1883 was held at—

Aberystwith:—University College.
Birmingham:—Queen's College.
Bristol:—University College.
Cheltenham (for ladies only):—The Ladies' College.
Downside:—St. Gregory's College.
Eastbourne:—New College.
Edinburgh:—The Literary Institute.
Epsom:—The Royal Medical College.
Leeds:—The Yorkshire College.
Liverpool:—University College.
Manchester:—The Owen's College.
Newcastle-on-Tyne:—The School of Science and Art.
Sheffield:—Firth College.
Stonyhurst:—Stonyhurst College.
Ushaw:—St. Cuthbert's College.
Ware:—St. Edmund's College.

The MATRICULATION EXAMINATION of JANUARY 1884 will be held at—

Birmingham:—Queen's College.
Glasgow:—Anderson's College.
Leeds:—The Yorkshire College.
Nottingham:—University College.
Portsmouth:—The Grammar School.

The MATRICULATION EXAMINATION of JUNE 1884 will be held at—

Birmingham:—Queen's College.
Bristol:—University College.

The INTERMEDIATE EXAMINATION IN ARTS, 1883, was held at—

Birmingham:—The Mason Science College.
Cheltenham (for ladies only):—The Ladies' College.

[1] By the term "Academical Year" is ordinarily meant the period intervening between any examination and an examination of a higher grade in the following year, which period may be either *more* or *less* than a calendar year. Thus the interval between the *Intermediate* Examinations in Arts, Science, and Medicine, and the *Degree* Examinations of the next year in those Faculties, respectively, is about sixteen months; whilst the interval between the B.A. Examination and the M.A. Examination of the next year, or between the B.Sc. Examination and D.Sc. Examination of the next year, is less than eight months. Nevertheless, each of these intervals is counted as an "Academical Year."

Liverpool :—University College.
Manchester :—The Owen's College.
Ushaw :—St. Cuthbert's College.

The INTERMEDIATE EXAMINATION IN SCIENCE[1] and the PRELIMINARY SCIENTIFIC (M.B.) EXAMINATION,[1] 1883, was held at—

Birmingham :—The Mason Science College.
Liverpool :—University College.
Manchester :—The Owen's College.

The B.A. EXAMINATION, 1883, will be held at—

Liverpool :—University College.
Manchester :—The Owen's College.
Ushaw :—St Cuthbert's College.

II.

SCHOLARSHIPS, &c.

GILCHRIST SCHOLARSHIPS, EXHIBITIONS, AND PRIZES.

I.—BRITISH SCHOLARSHIPS, &c.

(a) For male candidates.

1. A scholarship of the value of fifty pounds per annum, and tenable for three years is annually awarded to the candidate from the ROYAL MEDICAL COLLEGE, EPSOM, who at the June Matriculation Examination stands highest among the candidates approved by the Head Master of that institution, and who passes either in the Honours List or in the First Division, on condition of his prosecuting his studies during the tenure of his scholarship with a view to graduation in one of the Faculties of the University of London.—Particulars may be obtained on application to the Secretary of the Royal Medical College, 37, Soho Square, W.

2. A similar amount is annually offered to candidates intending to pursue, at OWEN'S COLLEGE, MANCHESTER, their studies for graduation in one of the Faculties of the University of London, a single scholarship of fifty pounds per annum for three years being awarded to the highest of those candidates at the June Matriculation Examination who shall have been previously approved by the Principal of Owen's College, provided that he pass in the Honours Division; or, in case no candidate should so pass, two scholarships, each of twenty-five pounds per annum, being awarded to the two candidates as aforesaid who shall stand highest in the First Division.—Particulars may be obtained on application to the Principal of Owen's College, Manchester.

3. A scholarship of fifty pounds per annum, tenable for three years, is also annually awarded to that candidate in the Honours Division at the June Matriculation Examination who shall stand highest of the candidates previously approved by the Principal of UNIVERSITY COLLEGE, BRISTOL, and who intends to study at that College with a view to graduation in one of the Faculties of the University of London. [N.B.—This scholarship is open to women.] Further particulars may be obtained on application to the Principal of University College, Bristol.

(b) For female candidates.

1. Two exhibitions—one of thirty pounds, the other of twenty pounds per annum,—tenable for two years, will be awarded at the *June* Matriculation Examination to the two female candidates of not more than twenty years of age at the commencement of the examination who pass highest in the Honours Division to assist them in pursuing their studies at some collegiate institution approved by the Gilchrist Trustees.

2. Two exhibitions—one of forty pounds, the other of thirty pounds per annum,—tenable for two years, will be awarded to the two female candidates who pass highest at the Intermediate Examination in Arts (provided that they obtain in the one case at least two-thirds, and in the other at least three-fifths, of the total number of marks to assist them in pursuing their studies at some collegiate institution approved by the Gilchrist Trustees.

3. A gold medal of the value of twenty pounds (or a book prize of the same value) will be awarded to the female candidate who passes highest at the B.A. Examination, provided she obtain not less than two-thirds of the total number of marks.

[See also the BRISTOL Scholarship above.]

Further particulars may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S. W.

II.—INDIAN SCHOLARSHIPS.

Two scholarships, each of the value of one hundred pounds per annum, and tenable for four years, are annually awarded to the two native candidates who pass highest in the January Matriculation Examination carried on at CALCUTTA, BOMBAY, and MADRAS, provided that such candidates pass either in the Honours or in the First Division, are not more than

---

[1] With the exception of the practical examinations in Biology and Zoology which must be carried on at the University.

22 years of age, and are desirous of prosecuting their studies either at the University of Edinburgh or at University College, London, with a view to graduation in one of the Faculties of the University of London.

Further particulars of the *Indian scholarships* may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S. W.

III.—COLONIAL SCHOLARSHIPS.

1. A scholarship of the value of one hundred pounds per annum, and tenable for three years, is annually awarded to the highest among those candidates at the June Matriculation Examination carried on in the DOMINION OF CANADA who pass either in the Honours or in the First Division, are not more than 22 years of age, and are desirous of prosecuting their studies either at the University of Edinburgh or at University College, London, with a view to graduation in one of the Faculties of the University of London.

2. A similar scholarship, under the same conditions, is annually awarded to the candidate who passes the highest at the January Matriculation Examination carried on in the WEST INDIA COLONIES

3. A similar scholarship, under the same conditions, is biennially awarded to the candidate who passes highest at the June Matriculation Examination carried on at HOBART TOWN, Tasmania.

4. A similar scholarship, under the same conditions, is biennially awarded to the candidate who passes highest at the June Matriculation Examination carried on in NEW ZEALAND.

5. A scholarship of one hundred pounds per annum, tenable for three years, is biennially awarded to the Bachelor of Arts of the University of SYDNEY who may be nominated by the authorities of that University, and who is desirous of prosecuting his studies either at the University of Edinburgh or at University College, London, with a view to graduation in one of the Faculties of the University of London.

(*Note.*—Every candidate for a Colonial scholarship must either be a native of the Colony in which he presents himself, or have resided therein for the five years immediately preceding.)

Further particulars of the *Colonial scholarships* may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S. W.

WEST SCHOLARSHIP.

The scholarship, of the value of thirty pounds, and tenable for one year, is awarded by the Council of University College, London, to that candidate at the June Matriculation Examination who distinguishes himself the most in English.—Further particulars may be obtained of the Secretary of University College, Gower Street, London, W. C.

TUFFNELL SCHOLARSHIPS.

Two scholarships, of the value of about one hundred pounds each, and tenable for two years, are awarded by the Council of University College for distinction in Analytical and Practical Chemistry, and in General Chemistry, alternately, to that student of the College, *being an undergraduate of the University of London of not more than three years' standing*, who shall have passed the most distinguished examination in the subjects for which the scholarship is to be conferred, and shall have evinced sufficient merit to entitle him to the scholarship.—Further particulars may be obtained of the Secretary of University College, Gower Street, London, W.C.

REID STUDENTSHIPS FOR WOMEN.

One free studentship at Bedford College, value 30 guineas per annum, tenable for two years, will be awarded to the woman taking the highest place in the Honours Division of the June Matriculation Examination, 1883.

One free studentship at Bedford College, value 30 guineas per annum, tenable for two years, will be awarded to the woman taking the highest place in the Intermediate Examination in Arts, 1883.

One free studentship at Bedford College, value 30 guineas per annum, tenable for two years, will be awarded to the woman taking the highest place in the Intermediate Examination in Science, 1883.

For further particulars application should be made to "The Reid Trustees," Bedford College, York Place, Portman Square, London, W.

[NOTE.—The Gilchrist and other Scholarships announced in this appendix are awarded by the respective Educational Bodies upon the result of the University Examinations; but the University has otherwise no control over, and is not responsible for such award.]

III.

INSTRUCTIONS TO CANDIDATES FOR MATRICULATION.

Care should be taken, in sending notice, to give a correct postal address; and the candidate's full name should be distinctly written.

Fees should not be sent by post.

Candidates entering their names for the examination for the first time should on no account send a notice of entry to the Registrar unaccompanied by the requisite document

giving proof of age. No candidate, however old, is admitted to the examination without the production of such a document.

A certificate must in all cases be accompanied by a letter stating that the person to whom it relates wishes to enter for the examination.

The age of a candidate with regard to entry is reckoned from the first day of the several examinations, that day being computed to fall as late as the Regulations will possibly allow. The two dates, in the case of the Matriculation Examinations, are January 14th and June 21st. Candidates who *complete their sixteenth year* on either of those dates will therefore be admissible to the January or the June examination, as the case may be; but no further extension of time will be allowed.

Candidates who have previously presented themselves at the examination need not send in their certificates of age a second time; but should state, when giving notice of entry, that they have so presented themselves.

Notice of entry should not be sent earlier than six weeks before the commencement of the examination.

The full marks obtainable at the Matriculation Examination are 2,800. Of these 2,000 qualify for a Prize, 1,800 for Honours, and 1,400 for the First Division. There is no regulation fixing the number of marks required for a pass. No further details as to the marking at this or other examinations can be furnished.

The alphabetical pass list is sent, as soon as it is printed off, to every College or School from which any candidate (whether successful or not) has immediately proceeded to the Matriculation Examination.

The classified list is sent to every College or School from which a *successful* candidate has immediately proceeded. It is also widely circulated among the leading newspapers of the United Kingdom.

Lists cannot be supplied to individual candidates or their friends.

The examination papers of past examinations are not published separately; but the papers of the previous academical year are printed in the University Calendar of the current year, which is issued annually at the beginning of April, and is to be obtained (price 4*s.*) of the publishers, Messrs. Taylor and Francis, Red Lion Court, Fleet Street, E.C.

Subordinate Educational Service.

The 21st November 1883.—Moonshi Sajewan Lal, Second Master, Patna Normal School (class VII), was on leave of absence without pay for two days, viz. the 4th and 5th October 1883

Babu Hari Das Banerjea, M.A., Second Master, Mozufferpore Zillah School (class VI), was on leave of absence without pay for seven days, with effect from the 7th October 1883.

The 23rd November 1883.—Moulvi Abdul Rohim, Deputy Inspector of Schools, Patna (class IV), is allowed leave of absence for a month and a half, under section 71, chapter V of the Civil Leave Code, with effect from the 2nd November 1883, or such subsequent date as he may avail himself of it, and Moonshi Janki Prasad, Sub-Inspector of Schools, Patna (class VII), is placed in temporary charge of the Deputy Inspector's duties in addition to his own.

Babu Sasadhar Bhattacharjea, Officiating Deputy Inspector of Schools, Purneah (class VII and officiating in class VI), was on leave of absence without pay for a week, with effect from the 18th October 1883.

Moonshi Baladava Ram, B.A., Deputy Inspector of Schools, Purneah, and now Officiating Deputy Inspector of Schools, Chumparun (class VI), having returned to duty on the 4th October 1883, the unexpired portion of the leave granted to him under the orders of the 9th March 1883 is cancelled.

The 26th November 1883.—Babu Radha Kisor Chakravarti, Sub-Inspector of Schools, Dacca (class VI), is appointed to officiate as Deputy Inspector of Schools in that district, *vice* Babu Kailas Chandra Sen on deputation, and to act in class V, *vice* Babu Bhuban Mohan Sen.

Babu Surendra Kumar Bose, B.C.E., Assistant Teacher of Surveying, Government Engineering College, Sebpore (class VI), is allowed leave of absence for a month, under sections 127 and 128, chapter X of the Civil Leave Code, with effect from the 19th November 1883.

Mr. C. Warde is appointed to officiate as Assistant Teacher of Surveying, Government Engineering College, Seebpore, and to act in class VI, with effect from the date on which he may join his appointment, *vice* Babu Surendra Kumar Bose, B.C.E., on leave.

The 29th November 1883.—Moulvi Abul Khair, M.A., Superintendent of the Rajshahi Madrasah (class IV), is appointed Deputy Inspector of Schools, Hazaribagh, with effect from the 15th December 1883.

The 30th November 1883.—Babu Purna Chandra Ghosh, Second Master, Palamow Government School, is appointed to officiate as Head Master of the same institution, and to act in class VI, with effect from the 11th September 1883.

The 1st December 1883.—Babu Ram Kumar Basak, B.A., Seventh Master, Dacca Collegiate School (class VII), is allowed leave of absence for three weeks, under section 72, rule I(*a*), chapter V of the Civil Leave Code, with effect from the 19th October 1883, or any subsequent date on which he may avail himself of it.

Babu Siris Chandra Banerjea, Fifth Assistant Teacher, Dacca Collegiate School, is appointed to officiate as Seventh Master of the same institution, and to act in class VII, *vice* Baboo Ram Kumar Basak, B.A., on leave.

The 5th December 1883.—Babu Brajendra Kumar Guha, B.A., Deputy Inspector of Schools, Mymensingh (class IV), is allowed leave of absence for three months, under section 71, chapter V of the Civil Leave Code, with effect from the 11th December 1883, or any subsequent date on which he may avail himself of it.

Babu Krishna Nath Banerjea, Sub-Inspector of Schools, Mymensingh (class VII), is appointed to officiate as Deputy Inspector of Schools, Mymensingh, and to act in class V, during the absence on leave of Babu Brajendra Kumar Guha, B.A., or until further orders.

The 6th December 1883.—Babu Rajendra Chandra Banerjea, M.A., is appointed temporarily to be Assistant Professor of Rhetoric and Grammar, Sanskrit College, in class VI, with effect from the 25th September 1883, the date on which he joined his appointment, *vice* Babu Hara Prasad Bhattacharjea, M.A., or until further orders.

The 7th December 1883.—Babu Giridhari Bose, Deputy Inspector of Schools, Dinagepore (class VI), acted in class V for two months and twenty-one days, *vice* Babu Sri Nath Datta.

Babu Sital Chandra Chatterjea, Sub-Inspector of Schools, Manbhoom, acted in class VI for two months and twenty-one days, *vice* Babu Giridhari Bose.

Babu Rasamay Mitra, M.A., is appointed temporarily to be Additional Master, Arrah Zillah School, in class VI, during the absence on deputation of Babu Jadu Nath Majumdar, M.A., or until further orders.

Babu Trailokya Nath Ghosh, B.A., Second Master, Balasore Zillah School (class VII), is appointed temporarily to be Deputy Inspector of Schools, Balasore, *vice* Babu Chatur Bhuj Patnaik, B.A., resigned

The 8th December 1883.—Babu Chandra Nath Maitra, Head Master, Arrah Zillah School (class IV), was on leave of absence for two days, viz. the 17th and 18th March 1883, under section 72, Rule I (*a*), chapter V of the Civil Leave Code.

G. BELLETT,
Offg. Director of Public Instruction.

Gilchrist Scholarship Examination Notification.

WITH reference to the Government notification of the 12th December 1868, published in the *Calcutta Gazette* of the 16th idem, page 2044, and subsequent orders No. 274, dated the 13th April 1880, it is hereby notified that an examination for the Gilchrist Scholarship will be held on Monday, the 14th January 1884, and the following days, at the Presidency College, Calcutta, at 10 A.M.

G. BELLETT, *Offg. Director of Public Instruction.*

Calcutta, the 20th November 1883.

NOTIFICATION OF THE BOARD OF REVENUE.

No. 1305B.

NOTIFICATION.

NOTICE is hereby given that the Provision Opium to be brought forward for sale by public auction in the year 1884 will consist of about 22,200 chests prepared at the Patna factory, each chest of which is believed to contain 1 maund 18 seers 12 chittacks of pure opium, besides 9 seers 6 chittacks used for pasting the leaves of the shell, and about 25,350 chests prepared at the Ghazeepore factory, each chest of which is believed to contain 1 maund 18 seers 12 chittacks of pure opium, besides 9 seers 6 chittacks used for pasting the leaves of the shell; being of the two seasons 1881-82 and 1882-83 in the proportion marginally noted.

OPIUM.

2. The dates on or about which the sales will be held, and the total quantity of opium as well as the respective quantities manufactured at the Patna and Ghazeepore factories, which will be brought forward for sale every month, are specified below. The Board of Revenue reserve to themselves the right of altering the dates should circumstances render it expedient to do so. In accordance with the notification of the Government of India, No. 1763, dated 30th June 1883, 2,000 chests of Patna and 2,450 chests of Benares opium will be sold monthly from January to

March 1884, and 1,800 chests of Patna and 2,000 chests of Benares opium will be sold every month from April to December 1884, both inclusive:—

Total ...	22,200	25,350	47,550

The following are the conditions of sale:—

1.—The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

2.—The opium will be ordinarily offered for sale at an upset price of Rs. 800 per chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by clause 13 of these Conditions of Sale. The bids must advance by Rs. 5 at a time.

3.—The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M.; but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or, if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale.

4.—Each lot shall contain five chests.

5.—A promissory note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such Promissory Notes shall be redeemed on the part of the purchasers at this Office by Bank of Bengal Receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M. in the afternoon of the fifth day after the sale provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

Deposit.
When the amount bid is less than Rs. 1,200 per chest, Rs. 300 per chest.
On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest.
On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.
And so on, Rs. 100 being added to the deposit for every bid additional, to the extent of Rs. 400.

6.—The said promissory notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

7.—The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M. if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8.—No tender of money, Bank of Bengal Receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the fifth day following the day of sale, will be afterwards accepted. Provided always that money so subsequently tendered may be taken in payment of the said

Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. 5 and No. 6.

9.—The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10.—Purchasers taking out certificates or orders for the delivery of opium after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots, or of a different number of lots or chests, whether more or less, than the number of lots or chests originally required to be included in each certificate or order.

11.—No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12.—The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand tender at the time a deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these conditions.

13.—With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum up-set price, diminishing the same gradually until a bid is obtained; and the first *bonâ fide* bidder for a lot after it has been offered for sale in the mode here described shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

14.—The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether twenty-five lots, provided always that there remain a sufficient number of lots of the opium to complete the said twenty-five.

15.—In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16.—The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Board of Revenue:—No. 1, certificate of the opium advertised for sale; No. 2, report of the examination of such opium.

17. The public are hereby informed that in providing the investment of the opium manufactured at the Patna factory and the opium manufactured at the Ghazeepore factory for the year 1883-84, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug when packed at the Patna and Ghazeepore factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue.

18. The public are hereby informed that the opium manufactured at the Patna factory in season 1883-84 consists of opium made at consistences of 73°, 74°, and 75°, and that the opium manufactured at the Ghazeepore factory in the same season consists of opium made at consistences of 70°, and 75°. The consistence of the opium which will be sold each month will be mentioned in the sale notification of that month.

19. Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of

opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

20. It is hereby further notified that under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand that out of the quantities of opium manufactured at the Patna and Ghazeepore factories declared as above for sale at the twelve sales of the year 1884, there shall be delivered to them, at the average of the particular sale or sales to which the opium so applied for may belong, a quantity not exceeding in the aggregate 300 chests, and the Agents of the French Government must make requisition specifying the quantity of opium required by them at any particular sale within thirty days from the advertisement of such intended sale: provided, however, that the Agent of the French Government may make such requisition for the whole quantity within thirty days from the publication of this notification. If the Agent of the French Government shall not make the requisition for opium within the time above mentioned, the entire quantity of about 17,550 chests of opium manufactured at the Patna and Ghazeepore factories, as above estimated, will be brought to sale in the usual manner; and if they shall make application for a quantity of opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve sales above-mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the opium which the French authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing after the date fixed for payment, or by selling such opium, or any portion of it, at any subsequent monthly sale in addition to the quantity which in this advertisement is approximately mentioned as the quantity to be sold at such sale; or by selling such opium at a sale to be held expressly for the purpose.

	Chests.
Opium manufactured at the Patna Factory	22,200
Opium manufactured at the Ghazeepore Factory ...	25,350
Total ...	47,550

Article of the Convention above referred to.

"*Article VI.*—With regard to the trade in opium, it is agreed between the high contracting parties that at each of the periodical sales of that article there shall be reserved for the French Government, and delivered upon requisition duly made by the Agents of His Most Christian Majesty, or by the persons duly appointed by them, the number of chests so applied for, provided that such supply shall not exceed three hundred chests in each year, and the price for the same shall be determined by the average rate at which opium shall have been sold at every such periodical sale, it being understood that if the quantity of opium applied for at any one time shall not be taken on account of the French Government by the Agents of His Most Christian Majesty within the usual period of delivery, the quantity so applied for shall nevertheless be considered as so much in reduction of the three hundred chests hereinbefore mentioned. The requisitions for opium, as aforesaid, are to be addressed to the Governor-General at Calcutta within thirty days after notice of the intended sales shall have been published in the *Government Gazette*."

By order of the Board of Revenue, L.P.,

C. E. BUCKLAND,

FORT WILLIAM, *the 27th November* 1883. *Offg. Secretary.*

No. 1306B.

NOTICE is hereby given that the First Sale of Opium, the Provision of 1881-82 will be held at the Government Opium Sale-room, No. 2, Bank shall-street, on Wednesday the 2nd January 1884, at 11 A.M., and will comprise 4,450 chests, viz.—

	Chests.
Opium manufactured at the Patna Factory of 77° consistence ...	2,000
Opium manufactured at the Ghazeepore Factory consisting of 1 chest of 70°, 426 chests of 72°, 1,973 chests of 75°, and 45 tin-lined chests, of which 23 chests are of 75° and 22 chests of 72° ...	2,450
Total ...	4,450

2nd. The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 27th November 1883, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd. The latest dates for deposit and clearance will be the 7th and 17th January 1884, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the Sale-room will be received after 3-30 P.M. of Monday, the 7th January 1884, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Thursday, the 17th January 1884.

4th. In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazeepore Factories will be brought to sale in the ensuing year, about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates, should circumstances render it expedient to do so.

C. C. STEVENS, Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned land situate in the district of Hazaribagh will be put up to sale at the Hazaribagh Collectorate on Saturday, the 5th January 1884, corresponding with 22nd Pus 1291 Fasli. The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The land to be sold revenue-free to the highest bidder above the upset price. The purchaser of this land will be considered as the proprietor of the land, and the entire proprietary right of Government in such land will be transferred to him.

2*nd*.—If the amount of purchase-money do not exceed Rs 100, the whole amount to be paid down at once.

3*rd*.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government and the land to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

HARI DAS PAL, District Engineer, Khulna.
Khulna, the 22nd November 1883. (1680—3)

WANTED an acting Nazir for the District and Sessions Judge's Court, Dinagepore, for a period of two years and five months, the permanent incumbent being absent on leave. The salary is Rs. 75 per month. Applications with copies of testimonials will be received by the undersigned up to 4th January 1884. Candidates should know English as well as Bengali, and should have experience of the business of Civil Courts. The amount of security required is Rs. 3,000 in Government promissory notes or stock notes.

L. B. B. KING, District Judge.
Dinagepore Judge's office, the 23rd November 1883.

Notification.

IT is hereby notified for information of the public that a duplicate receipt for an amount exceeding Rs. 20 is liable to a stamp duty of one anna under Article 23 (*a*), Schedule I of Act I of 1879, and should, under section 16 of the Act, be stamped before or at the time of execution. If the duty payable on the duplicate receipt is denoted by an adhesive stamp, such stamp should be cancelled *so that it cannot be used again*. Any person signing a duplicate receipt when the amount exceeds Rs. 20 without the same being duly stamped, is liable to be criminally prosecuted under section 61, Act I of 1879, and punished with a fine which may extend to Rs. 500; and any person neglecting or omitting *to effectually cancel the adhesive stamp* and in payment of stamp duty renders himself liable to a fine which may extend to Rs. 100.

The attention of banking, mercantile, and trading community is especially drawn to the requirements of the law on this point.

G. M. GOODRICKE, Collector of Calcutta.
Calcutta Collectorate, the 13th September 1883.

Forest Department, Bengal.

SUNDERBUNS DIVISION.

Notice.

THIRTEEN pieces of teak planks are now lying at the Government Timber Depôt of Saterhog station.

Any person having claim upon the same is requested to come forward and prove his claim within two months from this date to the officer in charge of the depôt, or at the office of the undersigned, and after paying salvage, &c., upon the planks to remove the same.

No claims will be admitted after two months from this date, when the timber will be sold for the benefit of Government.

W. E. D'ARCY, Dy. Consvr. of Forests,
Sunderbuns Divn.

Dated Calcutta, the 30th November 1883.

Sylhet, 12th November 1883. (1678—4)

Notification.

TO be peremptorily sold, pursuant to a decree of the High Court of Judicature at Fort William in Bengal in its Ordinary Original Civil Jurisdiction, made in suit No 251 of 1880 (wherein Janokeynauth Roy is plaintiff and Sreemutty Khettermoney Dassee and Nilmadhub Bose are defendants), and dated the 12th August 1880, by the Registrar of the said Court in his sale-room at the Court-house on Saturday, the 22nd day of December next, at the hour of 12 o'clock at noon, the undermentioned immoveable properties—

Lot 7.—All that upper-roomed brick-built messuage, tenement or dwelling-house, No. 75, Beadon Street (formerly No. 77, Nyanchund Dutt's Street), Simlah, in the town of Calcutta, together with the piece or parcel of land thereunto belonging, and on part whereof the same is erected and built, containing by estimation three beegahs eleven chittacks, be the same a little more or less, and which premises are butted and bounded as follows—that is to say; on the north by the tenanted land of Sumbhoo Chunder Bannerjee, formerly belonging to Nilmoney Mitter, deceased; on the south partly by the public road called Noyan Chund Dutt's Street, partly by the house and premises of Sumbhoo Chunder Dutt, formerly belonging to Rotton Chunder Dutt, partly by the land and tank belonging to the estate of Promothonauth Dey and Aushootoss Dey, and partly by the dwelling-house of Hullodhur Bysack, formerly belonging to Gunganarain Bysack; on the east partly by the house and premises belonging to the said estate of Promothonauth Dey and Aushootoss Dey, and partly by the tenanted land of Sumbhoo Chunder Bannerjee, formerly belonging to Nilmoney Mitter; and on the west partly by the dwelling-house and premises of Sreenauth Bose and Gopaul Chunder Bose, formerly belonging to Madhub Chunder Bose, partly by the house and premises of Birressur Dutt, and partly by the dwelling-house and premises of Bholanauth Bannerjee, formerly belonging to Ramnidhee Bannerjee.

Lot 8.—All that piece or parcel of land containing about two cottahs, situate in Beadon Street, in Calcutta, and now forming a part of the said house and premises, No. 75, Beadon Street, and lying to the south of the southern wall of the said house and separating the same from Beadon Street, and which piece of land was purchased from the Municipal Commissioners of Calcutta.

The condition of sale and abstract of title may be seen in the office of the Registrar of High Court in its Original Jurisdiction, and also in the office of Baboo Aushootoss Dhur, attorney for the plaintiff, at No. 2, Hastings Street, in the town of Calcutta, on any day before the sale and will be produced at the sale.

R. BELCHAMBERS, Registrar.
Aushootoss Dhur, Plaintiff's Attorney.
Calcutta, High Court, Original Side, the 28th November 1883. (1706—1)

PURSUANT to a decree of the High Court of Judicature at Fort William in Bengal in its Ordinary Original Civil Jurisdiction made in suit No. 2 of 1876, wherein Henry Alfred Coggan, Fernand Francois Chrestien, and Frederick Francois Emile Chrestien all of 74, Dhurrumtollah, in Calcutta, contractors on behalf of themselves and all other the creditors of Nicholas Peter Pogose of Dacca, zemindar, deceased, are plaintiffs, and Peter Nicholas Pogose, administrator, *ad litem* of the said Nicholas Peter Pogose, deceased, and the Official Trustee of Bengal, are defendants, the creditors of the said Nicholas Peter Pogose, deceased, who died at Dacca aforesaid, on or about the 8th day of October 1867 are, on or before the 19th day of January 1884, to send to the office of the Registrar, on its Original Side, their names, addresses, and descriptions, the full particulars of their claims, a statement of their accounts, and the nature of the securities, if any, held by them, or in default thereof they will be peremptorily excluded from the benefit of the said decree.

Every creditor holding any security may produce or transmit the same to the Registrar, with the particulars of his claim or shall produce the same before the Honorable Mr. Justice Norris, in the Court House, on the 2nd day of February 1884, at 11 o'clock in the forenoon, being the time appointed for adjudicating on the claims.

Dated this 19th day of November 1883.

R. BELCHAMBERS, Registrar.
Geo. B. McNair, Plaintiffs' Attorney. (1668—2)

Also on the same date will be sold the household furniture and effects and silver and plated articles, the property of the late L. Ramey, now at the Pauchooriah Factory, together with a quantity of implements and machinery used in the manufacture of indigo.

A large weighing scale, a number of garden tools, an iron safe and a boat.

List of the above can be obtained at the Pauchooriah Factory on application to the Manager.

High Court, Calcutta, 23rd November 1883. (1704*a*—3)

India General Steam Navigation Company, "Limited."

NOTICE.

AN Extraordinary General Meeting of Shareholders will be held at the registered office of the Company, No. 4, Fairlie Place, Calcutta, at noon, on Saturday, the 15th December 1883, for the purpose of passing the following resolutions:—

That the capital of the Company be increased from Rs. 33,00,000 to Rs. 55,00,000 by the issue of 22,000 additional shares of the nominal value of Rs. 100 each.

That 11,000 of such additional shares be offered as contributory shares to the persons whose names are on the register of the Company on the 1st day of January next in the proportion of one new share to each three old shares of Rs. 100 each. Rs. 50 in respect of each new share shall be paid on the issue of such share, and the remaining Rs. 50 shall be paid at such time as the Directors may determine.

That the remaining 11,000 additional shares be issued as fully paid-up shares by way of bonus to the persons whose names are on the register of the Company on the 1st day of January next, in the proportion of one new share to each three old shares.

By order of the Directors,
G. J. Scott,
Secretary, I. G. S. N. Co., Ld.

Calcutta, the 30th November 1883. (1708—2)

Notes on Forestry,

By C. F. Amery,

Deputy Conservator, Forests, N.-W. Provinces.

THIS little work, published with the approval of the Government of India, treats of the general principles of forest management in all its branches, and is recommended not only to forest officers, but to all who are interested in the progress of forest management in this country.

May be obtained of Messrs. King, King & Co., Bombay, and of Messrs. Wyman & Co., Calcutta. Price Rs. 3-8, or including postage, Rs. 4. Or of the publishers, Messrs. Trübner & Co., Ludgate Hill, London. Price five shillings.

☞ The following books may be purchased from the Office of Superintendent of Government Printing, India, No. 166, Dhurrumtollah Street, for private use only, which should be stated in the requisition.

No orders can be attended to unless accompanied by a remittance. When postage stamps are forwarded, one anna additional should be sent for every Rupee's worth of stamps for discount in exchanging them for cash. Service Labels or Court Fee Stamps are not received.

Books required for the public service cannot be supplied on payment; they are only issued on the authority of the Department to which the indenting officer is subordinate. Applications for them should be made through the Local Government under which the applicant serves.

Statistics of population of the Indian Empire, collected at the Census of 1881, Vol. II. *Price, Rs. 2-8; packing and postage, 8 annas extra.*

Grammar of the Róng (Lepcha) language, by Colonel G. B. Mainwaring, B. S. C. *Price, Rs.* 5; *packing and postage, 6 annas.*

Revised Army Regulations corrected to 31st December 1879. *Price, Rs.* 4; *packing and postage, 8 annas: interleaved copies, Rs.* 5; *packing and postage,* 12 *annas.*

Proceedings of the Council of the Lieutenant-Governor of Bengal for the purpose of making Laws and Regulations.

Saturday, the 1st December 1883.

Present:

The HON. H. L. DAMPIER, C.I.E., *Presiding;*
The HON. G. C. PAUL, *Advocate-General;*
The HON. H. J. REYNOLDS;
The HON. C. P. L. MACAULAY;
Colonel the HON. S. T. TREVOR, R.E.;
The HON. J. E. CAITHNESS;
The HON. MAHOMED YUSUF;
The HON. HARBANS SAHAI; and
The HON. CHUNDER MADHUB GHOSE.

STATEMENT OF BUSINESS BEFORE THE COUNCIL.

The HON. THE PRESIDENT said:—"I am sure that every Hon. Member will regret that the Lieutenant-Governor is unable to be in his place to-day, not only for the first meeting of the Session, but also to inaugurate the

meetings of the Council in this hall. It will not be out of place to remind Hon. Members that the meeting of to-day puts the finishing touch to the execution of that idea, originated by Sir Ashley Eden, which, while providing a fitting habitation for the Government of this great Province, has at the same time contributed to the embellishment of what is, and from day to day is still more, becoming the most magnificent part of this City of Palaces. It is usual for the Lieutenant-Governor at the opening of the Session to give an outline of the state of business and of the legislative measures which he proposes to introduce; and His Honor has asked me in his absence to say what he proposed to have said himself on this subject.

The Bill of the most importance and of the widest interest now before the Council is, of course, that connected with Local Self-Government. Hon. Members will remember that the Bill, as it is now before the Council, provides for a scheme which, generally speaking, takes the unions of villages as the lowest unit of administration, and above that the Local Boards, which would, generally speaking, correspond with sub-divisions. These are the executive authorities provided by the Bill, the control over which is vested in the Central Board. Since the last sitting of this Council, the scheme has been laid before the Secretary of State, who was unable to give his approval to that part of it which vests the control in a Central Board, on the general ground that he considered it undesirable to depart, so entirely as the Bill provides, from the ordinary and familiar system of administration which is in force, by excluding the District Magistrate and Divisional Commissioner from taking *any* share in the direct control of this branch of the administration, and vesting that control in a novel authority. The Government of India, therefore, have called on the Lieutenant-Governor to recast the scheme on these lines, and the Lieutenant-Governor has submitted his proposals, but as they are still under consideration, it would not be proper to speak more of them here. But I am to mention that His Honor hopes to be able to adhere to that part of the scheme which constitutes Unions and Local Boards, while modifying the portion of the scheme regarding control by a Central Board. With a view to ascertain by actual experiment how the division of the country into Unions will work in the most advanced districts, and with the view of clearing the way so as to lose no time in introducing the system as soon as the passing of the Bill shall have made it possible to do so, the Lieutenant-Governor has appointed an officer to make close enquiries in the most advanced districts. There appears to have been some misapprehension as to the object of Mr. Westmacott's special mission. I may here mention, with reference to a good deal on the subject I have read here and there, that Mr. Westmacott has been specially selected, because his previous utterances show him to be in entire sympathy with genuine and real self-government. His special duty is to ascertain, in certain selected districts, of which Hooghly is one, how the details of this scheme, plotting out thanas and sub-divisions into Unions, will work; so that, as soon as the Bill is passed, the Lieutenant-Governor will be able to proceed with that knowledge of details before him as ascertained from actual experience. There will still remain a great deal to be done, of course, for the whole of the constitution of Local Boards, and the assignment to them of funds by the Government will remain to be arranged by Government, even in those districts in which Mr. Westmacott has worked through the district officers beforehand. Nothing more, however, can be done with this Bill until the correspondence on the subject with the Government of India shall have been concluded. After that, the Lieutenant-Governor desires me to assure Hon. Members that nothing shall be wanting on his part to carry out the measure fully and promptly.

The next Bill before the Council is the Municipalities Bill. As my Hon. friend Mr. Reynolds has a motion on the paper in connection with that Bill, I will leave him to explain to us presently the stage into which it has passed since the last meeting of the Council.

The third in the list of Bills actually before the Council now is one for the amendment of the Estates' Partition Act, 1876, regarding which I have motion on the paper to-day asking the Council to allow the Bill to be read and referred to a Select Committee, of which I shall speak in another capacity.

Then as to proposed projects of legislation. Hon. Members are probably aware that a discussion has been going on for some four or five years between the Commissioners of the Calcutta Municipality and the Commissioners of the Suburbs, with regard to the supply of water to the latter. The Lieutenant-Governor is glad to announce that there is now a prospect of this discussion being brought to an end, and of some steps being taken in the matter. He has been able to bring about an understanding between the two bodies of Commissioners, by which they are amicably to decide the principle on which the charge for water is to be regulated. One of two principles will in all probability be adopted, and I will read the description from the letter of the Secretary to Government to the Chairman of the Municipal Corporation of Calcutta, "what principle should be adopted for the purposes of this calculation—whether the price of the water should be determined with reference to the cost of all works, or whether the Suburbs should pay separately (1) the interest on the capital expended on works constructed exclusively on their account, and (2) the price of the water as determined after deduction of the cost of these works—should at once be decided by arbitration." The principle is to be decided amicably outside the Bill between the two bodies of Commissioners, and then the Bill will provide that any dispute which may arise as to the application of that principle should be decided by arbitrators: for such arbitration the Bill will provide a scheme. Then it is found that for the Suburbs something more elaborate will be required in the way of rules for assessing and collecting a water-rate than those which are contained in the General Municipal Bill; therefore, as regards water-rates, the Suburbs will be excluded from the General Municipal Bill, and the Bill which it is proposed to introduce will contain special provisions in that behalf.

There is another project of legislation which the Lieutenant-Governor contemplates: it is the registration of tenures in the offices of the Collectors. Hon. Members have probably seen the report which the Lieutenant-Governor has sent to the Government of India on the Bengal Tenancy Bill, in one paragraph of which he mentions this project: the object will be to get tenures registered, the lines of the Land Registration Act for estates being followed as far as they are applicable. When that is done, it will be time to consider whether the facilities in collecting their rents (for which zemindars are crying so loudly) by bringing tenures to summary sale without decree, cannot be given to them with regard to tenures which have been actually registered. And there will follow another result, which is that, when the registration of tenures shall be complete, it will probably be possible to do away with the legal presumption—well known as the twenty years' presumption—which so often has the effect of placing tenures, in respect of which no alteration of rents for twenty years can be proved, in the actual position of tenures which have been held at fixed rents since the time of the Permanent Settlement. I see that the Lieutenant-Governor in that letter speaks of the registration of tenures in a way which (I now am speaking for myself) seems to me to underrate the difficulties and vastness of this undertaking; and, certainly, if I had to advise, I should recommend that legislation on the subject should proceed tentatively, without anything like the provision there is in the Estates' Registration Act binding the Government to complete this registration within a few years. My idea would be to recommend that the Lieutenant-Governor should proceed, class by class; as for instance first to register all tenures paying above such an amount, and when that has been done, and these have been made saleable by summary process, then he may go a little lower, till he has exhausted the whole mass of tenures.

These are the remarks I have to add to those which I have been commissioned to make on behalf of the Lieutenant-Governor on this occasion. The Council will now proceed to the business of the day, but it will be more convenient if the third item of business is taken up first. I will therefore ask the Hon. MR. REYNOLDS to be good enough to proceed with his motion."

BENGAL MUNICIPALITIES BILL.

The HON. MR. REYNOLDS said:—"When I had the honour, on the 21st of March last, to present the preliminary report of the Select Committee

on the Municipal Bill, I remarked that I would not then invite the Council to enter upon any discussion of the provisions of the measure. The object of laying the Bill at that time before the Council was rather to elicit a further expression of public opinion on the scheme which the Select Committee desired to suggest for consideration, than to commit Hon. Members to an acceptance of the Bill in the form which it had then assumed. The Council was then pleased to agree to the proposal that the Bill should be republished and should be referred back to the Select Committee for further consideration and report. The Bill was accordingly republished, and a large number of opinions, remarks and criticisms have since been received, and have been considered by the Committee. The whole question has now been thoroughly ventilated, and I believe that in the course of another fortnight, the Select Committee will be ready to present their final report. Till that report is presented, the remarks which I have to make upon the Bill, must, of course, be reserved; but it will, I believe, be some satisfaction to Hon. Members to know in what position the question stands at present, and to receive an assurance that the Select Committee is likely to complete its labours without much longer delay.

The decision of the Secretary of State regarding the Central Board has made it necessary to modify the wording of a good many sections of the Bill. The duties which in the former draft were assigned to the Central Board will now be performed, partly by the Local Government and partly by the Commissioners of Divisions. But this change tends in one way to facilitate the early passing of the Bill. It was previously intended that this Municipal Bill and the Local Self-Government Bill should proceed *pari passu*, should be passed together, and should come into operation at the same time. This arrangement would have been necessary, if the Central Board had been the controlling authority for both Municipalities and Local Boards. But now that the proposals of the Bengal Government for the establishment of a Central Board have been disallowed, there is no reason why the Municipal Bill, which is in a more forward state than the Local Self-Government Bill, should be deferred till the latter measure is ready to pass the Council. I therefore hope to be able to invite the Council to take the Municipal Bill into consideration in the course of the present month; and accordingly I now move that the Select Committee be allowed a further period of one month before presenting its final report."

The motion was agreed to.

AMENDMENT OF THE ESTATES' PARTITION ACT, 1876.

The Hon. Mr. Dampier said that during the last Session he obtained the permission of this Council to introduce a Bill for the amendment of the Estates' Partition Act, 1876. The grounds upon which the Government came to this Council to pass this Bill he then fully explained, and he need not go over them again, beyond reading over the printed Statement of Objects and Reasons, which was as follows:—

"The Partition of Estates under the existing law now makes such demands on the time and attention of Revenue Officers in some districts as seriously to interfere with the discharge of their other duties.

"Of late years the Legislature has provided means short of a complete separation of the liability for land revenue by which a joint proprietor can, to a great extent, protect himself against the consequences of default by his co-parcener.

"The object of the Bill is to relieve Revenue Officers of the duty of making partitions, of which the effect will be to create separate estates liable for an annual amount of land revenue not exceeding Rs. 10, as the public inconvenience caused by their employment in this duty now outweighs its advantages

"The proprietors of joint interests in estates, who will be precluded from applying for partition by Revenue Officers, will now be placed, in respect of separation of their shares, in the same position as the joint holders of a tenure, who have no right against their landlord of splitting up the tenure."

That was to say, they would be so placed, if there was any other machinery provided by law for affecting such partition. But it so happened that the Code of Civil Procedure did not allow the civil courts to make partitions of revenue-paying estates. When any such partition was decreed by a civil court, it called upon the revenue authorities to carry it out under the provisions of the Estates' Partition Act of 1876; so that if certain classes of partitions of estates were, by

the legislation now proposed, excluded from the jurisdiction of the revenue authorities, the proprietors of interests so excluded would be without any means of obtaining separation of lands from their co-parceners. To remedy this, the Governor-General in Council has agreed to introduce a Bill into His Excellency's Council modifying those clauses of the Code of Civil Procedure which bar the Courts from making such partitions. Therefore he had only to repeat that the effect of the two Bills will be to place the owners of, presumably, petty estates, which will not be liable for the payment of revenue above ten rupees, in precisely the same position as the holders of large valuable tenures are with regard to separation of their interests from those of their joint holders. He moved that the Bill to amend the Estates' Partition Act, 1876, be read in Council.

The motion was agreed to.

The Hon. Mr. Dampier also moved that the Bill be referred to a Select Committee to carry out the decision of the Council adopting the principle of the Bill, and to report thereon in one month.

The Hon. Harbans Sahai said that, following the procedure adopted in the case of the Local Self-Government Bill, he would at this stage take the opportunity of submitting the objections which he entertained to the principle of the Bill, which he thought was so bad that the Bill should not be referred to a Select Committee. The Hon. Member, in his Statement of Objects and Reasons, was pleased to intimate that the necessary steps would be taken to amend the Civil Procedure Code so as to authorise the Civil Courts to effect the partition of estates, the annual value of which would be below Rs. 10. He did not see why there should be two concurrent jurisdictions in cases of partition affecting the same estate—in the revenue authorities in cases in which the revenue of the separate estates might exceed Rs. 10, and in the Civil Courts where the separately rated revenue might be less than Rs. 10. The principle of the Bill, he said, was bad, because the Civil Courts had not a proper and sufficient staff of ameens and others to carry out the partition of estates, and a double staff of ameens would be necessary—one in the Civil Court and the other under the revenue authorities. He also contended that the Bill would not work in practice, because, although the share of the first applicant for partition might have a *jumma* above ten rupees, in the course of partition it might turn out that there were other applicants, sharers in the same estate, whose *jumma* was below that amount. Were the revenue authorities to proceed with the partition, or to transfer the proceedings to the Civil Court? The same objection would apply where the original application was made to the Civil Court by a sharer whose *jumma* might be less than Rs. 10.

If the Hon. Member proposed that the whole jurisdiction in partition cases should be removed from the revenue authorities and transferred to the Civil Courts, the Hon. Harbans Sahai would be the first to hail such a transfer of jurisdiction; but he certainly thought it objectionable to vest the Civil Courts with jurisdiction in partition cases of the smaller classes when they had no proper staff for the purpose.

Then the first reason which the Hon. Mover alleged for the introduction of the Bill was, that the partition of estates under the existing law now made such demands on the time and attention of revenue officers in some districts as seriously to interfere with the discharge of their other duties. He would ask the Council whether the work of the Civil Courts was light, and whether they had time at their disposal to attend to the work which it was proposed to hand over to them. Was it not a fact that rent and other civil suits were being so much multiplied that in almost every district the Government was obliged to appoint additional munsifs? If that was a fact, then the very reason which was assigned for the removal of these cases from the jurisdiction of the revenue authorities applied equally to the Civil Courts, which were overworked.

Then another cogent reason against the Bill was this, that these partitions having been up to the present time in the hands of the revenue authorities, if the Collectors were generally assisted, as in some districts they were, by a special Batwarrah Deputy Collector, they would be the proper authorities to effect all partitions. In partition cases it was necessary to refer to the jumma-bundi papers, to make local inspections, and do many other things with which

the revenue officers were well acquainted, and to which they had ample time to do justice. But the Civil Courts, from the very nature of partition cases, would not be so competent as the revenue authorities. The case would, however, be altogether different if the partition of all estates was made over to the Civil Courts with a proper establishment provided for the purpose, but the principle of making over to them the partition of petty estates only was, he thought, a bad one.

It had been said that the Council of the Governor-General would be asked to make the necessary amendment in the Code of Civil Procedure; but suppose that Council rejected the Bill, what then would be the result? How would the partition of small estates be then effected?

Then it was stated by the Hon. Mover that the public inconvenience caused by the employment of the revenue authorities in the partition of very small estates now outweighed its advantages. To this, BABOO HARBANS SAHAI begged to enter his humble protest, especially as regards the partition of estates in Behar. He might inform the Hon. Mover that in that Province there were many valuable estates yielding large profits, the public revenue of which was merely nominal. The fact was that at the time of the decennial settlement the districts were covered with jungle and waste lands, and the Government revenue was a nominal sum. Now that the jungle had been cleared away and the waste lands cultivated, the estates so nominally assessed had become valuable property and their gross rental was enormous. The principle that the amount of Government revenue payable on any estate should be the index to its value, or to the gross produce of the estate, was, he thought, erroneous. In many cases it might be just the reverse.

Again, the Collector had hitherto been considered as a necessary party to the partition of estates, because it was not only the interests of the party that had to be consulted, but also the interest of the Government. There might be collusive partitions between the parties by which one sharer might be allotted the worst description of land which did not yield sufficient to meet the amount of Government revenue assessed upon it. The consequence would be that the separate estate so created would default.

[The HON. MR. DAMPIER explained that the Hon Member was speaking under a misapprehension. He had stated that the proprietors of revenue-paying estates who would be excluded under this Bill from getting a partition made by the revenue authorities would be placed precisely in the same position as the joint proprietors of tenures which were indefeasible as against the zemindar; that was to say, they would lose the right to have their estates made separately liable to their share of the Government revenue.]

The HON. HARBANS SAHAI continued:—Every joint proprietor had an inherent right to have the Government revenue partitioned. At present a shareholder, however small his share might be, had every right to go to the Collector and ask for a division of the land and the apportionment of the revenue payable by him, in order that he might no longer be held responsible for the default of his co-sharers. This was a right which he justly had, and on what ground was he to be deprived of that right? It was not an imaginary right, but a substantial one. For once his liability for revenue was fixed and not dependent upon what his co-parceners might do, he could safely absent himself from his property after making sufficient arrangements to meet his separate liability. But now he was to be deprived of that right for no fault of his own.

He thought the Bill was based on a very illiberal and unsound principle, inasmuch as it threw on the already overworked Civil Courts a portion of the work for which it was alleged the Collector had no time, whilst the work of partition of larger estates would be carried on as usual by the revenue authorities.

The HON. MAHOMED YUSUF submitted that the further consideration of the motion before the Council should be postponed to the next meeting; for this reason, namely that, although the Members of the Council had notice of this Bill at the last session, there were certain observations regarding the scope of the Bill which he thought ought to be made before the Bill was referred to a Select Committee, and he for one was not aware that

all he had to say should be said at this the first meeting of the present session of the Council.

The HON. CHUNDER MADHUB GHOSE asked whether it was proposed by this Bill that there should be no partition of an estate on the partition of which, when made, any estate created thereby might yield a evenue not ex ceeding Rs. 10. Suppose an estate now yielded Rs. 1,000 a year, and a shareholder who paid Rs. 100 annual revenue were to apply for partition of that estate, the Collector would be bound under this Bill to proceed with the case. But it might turn out on partition being made that one of the shareholders who owned a one-pie share in the estate would have to pay an amount of annual revenue less than Rs. 10, consequently, although the whole estate paid a jumma of Rs. 1,000, and the shareholder who applied for partition actually paid Rs. 100 out of that jumma, the partition could not be made by the Collector, because it would bring out an estate whose jumma would be less than Rs 10. If that was the case, the Bill would work serious hardship, because there were many estates in which there were some very small shareholders, whilst large shares were held by others.

The HON MR. DAMPIER said he fully appreciated the difficulty which had just been referred to. He had already said that it had occurred to him to suggest to the Select Committee whether a partition, such as the Bill excluded, might not be allowed to be made as part of proceedings which were actually going on for dividing an estate into other estates bearing a larger amount of revenue than Rs 10. The principal object of the Bill was to relieve the revenue officers of an excess of business, and if that was secured he would not object to the consideration of any suggestions which would tend to meet objections.

The HON. MR. REYNOLDS said, that in the case put by the Hon Member to his right (BABOO CHUNDER MADHUB GHOSE) it seemed to him that the difficulty would not arise at all. He supposed a case where an estate had a revenue of Rs. 1,000, and where a shareholder in that estate whose revenue amounted to Rs. 100 applied for partition: that merely involved the partition of an estate into two shares—one of Rs. 100 and one of Rs. 900. There was nothing in the Bill which would prevent such a partition taking place, even though there were other small shareholders whose shares of the Government revenue would respectively be less than Rs. 10. But the Collector had nothing to do with that. All he had to do was to see that the partition of the shares of the applicants would not result in creating estates with a revenue less than Rs. 10. MR. REYNOLDS did not think that the objection which had been taken would apply.

The HON. MR. DAMPIER said in reply, that the partition of an estate by the revenue authorities originated from an application made by one sharer for separation of lands representing his share, and of his liability for land revenue from those of his co-proprietors. For the purposes of illustration he would say that in each proceeding for partition, the proprietors of the estate concerned were divided into two great classes—applicants for the partition of their respective shares, and non-applicants. Now let it be supposed that A came forward and applied to have partition of such an estate made for the purpose of separating off lands representing his interest; and also for separating off his liability for a proportionate share of the land revenue, all the rest of the proprietors being non-applicants. If the proportionate share of land revenue, for which A's estate would be liable after separation for land revenue assessment were Rs. 100, the Collector would say: "there is no objection so far as your share is concerned, as the jumma will be above Rs. 10; but by the partition two new estates will be created, one belonging to the non-applicant. In order to comply with the law I have to see that the jumma of that estate, the residuary estate as it is called, will not be less than Rs. 10."

If the Collector found that the jumma of the non-applicant's separate estate would be above Rs. 10, he would admit the application of A for the partition of the estate. If he found the jumma of the residuary estate would be only Rs. 9, he would say: "I cannot admit this application of A for splitting up this estate of Rs. 109, into two estates of Rs. 100 and Rs. 9 respectively, because 9 is less than 10, and therefore this partition cannot be admitted." The usual

course of things was that when once A applied for separation of his share (and so forced the trouble, harassment, and expense of partition proceedings on his joint proprietors, whether they liked it or not) other shareholders B, C, and D would come in and say:—"We have this trouble put upon us; let us have the advantage of separation of our shares also." In dealing with these subsequent applications, the Collector would apply precisely the same principles. If the jumma of each separated estate would be above Rs. 10, he would carry out the separation: any application of which the effect would be to create a separate estate with a jumma of less than Rs. 10 he must reject. And here MR. DAMPIER might mention that the object of the Bill being to prevent an insurmountable quantity of work falling on the revenue authorities, it had occurred to him to suggest for the consideration of the Select Committee whether even an application which would have the effect of creating an estate bearing a jumma of less than Rs. 10 might not be allowed, provided that it was presented to the Collector during the progress of proceedings under the Act for the separation of the parent estate into two or more estates, each bearing a higher jumma.

MR. DAMPIER thought he had now answered the objection of the Hon. Member on his right (BABOO CHUNDER MADHUB GHOSE) and the last objection raised by the Hon. Member opposite (BABOO HARBANS SAHAI). Another objection of the last named Hon Member was that the Civil Courts had no more time at their disposal than the revenue authorities, and that therefore the proposed duty should not be thrown on them.

As a general proposition he would venture to ask whose duty it was to decide as to rights between man and man. Was it the duty of the Civil Courts or of the revenue authorities? He supposed it would not be denied that it was the duty of the Civil Courts. Then what excuse was there for the revenue authorities to interfere at all in the partition of estates? The excuse was that the safety of the Government revenue was concerned in the separation of the joint liability for revenue, and therefore in view of the paramount interests of the State revenue special jurisdiction was given to the revenue authorities in this particular class of adjudications on rights between man and man. On that ground only were the revenue authorities authorized by law to make these partitions. Now the Bill entirely removed that special ground for the exercise of jurisdiction by the revenue authorities, inasmuch as it provided that the liability for revenue up to the amount of Rs. 10 should not be separated off from the joint liability; therefore the special reason for leaving this particular class of cases in the hands of the revenue authorities no longer existed. The Hon. Member also said that it was not right to take the amount of Government revenue as the standard of importance of proceedings. MR. DAMPIER would reply that the amount of land revenue involved was precisely the measure of the reason for employing the revenue authorities to do work which, irrespectively of that consideration, was the proper work of the Civil Courts.

The Hon. gentleman had said that the Civil Courts had no establishment for this work. To that MR. DAMPIER could only say that the Executive Government of India was willing to introduce a Bill leaving the work to the Civil Courts, in face of which he found it difficult to accept the Hon. Member's opinion that those Courts would be unable to cope with it.

Then the Hon. Member also suggested the dead-lock which might arise if the Legislative Council of the Governor-General, after this Council had passed this Bill, should refuse to modify the section of the Civil Procedure Code. MR. DAMPIER would remind him that Bills of this Council were subject to the *veto* of the Governor-General, and therefore Mr. Dampier supposed that where two measures of this kind were intimately connected with each other, the Governor-General would keep the approval of this Council's Act in suspense, until His Excellency very clearly saw his way to the other part of the measure being carried in his Legislative Council.

Another objection made was that in some estates the liability for Government revenue was very small, whilst the value of the zemindar's interest was enormous. But in making this objection, the Hon. Member had entirely passed over that part of the Statement of Objects and Reasons and of Mr. Dampier's former speech, which dwelt on the facilities which legislation had provided of

late years to joint proprietors for protecting themselves from the default of their co-parceners. He quite admitted that no other means were provided for giving such ultimate and complete protection as the Batwarrah law gave, but the protection given by other means was real and substantial, and ought to be sufficient for safety to any prudent man. Separate accounts might be opened; and not only so, but in those estates of which the value was "enormous" and the amount of Government revenue trifling, as stated by the Hon. Member, it would be no great hardship for any proprietor to avail himself of the protective right of depositing Government securities in the hands of the Collector for the purpose of meeting the revenue of the estate in the event of the default of his co-sharers, and thus absolutely free himself from any risk that his co-parceners might play him false by withholding payment. All reasonable protection was thus given.

Then as to the question of public convenience and as to the Collector having time to undertake partition proceedings, MR. DAMPIER must say that, if the Council entertained this discussion, they would be precisely at the point at which they were when the principle of the Bill was first proposed to this Council. However, superficially, Hon. Members might have looked at the proposal before the principle of the Bill was accepted by the Council, it could scarcely be said that they had failed to catch that the appeal to this Council was made by the Executive Government on the one ground that relief was required for the Collectors. MR. DAMPIER presumed that he would not be called upon to take up the time of the Council by going over the same ground again. He therefore pressed the motion which he had made to refer the Bill to a Select Committee.

After some conversation the motion was put and carried, and the following Members were appointed to form the Committee:—The Hon. Mr. Reynolds, the Hon. Harbans Sahai and the Mover.

The Council was adjourned to Saturday, the 8th December 1883.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE CALCUTTA MUNICIPALITY FOR THE YEAR 1882-83.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 7th December 1883.

RESOLUTION.

READ—

The Administration Report of the Calcutta Municipality for the year 1882-83.

A memorial from the Hon'ble H. S. Cunningham and others, requesting Government to appoint a Committee under section 28 of Act IV of 1876 to report upon the cleansing and conservancy of the town.

A letter dated the 30th July 1883, from the Commission, with enclosures, reporting upon the memorial.

A letter dated the 9th October 1883, from the Government of India, Home Department, forwarding a memorandum of the Army Sanitary Commission on the Administration Report of the Commissioners for 1881, and requesting that the earnest attention of the municipality may be drawn to the remarks of the Commission.

Read again—

The Report for 1881 and the Resolution recorded upon it.

By Act I (B.C.) of 1882, the Calcutta Municipal year has been made to coincide with the official year, from 1st April to 31st March, instead of, as formerly, the calendar year. This change was introduced for the first time during the year under review. The present report accordingly comprises a period of 15 months, viz. from 1st January 1882 to 31st March 1883.

2. The third general election of Commissioners, held under the Calcutta Municipal Act IV (B.C.) of 1876, took place during the year under review, the period for which the body of Commissioners was appointed at the election of 1879 having expired in September 1882. A separate report on the late election was submitted by the Chairman, and has already been considered and reviewed by the Lieutenant-Governor. Mr. Rivers Thompson took occasion to express the satisfaction with which he had observed the marked growth of public interest evinced on this occasion, and the gratifying evidence it affords of the increasing desire of the people of Calcutta to take a part in the management of the affairs of their city. Whether we regard the increase in the gross number of votes recorded—an increase as compared with 1879 of upwards of 80 per cent.—or regard the keenness of the competition for seats in some of the wards, we find evidence that the political pulse of Calcutta has been decidedly quickened by six years of municipal freedom. Nor is this all. An inspection of the lists of elected Commissioners shows that of those who held office prior to the election of 1882, twenty-two were re-elected, and twenty-six either were not candidates or were rejected by the constituencies. From the table of attendances at committee meetings, which is attached to the report, it appears that, of those Commissioners who were re-elected, all but four were conspicuous by their industry and attention to municipal work, while of the twenty-six who have found no place in the new Corporation, only four seem to have given any considerable portion of their time to their duties as Commissioners. In Mr. Rivers Thompson's opinion this is an encouraging sign, which evidences a desire on the part of the people to secure the best men as their representatives, and shows that a seat at the Municipal Board is neither sought by candidates, nor conferred by the rate-payers, as a mere honorary distinction, but is regarded by both alike as a position which involves real duties and substantial responsibilities.

3. Thirty-seven general meetings were held during the year, of which 24 were special general meetings. The number of meetings held by the various standing committees was 129, including 51 meetings of the Town Council, 10 of the Water supply Extension Committee, and 17 of the Bustee Committee. Four Special Committees were appointed during the year. These were the Conservancy Committee of 1882, which held ten meetings; the Sanitary Committee appointed to consider the memorial presented to the Lieutenant-Governor by a number of influential residents of Calcutta; the

Budget Committee and the Souttar Memorial Committee. The total number of attendances at meetings aggregated 3,292 out of 6,223 invitations during the 15 months, showing an appreciable increase over the figures of 1881. The increase is said to be slightly greater among the nominated than among the elected Commissioners.

4. Various structural improvements in the streets of the town were effected during the year, some from capital, some from the regular Town Improvement (revenue) Fund, and some from other revenue funds. For the former the money was chiefly found by the sale of surplus lands and of the out-offices of the Town Hall. Among the lands so disposed of was a portion of the old Mahratta Ditch, concerning which a reference was subsequently made to Government by the Collector of the 24-Pergunnahs. The question has been raised whether any portion of the Ditch is the legal property of the Commissioners, and if so, whether it is advisable that a site of such historical interest and importance should be obliterated. The matter is now under the Lieutenant-Governor's consideration. A part of the sum realized by the sale of the surplus lands was, at the instance of the Town Council, devoted to acquiring lands for the purpose of widening the Chitpore road. A grant of Rs. 60,000 had been made by Government for this purpose from the assets of the old Fire-Brigade Fund, and a further assignment of equal amount had been provided in the Municipal Budget. It was found, however, that the cost of carrying out this important scheme in its original comprehensive form was practically prohibitive; and the funds originally provided were supplemented by the appropriation of Rs. 50,000 out of the sale proceeds of municipal lands already mentioned. The Commissioners have completed during the year the widening of the road for a length of 700 feet between Burtollah and Machooa-Bazar Street. They observe, however, that the cost of the entire scheme is so heavy that they do not see their way to completing it. In view of the reduction of the house-rate to 7½ per cent, and of the immense importance of this work to the northern portion of the town, the Lieutenant-Governor cannot consider this view satisfactory. Each year that passes will add to the cost and difficulty of acquiring the land required, and Mr. Rivers Thompson would be glad to receive an assurance that some substantial progress will be made every year.

The widening of Nimtollah Street, and of Dharmahatta Street at its junction with the Strand Road, was effected at a cost of Rs. 19,858 out of the proceeds of the sale to Government of the out-offices of the Town Hall. The Commissioners observe:—"The result is that two important thoroughfares which formerly tapered at their orifices, causing almost incessant blocks among the gorged cart traffic, have now fine wide entrances in which blocks no longer occur."

General street improvements at a cost of Rs. 46,241 were effected out of revenue. One of these,—the widening of Sikdarparah Street at a cost of Rs. 10,954,—has met a great want by substituting a carriage road westwards from Chitpore Road for the narrow foot-path which previously existed. The surplus of the Hackney Carriage Fund, supplemented by a grant of Rs. 2,721 from the General Fund,—in all Rs. 20,981,—was expended on new stands, properly paved and drained.

5. Among the miscellaneous matters which were dealt with by the Town Council during the year were the passing of rules to regulate the licensing of depôts for the sale of straw, hay and timber; the proposed establishment of a Central Railway station; the establishment and maintenance of water-troughs for cattle; the quality of the gas supplied by the Oriental Gas Company; and the disposal of arrear rate-bills. These bills had been accumulating from 1876 down to the second quarter of 1879, and the labours of the Sub-Committee resulted in the cancellation of bills aggregating Rs. 3,86,170. This is a heavy loss to the Municipality, and although a large part of the amount represented bills made or sent out in error, it is clear, as stated in the report, that a substantial part "represented perfectly good and realizable assets, and would have been recovered, had ordinary promptitude been used in collecting it." These facts afford the strongest condemnation of the manner in which the finances of the Corporation were managed in the three years immediately following the establishment of the present system of municipal administration. Mr. Rivers Thompson has much pleasure in acknowledging the excellent work which has been done by

the present Chairman and his predecessor, with the aid of his subordinates and of the Commissioners, in extricating the finances of the Municipality from their former chaotic condition, and in reorganizing the system of collection and placing it on a sound and satisfactory basis.

6. The year under review witnessed the settlement of the question of increasing the supply of filtered water, and extending it to the Suburbs. This important question had formed the subject of protracted negotiations between the Government, the Commissioners, and the Suburban Municipality: and it has now been finally arranged, with the sanction and approval of the Lieutenant-Governor, that the increased supply shall be provided by means of an iron main from Pultah, forty-eight inches in diameter, and capable of supplying 12 million gallons per diem, of which eight millions will be reserved for the Town, and four millions will be available for the Suburbs. The price at which the Suburban Municipality are to receive their water will, if necessary, be settled by arbitration. The pipes and engines have been ordered from England, and a Bill will be introduced in the ensuing session of the Legislative Council to confer on the Commissioners of the two Municipalities such legal powers as may be necessary. The public of the metropolis are much indebted to the Committee whose labours have brought the negotiations to a successful conclusion, and the Lieutenant-Governor concurs in the remark that the Commissioners may fairly congratulate themselves on the satisfactory settlement of this much vexed question. At the same time he cannot refrain from observing that arrangements might have been much more rapidly advanced had not the report of the Committee been remanded for further consideration in July 1880, and had not the Commissioners then in office deemed it advisable to do nothing throughout 1881, simply because they were waiting to see if His Excellency the Governor-General in Council would pass the amending Act.

7. At the end of 1881 the total debt of the Corporation amounted to Rs. 1,44,14 777, against which was a sinking fund valued at Rs. 20,12,507. The net indebtedness of the Municipality at the beginning of the period under review was therefore Rs. 1,24,02,270. During the year, Rs. 9,50,500 was borrowed on two occasions. On the other hand the Government debt was reduced by Rs. 1,50,754, and the value of the sinking fund was raised to Rs. 23,31,145, or by Rs. 3,18,638. On the 31st March 1882, therefore, the net indebtedness of the Corporation amounted to Rs. 1,28,83,378. The loans raised during the year were required partly for works to be executed from capital, and partly for the cost of the new outfall sewer. They were raised at 4½ per cent., being the first loans raised by the Corporation at less than 5 per cent., and were taken up at an average premium of Rs. 2-3-9. It is observed that although during the last 3¼ years the Corporation has borrowed in all Rs. 12,00,500, the net municipal debt has practically remained stationary, having been Rs. 1,28,78,770 on the 1st January 1880.

8. The following statement shows the revenue of the Municipality during 1882-83 compared with that of 1881 :—

	Actuals for 1882.	Actuals for 3 months of 1883.	Total.	Actuals for 1881.
	Rs.	Rs.	Rs.	Rs.
House-rate	9,65,008	2,49,890	12,14,588	9,96,496
Taxes	4,50,188	69,430	5,19,618	4,19,146
Fees	8,916	2,246	11,162	6,852
Fines and penalties	22,929	4,668	27,597	31,657
Road Department receipts	31,527	1,352	32,879	2,919
Street-watering	72	.. ..	72	.....
Conservancy Department receipts	46,947	7,467	54,414	30,371
Municipal Railway	3,170	1,054	4,224	285
New drainage	14,647	2,461	17,108	7,601
Night-soil Department	2,24,191	57,720	2,81,917	2,44,158
Slaughter-house	40,774	10,767	51,041	38,916
Municipal Market receipts	1,08,516	31,477	1,39,993	1,05,497
Hospitals and Vaccination	663	200	863	709
Rents	34,385	11 661	46,046	26,497
Sale of lands and building materials, &c.	.....	1,919	1,919	.....
Miscellaneous receipts	13,208	2,674	15,882	24,994
Total General Fund income	19,65 729	4,53,492	24,19,221	19,38,750
Water-rate	4,05,107	1,04,576	5,09,683	3,80,050
Sale of water	80.741	22,280	1,09,021	78,884
Water-supply miscellaneous receipts	3,048	1,600	5,248	5,835
Total Water-rate Fund income	4,05,496	1,28,456	6,23,952	4,64,769
Lighting-rate Fund receipts	2,45,897	63,906	3,09,803	2,46,831
GRAND TOTAL OF INCOME	27,07,122	6,45,854	33,52,976	26,50,350

The receipts of the Police Rate Fund, Hackney Carriage Fund and Jute and Fire-Brigade Fund, which are separately brought to account, have been excluded. The two last-named funds have now been closed. The receipts of the Municipality for 1881 included one quarter's collections of the house-rate at the higher rate of 8 per cent.; whereas during the period embraced by the present report this was levied throughout at 7½ per cent. Night-soil fees also were levied at a lower rate during 1882-83, and a reduction of Rs. 30,000 was thus caused in the demand. Notwithstanding this, however, and in spite of the fact that the house-rate receipts of the previous year were swollen by the recovery of arrears aggregating Rs. 15,000, which had no counterpart in the past year, the total collections of 1882 (twelve months) exceeded those of 1881 by Rs. 26,979. This satisfactory result was due partly to greater promptitude in realizing the current demand, partly to increased license receipts in consequence of the demand for the first three months of 1883 being made payable in advance, and partly to the higher rents paid by the Tramway Company. The *bond fide* growth of revenue is estimated at about Rs. 49,000 for the twelve months of 1882.

9. The following table shows the expenditure of the Municipality during the period under review :—

	Actuals for 1882.	Actuals for 3 months of 1883.	Total.	Actuals for 1881.
	Rs.	Rs.	Rs.	Rs.
Interest on loans	3,64,689	1,83,926	5,48,615	5,21,244
Contribution towards sinking fund and repayment of loans...	1,30,459	1,00,286	2,30,745	1,93,875
Establishment	2,01,598	50,550	2,52,138	1,93,414
Cost of collection	33,775	9,331	43,106	34,271
General expenditure	50,592	14,582	65,074	55,387
Road Department expenditure	2,52,323	74,965	3,27,288	2,73,973
Street-watering	50,536	16,513	67,048	54,081
Gowkhannah charges	1,00,386	32,838	1,33,224	1,15,558
Conservancy charges of the town	73,207	21,684	94,851	65,730
Municipal Railway	81,022	17,028	98,250	66,584
Drainage Pumping Station	31,268	7,586	38,854	32,097
Salt-Water Lakes	31,215	4,255	35,470	19,373
House drainage	6,475	1,283	7,758	4,023
Burning Ghát charges	408	116	524	842
Night-soil Department	1,31,921	31,913	1,63,264	1,35,404
Slaughter-house	13,032	2,952	15,984	12,887
Municipal markets	23,239	6,799	30,038	22,776
Hospitals and vaccination	5,927	31,068	36,995	42,974
Town Hall	3,626	1,070	4,696	4,901
Miscellaneous	85,709	31,627	1,17,336	1,60,869
Total expenditure of General Fund ...	16,71,567	6,40,801	23,12,368	20,10,313
WATER-RATE FUND.				
Interest on loans	1,06,690	94,556	2,01,246	2,03,461
Contribution towards sinking fund and repayment of loans ...	49,125	47,510	96,635	90,669
Establishment	83,702	21,017	1,04,719	81,389
Cost of collections	6,044	1,747	7,791	5,744
General expenditure	6,359	2,034	8,393	7,603
Working expenses	98,421	20,034	1,39,266	1,07,180
Charges for supply of water to shipping, &c.	19,914	4,431	24,345	16,645
Total expenditure of Water-rate Fund ...	3,70,255	2,12,140	5,82,595	5,12,871
LIGHTING-RATE.				
Lighting lamps	2,11,285	58,032	2,69,317	2,27,150
Cost of new lamps	4,085	1,368	5,453	2,949
Cost of collections	3,413	973	4,385	3,441
Supervision and contingencies	4,995	1,226	6,220	5,181
Total expenditure of Lighting-rate Fund ..	2,23,778	61,599	2,85,377	2,38,721
GRAND TOTAL EXPENDITURE. ...	22,65,600	9,14,540	31,80,140	27,61,805

The total expenditure during 1882 amounted to Rs. 22,65,600 against Rs. 27,61,805 in 1881, while in the whole 15 months the total expenditure was Rs. 1,80,000 less than the estimate, and Rs. 1,06,853 less than the receipts. It is explained, however, that the amounts actually falling due and paid within the first quarter of 1883 on account of interest and sinking fund were less by about Rs. 1,33,000 than the proportionate share for that period of the corresponding charges for the whole year. The General Fund therefore ended the 15 months virtually poorer by Rs. 26,000, though nominally richer than on the 1st January 1882. The expenditure, however, was considerably below the estimate, and it is a satisfactory feature of the operations of the year that almost all the savings occurred in current expenditure, while the grants were exceeded on works of improvement. The receipts of the Water-rate Fund aggregated Rs. 6,23,952 for the 15 months: of this sum Rs 4,95,496 was collected during 1882, being Rs. 30,727 in excess of the collections of 1881. The disbursements, however, added to the proportionate share of interest and sinking fund

charges, exceeded the receipts by Rs. 28,000. This rate is levied at 3 per cent. on the annual valuation against a possible maximum of 6 per cent. During the next two or three years heavy expenditure will have to be incurred in connection with the extension of the supply, and measures should be taken to bring the receipts and disbursements into equilibrium. The Lighting Rate, which is levied at the maximum rate of 2 per cent., showed a small excess of receipts over expenditure. The Police-rate Fund also showed an increase in the net balance at the close of the year of more than Rs. 20,000, although the rate was reduced in 1882 from 2½ to 2¼ per cent. This result is satisfactory. The old Jute Warehouse and Fire-Brigade Fund was closed shortly after the end of the period under review, under the operation of Act IV (B.C.) of 1882.

10. The work done in the Bill, Collection and Warrant Departments during 1882-83 exhibited the high degree of efficiency to which it had been brought during the two previous years. The nominal balance in the Bill Department, it is true, increased from Rs. 53,146 to Rs. 92,630, but it is explained that the bulk of this was due to the fact that Rs. 55,603 worth of bills were received back from the Collector and Warrant Officer only a few days before the close of the last quarter in consequence of a new system which was introduced during the year. The plan of requiring the Warrant Department to return bills after six months, and of allowing the assessor to effect recoveries for himself, has been productive of excellent results, and has moreover been practically self-supporting. Of the total demand of the year, the Collector recovered 90·96 per cent. against 87·6 per cent. in the previous year, while the percentage of bills returned by the assessor and transferred to the Warrant Officer was proportionately reduced. The continued improvement in the working of this department, which has raised the percentage of collections from 74·3 in 1878 to 80·3 in 1879, 81 in 1880, 87·6 in 1881, and 90·96 in the period under review, is highly satisfactory, and reflects much credit on the Collector, Baboo O. C. Dutt. In the Warrant Department the outstandings, which aggregated Rs. 2,13,945 at the beginning of the year, had been reduced to Rs. 73,999 on the 31st March 1883 This latter amount should, however, be increased by about Rs. 50,000 worth of bills which, as already stated, were returned to the assessor shortly before the close of the year. This brings up the real outstandings to about Rs. 1,23,000. The opening arrear balance in this department was Rs. 1,62,310. Of this amount Rs. 21,535 was collected, Rs. 59,790 remitted or cancelled, and Rs. 55,924 transferred to the assessor, the arrear balance outstanding on the 31st March 1883 being only Rs. 28,772. It is stated that the whole of this will shortly be cleared off. Equally good progress was made in the collection of the current demand. These three departments constitute the machinery by which the Municipality collects its dues, and the combined results of the work of all three were as follows:—

		Rs.	Rs.
Opening balance ...	... ...	2,77,600	
Falling due in 1882-83 ...	... ...	27,34,178	
	Total		30,11,778
Collected ...	... ...	26,39,492	
Remitted or cancelled ...	... ...	2,03,324	
	Total		28,42,816
	Balance on 31st March ...		1,68,962

That there is still room for improvement, especially in the Assessors' Department, is evidenced by the fact that the total collections, including the collections of arrear demands, fell short of the current demand of the year by nearly a lakh of rupees.

11. The receipts under the head of license fees aggregated Rs. 6,12,377 during the 15 months. Of this amount Rs. 4,96,798 was on account of 1882, against Rs. 4,87,659 collected in 1881. Trade and profession licenses yielded Rs. 3,25,116, carriage and horse licenses Rs. 1,26,733, trade refuse fees

Rs 44,108, hackney carriage registry fees Rs. 16,624, and cart registration fees Rs. 98,933. There was an increase of two in the number of Joint Stock Companies, of 258 among traders, and of 2,422 among shop-keepers of all kinds, while the number of merchants fell from 1,774 to 1,760, and of itinerant dealers from 7,262 to 5,914. The collections under this head for 1882 amounted to Rs. 2,63,406. This tax has no counterpart in the United Kingdom, where also the proceeds of the carriage and horse tax are an asset of Imperial revenues. The income derived by the Calcutta Municipality from these two imposts, which yielded Rs. 4,51,849 during the 15 months under review, should be borne in mind when claims are put forward to a share in the excise receipts of the town, and when reference is made to the import duties on wine and coal which are levied by the city of London. The number of carts registered rose from 18,095 to 19,732, the receipts being largely in excess of those of 1881. The increase is said to be mainly due to the greater commercial activity that prevailed throughout the past year. The number of first and second class hackney carriages registered during the year increased, but there was a falling off in the number of third class carriages and palankeens, owing to the further extension of the tramway.

12. The Corporation were engaged in nine civil suits during the year, being plaintiffs in four and defendants in five cases. All of the former were decreed in favour of the Commissioners, while of the latter, two were compromised out of court, and the remaining three, which all arose out of the same facts, have since the close of the year been decided against the Corporation. In the criminal courts 11,611 persons were prosecuted for various offences, against 13,887 in 1881. The falling off occurred chiefly in the License Department, where prosecutions were avoided as much as possible in consequence of the panic which was produced among the petty dealers by the change in the Municipal year. Three thousand three hundred and fifty-seven persons were fined, 2,297 were warned and discharged or paid their fees into court, 5,422 cases were struck off or withdrawn on payment of license-fee, and 499 cases were dismissed. The Lieutenant-Governor regrets to find that complaints are again made of the leniency shown by the Honorary Magistrates in dealing with conservancy cases, and the consequent difficulty experienced by the Health Department in enforcing conservancy rules.

13. The sanitary state of the town received an unusually large share of public attention during the period under review, and the alleged prevalence of conditions at variance with the laws of hygiene led to the publication of severe strictures in the local press, and on some occasions to wide divergence of opinion among the Commissioners themselves, accompanied too frequently by somewhat acrimonious discussions. For these reasons the subject of town improvements has been treated in the present report at unusual length. The measures of improvement which mainly occupied the attention of the Commissioners were numerous and important, and included the extension of the water-supply, both filtered and unfiltered, the completion of the sewerage system, the improvement of the privies of the town and of the arrangements for the removal of night-soil, the reclamation of bustees, and the obliteration of foul and dangerous tanks. The arrangements for the extension of the supply of filtered water have, as already mentioned, been completed. The new engines and the main have been ordered from England, and it is hoped that the end of 1884 will see the works fairly on the road to completion. Meanwhile a virtual increase of the present supply has been made by the extended use of unfiltered water for a variety of less important purposes. The efforts of the Corporation to meet the growing requirements of the town are illustrated by the following figures, which show the average daily supply of water in each year since 1879 :—

	Daily average of unfiltered water.	Daily average of filtered water.	Total.
	Gallons.	Gallons.	Gallons.
1879	1,091,859	7,464,159	8,556,118
1880	1,165,776	7,407,256	8,573,032
1881	1,257,307	7,208,453	8,465,760
1882	1,838,725	7,824,576	9,663,301
1st quarter of 1883	2,594,276	8,049,707	10,643,983
2nd „ of 1883	2,992,494	8,279,167	11,271,661

It must not be overlooked that according to the census returns the population of Calcutta was actually less in 1881 than in 1876, and the supply available per head was therefore proportionately greater. The increase in the supply of unfiltered water was obtained by working the old engines to their fullest extent, as it was considered safe to do this in view of the early completion of the scheme for the extension of the unfiltered supply. It is hoped that this scheme will be in working order during the current cold season. The new engines are calculated to deliver 4 million gallons a day, working six hours, and it is estimated that over 2 million gallons of filtered water, now used for purposes for which unfiltered water would be suitable, will thus be set free. When the new scheme for increasing the supply of filtered water is completed, the present supply of filtered water will be about trebled. The execution of these two schemes cannot fail to have an important effect upon the health and general well-being of the town.

14. A large amount of progress was made in 1882-83 in the extension of the drainage system. An expenditure of Rs 4,19,933 was incurred in laying down 20·67 miles of sewers of all classes, and in constructing 3,596 new house-connections. The agitation in the press during the cold weather of 1882-83, and the attacks which were made by a certain section of the community upon the whole system of underground drainage as applied to Calcutta have invested the subject with an unusual degree of interest, and have caused the existing arrangements to be investigated with a minuteness which, whatever may be the result, cannot fail to throw much valuable light on this important subject. The Lieutenant-Governor has now before him the special report submitted by the Commissioners upon the memorial which was presented to him in March last by a number of influential residents of Calcutta. Orders will be separately passed upon this, but it may be stated here that, upon the evidence before him, Mr. Rivers Thompson does not at all incline to the belief that the sewerage system of Calcutta has been other than an invaluable boon to the town. The total mileage of sewers actually laid down is—brick-sewers 36·77, and pipe-sewers 113·14, or 149·91 miles in all. Good progress was made during 1882-83, and it is now reported that only about 15 miles of pipe-sewers remain to be constructed. An important change was introduced during the year by the transfer of the night-soil establishment to the Health Officer. This reform is said to have infused a larger amount of energy into the department, and to have resulted in a material degree of improvement.

15. In the Resolution recorded last year, the Lieutenant-Governor observed that, while good work had been done during 1881 in drawing up rules for the reclamation of bustees and laying down a programme of projects for future guidance, the amount of work actually done was incommensurate with the preliminary operations. Mr. Rivers Thompson is glad to find that during the past year this important work has received more practical attention at the hands of the Commissioners. The scheme for the reclamation of the large Soortee Bagan Bustee of 64 bighas, which was drawn up and taken in hand in 1881, has been carried almost to completion, and the projected works of improvement constructed at the expense of the Municipality. The Patwar Bagan Bustee, which measures 29 bighas in extent, has also been taken up; the owners have been induced to undertake the works ordered by the Committee at their own cost, and these are now said to be rapidly progressing. Proceedings have also been taken with regard to the Hather Bagan, Jorapooker, and Gowalapara, Bamun Bagan, Colvin, Kola Bagan and other bustees, and the schemes have all made more or less progress. The areas of the bustees so dealt with aggregate 293 bighas. In addition to these, the Jora Bagan bustee, which covers 28 bighas, was taken in hand under the new section 283A of the Municipal Act. This section confers extensive summary powers on the Commissioners for the reclamation of bustees whose owners prove contumacious, and it is satisfactory to learn that its first application has been successful. The original cost of the scheme for the reclamation of this bustee, as estimated, exceeded four lakhs of rupees, but modifications subsequently made have proved so acceptable to the people that the owners of the bustee have in almost every instance consented to give up free of cost the land required for

the municipal improvements, recouping themselves by the enhanced value of the remainder. The actual sum which will be required for the acquisition of land will, therefore, it is said, be very small. This result is satisfactory, and proves that the details of the scheme have been worked out with judgment.

16. These results are better than any reported in previous years. Nevertheless it is perfectly clear,—and the action of the Commissioners themselves in regard to the current year shows that they recognize,—that the expenditure, even in the year under report, was incommensurate with the importance of the object to be attained. In previous years, it may be generally said, nothing was done from the General Fund of the town. The scandalous state of the bustees in Calcutta has been for many years strongly urged upon the Corporation. So far back as 1868, Dr. Tonnerre described their condition in words which should have brought home to those intrusted with the municipal administration of the town the grave danger which menaced their charge; but, beyond obtaining from the Engineer a report, upon which no action was taken, the Justices did nothing. Dr. Tonnerre reverted to the subject in his report for 1872, and used these words :—

> In vain a supply of pure water has been introduced in the town; in vain our talented Engineer strains every nerve to carry out his drainage scheme for the improvement of Calcutta; in vain the drainage works will be carried on in the native portion of the town: as long as these villages are allowed to remain in their present state, we are upon a volcano, ready to burst under the slightest atmospheric perturbation, and cholera, small-pox, or any other zymotic disease may, at any moment, make their appearance amongst us in a most virulent form, defying sanitary improvements, and thus baffling the efforts of those who have been working hard for years to prevent their return

Again, beyond a brief reference to the matter in their Administration Report, the Justices did nothing. Dr. Payne succeeded Dr. Tonnerre as Health Officer, and to him is due the credit of leading the Commissioners elected under the new law to do something in the way of obliterating the filthy tanks from which the inhabitants of the bustees derived their supply of fluid. His efforts to induce them to retain the bustees generally, or even to maintain a small body of scavengers for the waste lands which formed the common latrines, were, however, unsuccessful. He showed that the inhabitants of the bustees generally lived their lives in the midst of filth, slept on filth, bathed in filth, drank filth, cooked in filth, washed their clothes in filth. But he was only allowed to fill up some tanks: no attempt was made to substitute clean water; no attempt was made to remove the filth which poisoned the earth and the atmosphere, and percolated into the many tanks that remained; no attempt was made to make the worst places accessible to the conservancy carts. Year after year Sir Ashley Eden urged the Commissioners to action, and pointed out the serious notice which the condition of Calcutta was attracting among sanitary authorities in England. Nevertheless no scavengering establishment was employed for the bustees, and the expenditure on bustee improvement was *nil* in 1879, Rs. 509 only in 1880, and Rs. 5,337 only in 1881. Under these circumstances, when an outbreak of sickness occurred, and when, from whatever cause, the atmosphere of parts of the town became tainted and offensive, it was natural that the European public should attribute the unsatisfactory state of affairs to municipal neglect, and ask Government to intervene for the protection of the community. The Lieutenant-Governor gladly recognizes that, before this application was made, the Commissioners, under the guidance of their able and energetic Chairman, Mr. Harrison, had already addressed themselves seriously to the task of bustee sanitary reform, which is undoubtedly the most important of all the reforms which demand their attention. The expenditure during the 15 months covered by the report was Rs. 40,069. This, however, did not include any outlay on the essential objects of scavengering and water-supply; and the Lieutenant-Governor is very glad to learn that the present Commissioners have for the current year adopted a scheme prepared by Mr. Harrison, involving an outlay of Rs. 1,50,000 on (1) scavengering establishment, (2) erection of bathing platforms, to be supplied for the present with unfiltered water, (3) structural improvements. It was time that the Commissioners should thus show their appreciation of the gravity of the position, and the Lieutenant-Governor trusts that the grant will on no account be reduced hereafter. The

question of bustee sanitation has become one of more than local interest. The condition of the chief ports of India, especially with reference to cholera mortality, has attracted the attention of the Governments of foreign countries, and important interests of imperial trade are involved in the removal of the causes which must unquestionably contribute to insalubrity.

17. It will be well that the Commissioners should understand what it is that Government and the public demand at their hands. What is required is not the immediate substitution of regular streets with model masonry houses for the clusters of huts known as bustees. It is very desirable that substantial, regularly built, and well ventilated houses should gradually take the place of huts huddled together without plan or system, and the Lieutenant-Governor will be glad to see the Commissioners make free use of their powers to acquire land, clear it and sell it for building purposes and under proper rules. But structural improvements, though they should be steadily pursued, are not for the moment of primary and vital importance. What is urgently required, and must be insisted upon, is—

(1) The obliteration of the cess-pools called tanks, and the substitution of stand-pipes and bathing platforms.

(2) The provision of means of access for the conservancy carts or wheel-barrows, the connection of all premises with the pipe-sewers, and the cleansing of the connecting drains and the waste lands of the bustees.

So long ago as 1878 Dr. Payne wrote:—"If only the existing law were carried out in respect of conservancy, the tanks obliterated or remodelled, and the night-soil of the town effectually removed, such great improvement in the public health might reasonably be expected as should postpone indefinitely the costly and difficult work of re-construction."

(1). The work of tank-filling does not proceed so rapidly as might be wished. Thirty-three tanks were obliterated during the year at a net cost of only Rs 1,768 to the municipality; but very many still remain. It is satisfactory to note that of the 33 tanks 13 were filled up by their owners. No doubt there is a difficulty in procuring material for this work; but the Lieutenant-Governor trusts that every effort will be made to secure a more rapid rate of progress in the current year than has been attained in its predecessors. As regards the counterpart of the scheme of tank-filling,—the provision of wholesome water for the use of the people,—it is to be observed that Mr. Harrison's scheme contemplated the erection of 75 platforms in five years at an estimated cost of Rs. 1,200 each. The Lieutenant-Governor has reason to believe that this estimate of cost is unduly high. He understands that the platform which has just been constructed in Komedan Bagan bustee did not cost more than Rs. 500, and, allowing for the cost of land where the owners are unwilling to give it free, he considers that an average rate of Rs 600 should suffice. The total cost would thus be reduced to Rs. 45,000, and Mr. Rivers Thompson would very strongly urge upon the Commissioners the advisability of at once carrying out this part of the scheme, by constructing at least 75 platforms during the current year.

(2). The progress of the drainage works has been accompanied by the conversion of many filthy ditches into good roads or paths. It is understood that the operations of this department will be completed by the end of 1884; and the roads made by it, supplemented by others constructed by the owners or by the Commissioners, should soon suffice to bring the whole of the bustee area within the reach at least of the conservancy carts or wheel-barrows. With the extension of the pipe-sewers, the Commissioners should rigorously insist upon the construction of house-connections in all cases. This having been done, if the establishment recommended by Mr. Harrison for keeping the surface connections clean and for cleansing the waste lands is maintained, the essential steps for the conversion of the Calcutta bustees into comparatively healthy localities will have been taken; and if the Commissioners will continue, as the Lieutenant-Governor has no doubt they will, the action which they have taken in the current year, and steadily devote at least Rs. 1,50,000 annually to the cleansing and structural improvement of the bustees, a very few years should see a vast improvement in the health as well as in the physical aspect of the northern division of the town.

18. There was nothing worthy of note in the meteorology of the year. The average temperature was a little higher than usual, and the average humidity was also high, especially in October and November. The rainfall was practically normal, falling short of the average of the last 48 years by only two-tenths of an inch. The distribution, however, was to some slight extent unusual, being in excess in February and October, and in deficit in June, July, and August. The price of food was generally moderate, rice selling at Rs. 2-9, Rs. 2-3, Rs. 2-1, and Rs. 1-14 per maund according to quality. Dr. Macleod observes that these prices entitle the year to rank as a year of plenty.

19. The number of births registered was 7,505, besides 1,852 registered during the first three months of 1883. The birth-rate of 1882 was 17·3 per mille, which is slightly in excess of that of the previous year. Among the various races, the recorded birth-rates per mille were—

	Birth-rate.	Proportion of male to 100 female births.
Non-Asiatics	16·3	102
Mixed races	42·7	109
Hindus	18·3	108
Mahomedans	13·9	121
Others	6·3	84

The Health Officer observes that the statistics for non-asiatics and mixed races are open to great doubt, and a recorded birth-rate of 42·7 per 1,000 certainly seems abnormal. It is probable that the actual number of births is on the whole correctly returned according to races, whereas the birth-rate is calculated upon a census population which was reduced by the inclusion among non-asiatics of many members of the mixed races. It is improbable that there is any appreciable concealment of births among the Eurasian class. It is curious to notice the large excess of males over females in the case of twin births, the percentage of the former being as high as 119. Dr. Macleod believes that twin births are more correctly registered than others, and he thinks that the facts raise a presumption in favour of the excess of male over female births throughout the province generally. The recorded facts are certainly remarkable. It should be remembered, however, that in an ordinary Hindu household, the birth of twin daughters would be regarded as a calamity, and the temptation to concealment would in some cases at least be too strong to be resisted. The Lieutenant-Governor prefers to reserve his opinion.

20. The death-rate of the year was unusually high. Only three years in the preceding decade present higher aggregates, and the rate is also in excess of the decennial mean. The total number of deaths in 1882 was 13,177 against 13,030 in 1881, and an average of 12,714 in the ten years 1872-81. There were also 3,434 in the period of January to March of 1883. The death-rate per mille was 30·4 against an average of 29·3. The main cause of the increase was cholera, which was unusually prevalent, being credited with 2,240 deaths against 1,693 in 1881, and a decennial average of 1,341. The Commissioners point out that the year was undoubtedly one of general prevalence of cholera, and that the outbreak was more severe in the tracts adjacent to Calcutta than in Calcutta itself; and they infer, not only that the outbreak was due to general and not to local causes, but that local causes tended to mitigate it. It is possible, however, to push this inference too far. It would certainly be unfair to point to the increase in cholera mortality in Calcutta and ascribe it wholly to municipal neglect, without adverting to the general influences of the season which the experience of the metropolitan tracts generally shows to have been in operation. But it is quite certain that had the Commissioners of Calcutta pursued for some years the policy which they have now adopted—had they adopted the advice unceasingly tendered to them by their officers and provided properly for the sanitation of the bustees, and removed undoubted sources of disease which were undoubtedly removeable,—the mitigation of the outbreak would have been much greater and the mortality consequently much less. The responsibility for a great deal of cholera mortality in 1882 unquestionably rests with the predecessors of the present Commissioners. The Army Sanitary

Commission quite justly remark:—"From what has been said, it will be seen that increase of cholera in Calcutta is a perfectly legitimate consequence of filth unremoved and accumulating among the dwellings of the people, and we have also seen where the blame of this lies."

The other chief diseases show a sensible decrease of mortality, especially small-pox, which caused only 17 deaths during 1882. It is to be observed, however, that there were as many as 38 deaths from small-pox in the first quarter of 1883. Under pressure of this outbreak vaccination was pushed on with great vigour, and it is reported that 6,063 persons were vaccinated within the quarter in question. The infant death-rate was as usual very high, being 427·1 per mille. In other respects the vital statistic of Calcutta for 1882-83 do not present any remarkable features.

21. The report now submitted is unusually full and interesting. The peculiar circumstances of Calcutta are strongly brought out by an able and elaborate comparison with the financial position of other great cities; and the details of the work done, and to be done, by the different departments are fully and lucidly exposed. The Commissioners touch briefly upon questions of taxation and the sources of municipal revenue which they doubtless do not expect the Lieutenant-Governor to deal with in reviewing a report of this nature. Mr. Rivers Thompson fully appreciates the great need of many structural improvements in the town, and he would be glad to see the question of providing better channels for its ever-increasing traffic comprehensively considered The subject is of special importance in connection with the early completion of the Hooghly Bridge, the establishment of a Central Railway Station, and the great undertaking for the construction of large Docks at Kidderpore.

22. The Lieutenant-Governor desires to thank the Commissioners for their services during the year. The offices of Chairman and Vice-Chairman were held throughout by Mr. H. L. Harrison and Rai Shama Churn Dey, Bahadur respectively, whose valuable services have again earned the cordial approbation of the Municipality and of Government.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE SALT DEPARTMENT IN 1882-83.

REVENUE DEPARTMENT—MISC. REVENUE.

Calcutta, the 8th December 1883.

RESOLUTION.

READ—

The Report of the Board of Revenue on the Administration of the Salt Department in 1882-83.

The receipts of the Department during the year show a considerable decrease, which is attributed to the reduction of the salt duty (from Rs. 2-14 a maund on imported salt, and Rs. 2-8 to Rs. 2-12 a maund on salt manufactured in Orissa and the 24-Pergunnahs, to an uniform rate of Rs. 2 per maund) brought into effect on the 10th March 1882, and the importation of large quantities of Bombay salt on which duty had been previously paid at that place. The charges, on the other hand, show an increase, due to larger refunds of duty. The financial results of the past two years are compared in the following statement:—

HEADS.	1881-82.	1882-83.	Increase.	Decrease.
RECEIPTS.	Rs.	Rs.	Rs.	Rs.
Imperial—				
Import duty on salt	2,37,15,928	1,71,72,575	.....	62,43,353
Excise ditto	9,73,170	7,27,526	.....	2,45,644
Total ...	2,46,89,098	1,82,00,101	.....	64,88,997
Provincial—				
Rent of warehouses	1,07,409	1,23,434	16,025	.....
Miscellaneous	39,626	41,553	1,927	.....
Total ...	1,47,035	1,64,987	17,952	.....
Total Receipts ...	2,48,36,133	1,83,65,088	.....	64,71,045
CHARGES.				
Imperial—				
Compensation paid under conventions with the French Government	20,000	20,000	.....	.....
Salt Preventive Establishment in Orissa	19,400	16,064	.....	3,336
Refund of customs duty on salt	2,54,497	2,84,801	30,304	.....
Total ...	2,93,897	3,20,865	26,968	.....
Provincial—				
Salaries, establishments, and contingencies	17,789	17,626	.....	163
Refunds other than customs and excise duty... ...	94	.....	.....	94
Total ...	17,883	17,626	.....	257
Total Charges ...	3,11,780	3,38,491	26,711	.....
Approximate Net Revenue ...	2,45,24,353	1,80,26,597	.....	64,97,756

The decline in receipts thus amounted to Rs. 64,71,045, or 26 per cent.; while the charges rose by Rs. 26,711, or 8·5 per cent.

2. The stocks of salt in hand at the commencement of the year amounted to 23,18,543 maunds, and during the year 84,46,014 maunds were imported, and 2,87,846 maunds manufactured locally, making a total of 1,10,52,403 maunds available for the whole year. Of this quantity duty was paid on 95,45,913 maunds (the duty on 5,21,099 maunds having been realized in Bombay), 2,500 maunds were passed free of duty, and 87,353 maunds were written off on account of wastage and destroyed, a balance of 14,16,637 maunds being thus left in stock at the end of the year. The corresponding figures of the preceding year show 20,36,503 maunds of initial stocks, 90,03,787 maunds of imports, and 4,75,763 maunds locally produced or a total of 1,15,16,053 maunds for the entire year; and during the year duty was paid on 91,61,096 maunds (including 20,700 maunds on which duty was realized in Bombay), 250 maunds were passed free of duty and 37,475 maunds were written off for wastage and destroyed. A comparison of the figures for the two years shows

a decrease in the past year in both importation and manufacture, but an increase in the quantity of imported salt on which duty was paid.

3 Importation was, as in the previous year, confined to Calcutta and Chittagong, and the chief sources of supply were again the United Kingdom, Bombay, the Arabian and Persian Gulfs, and Italy. Some cargoes were also received from France and Spain, and a small consignment arrived from Austria (Trieste). The decline in importation, amounting to 5,57,578 maunds, occurred at both Calcutta and Chittagong. This result is attributed in Calcutta to the heavy losses suffered by importers in 1881-82, in consequence of the unremunerative prices of salt, and accumulation of stocks and continued low prices in the past year. Large importations in the previous year account for the decrease at Chittagong. The Board bring to notice, in connection with this subject, the wastefulness of the systems of weighing salt cargoes into ships lately introduced in Liverpool. Under the old system salt was weighed in scales suspended over the hatchways, whereby all spillage went into the hold, the ships received liberal weight and no wastage occurred on deck. Now salt is weighed on deck in self-registering tubs, or the cargo is calculated from the drafts of the lighters which are registered. Under this new system the general percentage of wastage on arrival in Calcutta has been found to be 3·5 in 1882, against 2·7 in 1878, 2·6 in 1879 and 2·9 in 1880 and 1881; and the Board having regard to it support a suggestion of the Collector of Customs that the present wastage allowance of 5 per cent. for vessels coming through the Suez Canal and of 8 per cent. for vessels coming round the Cape be withdrawn, and a general rate of 3 per cent., which experience has shown will more than cover the actual average loss, be allowed. It is not, however, stated whether the mercantile community affected has been consulted in regard to this proposal, and the Lieutenant-Governor will, therefore, defer the consideration of it until the Board have obtained the views of the Chamber of Commerce on the matter, and submitted a special report to Government.

4. The clearances of salt from shipboard were less than in 1881-82 at both Calcutta and Chittagong, being 62,92,850 against 64,92,330 maunds at the former and 69,657 against 1,01,736 maunds at the latter. At Chittagong 31,000 maunds were in addition cleared under bond for Naraingunge. The clearances of imported salt from bond, however, increased from 19,44,961 to 25,13,492 maunds in Calcutta and 2,37,565 to 2,81,204 maunds at Chittagong. Besides these quantities, 24,886 maunds were cleared at Naraingunge and 100 maunds at Balasore, where there were no clearances in the previous year. The total increase in clearances at all ports thus amounted to 6,27,156 maunds, or 29·1 per cent.; but the reduction of the duty caused a decrease of 4·4 per cent. in the receipts. At Chittagong the quantities removed for the districts of Tipperah and Noakholly fell off owing to these districts now taking their supplies chiefly from Naraingunj; but the clearances for Chittagong itself and Naraingunj largely increased. The salt trade of the port would, without doubt, be greatly developed by the construction of the projected railway to connect it with Chandpore on the Megna and later with Assam.

5. A considerable decrease again took place in the manufacture of excise salt, for which various reasons are assigned. The total quantity manufactured amounted to only 2,87,846 maunds against 4,75,763 maunds in 1881-82 and 6,15,776 maunds in 1880-81. In the 24-Pergunnahs only 7,643 maunds were manufactured as compared with 17,110 in the previous year and manufacture was altogether abandoned in the course of the year. In Orissa there was a decrease in all districts, amounting in the aggregate to 1,78,450 maunds, or 38·9 per cent. The falling off was especially large in Balasore, where only 93,131 maunds were produced against 2,02,763 maunds in 1881-82, this result being attributed by the Commissioner to the existence of large stocks at the beginning of the year, and to the operations being checked by heavy rains at the commencement of the season and dearness of labour. The last two causes, as well as competition of Ganjam salt, also account for the reduced manufacture in Pooree; while in Cuttack manufacture is said to have been checked by the bad weather early in the season, and by the fact that the contractors had in hand from the previous year a stock equal to nearly a year's sale.

6. Sales of excise salt increased from 7,500 to 8,500 maunds in the 24-Pergunnahs, and from 1,39,320 to 1,72,245 maunds in Balasore, but fell

from 73,362 to 61,874 maunds in Cuttack, and from 1,64,321 to 1,20,408 maunds in Pooree. The net result for all districts was a reduction in sales from 3,84,503 to 3,63,027 maunds, or by 5·5 per cent., and in duty from Rs. 9,73,170 to Rs. 7,26,055, or by 25·3 per cent. The increase in the 24-Pergunnahs calls for no remark, and in Balasore it was due to the locally manufactured salt being in greater demand for exportation to Cuttack and the Tributary Mehals. The decrease in Cuttack is attributed partly to the importation of Balasore salt, and that in Pooree to the growing competition from Ganjam, which the local manufacturers somewhat aided by holding out for higher prices for their own inferior produce. The Collector calls attention to the danger which the Pooree salt-makers run from the diminished demand for their salt. They are represented as entirely dependent on the manufacture of salt for subsistence. If that fails, their condition, already low, will be still further reduced.

7. The total quantity of salt sold within the law limits in the saliferous districts of Midnapore, Howrah, the 24-Pergunnahs, Khulna, Backergunge, Chittagong, Noakholly, Cuttack and Balasore rose from 9,67,083 to 9,99,653 maunds, showing a net increase of 32,570 maunds, or 3·3 per cent Consumption increased in all districts except Backergunge. In Midnapore and Khulna the advance was slight. But in Howrah it amounted to 4·3 per cent. on the previous year's consumption, in the 24-Pergunnahs to 3·1 per cent., in Chittagong to 6 9 per cent, in Noakholly to 4·6 per cent., in Cuttack to 6·4 per cent., and in Balasore to 5 per cent. The reduction of the salt duty is alleged everywhere to have contributed in part to the increase, while as special causes tending to stimulate consumption an influx of labourers for employment on local works is mentioned in the 24-Pergunnahs, Khulna, and Balasore, increased vigilance on the part of the police in Howrah, Chittagong, and Cuttack, the prosperous condition of the agricultural classes in Chittagong, and increase of population in Noakholly. The decrease in consumption in Backergunge is ascribed to large stocks having been in the hands of the dealers at the beginning of the year, to the prices having been kept high by the dealers for a considerable period, and to the diversion of the trade of some of the marts within salt limits to places outside them. The Lieutenant-Governor agrees with the Board that there is no good reason to suspect the prevalence of illicit manufacture to any appreciable extent in the district.

8. The number of seizures in all districts during the year was 432, and the quantity of salt attached 4,780 maunds, against 530 seizures and 891 maunds in 1881-82. In 40 cases with 4,594 maunds, against 28 cases with 686 maunds in 1881-82, the salt was released, while in 394 cases with 188 maunds, against 505 cases with 203 maunds in 1881-82, the salt was confiscated. It will be observed that the number of cases fell off by 98, or 18·5 per cent., while the quantity of salt seized increased by 3,889 maunds, or 436·4 per cent.; these results are very satisfactory. The quantity, of salt, however, released after seizure increased largely owing to six large seizures of salt in transit in Howrah, embracing 1,876 maunds, and to one seizure of 2,500 maunds in the 24-Pergunnahs, in all of which the whole of the salt was released. The action of the authorities in these cases, if technically correct, must have caused considerable inconvenience, and, perhaps, some loss to the owners or the persons in charge of the salt, which might apparently have been avoided by a less rigid enforcement of the strict letter of the law. Where the substantive provisions of the law or the rules regarding the transit of salt are infringed purely through ignorance or carelessness, and without intention to defraud the revenue, it can seldom be necessary or equitable to have recourse to the extreme penalty of confiscation; and Mr. Rivers Thompson desires that this consideration may be borne in mind by all officers in dealing with such cases in future. In the Resolution on the last report the Lieutenant-Governor, referring to the large number of salt seizures, observed that he "would gladly be sure that for each seizure several unsuccessful searches were not made," and called on the Board to submit with the present report a statement showing both the number of unsuccessful searches and the number of actual seizures made by the police during the year. The Board have complied with this request. The statement furnished shows the number of seizures and of unsuc-

cessful searches respectively to have been 518 and 147. The proportion between the two is, the Lieutenant-Governor gladly observes, satisfactory in all districts except Backergunge, where for 58 seizures no less than 104 unsuccessful searches were made. The people have clearly been subjected to much unnecessary harassment in this district. while the diminished consumption of salt there is not incompatible with the belief that the searches were ill-directed. The Lieutenant-Governor must, therefore, request the Commissioner, who has already drawn the attention of the police to the matter, to be careful, while encouraging legitimate proceedings on their part for protection of the the revenue, to check any tendency to injudicious activity such as the above figures seem to disclose.

9. In paragraphs 55—60 the Board submit the opinions of the local officers and their own conclusions on the question of simplifying the present salt system for the greater convenience of the public, on which they were requested to report in the last Resolution. They have rightly understood the Lieutenant-Governor's observations to have had reference more to the working of the rowannah system than the prevention of illicit manufacture; but Mr. Rivers Thompson fears that little practical improvement is likely to be obtained from the only proposal which they are prepared to make, namely, "that the district officers be instructed to follow a firm and uniform policy of insisting on the observance of the salt law, and to intelligently and carefully watch the action of the police in connection with salt cases." The policy and the course of action here indicated have already been repeatedly enjoined on the district officers in various ways, but with the result of only partial and transitory improvement. The causes of the undesirable friction between the public and the authorities, which, no doubt, exists, in a greater or less degree, everywhere, are inherent in the system itself, and real and permanent improvement must be looked for only in a modification of the system.

10. Prosecutions for offences against the salt laws were less numerous than in the previous year. The cases instituted during the year were 1,173 against 1,262 in 1881-82, and the total number brought to trial (inclusive of the cases pending from the preceding year) was 1,198 against 1,283, resulting in 1,078 convictions against 1,151 in 1881-82. The most important offences against the salt law are obviously illicit manufacture and illicit possession or transport of salt, which almost invariably implies previous illicit manufacture. The total number of cases under these heads fell last year from 608 to 470, a decrease which is sufficiently large to justify the conclusion that there has been a real diminution of illicit manufacture, due probably to greater watchfulness on the part of the police, and to the fact that the cheapening of salt, caused by the reduction of the duty, has weakened the temptation to resort to such manufacture. Cuttack alone shows a large increase in these cases.

11. The despatches of salt into the interior by the different water routes and railways in the last two years were—

Year.	*Viâ* Balli Khal.	*Viâ* Sankrail.	*Viâ* Gowakhally.	*Viâ* Kidderpore.	*Viâ* Balliaghatta.	By the East Indian Railway.	By the Eastern Bengal and Calcutta and South-Eastern Railways, or *viâ* Chitpore.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
1881-82	16,37,018	5,66,369	2,23,693	18,26,981	1,300	28,57,947	11,04,129
1882-83	13,55,729	5,92,862	2,76,086	16,20,328	2,19,828	34,37,203	10,12,356
Increase	.....	26,493	52,392	.....	2,18,528	5,79,256	.....
Decrease	2,81,289	.....	.....	2,06,733	.....	.....	91,773

There was, it will be observed, a net decrease of 1,90,609 maunds in the quantity conveyed by water, but a net increase of 4,87,483 maunds in the despatches by rail.

12. The Lieutenant-Governor approves of the Board's decision to postpone the submission of their report on the proposed exemption of Cuttack and

Balasore from the rowannah system until the question of placing the manufacture and sale of excise salt in Orissa under the control of the Madras Salt Department, working in this matter in subordination to the Bengal Government, has been settled. The Lieutenant-Governor has already agreed to this proposal, which emanated from the Supreme Government, and it remains only to arrange the details after the Madras Salt Commissioner has visited Orissa and submitted his recommendations.

13. The reduced importations of the year led to a decrease of nearly three lakhs of maunds in the quantity of salt bonded during the year, which amounted to 18,35,037 maunds against 21,32,146 maunds in 1881-82, and the quantity remaining in store at the end of the year was only 9,01,902 maunds as compared with 15,95,509 maunds at the commencement.

14. The Lieutenant-Governor thanks the Board for their careful administration of the Department during the year. The names of the officers favourably noticed by them will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

A. P. MACDONNELL,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE COLONIAL EMIGRATION REPORT FOR THE YEAR 1882-83.

GENERAL DEPARTMENT,—COLONIAL EMIGRATION.

Calcutta, the 11th December 1883.

RESOLUTION.

READ—

The Report of the Protector of Emigrants for 1882-83.

THE only important event of the year in connection with colonial emigration was the deputation of Mr. Grierson to conduct in Bengal an enquiry into the general system of emigration, and especially of recruitment, similar to that which had been previously carried out in the North-Western Provinces and Oudh by Major Pitcher. An interesting and useful report was submitted by Mr. Grierson, on which both this Government and the Government of India have passed orders, and effect will be given in the new Indian Emigration law now before the Legislative Council, and its subsidiary rules, to all the recommendations of the report which appear calculated to facilitate recruitment. Measures will also be taken to improve the mode of registering emigrants so as to facilitate correspondence between India and the Colonies and to secure the regular transmission to their heirs in India of the estates of emigrants dying intestate abroad, and generally attention will be directed to promoting the free working of colonial emigration in Bengal. The advantage of emigration as a means of relieving the pressure for existence in crowded Indian districts needs no demonstration; and it is also unquestionable that the surplus population of these provinces is sufficiently large to meet the labour demand of the Colonies, as well as that of the less populated provinces of India itself, to which emigration from Bengal is at present practicable, as for instance, the districts of Assam. The Lieutenant-Governor is, moreover, satisfied that, as a very general rule, the Bengal or Behar coolie materially improves his lot by emigration to the British Colonies: every attention is paid to his health and comfort on the voyage; he is the object, under special regulations, of protection at the hands of the Administration after his arrival in the Colony; and he earns during his sojourn there wages, which, as evidenced by the large sums annually brought to India by the return emigrants, are high enough to enable him to effect considerable savings in the course of a comparatively few years. Colonial emigration, therefore, has Mr. Rivers Thompson's cordial approval; but it is necessary to observe that the help which the Government can accord to it must, in the nature of the case, be confined to narrow limits. In a country where the mere expression of a wish on the part of officials is often interpreted as an order by the people, or distorted into such by designing persons for the achievement of their own ends, the Government could not, consistently with its duty to the people, undertake to lend active and direct aid to recruitment for the Colonies. All that the Administration can rightly do is to see that no obstruction is unnecessarily placed in the way of emigration, to encourage the dissemination among the masses of accurate information regarding the Colonies and the prospects of colonial emigrants, and to facilitate the interchange of communications between the emigrants and their relatives and friends in India. So far as the removal of all official obstacles to emigration is concerned, this has, indeed, been the steady policy of the Government of Bengal for many years past, and if, as has been stated by the Emigration Agencies, they have sometimes found reason to complain of their operations being unreasonably impeded by Government officials, such obstruction has never been countenanced by the Government. Any impediments of this nature could, moreover, have never materially affected the success of the Agencies. The real and only serious obstacle to recruitment for the Colonies has, doubtless, been, and must continue to be, the objection of the people themselves to emigrate, due to caste prejudices, attachment to their homes, general ignorance of the conditions of life and prospects in the Colonies, and unwillingness to leave their villages in seasons of prosperity and cheap food. The ignorance and prejudices of the people may, to a large extent, be removed, and towards this the Agencies themselves can contribute by the employment of return emigrants in recruitment, by helping to promote regular correspondence between the Colonies and

this country, and by providing that the intestate estates of deceased emigrants shall be regularly conveyed to their heirs in India. The effect of prosperous seasons on emigration is, however, due to economic laws which cannot be controlled by any legitimate executive or legislative action: no improvement of the law or rules will stimulate emigration when the Indian labourer earns good wages at home, and can readily provide himself with food and clothing.

2. It was found necessary last year to close emigration to the French Colony of Réunion owing to the unsatisfactory reports received of the condition of the emigrants in the island, and an order to that effect was accordingly issued by the Government of India under section 57 of the Act. The Emigration Agencies at work during the year were eight, six representing the British Colonies of Mauritius, Trinidad, Demerara, Jamaica, Natal and Fiji, one the Dutch Colony of Surinam, and one the French Colony of Gaudeloupe. The requisitions for emigrants received from the Colonies and the number actually despatched in the last two years are shown in the following statement :—

Colonies importing Indian labour.	1881-82.				1882-83.				Remarks.
	Number of statute adult labourers.				Number of statute adult labourers.				
	Under requisition.	Despatched.	In excess of requisition.	Short of requisition.	Under requisition.	Despatched.	In excess of requisition.	Short of requisition.	
Demerara	4,760	2,071½	.....	1,788½	6,000	2,773½	.....	3,226½	
Trinidad	2,892	2,402½	... ...	489½	3,000	1,828½	... ...	1,171½	
Fiji	1,200	None	... ..	1,200	1,000	855½	... ..	144½	
Mauritius	Males 500	None	... ..	500	Males 1,825	908*	.....	917	*These numbers include the females also. Requisitions from Mauritius and Natal specify the number of men only, and leave the number of women to be adjusted by the rule regulating their proportion.
Natal	,, 1,587	1,183*	.....	404	,, 2,091	829*	.....	1,861½	
Surinam	350	446½	... ...	3½	511	421½	... ...	89½	
Guadeloupe ...	825	942½	17½	.....	900	934½	34½	... ..	
Jamaica	None	..	.....	... ..	575	376	... ..	199	
Total ...	12,314½	7,996	17½	4,385½	16,502	8,927	34½	7,609½	

The number of labourers wanted by the Colonies last year thus exceeded that in the preceding year by 4,188 statute adults ; but so great was the difficulty experienced in inducing coolies to emigrate, owing to the favourable harvests and low prices of recent years, that none of the Agencies, save that for Guadeloupe, succeeded in meeting the demand of their respective Colonies. The success of the Guadeloupe Agency was apparently due in the main to the small number of labourers required, and the fact that the Agent's attention was entirely given to recruitment for that Colony alone. The terms offered to emigrants by the various Colonies remained the same as in previous years.

3. The larger demands of the Colonies and the difficulty of procuring emigrants necessitated an increase in the number of recruiters, and tended at the same time to stimulate resort to irregular recruitment. The number of recruiting licenses granted was 576 against 452, and the cancellations for misconduct were 15, or 2·60 per cent., against 14, or 3·09 per cent. in 1881-82. Sufficient evidence of misconduct was obtained in three cases for a conviction, and the offenders, besides losing their licenses, were sentenced to fine or imprisonment.

4. The total number of emigrants registered during the year was 13,035, the chief centres of recruitment being Calcutta (where the recruits were as usual, up-country people), Lucknow, Benares, Cawnpore, Allahabad, Patna Agra and Faizabad. Distributed according to their places of residence the emigrants of the year were supplied thus by the different provinces :—

North-Western Provinces	6,577
Oudh	2,656
Bengal and Behar	2,170
Punjab	528
Central India	331
Miscellaneous (Nepal, Madras, Bombay, &c.)	773
Total ...	13,035

The Natal and British Guiana Agencies found it necessary, in consequence of the scarcity of emigrants in the northern Provinces, to extend operations to Ganjam, and several hundred persons were recruited there and brought to Calcutta for embarkation.

5. Of the 13,035 emigrants registered, only 12,253 were admitted into the Calcutta depôts, the balance being accounted for by 180 desertions in the interior, 137 detentions in the mofussil depôts, and 465 discharges by the Agents, of which 25 were for unfitness, 8 for unwillingness to emigrate, 16 because they were claimed by relatives, and 416 because they were recruited too late for shipment during the season. These results, showing 5·99 per cent. of total deductions between registration and arrival in depôt, were somewhat better than in the previous year, when the percentage was 6·17. The percentage of deductions after arrival in depôt was, however, less favourable, having amounted to 17·94 against 14 in 1881-82. The difference was especially marked in the case of desertions, and the increase of these is attributed to delays in the embarkation of the emigrants and the prevalence of high wages in Calcutta, which naturally tempted the men to abandon their intention of emigrating and seek for work in the town. The rates of sickness and mortality during the year were also somewhat higher than in the previous year, the principal diseases being, as usual, malarious fever, dysentery, diarrhœa, chest affections and cholera. The percentage of fever cases was especially high in the Guadeloupe, Trinidad, Fiji and Surinam depôts, and, as these depôts also had the largest percentages of such cases in the previous year, the excessive prevalence of fever in them may possibly be accounted for by defects in their sanitary arrangements. The Lieutenant-Governor, therefore, desires that Dr. Grant will especially enquire into this matter, and suggest improvements to the Agents should any be found desirable. The total deductions in depôt were 2,397, comprising 84 deaths, 824 desertions, and 1,489 discharges on account of unfitness, unwillingness to embark, applications of relatives, relationship to other persons discharged, transfers to other Agencies and releases from engagement. The total number of emigrants in depôt during the year was altogether 13,356, 1,090 remaining from the previous year, and 13 born in depôt having been added to the number admitted within the year. The number available for despatch to the Colonies, after allowance for the deductions, was, therefore, 10,959. Of these 9,576, consisting of 6,108 men, 2,498 women, and 970 children, actually embarked, and 1,383 were thus left in depôt at the close of the year.

6. The emigrants embarked included 743 who had previously been in the Colonies, and, classified according to religion, consisted of 7,695 Hindoos (1,995 being Brahmins, 2,154 agriculturists, 456, artizans, and 2,790 of low castes), 1,846 Mahomedans, and 35 Christians. The large number of Brahmins would indicate that caste prejudice is, after all, not so strong an obstacle to emigration as is generally believed. The emigrants were despatched in 21 sailing ships, with an average number of 456 in each, and reports of the arrival of 20 of the vessels have been received, which show that 170 deaths occurred at sea, and that 9,406 souls altogether reached the different Colonies, thus: Demerara 2,956, Trinidad 1,930, Jamaica 393, Natal 869, Fiji 902, Mauritius 983, Surinam 403, and Guadeloupe 970. The remaining vessel contained 461 souls and was bound to Guadeloupe. With exception of a bad outbreak of cholera on board the *Sheila* bound to Surinam, the general health of the emigrants on boardship was better than in the previous year.

7. The return emigrants who arrived in Calcutta during the year were 3,546, or 386 in excess of the number in the preceding year, and they brought with them savings aggregating Rs. 5,69,760, their average savings being thus Rs. 161. The most prosperous of the emigrants were those returning from Demerara, and next those from Natal, Mauritius and Jamaica. As usual the emigrants returning from the French Colonies had the smallest savings.

8. The duties of the Protector of Emigrants were efficiently discharged by Dr. Grant, and also by Dr. Richards, who officiated for him during three months of the year.

By order of the Lieutenant-Governor of Bengal,

A. P. MACDONNELL,

Offg. Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 8th December 1883.

	No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.				
		Western Districts.		
Burdwan Div.	1	Burdwan, Dec. 8 '83	2·2	Weather—fine and cold. Rain fell on two days. *Amun* slightly damaged by rain, but this is more than made up for by the benefit received by cold-weather crops The ground too has been softened for ploughing. Fever prevails in the Sudder; elsewhere public health is fairly good.
		Cutwa ...	0·63	
		Culna .	1·76	
		Raneegunge ...	0·54	
	2	Bankoora, „ 8 „	1·44	Weather—at the beginning of the week cloudy and rainy; at its close cool and clear. The recent rain has enabled the winter crops to be sown, and is believed not to have done much harm to the rice Rice selling at from 16 to 20 seers per rupee. Fever prevalent in Bishenpore, Health good elsewhere.
		Bishenpore ...	1·36	
		Maliara ..	0·88	
		Khatra .	1·58	
	3	Beerbhoom, „ 8 „	0·79	Weather : part of the week cloudy and wet, remainder fine. Rain has slightly damaged the standing *amun*, but has benefited the *rubbee* crops Outturn of *amun* expected to be about 8 annas. Prices stationary, but high. General health satisfactory.
		Rampore Haut ..	1·82	
	4	Midnapore, „ 8 „	1·01	Weather—cool. The rain, which fell during the early part of the week, did no good to the rice crop, which is now being harvested. Public health fair.
	5	Hooghly, „ 8 „	1·85	Weather—cloudy. The late rain has improved the prospects of sugarcane, potato, and winter crops generally. It has perhaps slightly damaged the *amun* crop. Public health fair.
		Howrah, „ 11 „	2·15	Weather—rainy, cool and cloudy; fine in the latter part of the week. No change in the prospects of the *amun* crop. It is being reaped. Coarse rice selling at Rs. 2·8 per maund. Public health good
		Ooloobariah ...	1·98	
		Central Districts.		
Presidency Div.	6	24-Pergunnahs, Dec 11 '83	3·36	Weather—cloudy and rainy at the beginning of the week, but clear and cool in the latter part of it. Prospects of crops continue unfavourable. The rain has done some injury to that portion of the late paddy crop which had been cut but not removed from the field, but it has done good to the winter crops. Public health fair, though cases of cholera and fever continue to occur in almost all parts of the district.
	7	Nuddea, „ 8 „	0·22	Weather—cold; some showers *Amun* crop very bad. Harvesting has commenced in some parts. The late rain will be very beneficial to the winter crops which have germinated. Fever on the increase in Meherpore, but stationary elsewhere.
		Kooshtea ...	1·43	
		Meherpore	1·40	
		Choondanga ...	1·48	
		Ranaghat ..	2·25	
	8	Khoolna, „ 8 „	3·35	There was rain on the 4th and 5th instants; the rest of the week was fine. The rain has rather injured the rice crop, but has benefited the cold-weather crops, except mustard. Prices have risen slightly. There is much fever in some places, and some cholera reported.
	9	Jessore, „ 8 „	2·30	Weather—rainy, windy. Harvesting of *amun* crop in progress; outturn estimated at about 8 annas The rain during the week has done no good to the paddy, but some of the winter crops have been benefited by it. Fever prevalent in the district, but not in an epidemic form. Stray cases of cholera reported from Bongong and Keshaopore. Price of rice stationary.
		Jhenida .	1·73	
		Magura .	1·77	
		Narail .	2·28	
		Bongong ...	2·30	
	10	Moorshedabad, „ 8 „	1·08	Weather—seasonable The rain has come too late to benefit the *amun* rice, the prospects of which are unchanged. It has, however, much improved the condition of the *rubbee* crops Prices stationary Fever still prevalent in the north of the district.
Rajshahye and Cooch Behar Div.	11	Dinagepore Dec. 7 '83	0·57	Weather—still cloudy. The slight rain has done much good to the *rubbee*, and if, as it is hoped, it continues, great advantage is to be looked for. Prices not altered.
	12	Rajshahye, „ 8 .	1·09	Weather—cool and cloudy. The rain has been general and of much advantage to the *rubbee*. The mustard alone has suffered slightly.
		Nattore ..	1·43	
		Nowgong ...	1·00	
	13	Rungpore „ 7 „	0·32	Weather—seasonable. Harvesting of *amun* is in progress. Wheat, *cheena*, and *kaon* are up in some places. Tobacco and potatoes benefited by the late rain. Cholera reported from Barabari in the Kurigram sub division. Fever prevalent.
		Nilphamari ...	0·09	
		Kurigram ...	Nil	
		Gaibanda ...	Nil	
	14	Bogra, „ 8 „	0·79	Weather—cold and cloudy. The recent rain has been very beneficial to the *rubbee* crops. Public health generally fair.
	15	Pubna, „ 8 „	1·24	Rain on three days at Pubna. Mean temperature 64° with northerly wind. The rain, which has been general, has done much good to the winter crops. Prospects fair.
		Serajgunge ...	0·80	
	16	Darjeeling, „ 8 „	Nil	Weather cold and fine during most part of the week; cloudy during the last few days. In the Hills the outturn of paddy and *murwa* has been seriously affected by want of rain. Wheat and barley are being sown, and also potatoes in Kurseong.
	17	Julpigoree, „ 8 „	Nil	Weather—cloudy partially; mornings foggy. Harvesting of paddy has commenced all over the district; outturn expected to be about 12 annas. High price is due to rise in other districts. Cold-weather crops very much require rain and will suffer.
		Cooch Behar	...	Report not received.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date
	BENGAL.—*concld.*		
	Eastern Districts.		
	DACCA DIVN.		
18	Dacca, Dec. 8 '83	1·59	Weather—first part of the week clear and cold. Latter part showery and cloudy. Cutting of sugarcane and paddy continues. Sowing of pulses completed. In some parts land is being prepared for *cheena* and barley. Rain has done good to the winter crops. Prospects good.
	Manickgunge .	0·70	
	Moonshigunge ...	2·55	
	Naraingunge ...	1·79	
19	Furreedpore, „ 8 „	1·33	Weather—cloudy and rainy during the first three days of the week; since then seasonable. *Aman* harvest going on. The rain has done good to some of the *rubbee* crops, and has helped ploughing; but it was unseasonable, and has done harm to potatoes, &c.
	Goalundo .	0·95	
	Madaripore ...	1·96	
20	Backergunge, „ 6 „	2·85	Weather—cloudy and sometimes rainy. Prospects of crops in the low lands still good, but three days of rain and drizzle, accompanied by wind, have done considerable damage by making the paddy fall and breeding insects. Public health generally good. There have been a few deaths from cholera in the sub-divisions of Patuakhali and Nhola and in Barrisaul town.
21	Mymensingh, „ 7 „	0·78	Weather—cloudy with a little rain. The recent rain has done good to the winter crops. Paddy is being reaped. Public health in general not favourable. Fever raging in Atia in an epidemic form.
	Jamalpore ...	1·5	
	Kishoregunge ...	Nil	
	Atia ...	Nil	
	Netrokona ..	0·48	
	CHITTAGONG DIVN.		
22	Chittagong, Dec. 11 '83	8·15	The heavy rain has partly damaged the standing crop, and the outturn will be indifferent. Prices gradually rising. General health good.
23	Noakholly, „ 6 „	3·88	Weather cloudy during the first part of the week. Cloudy and rainy during the latter part. Wind south-easterly. *Amun* crop is being reaped. *Rubbee* crops are being planted. The heavy rain will probably do much damage to the crops, the prospects of which were good.
24	Tipperah, „ 7 „	2·70	Weather—cloudy. Persistent light rain since 2nd instant in the centre of the district. Crops reported good, but if this damp weather continues they must be spoilt.
	Brahmunberiah ..	0·09	
	Chandpore ..	Nil	
25	Chittagong Hill Tracts, „ 4 „	0·40	Weather—hot and cloudy throughout the week. Gathering of cotton continues. Prospects of paddy and sugarcane good. Sowing of mustard and other cold-weather crops still continues.
	Hill Tipperah „ 5 „	0·36	Weather during the first half of the week seasonably cold and dry, but during the last half rather rainy. Wind blowing from the north and north-east. *Shail* paddy is still being reaped. The rain will benefit the winter crops. Public health good.
	BEHAR.		
	PATNA DIVN.		
26	Patna, Dec. 8 '83	Nil	Weather—cold. Very slight rain reported in the east of the district. Reaping of paddy is still going on. *Rubbee* germinating well, but rain is much wanted. Public health good.
27	Gya, „ 8 „	0·01	Weather—cloudy and warm in the early part of the week. A few drops of rain on the morning of the 5th. The weather has cleared up again and is now cold and dry. Rice crop is being reaped, and sugarcane is being pressed. *Rubbee* prospects still very doubtful. General health good.
28	Shahabad, „ 8 „	Nil	Weather—cool and clear. *Rubbee* crops on the unirrigated lands looking poor; those irrigated by canal have a better appearance. Rain much wanted.
	Buxar .	Nil	
29	Durbhunga, „ 8 „	Nil	Weather—cloudy, but no rain; only a slight drizzle on one day during the week. Paddy is being harvested with a poor outturn, about 8 annas throughout the north and middle of the district. *Rubbee* is withering for want of moisture.
30	Mozufferpore, „ 8 „	Nil	Weather—dry and cool. Two days cloudy. *Rubbee* crops in most parts suffering from want of rain, but in a few are reported as yet healthy. Paddy is being cut everywhere; outturn estimated at from 2 to 6 annas. Price of rice slightly decreased at Hajipore. Public health fair, but fever still prevalent in Sitamurhee.
31	Sarun, „ 8 „	Nil	Weather—cool and clear; no sign of rain. Paddy is being harvested. *Rubbee* doing well where irrigation is practicable. On high lands it is backward and suffering from want of moisture. Rain much wanted. Prices stationary. Public health good.
	Sewan ...	Nil	
	Gopalgunge .	Nil	
32	Chumparun, „ 8 „	Nil	Weather—cool. Owing to cold nights and heavy dews the *rubbee* is looking well, though in places it is rather backward in growth. Rain is much wanted for the standing *rubbee* crops, and also to enable cultivators to sow down empty lands.
	PURNEAH DIVN.		
33	Monghyr Dec. 8 '83	Nil	Weather—cold and cloudy. A few drops of rain fell in the Sudder and Jamui sub-divisions on the 4th. There has been rain for 15 hours at Chakai in Jamui. Harvesting of *aghani* paddy has commenced; outturn will be poor. Prospects of *rubbee* crops fair. Prices stationary. Public health good.
	Begusarai .	Nil	
	Jamui .	Nil	
34	Bhagulpore, „ 8 „	0·26	Prospects of *aghani* rice not good. Average expected yield in Banka 6 annas; in the Sudder sub-division from 4 to 8 annas, except in thana Colgong, where the outturn will be only 2 annas; in Mudehpoorah from 6 to 8 annas. Much export is being made from the northern part of the district into Durbhunga. Paddy is selling at 25 seers per rupee. Prospects of *rubbee* crops up to date not absolutely bad, but ground not moist enough. Rain urgently needed. Area sown with *rubbee* far less than ordinarily. Prices of food-grains steadily rising. Coarse rice now selling in the town of Bhagulpore at 14½ seers per rupee.
	Banka ...	0·13	
35	Purneah, „ 8 „	0·10	Weather—delightful. Prospects of crops slightly improved since the rain of the 5th. More rain wanted. Health fair. Common rice selling at 14 seers per rupee.
	Arrareah ...	Nil	
36	Maldah, „ 8 „	1·03	Weather—the first four days were cloudy and the wind was north and north-east, followed by a copious shower on the night of the 4th; since then fair with prevailing wind from the north and north-west. The standing *rubbee* crops, except mustard, have been benefited by the rain. Prices of food-grains stationary. Public health good.
	SOUTHAL PERGHS.		
37	Southal Perghs, „ 8 „	0·98	Weather—bright, cold and clear. Rain fell on the 5th and 6th instants. It has had no effect on the winter crops, the average outturn of which will be under 8 annas. In the east half of the district it has improved the prospects of winter sowings.
	Deoghur ..	0·28	
	Godda ...	0·8	
	Rajmehal ..	0·65	
	Jamtara ..	0·70	
	Pakour ...	0·65	

No.	District, and date of return.		Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
ORISSA.				
Orissa Divn. 38	Cuttack,	Dec. 7 '83	0·96	Weather—very cold ; slight rain on 3rd, 4th and 5th. *Sarda* rice on high lands is being reaped, and on low lands it is ripening. *Dalua* rice is being sown. *Rubbee* crops doing well. Price of rice still remains unchanged, although there is a large export. Public health generally good.
39	Pooree, Khoorda	„ 6 „ ...	2·10 0·57	Weather—seasonable, but cloudy with a few showers towards the end of the week. Prospects of the rice crop generally good. The late rain has benefited the cold-weather crops. In places *sarad* rice is being harvested. Public health good. Prices stationary.
40	Balasore.	„ 7 „	1·40	Weather—seasonable after the rain of the 5th instant. Rice harvest has now everywhere begun. A 10-anna crop on an average is estimated for the Sudder sub division, and a 12-anna crop for the Bhudruck sub-division. Selling price of rice is steady. Public health generally good.
CHOTA NAGPORE. *South-West Frontier Agency.*				
41	Hazaribagh,	Dec. 7 '83	0·41	Weather—clear and cold. Rice harvest continues. The late rainy weather has materially benefited the wheat and barley. General health good.
42	Lohardugga,	„ 8 „	0 47	Weather—seasonable. Prospects of *rubbee* crops improved by recent rain. Prices unchanged. General health good.
43	Singbhoom,	„ 7 „	1·10	Weather—cold and bright now. It was cloudy and rainy on the 4th and 5th instants. Rice crop is expected to give an outturn of from 10 to 12 annas. The recent rain will greatly benefit the *rubbee* crops. Sugarcane doing well. Price of rice stationary at 28 seers per rupee. Public health good.
44	Manbhoom,	„ 8 „	1·26	Weather—cool and bright. On the 4th and 5th there was more or less rain throughout the district. Reaping of rice continues vigorously. The late rain has improved the prospects of the *rubbee* crops. No damage to the rice on the field is expected from the rain. Outturn of rice is estimated at from 8 to 12 annas in the sudder, and from 7 to 12 annas in the Govindpur sub division. Coarse rice sold at Purulia market at 22 seers per rupee on the 8th. Public health generally good.

Published for general information.

COLMAN MACAULAY,
Secy. to the Govt. of Bengal.

METEOROLOGICAL AND RAINFALL SUMMARY OF THE MONTH OF NOVEMBER 1883.

THE normal features of the meteorology of Northern India for the month of November are extremely simple. The temperature (more especially the night temperature) decreases rapidly during the month. The sky is generally cloudless, the air dry and winds light and from points ranging between west and north. Bengal is liable from its position during the month to two different kinds of atmospheric disturbances. The first and more common originate as cyclonic disturbances in the Bay of Bengal (due to the continuance of the south-west monsoon in the centre of the Bay after its retreat from Bengal and the adjacent coast). These cyclonic disturbances influence directly or indirectly the meteorology of Bengal. It is very rarely that a cyclone formed in the Bay in November advances into Bengal. Those which form in or near the Martaban gulf usually pass into Burmah and Arracan. Those generated in the centre or south of the Bay of Bengal generally move in directions varying between west and north-west, and advance across the Coromandel coast or the coast of the Circars. Those formed late in November almost invariably cross the coast to the south of Madras and near Negapatam. These cyclonic disturbances influence more or less the weather over Bengal, as well as the Bay. In Bengal the winds generally shift to the east, and the air becomes damper from the slight indraught due to the cyclonic circulation in the Bay. If the conditions are favourable, cloud forms rapidly over part or the whole of Bengal and more or less general rain may follow. The termination of this period of damp, cloudy, or rainy weather in Bengal is almost simultaneous with the breaking up of the cyclonic disturbance in the south of the Bay and Southern India, and is marked by the return to the normal cold weather conditions in Bengal, viz. the prevalence of dry northerly winds, clear skies, and low temperatures.

The second source of disturbance, although common in December, January and February, is very rare in November. This is the occasional occurrence of what may be termed north-east monsoon storms of Northern India, during which probably a large proportion of the winter snowfall of the Himalayas takes place. These commence (so far as India is concerned) as depressions with the usual cyclonic circulation of the air in the Punjab, and advance eastwards through the North-West Provinces occasionally into Behar and Bengal. Whether these storms originate in the Punjab or to the northwards or westwards in Afghanistan or Belochistan has not yet been ascertained. These storms, however, do not frequently occur in November in the Punjab, and rarely extend eastwards as far as Bengal.

The preceding remarks not only indicate the normal character of the meteorology of the month of November in Bengal, but also the small amount of the rainfall. The average rainfall over the whole of the Province, excepting the Chittagong, Backergunge, and Noakholly districts of South-Eastern Bengal, and the Cuttack and Pooree districts of Orissa, is less than one inch. Over those excepted districts, the average rainfall ranges from one to three inches.

METEOROLOGICAL SUMMARY OF THE MONTH.

THE month has been characterised by an almost entire absence of disturbances affecting Bengal. A small one noticed in last month's report gave cloudy weather in Bengal, and light rain in Orissa and Chutia Nagpur on the 1st and 2nd of November. The only disturbance originating in the Bay, which affected Bengal to any marked extent, was one which apparently formed in the Martaban gulf about the 9th of November, and gave very stormy weather to the north and north-west of the Andamans until the 15th of November. This gave cloudy weather for a brief period over Southern and Eastern Bengal, and light showers in the Chittagong district. One disturbance also occurred during the month in North-Western India, and gave heavy snow to the North-Western Himalayas, but it did not extend so far east as Bengal. The weather in Bengal during the past month has hence been that which characterises the prevalence of the north-east monsoon in its most pronounced form. Skies were unusually clear, temperature (more especially the night temperature) lower than the normal, northerly winds unusually steady, and the rainfall nil over the greater part of the Province.

Pressure has fluctuated considerably during the month, but the variations are of little importance. It has, contrary to what might have been expected, been in defect on the average over nearly the whole of the Province. Northern Behar continues to present pressure in excess relatively to adjacent districts.

Temperature was below the average for all stations except False Point. The deficiency was greatest in South-West Bengal, Chutia Nagpur and South Behar. The mean temperature of the month is 3½° below the normal at Gya, 2·8° at Purneah, 2·7° at Berhampore, and 2·4° at Calcutta.

The humidity of the month was below the average at all stations except Chittagong. The deficiency averaged 10 per cent. for the whole Province, and was greatest in South-West Bengal, where the deficiency ranged from 10 per cent. at Saugor Island to 20 per cent. at Calcutta.

The rainfall of the month is below the average in all districts except the Hazaribagh and Ranchi districts. Light showers fell in Orissa, South-East Bengal and Chutia Nagpur, but the average district rainfall nowhere exceeded an inch, except in the Ranchei district, (as represented by the station of Ranchee.) In this respect more especially the month of November has been the continuation of the three preceding months. The south-west monsoon appeared to change its character from some cause or action as yet unknown in August, and the rainfall since the beginning of that month has been abnormally small over the whole Province.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of November 1883:—

Meteorological District.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Average for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since May, 15th.

period for the past one year. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater by 10. The number denoting cloud amount represent the part of the sky covered, the whole sky being denoted by 10. Under the head "district observ- ional stations for the period in question during the past 12 years. The "means for the district" are the numerical averages of the rainfall returns receive day is one on which at least an hundredth of an inch fell.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending 7th December 1883 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean week.	Of week.			Rainy days.			Since 1st of month.		Since May 15th.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number.	Variation.	Average.	Normal average.	Average.	Normal average.

Meteorological Office, Bengal,
The 11th December 1883.

John Eliot,
Meteorological Reporter to the Govt. of Bengal.

MEMORANDA.

DURING the week ending 24th November 1883, the returns from the first class Municipalities in Bengal furnished the following results :—

(1) That births and deaths were recorded in the proportions, respectively, 27·1 and 37·4 per 1,000 of population, against 23·4 and 54·5 per 1,000, respectively, during the preceding week ending 17th November, indicating a considerable rise in the registration of both events.

(2.) That these events were returned in the highest proportions by the following Municipalities :—

Births.

	Ratio per mille.
Serampore ..	51·0
Bhagulpore ..	45·3
Durbhunga ..	40·9
Naraingunge ..	37·3
Burdwan ..	35·1
Pooree ..	34·2
Gya ..	31·4
Comillah ..	30·8
Chupra ..	30·3
Howrah ..	30·0
Uterparah ..	28·3

Deaths.

	Ratio per mille.
Purneah ..	86·6
Burdwan ..	76·3
Pooree ..	55·7
Beauleah ..	55·2
Bhagulpore ..	52·5
Suburbs of Calcutta ..	49·4
Dacca ..	45·4
Gya ..	42·4
Hooghly ..	41·6
Jessore ..	36·7
Howrah ..	35·9
Durbhunga ..	34·6
Santipore ..	34·5
Serampore ..	33·4
Patna ..	31·2
Midnapore ..	29·4
Uterparah ..	28·3
Mozufferpore ..	26·8
Kishnaghur ..	25·0

(3) That the diseases specified in the appended table proved fatal at the rates exhibited below :—

	Ratio per mille during the weeks ending—	
	24th November.	17th November.
Cholera	2·7	2·9
Small-pox	·1	...
Fever	19·9	18·0
Bowel-complaints	5·2	5·2
Injury	·2	·03
Other causes	9·3	8·4

The noticeable features indicated by the above figures being that the mortality from fever and from the diseases classed under the head of "Other causes" was sensibly higher during the week under notice than during the preceding week.

(4) That while no town exhibited conspicuous fatal results from small-pox and injury, the undermentioned Municipalities returned the highest death-rates from cholera, fever, bowel-complaints and other causes :—

Cholera.

	Ratio per mille.
Bhagulpore ..	10·0
Beauleah ..	7·9
Suburbs of Calcutta	7·2
Purneah ..	6·9

Fever.

	Ratio per mille.
Purneah ..	76·2
Burdwan ..	62·6
Beauleah ..	44·7
Jessore ..	36·7
Santipore ..	30·2
Dacca ..	26·6
Gya ..	23·9
Durbhunga	22·8
Suburbs of Calcutta ..	22·3
Midnapore ..	21·7
Serampore ..	21·6

Bowel-complaints.

	Ratio per mille.
Hooghly	12·1
Durbhunga	9·4
Patna ..	8·8
Bhagulpore	8·1

Other causes.

	Ratio per mille.
Pooree ..	36·4
Bhagulpore ..	16·3
Dacca ..	14·9
Suburbs of Calcutta ..	14·7
Gya ..	11·6
Howrah ..	11·3

(5) That the mortality in relation to *Sex*, *Class* and *Age* stands as follows :—

According to Sex.

	Ratio per mille.
Males ..	41·0
Females ..	33·3
Ratio of male deaths to every 100 female deaths ..	139

According to Class.

	Ratio per mille.
Christians ..	33·0
Hindus ..	36·7
Mahomedans ..	39·4

According to Age.

	Ratio per mille.
Under 1 year ..	289·0
1 and under 5 years ..	44·9
5 and under 10 „ ..	20·2
10 and under 15 „ ..	17·1
15 and under 20 „ ..	28·2
20 and under 30 „ ..	26·1
30 and under 40 „ ..	20·5
40 and under 50 „ ..	30·2
50 and under 60 „ ..	40·5
60 years and upwards ..	98·0

F. W. A. DEFABECK,

The 10th December 1883. *Officiating Sanitary Commissioner for Bengal.*

STATISTICAL DEPARTMENT,
The 8th December 1883.

COLMAN MACAULAY.
Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of November 1883.

	Inches.	Date	Hour.
The mean pressure of the month	29·910		
The average pressure of 24 years	29·970		
The highest pressure during the month	30·083	18th	10h.
The lowest pressure during the month	29·736	14th	16h.
The range of pressure during the month	0·347		
	Hours.		
The total number of hours of bright sunshine during the month	261·6		
	°		
The mean temperature during the month	69·8		
The average temperature of 24 years	74·8		
The highest temperature during the month	87·1	13th	
The lowest temperature during the month	51·1	22nd	
The range of temperature during the month	36·0		
The mean daily range of temperature during the month ..	20·2		
The greatest range of temperature in one day during the month	25·5	22nd	
	Per cent.		
The mean humidity during the month	71		
The average humidity of 24 years	72		
	Inches.		
The mean vapour tension during the month	0·510		
The average vapour tension of 9 years	0·616		
The mean cloud proportion of the month	1·81		
The total rainfall of the month	Nil		
The total rainfall of the month indicated by a Beckley's self-registering rain-gauge (mouth of the gauge 50·5 feet high)	Nil		
The average fall of 48 years	0·65		
The greatest fall in 24 hours	Nil		
	Days.		
The number of rainy days in the month	0		
The average number of rainy days of 24 years	2		
	°		
The mean maximum equilibrium temperature of solar radiation of the month	135·3		
The mean difference of sun and air temperatures ...	54·1		
The greatest sun temperature	150·3	4th	
The greatest excess of sun over air temperature	64·0	4th	
The mean temperature of nocturnal radiation thermometer on woollen cloth	50·6		
The mean depression of nocturnal radiation thermometer below the minimum of air	10·4		
The greatest depression of nocturnal radiation thermometer below the minimum of air	15·5	20th	
	Miles.		
The mean movement of the wind per day	68·9		
The greatest movement of the wind in one day	130·0	5th	
The greatest movement of the wind in one hour	15·0	19th noon to 1 P.M.	
The number of hours under each of the 8 points ..			

N. 282, NE. 53, E. 0, SE. 0, S. 0, SW. 0, W. 50, NW. 159, Calm 176.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·6° lower; and finally, the thermometer, which has furnished the record of temperature at the Surveyor-General's Office during the last 20 years and upwards, is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

HENRY F. BLANFORD,
Meteorological Reporter to the Govt. of India.

The mean pressure, temperature, &c., are deduced from the trace of the Barograph and Thermograph, d from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the ermometers are verified, and the readings have been corrected to a standard constructed and verified at the ew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet ove the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 merly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the eteorological Office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overca', *g* gloomy, *d* drizzling rain, *p* passing temporary shower, ≏ dew.

Report on Traffic of the East Indian Railway during four weeks ending 27th October 1883.

THE audited figures for the period are as follow :—

	Coaching.		Goods.		Total.	Materials carried on Revenue account, including maintenance.	
	No.	Rs.	Mds.	Rs.	Rs.	Mds.	Rs.
1883	804,230	9,92,678	53,23,509	20,50,280	30,42,967	31,11,006	83,466
1882	727,407	8,83,790	53,78,024	21,17,468	30,01,258	27,44,521	1,27,010
Increase	76,823	1,08,888	2,45,484	.....	41,709	3,66,485	.....
Decrease	.....	.....	.....	67,179	.....	.....	43,544

Increase in passengers	...	11 per cent.
Ditto in coaching earnings	...	12 „
Ditto in weight carried...	...	5 „
Decrease in goods earnings	...	3 „
Increase in total earnings	...	1 „

GOODS.

The total figures result in an increase in weight, but a decrease in earnings. This is owing to the large quantities of downwards coal carried during the period, while the earnings from wheat and grain traffic show a marked decrease, consequent on the export traffic to Howrah being limited.

The principal staples showing fluctuations are—

INCREASES.

Coal, down.
Ordnance stores.
Rice.
Other grains.
Indigo.
Piece-goods.
Railway material construction account.
Railway material, foreign.
Saltpetre.

DECREASES.

Coal, up.
Cotton.
Wheat.
Pulses.
Gunny.
Salt.
Seeds.

REMARKS.

Coal, downwards .. .. Mds. 2,17,730 Rs. 32,260

The increase occurs principally at Toposi, Asansol, and Barakar stations.

Ordnance stores ... ... Mds. 640 Rs. 12,590

Howrah was the principal despatching station with consignments of ammunition to Cawnpore and stations on the Sind, Punjab and Delhi Railway.

Rice ... ... Mds. 85,070 Rs. 30,900

The downwards traffic has been normal, the increase being in rice despatched from Bengal to Behar.

Other grains... ... ... Mds. 56,780 Rs. 12,950

See above.

Indigo ... ... Mds. 4,520 Rs. 13,240

Sales of native-made indigo in Calcutta were carried on earlier than usual this year.

Piece-goods ... ... Mds. 23,210 Rs. 29,760

Increases appear at Howrah, Delhi and *vid* Jubbulpore.

Railway material, construction account ... ... Mds. 1,41,350 Rs. 7,550

Materials carried by ballast trains chiefly in the Howrah, Dinapore and Delhi districts.

Railway materials, foreign ... ... Mds. 1,65,070 Rs. 91,520

Large despatches from Howrah to the several railways on the north bank of the Ganges.

Saltpetre ... ... Mds. 22,240 Rs. 9,270

Exports to Great Britain and America show an improvement.

DECREASES.

Coal, up ... ... Mds. 80,210 Rs. 19,560

This falling off is apparent at Barakar and Giridih.

Cotton ... ... Mds. 33,160 Rs. 35,840

The business in cotton in Calcutta has been of a moderate nature.

Wheat ... ... Mds. 85,050 Rs. 1,26,950

Owing to unfavourable markets in England and the Continent, the export of wheat has been reduced to small proportions The following statement exhibits the falling off at stations :—

WHEAT TRAFFIC

During four weeks ending 27th October 1883.

INCREASE.

Stations.	Mds.	Rs	
Vid Benares	1,690	1,110	
„ Cawnpore	4,300	3,360	
„ Aligarh	41,320	9,260	to Agra *vid* Agra and *vid* Hathras, to Bombay *vid* Delhi.
„ Ghaziabad	11,140	.....	
Total Increase ...	58,450	13,730	

DECREASE.

Cawnpore	10,220	5,190	
Etawah	11,430	7,110	
Aligarh	11,570	10,920	
Sikandarabad	16,480	11,720	
Delhi	54,030	38,840	
Patna City	5,170	1,550	
„ Ghat	30,070	9,130	
Vid Ghaziabad	.....	46,440	to Howrah.
Total Decrease ...	1,38,970	1,30,900	
Net Decrease ...	80,520	1,17,170	

Pulses ... ... Mds. 39,150 Rs. 14,590

This traffic has fallen off at Burhee, Dinapore and other stations in the Dinapore district consequent on the market in Calcutta being unfavourable.

Gunny ... ... Mds. 11,470 Rs. 12,520

Exportation of country produce being normal, the demand for bagging has fallen off

Salt ... ... Mds 1,99,970 Rs. 59,470

The falling off is at Howrah and is attributable to the closing of the Government salt Golahs for the holidays.

Seeds ... ... Mds. 7 530 Rs. 61,300

In the first fortnight of the period business in Calcutta was much restricted, but improved subsequently.

The train mileage for the period has been, excluding maintenance and locomotive coal train mileage—

	Coaching. Rs.	Goods. Rs.	Total. Rs.
1883	2,54 074	3.72,526	6,26,600
1882	2,64,698	3,85 390	6,50,088

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL

No. 3004A.

GENERAL.—*The 11th December* 1883.—Mr. E. T. Lloyd, Assistant Magistrate and Collector, Dacca, is allowed special leave for six months, under section 60 of the Civil Leave Code, with effect from the 1st February 1884, or such subsequent date as he may avail himself of it.

The 12th December 1883.—Moulvie Syed Mahomed Israil, Deputy Magistrate and Deputy Collector, on leave, has been granted by Her Majesty's Secretary of State for India an extension of three months' extraordinary leave without pay.

In supersession of the order of the 22nd ultimo, Mr. G. G. Dey, Joint Magistrate and Deputy Collector, is allowed furlough for twelve months, under section 49, chapter V of the Civil Leave Code, with effect from the 9th November 1883.

The 14th December 1883.—In supersession of the order of the 27th ultimo, Baboo Mohendro Nath Gupta, Deputy Magistrate and Deputy Collector, Monghyr, is transferred to Jessore, and is appointed to have charge of the Bongong sub-division of that district

This cancels the order appointing Baboo Uma Churn Gangooly to have charge of the Bongong sub-division.

Mr. J. Monro, Commissioner, Presidency Division, reported his departure from India, on furlough, on the 30th ultimo.

The 15th December 1883.—Mr. J. F. Bradbury, Officiating District and Sessions Judge, Backergunge, is allowed leave for one day, under the note to rule 2, section 72, chapter V of the Civil Leave Code, in extension of the leave granted to him under the order of the 16th October last.

Mr. S. S. Jones, Assistant Magistrate and Collector, Deoghur, Sonthal Pergunnahs, is appointed to act, until further orders, in the first grade of Joint Magistrates and Deputy Collectors, with effect from the 27th ultimo.

Mr. J. Anderson, Magistrate and Collector, Bankoora, reported his return from furlough on the 28th ultimo.

The 17th December 1883.—Baboo Dino Nath Ghose, Deputy Magistrate and Deputy Collector, Purneah, is allowed leave for two months and twenty-four days, under section 71, chapter V of the Civil Leave Code, with effect from the date on which he availed himself of it.

The 18th December 1883.—Mr. F. W. R. Cowley, District and Sessions Judge, Purneah, is allowed furlough for twenty-three months, under section 49, chapter V of the Civil Leave Code, with effect from such date in March or April next as he may avail himself of it.

Mr. F. W. Badcock, Joint Magistrate and Deputy Collector, 24-Pergunnahs, is allowed furlough for thirteen months, under section 49, chapter V of the Civil Leave Code, with effect from the 5th January next, or from such subsequent date as he may avail himself of it.

Baboo Pran Kissen Roy, Deputy Magistrate and Deputy Collector, Poorec, is allowed leave for two months, under section 71, chapter V of the Civil Leave Code, with effect from the afternoon of the 8th instant.

Mr. H. F. J. Kean is re-appointed to be a Magistrate and Collector of the first grade, and is posted to Monghyr, with effect from the date on which he received charge of his office.

Baboo Protap Chunder Chatterjee, Deputy Magistrate and Deputy Collector, was on leave, under section 127, chapter X of the Civil Leave Code, from the 5th November to the 4th December 1883.

Mr. F. E. Piffard, Officiating Deputy Magistrate and Deputy Collector, Pakour, Sonthal Pergunnahs, is allowed leave for two months, under rule 2, section 136, chapter X of the Civil Leave Code, with effect from the date on which he availed himself of it.

Baboo Nogendro Lall Mitter, Temporary Sub-Deputy Collector, Jhenida, Jessore, is allowed leave for one month, under rule 2, section 136, chapter X of the Civil Leave Code, with effect from the date on which he availed himself of it.

Mr. J. J. Livesay, Magistrate and Collector, Bogra, acted in the first grade of Magistrates and Collectors from the 28th August to the 2nd November last, both days inclusive. Mr. Livesay is appointed to act, until further orders, in the first grade of Magistrates and Collectors, with effect from the 22nd November last.

Mr. H. J. Newbery, Officiating Magistrate and Collector, Rungpore, acted in the first grade of Magistrates and Collectors from the 4th to the 17th October last, both days inclusive.

Mr. C. A. Samuells acted in the second grade of Magistrates and Collectors from the 4th to the 17th October last, both days inclusive, and from the 20th idem to the 2nd November, both days inclusive.

Mr. H. G. Cooke, Officiating Magistrate and Collector, Noakholly, acted in the second grade of Magistrates and Collectors from the 19th September to the 7th November last, both days inclusive.

Mr. G. M. Currie, Officiating Magistrate and Collector, Pooree, is appointed to act, until further orders, in the second grade of Magistrates and Collectors, with effect from the 22nd ultimo.

Baboo Okhoy Coomar Roy Chowdry, Temporary Sub-Deputy Collector, Nattore, Rajshahye, is allowed leave for one month and thirteen days, under section 71, chapter V of the Civil Leave Code, with effect from the 19th instant.

Baboo Noni Lal Mookerjee is appointed to act as Sub-Deputy Collector, Nattore, Rajshahye, during the absence, on leave, of Baboo Okhoy Coomar Roy Chowdry, or until further orders.

Baboo Sant Prosad, Deputy Magistrate and Deputy Collector, Durbhunga, on leave, is posted to the sudder station of the district of Mozufferpore.

Kumar Rameshwara Sing, Assistant Magistrate and Collector, is allowed leave for one year, under section 84, chapter VI of the Civil Leave Code, in extension of the leave granted to him under the order of the 5th December 1882.

POLICE.—*The 11th December* 1883.—Baboo Ram Kumar Das, second grade Inspector of Police, Dacca, is promoted to the first grade, with effect from the 6th November 1883, *vice* Baboo Sriram Chandra Ghose, retired.

Baboo Nakai Lal Misra, third grade Inspector of Police, Chumparun, is promoted to the second grade, with effect from the 11th July 1883, *vice* Baboo Haruk Chand, retired.

Baboo Sham Sunder Dutt, third grade Inspector of Police, Cuttack, is promoted to the second grade, with effect from the 1st November 1883, *vice* Baboo Jadunath Das, retired.

Baboo Piari Mohun Bose, third grade Inspector of Police, is promoted to the second grade, with effect from the 6th November 1883, *vice* Baboo Ram Kumar Das, promoted.

The 15th December 1883.—Mr. E. H. D'Oyly, Officiating Assistant Superintendent of Police, Bhagulpore, is allowed leave for one month, under section 127, rule 1, chapter X of the Civil Leave Code, with effect from the date on which he availed himself of it.

The 17th December 1883.—Mr. J. Masters, District Superintendent of Police, Burdwan, is allowed leave for ten days, under section 71, chapter V of the Civil Leave Code, with effect from the 24th instant.

LEGISLATIVE.—*The 18th December* 1883.—The Lieutenant-Governor accepts the resignation tendered by the Hon'ble T. P. Allen of his seat in the Council of the Lieutenant-Governor of Bengal for making Laws and Regulations.

With the sanction of His Excellency the Viceroy and Governor-General, the Lieutenant-Governor, under the provisions of the 29th, 30th and 45th sections of the Indian Councils Act of 1861, appoints Kumar Boykantonath Dé to be a member of the Council

of the Lieutenant-Governor of Bengal for the purpose of making Laws and Regulations in the Bengal Division of the Presidency of Fort William.

With the sanction of His Excellency the Viceroy and Governor-General, the Lieutenant-Governor, under the provisions of the 29th, 30th and 45th sections of the Indian Councils Act of 1861, appoints Mr. W. L. Alexander to be a member of the Council of the Lieutenant-Governor of Bengal for the purpose of making Laws and Regulations in the Bengal Division of the Presidency of Fort William.

ECCLESIASTICAL.—*The 15th December* 1883.—The Rev. A. W. R. Quinlan, Chaplain of Dum-Dum, is appointed to officiate as Chaplain of Darjeeling, during the absence, on leave, of the Rev. J. Stephenson, or until further orders, with effect from the 8th instant.

NOTIFICATION.

The 14th December 1883.—Whereas a notification was published at page 834, Part I of the *Calcutta Gazette* of the 10th October 1883, declaring the Lieutenant-Governor's intention to sanction the imposition by the Commissioners of the Jamalpore Municipality, in the district of Monghyr, of a tax, under section 122 of Act V (B. C.) of 1876, on carriages and horses and other animals mentioned in the third schedule of the Act, and also the levy of a fee on the registration of carts under section 134, and whereas no objection has been raised to the proposal within one month from the publication of the above notification within the municipality, it is hereby notified for general information that, in the exercise of the powers conferred on him by section 78 of the Act, the Lieutenant-Governor sanctions the imposition by the said Commissioners of a tax on carriages, horses, and other animals at rates not exceeding those mentioned in the third schedule of the Act, and the levy of a fee on the registration of carts at rates not exceeding those mentioned in section 134 of the Act.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 18th December 1883.—In the exercise of the powers conferred on him by section 32, Act V (B.C.) of 1876, the Lieutenant Governor hereby cancels the notification dated the 7th September 1881, published at page 849, Part I of the *Calcutta Gazette* of the 14th idem, by which the following roads, lying within the limits of the Chittagong Municipality, were excluded from the operation of the said Act, and their management transferred to the Road Committee of the district:—

1. The Hathazari Road from the point where it enters the Municipality up to the Commissioner's Cutcherry.
2. The Bakolia Road from the point where it enters the Municipality to where it joins the Hathazari Road near the Racquet Court.
3. The Halisahar Road from the point where it enters the Municipality to where it joins the Imperial Dacca Road.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 13th December 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, if no valid objections be raised within three weeks from this date, to approve of the following additions to and alterations in section II of the Salt Manual:—

The following is added to Rule 42 at page 12 of the Salt Manual:—

"Failure to comply with this rule will render such person liable to a fine not exceeding Rs. 500; and if it shall appear to the officer trying the case that the omission was made with a fradulent intent, he shall direct the salt to be confiscated."

The following is added to Rule 43 at page 12 of the Salt Manual:—

"Provided that the person in charge of the salt, referred to in Rule 42, and the proprietor of the salt, referred to in Rule 43, shall not both be fined in respect of the same omission."

Rule 44, at pages 12 and 13 of the Salt Manual, is altered as follows:—

For "under section 148 of the Code of Criminal Procedure (Act X of 1872)," *substitute* "under section 204 of the Code of Criminal Procedure (Act X of 1882)."

For "as provided in the same section," *substitute* "as provided in section 90."

For "section 93" quoted in the rule, *substitute* "section 57."

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 16th December 1883.—In exercise of the powers conferred upon him by section 19 of Act VII of 1878 (the Indian Forest Act), the Lieutenant-Governor hereby declares the following tract (which, in a notification dated the 15th August 1882, it was proposed to constitute a reserved forest) to be a "reserved forest" with effect from the 1st January 1884:—

District.	Pergunnah or other sub-division.	Name of forest.	Boundaries.
Darjeeling	Hill territory ...	Goom ...	*North.*—The Kuhil Jhora to the Hill cart road. *East and south.*—The Hill cart road, then a demarcated line passing round a village to the north-west boundary point of the Soom Tea Company's location, passing along the boundary of that location to the Goompahar ridge, continuing across that ridge to the present cart road, then along that road to the head of a small Jhora tributary to the Bing Jhora, and continuing down that Jhora and to the south east boundary point of the Goompahar Forest Reserve. *West.*—The eastern boundary of the Goompahar Forest Reserve, and a demarcated line from its north-eastern point to the Kuhil Jhora.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

The 18th December 1883.—Consequent on the promotion of Mr. A. L. Home to be a Conservator of Forests, third grade, with effect from the 24th April 1883, and the departure, on furlough, on the 23rd May 1883, of Mr. R. H. M. Ellis, Deputy Conservator of Forests, the following changes and promotions are made in the Bengal-Assam list of officers in the Forest Department :—

Mr. A. J. Mein, Deputy Conservator of Forests, fourth grade, Assam, and officiating in the third grade, to be Deputy Conservator of Forests, third grade, with effect from the 24th April 1883.

Mr. F. B. Manson, Assistant Conservator of Forests, first grade, Bengal, and Officiating Deputy Conservator, fourth grade, to be Deputy Conservator of Forests, fourth grade, with effect from the 24th April 1883.

NOTIFICATION.

The 15th December 1883.—Under section 7 (*k*) of Act XII of 1875 (the Indian Ports Act), the Lieutenant-Governor prescribes the following rules for the licensing and regulation of passenger boats plying for hire within the port of Chittagong. They shall take effect from the 1st January 1884.

Rules.

1. No passenger boat shall ply for hire within the limits of the Port unless licensed and registered by the Port Officer, and under the direction of a person licensed by the same officer.

2. Every application for the licensing and registration of a passenger boat must be made in writing to the Port Officer, and contain particulars of the owner's name and residence, a description of the boat, and the number of passengers which it is intended to carry.

3. Every license granted under these rules shall continue in force for one year from the date on which such license was issued, unless it is revoked under the provisions of these rules.

4. No license shall be granted to any passenger boat unless the Port Officer is satisfied that it is in good order and suited for the accommodation of passengers; and the number of persons to be kept in charge of the boat, and of the passengers which may be carried therein at one time, shall be stated in the license.

5. The number of every licensed and registered boat shall be painted by the Port Officer on the bow thereof in letters of not less than four inches in length.

6. No fees shall be charged for the licensing and registration of passenger boats under these rules.

7. The owner or the person in charge of any licensed passenger boat shall not permit any number of persons more than that for which such boat has been licensed to be carried therein at one time, and shall not permit such boat to ply for hire unless provided with the number of crew stated in the license. The boat must be kept thoroughly clean.

8. In the computation of the number of persons, in addition to the crew carried in any vessel, two children below the age of 12 years shall be counted as one person, and every two maunds weight or luggage shall be counted as equivalent to one person.

9. The license granted for any passenger boat may be revoked by the Port Officer whenever such boat is, in his opinion, unfitted for the conveyance of passengers, or when any breach of the conditions of the license or the Port rules, or the Sea Customs Act, has been committed by the owner or the person in charge.

10. No passenger boat shall obstruct the free navigation of the port or the approaches to any wharf, jetty, or landing stage.

11. Every passenger boat moving in the port after dark shall carry a light in a lantern in the forepart of the vessel where it can be distinctly seen.

12. Whenever any accident shall occur to a registered passenger boat, the person in charge or the owner shall at once proceed to the nearest police station and report the circumstances connected with the accident to the officer in charge.

13. When any property belonging to passengers or others is left in a passenger boat unclaimed, the property so left shall be at once sent by the person in charge to the nearest police station.

14. Any person in charge of a licensed passenger boat plying for hire in the port, who shall without good reason refuse to carry a passenger in such vessel shall, for every such refusal, be liable to the penalty prescribed by law for breach of these rules, and shall in addition be liable to have his own license, and that of the vessel of which he is in charge, revoked.

15. Every licensed passenger boat, when plying, shall have its license on board, which shall be produced when required.

16. An owner of a passenger boat who may withdraw it from plying, except for the purpose of repairs or other sufficient cause, without giving 48 hours' notice to the Port Officer, shall, in addition to the penalty prescribed by Act XII of 1875 for a breach of these rules, be liable to have the license revoked.

17. Every person registered under rule 1 shall be provided with a metal license ticket upon which shall be legibly painted the number of his license, and every such person when in charge of a licensed vessel shall wear his ticket exposed to view. No person without such ticket shall be in charge of any passenger boat.

18. Whenever the number on any license ticket shall become obliterated or defaced, so that the same shall not be distinctly legible, and also when any license ticket shall have been lost or mislaid, an application shall be made to the Port Officer for a renewal thereof, and the Port Officer shall supply a new license ticket.

19. On the expiration or other determination of any license, the ticket shall be returned to the Port Officer.

20. No license ticket shall be lent or transferred to any other person, and no such ticket shall be used by any unlicensed person.

21. No person in charge of any registered passenger boat plying within the limits of the port shall use, or wear, or have any ticket resembling, or intended to resemble, the metal ticket granted under the authority of these rules.

22. Any person committing an infringement of any of the foregoing port rules is liable to a fine not exceeding one hundred rupees, under the provisions of Act XII of 1875.

A. P. MACDONNELL.
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 15th December 1883.—Under section 79 of Act VIII of 1878 (the Sea Customs Act), the Lieutenant-Governor appoints the Port Officer of Chittagong to issue licenses for, and register, cargo-boats plying within the limits of that port, and under the same section and section 7 (*k*) of Act XII of 1875 (the Indian Ports Act) the following rules are prescribed for the licensing and registration of such boats, in supersession of the rules published at page 54, Part I of the *Calcutta Gazette* of the 24th July 1872. These rules shall take effect from the 1st January 1884.

Rules.

1. Each application for the licensing and registration of a cargo-boat must contain particulars of the owner's name and residence, and the tonnage of the boat.

2. The applications will be made to the Port Officer, who shall survey the boats and satisfy himself that they are safe.

3. The licenses will then be issued, and will be current for one year only, from the date of registration. A fee at the following rates will be charged on the issue of each license, and the same fee on its renewal every year :—

			Rs.	A.	P.
"Open or decked" boat up to 3 tons burthen	...	...	... 1	0	0
Ditto	ditto	*above* 3 and *not above* 5 tons burthen	... 1	8	0
Ditto	ditto	*above* 5 and *not above* 10 tons burthen	... 2	0	0
Ditto	ditto	all above 10 tons burthen ...	... 3	0	0

4. The number of the license must be branded or cut and painted in conspicuous white figures on both bows of the boat : the figures not to be less than six inches in length. The tonnage must also be cut into boat's stern.

5. The license must be produced whenever demanded, and should therefore be in the custody of the manjee of the boat for the time being.

6. Cargo-boats, the manjees of which shall not produce their licenses when called upon, will be treated as unlicensed boats, unless good cause be shown to the contrary.

7. Any goods found within the limits of the port on board of any boat not duly licensed and registered shall, unless such goods be covered by a special permit from the customs officer, be liable to confiscation, and the owner or the person in charge of the boat shall be liable to a penalty not exceeding one hundred rupees

8. No cargo-boats shall be licensed unless provided with a crew according to the following scale :—

Class I.—"Square built, open or decked."

For a boat not above 10 tons burthen, 3 men, including manjee.
" " above 10 and not above 15 tons, 4 men, including manjee.
" " " 15 " " 20 " 5 " " "
" " " 20 " " 25 " 6 " " "
" " " 25 " " 30 " 7 " " "
" " " 30 " " 35 " 8 " " "
" " " 35 " " 40 " 9 " " "
" " " 40 tons, 10 men, including manjee.

Class II.—"Dinghy built Bhurs."

For a boat not above 10 tons burthen, 3 men, including manjee
" " above 10 and not above 20 tons, 4 men, including manjee.
" " " 20 " " 30 " 5 " " "
" " " 30 " " 40 " 6 " " "
" " " 40 tons, 7 men, including manjee.

9. The license of a cargo-boat found plying contrary to the conditions of the license, with a crew fewer in number than is prescribed in such license, shall be liable to cancelment

10. If any cargo-boat becomes unsafe during the term of its license, the Port Officer may withdraw the license until it is properly repaired.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

The 18th December 1883.—An estimate amounting to Rs. 12,100, for the provision of a new pumping-engine and the removal and re-erection of the existing pump employed in filling the reservoir on the top of the late workshop building, having been submitted by the Vice-Chairman to the Commissioners for making improvements in the Port of Calcutta, with his letter No. 3242, dated the 28th November 1883, the Lieutenant-Governor sanctions the expenditure under the provisions of Section 35 of Act V (B.C.) of 1870.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 18th December 1883.—The following Notice to Mariners is published for general information.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 57).

INDIA—EAST COAST.

PORT OFFICE, *Calcutta, the 17th December* 1883.

[Second Publication.]

NOTIFICATION.

The 6th December 1883.—In exercise of the powers conferred upon him by section 19 of the Indian Forest Act VII of 1878, the Lieutenant-Governor hereby declares the lands described below (which on the 4th July 1882 were notified as proposed reserves) to be reserved forests with effect from the 1st January 1884:—

District.	Pergunnah or other sub-division.	Name of forest.	Boundaries.
Tributary Mehals of Orissa.	Ungool ...	Eastern Range	*North.*—From a point near the boundary between Hindole and Ungool, south-east of Konja, along a demarcated line running at the foot of the hills to Koradasinga, passing to the south of Konja Navagum, Navakhaita, Bodokuntakul, Harodi, Kantamago, Tologodo. *West.*—From Koradasinga along a demarcated line round that village and passing southward to Hidisinga, and skirting round that village to Pamposorra, round which the demarcated line runs, and on and round three sides of Tokorosinga to, and skirting round, the village of Kulmgi, at which point it meets a demarcated line and joins the western range. From Kulmgi to the north of Purankote the eastern and western ranges join, and from the north of Purankote a demarcated line runs to Tikurpara on the Mohanuddy, passing to the east of Hatibari, Korodapada and Tikurpara. *South.*—The Mohanuddy river to the boundary of Daspalla. *East.*—The boundary between Ungool and Daspalla, Nursingpur, and Hindole to the starting point. *Note.*—From the above are excluded the village sites and permanently cultivated lands of the following villages, together with a sufficient and reasonable extent of land for grazing of cattle and the supply of agricultural implements and building materials for the sole use of residents of those villages:— Saleer. Raiguda. Jokoba. Badakheta. Bolingo. Taluka. Kotarang. Nadimi. Chotokoi. Chota Kotarang. Talisora.
.....	.....	Western Range	*North.*—From a point near the boundary between Ungool and Athmalik along a demarcated line running south-east of Dolki, Dolasinga and Kumura to Bagnamda, and skirting round to the south and east of that village and turning north-east to Noapoda and on along the same continuous demarcated line passing near Noapara and Injadole Hingagora to Jagonathpur, and skirting past that village on its south to Takorasinga and Kolingi, near which the demarcated boundary line meets the eastern range. *East.*—The boundary of the eastern range to the north of Purankoti, and from thence along a demarcated boundary line to the Mohanuddy river, passing first southward and turning westward to the old village site of Malisai, and again turning and running south, passing to the west of Mojipoda. *South and West.*—The Mohanuddy river and the boundary between Ungool and Athmalik. *Note.*—From the above is excluded by boundary marks the village site and permanently cultivated lands of the Torba village.
.....	.....	Northern Range, Tabada block.	*West.*—From a point on the path leading from Wontullia to Ugi along a demarcated line passing to the east of Ingili, and *South.*—Turning east passing to the north of Injagola, and *East.*—Passing northward along a continuous demarcated line. *North.*—A demarcated line to the starting point. *Note.*—From the above is excluded by demarcated boundary marks the village site, grazing ground and permanently cultivated lands of the Tabada village.
.....	.....	Wontullia block	*South.* } A demarcated boundary line running round *East and North.* } the forests on these three sides. *West.*—The boundary between Ungool and Athmalik.
.....	.....	Kotoda block ...	*West.*—The boundary between Ungool and Athmalik. *South.*—A demarcated boundary line. *East.*—A demarcated boundary line. *North.*—A demarcated boundary line.
.....	.....	Simlipoda block	*West.*—The boundary between Ungool and Athmalik. *South.*—A demarcated boundary line. *East.*—A demarcated boundary line. *North.*—A demarcated boundary line.
.....	.....	Konoloi block...	*North and West.*—The boundary between Ungool and Radakhol. *South.*—The boundary between Ungool and Athmalik. *East.*—A demarcated boundary line.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 4th December 1883.—In exercise of the powers conferred on him by section 7 of Act XII of 1875 (the Indian Ports Act), the Lieutenant-Governor sanctions the following rules, in modification of and addition to the rules for the regulation of Passenger-boats in the Port of Calcutta, published under date of the 20th June 1879 in the *Calcutta Gazette* of the 25th June 1879, page 589.

Rules for ascertaining the number of passengers which passenger-boats are to carry.

(*a*) For ordinary passenger boats, dinghees, green, and other open boats in which passenger space is not protected by bulwarks—

Divide the superficial area in square feet of the floor space available for the accommodation of passengers by 6, and the result will be the number of passengers the boats may be licensed to carry.

(*b*) For steamers and barges having cabin or 'tween deck floor space and deck space protected by rail, netting, or other sufficient bulwarks—

Divide the superficial area in square feet of the deck floor space available for the accommodation of passengers by 4·5, and the superficial area in square feet of the cabin or 'tween deck floor space available for the accommodation of passengers by 9, and the aggregate result of the quotients shall be the number of passengers the boat may be licensed to carry. In such vessels the spaces on bridges and tops of houses shall only be measured and included in the floor space, when, in the opinion of the surveyor, the beam and general stability of the vessels are sufficient to permit passengers being carried on such spaces in safety.

Rule 22A.

Any passenger on board any registered passenger-boat or steam-ferry plying within the limits of the port, which shall have on board passengers in excess of the number the boat or steam-ferry is licensed to carry, shall, upon being requested by the owner or person in charge of said boat or steam-ferry to leave the boat or steamer before the same has quitted the landing place at which such person embarked, and upon having the full amount of his fare (if he has paid the same) returned or tendered to him, forthwith leave the vessel; and any passenger refusing so to leave shall incur the penalty prescribed for any breach of these port rules.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 8th December 1883.—In exercise of the power conferred upon him by section 7 of Act XII of 1875 (the Indian Ports Act), the Lieutenant-Governor sanctions the following addition to Rule 23 of the Rules for the Port of Calcutta, published in the *Calcutta Gazette* of the 20th August 1879:—

23A. The river between the lower buoy of the College Sand and Matea Brooz Ghât shall be kept clear for turning inward or outward bound vessels, and no vessels shall anchor within these limits. All vessels intending to anchor in Garden Reach shall be moored below Matea Brooz Ghât moorings in a clear swinging berth, as close to the south bank as the length and draught of the vessels will admit. Inward bound vessels proceeding above Matea Brooz Ghât shall moor in the stream between Fort Point and Tolly's Nullah, leaving the clear channel of 200 yards prescribed by Port Rule 23.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 6th December* 1883.

[Third Publication.]

NOTIFICATION.

The 3rd December 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, if no valid objections be raised within one month from this date, to approve of the following rules to regulate the account of expenditure on drainage schemes sanctioned under Act VI (B.C.) of 1880:—

Rules for the account of Expenditure on Drainage chemes sanctioned under Act VI (B.C.) of 1880.

1. In the following rules the word "scheme" means any project or portion of a project sanctioned by the Government under section 54 of the Act as a separate scheme.

2. Expenditure on any scheme for the drainage and improvement of any tract of land under Act VI (B.C.) of 1880 will be incurred on estimates adopted by the Commissioners appointed under the Act and sanctioned by Government.

3. The expenditure will be incurred partly by the Public Works Department and partly by the Civil Department. The expenditure in the Civil Department will be in respect of compensation for lands taken for the purposes of the Act, and for damage inflicted in carrying out the scheme, salaries of officers, servants and establishments, and cost of surveys and valuations (other than those made by officers of the Public Works Department), whether antecedent or subsequent to the preparation of the scheme and plans.

4. On the vouchers on which such expenditure is incurred it will be distinctly stated for what particular scheme the payments are made, and no voucher shall be paid at the treasury unless it is first passed by the Collector of the district as a charge to a particular scheme under the Act.

5. The expenditure will be passed by the Accountant-General to charge of a special advance head to be opened for each scheme upon his accounts, and an account of all the transactions under each such account (opening and closing with a balance) will be forwarded by him to the Collector at the end of each quarter for communication to the Commissioners. The account should be made up in such detail as to show the *general* nature of the expenditure included in it, such as "surveys," "compensation for land," "payment of drainage," &c.

6. The accounts of expenditure in the Public Works Department will similarly be kept separately for each "scheme," the charges being in the first place passed to debit of a special advance head to be opened upon the books of the Examiner.

7. A quarterly account of the expenditure so charged will be prepared by the Examiner, and by him transmitted to the Accountant-General for communication to the Collector and the Commissioners. This account will show the general nature of the expenditure only, such as "establishments," "works," "stores" or any other similar particulars.

8. At the final closing of the account of each year, but not till then, the total charge upon the Examiner's books will be transferred to those of the Accountant-General, which will then show, under a separate advance account for each scheme, the total expenditure in each year, both in the Civil and in the Public Works Department.

9. At the end of each quarter, until the work is finally completed, the officer in charge of the works will, as required by section 27, make a detailed report to the Drainage Commissioners, through the Collector, of the progress of the works and the expenditure thereupon, so far as known to him, from the date to which the next preceding report has been brought down.

10. The quarterly account received from the Accountant-General by the Commissioners will be received as the statement of the accounts of Government in respect of each scheme. They will, on receipt, be examined by the Commissioners against the register of sanctioned charges (for Civil Department), and be compared with the quarterly report of the officer in charge of the works (for Public Works Department). The Commissioners will report to the Accountant-General objections they may have to raise to the accounts whether in respect of their completeness in point of the detail required for their purposes or in respect of their accuracy.

11. It shall be the duty of the Accountant-General to meet such criticisms, as far as consistent with the facts, by adjustments which will appear in the succeeding quarterly accounts. But the Accountant-General is the final authority in respect of the correctness of the account.

12. A copy of the certificate of completion of work required by section 28 of the Act will be sent by the officer in charge of the work to the Accountant-General, who will thereupon calculate the interest due up to date of completion, and add it to the total cost charged in his books to the advance head, for recovery from the persons concerned.

13. The interest shall be made up by reckoning for interest the total of the net expenditure shown in each quarterly account from the end of the quarter to which it appertains.

14. A complete account will now be made up by the Accountant-General in such detail as the Drainage Commissioners may require, but not in greater detail than that of the quarterly account. This complete account shows the total recoverable under the Act.

15. The Accountant-General will at the same time draw up a statement, agreeing with the above, showing the quarterly totals in the following form :—

Quarter ending.	Amount of expenditure.			Amount of interest till (a specified date.)
	Civil.	Public Works.	Total.	

The complete account, together with this statement, will be communicated by the Accountant-General to the Collector for communication to the Commissioners, and will be subscribed by the Accountant-General as a certificate under section 27 of the Act.

A. P. MACDONNELL,

NOTICE TO MARINERS.—(No. 53).

AFRICA—EAST COAST.

RED SEA—COAST OF ABYSSINIA.

Shoal off Rás Dumeirah.

NOTICE is hereby given that a dangerous shoal patch has been discovered lying about five miles north of Rás Dumeirah, and about 30 miles South-West of Mokha in the Red Sea.

This danger was reported by the master of the S. S. *Helmsley*, which vessel struck on it on the 16th October last, whilst on her passage to Bombay.

The *shoal* consists of sand about 530 feet long, and has a depth of about 18 feet on it at low water spring tides.

Position as given :—Latitude 12°56′ N. Longitude 43°0.0′ E.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 27th November* 1883.

DECLARATION.

The 13th December 1883.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Dacca Municipality for a public purpose, viz. for the purpose of opening a cartway into the east head of the Lakhi Bazar and Pattakhan's Lane in the town of Dacca, pergunnah Jehangirnugger, zilla Dacca, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1,838 square feet, is required. The land is bounded on the north by the land of Jarip Bepari ; on the south by that of Pran Nath Babu ; on the west by the Lakhi Bazar Gar ; and on the east by the municipal road.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 14th December 1883.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Serampore Municipality for a public purpose, viz., for the construction of a road from the Grand Trunk Road to Hariparah road in the town of Serampore, pergunnah Boro, zillah Hooghly, it is hereby declared that for the above purpose a piece of land measuring more or less 1 cottah 3½ chittacks of standard measurement is required. The land is bounded on the north by the wall of the East Indian Railway Company's tank, on the west by a foot-path which joins Hariparah Lane, on the south by Baroni Muchini's land, and on the east by a municipal road.

This declaration is made under the provisions of section 6 of Act X of 1870 to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 14th December 1883.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Dinagepore Municipality for a public purpose, viz. to bury nightsoil in trenches, in the village of Nimnagar, pergunnah Bijanagor, zillah Dinagepore, it is hereby declared that for the above purpose a piece of land measuring, more or less, 12 bighas 2 cottahs 12 chittacks of standard measurement, is required. The land is bounded on the north by Dianatullah Poddar's land ; on the west by public roads ; on the east by Fozor Mistiry's land, and on the south by Ron Mahomed's land.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT,—BENGAL.

The 17th December 1883.

No. 463.—*Transfer.*—Mr. H. Bell is transferred from the Dacca and Mymensing to the Tirhoot State Railway, and is appointed as Engineer-in-Chief, Tirhoot Railway Extensions, Construction Section.

No. 464.—*Appointment.*—Major W. J. Engledue, R.E., Executive Engineer, first grade, reported his return from furlough, granted him in Government of India, Military Department, notification No. 103 of the 23rd February 1883, on the 12th instant, and is appointed as Engineer-in-Chief, Dacca and Mymensing State Railway.

LOCAL COMMUNICATIONS.

The 17th December 1883.

No. 465.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the expense of the Dacca Road Cess Committee for a public purpose, viz. for constructing a road 28,000 feet long by 40½ feet broad from Kadda to Jaydebpur, in pergunnah Bhowal, zillah Dacca, passing through the villages of Kadda, Nawjore, Autpara, Naljanee, Channa, Daudpur and Jaydebpur, it is hereby declared that for the above purpose a piece of land measuring, more or less, 71 bigahs 19 cottahs of standard measurement, is required within the aforesaid villages.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

No. 466.—*Declaration.*—Whereas it appears that land is required to be taken up by Government for a public purpose, viz. for constructing a road from Munshi to Buktearpore, in the villages of Munshi, Kootia, Saidpur, Bulha, Kowakoli, Bodla, Damra, Kapuria, Mutla, Sulkoa, Mobarakpur, Gurja, Gonespura, Buktiarpur, in the district of Monghyr, it is hereby declared that for the above purpose land on the north of the Ganges, measuring, more or less, 342 Behar bigahs, or 616½ standard bigahs, is required in the above mentioned villages.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

MIS. PUBLIC IMPROVEMENTS.

The 17th December 1883.

No. 467.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction of the Plassey Monument in the village of Teznagar, in the district of Nuddea, it is hereby declared that for the above purpose a plot of land measuring, more or less, 13 cottahs 14 chittacks of standard measurement, said to belong to the proprietor or proprietors of the Ramnagar indigo concern, and bounded on the north and south by waste land in the occupation of the said proprietor; on the east by Baboo Behary Mundle's house and by waste land; and on the west by a line parallel to and at a distance of 35 feet, more or less, from the foot of the Government embankment, is required within the aforesaid village of Teznagar.

This declaration is made, under section 6 of Act X of 1870, to all whom it may concern.

The 18th December 1883.

No. 468.—*Notification.*—With reference to notification No. 361 of the 29th October 1883, the unexpired portion of the furlough granted to Mr. E. LeLievre, Executive Engineer, second grade, Rajshahye Division, in the orders marginally noted, is hereby cancelled.

Notification No. 12 of the 9th January 1882.

No. 469.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is likely to be required to be taken by Government at the public expense for a public purpose, viz. for a railway in the district of Hooghly, it is hereby declared that for the above purpose a survey party is about to take the field for the survey of a line of railway along the road from Howrah *viâ* Jugguthullubpore to Ampta, returning thence in a direct line to Howrah.

This declaration is made, under the provisions of section 4 of Act X of 1870, to all whom it may concern.

J. M. HEYWOOD, *Lieut.-Col.*, R.E.,
Offg. Joint-Secretary to the Govt. of Bengal, P. W. Dept.

[Second Publication.]

The 11th December 1883.

No. 453.—*Notification.*—With reference to notification No. 440, dated the 4th instant, published at page 1232, Part I of the *Calcutta Gazette* of the 5th idem, it is hereby notified for general information that the estimate of the probable cost to be incurred in respect of the repairs and maintenance of the 65 miles of the Gunduck tuccavee embankment and the works connected therewith in the district of Chumparun during 20 years commencing from the 1st April 1883, amounts, at the rate of Rs. 200 per mile per annum, to Rs. 2,60,000, and that the Lieutenant-Governor proposes, under section 63 of Act II (B.C.) of 1882, to fix the

aforesaid total sum of Rs. 2,60,000 as payable during the said 20 years by the zemindars of the estates benefited by such repairs, maintenance and works, should no valid objections thereto be preferred. Any person interested who desires to object to the above-mentioned order is required to prefer, within three months of the date of its first publication in the *Calcutta Gazette*, such objection as he may think proper to the Collector of Chumparun for consideration by the Lieutenant-Governor.

H. C. LEVINGE,
Secy. to the Govt. of Bengal, P. W. D.

JAIL DEPARTMENT.

No. 11293, *dated the* 13*th December* 1883.—Surgeon E. S. Brander made over charge of the Nuddea Jail to Surgeon E. Bovill in the afternoon of the 5th December 1883.

No. 11335, *dated* 14*th December* 1883.—Baboo Jadub Kristo Sen made over charge of the Rungpore Jail to Surgeon E. S. Brander on the forenoon of the 10th December 1883.

A. S. LETHBRIDGE, *Inspector-General of Jails, Bengal.*

TREASURY NOTICES.

BABOO SRI NATH GUPTA Deputy Collector of Dacca, has been placed in charge of the Dacca Treasury, *vice* Baboo Krishore Chunder Roy, Deputy Collector, and is authorized to draw bills on other treasuries, with effect from 1st December 1883.

N. S. ALEXANDER, *Offg Commissioner.*

SMALL CAUSE COURT NOTICES.

IN supersession of all previous notification, it is hereby notified, under section 14, Act XI of 1865, that, subject to the orders of the Government, the Judge of Small Cause Courts of Dacca and Munshigunge, will hold sittings in the Small Cause Court at Dacca from 1st to 22nd of every month from the month of January next, and from 23rd to the end of the month in the Small Cause Court at Munshigunge.

DACCA SMALL CAUSE COURT, *the* 11*th December* 1883. KEDARESSAR RAI, *Judge.*

EDUCATIONAL NOTICES.

THE Law Classes of the Presidency College will be opened during the ensuing session as before.

CALCUTTA,
The 7th December 1883.

G. BELLETT,
Offg. Director of Public Instruction.

Government Engineering College, Howrah.

CANDIDATES for admission to the Engineer Classes should apply to the Principal before the 31st January 1884. The Session begins on Monday, the 4th February 1884. Candidates for this class must furnish proof that they have passed the Calcutta University Entrance Examination.

An examination for admission to the Mechanical Apprentice Classes will be held at this College on Wednesday and Thursday, the 30th and 31st January. The subjects for examination are—

Arithmetic (the whole).
Algebra (to Simple Equations, inclusive).
Euclid (Book I and II).
English (Grammar and Composition).

Applications for permission to appear at the examination should reach the Principal not later than the 25th January 1884.

Ten scholarships will be awarded to students entering the Engineer Class, not being already holders of junior scholarships. The scholarships will be awarded with general reference to the place taken by candidates at the Entrance Examination. Applications for scholarships will be received by the Principal up to the 30th January.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour, and eye-sight.

Further particulars will be supplied on application to the Principal.

G. BELLETT, *Offg. Director of Public Instruction.*

The 20th November 1883.—The following correspondence and regulations for the Matriculation Examination of the University of London are published for general information.

A. P. MACDONNELL,
Secretary to the Govt. of Bengal.

No. 105P., dated India Office, London, the 20th September 1883.

From—Her Majesty's Secretary of State for India,
To—His Excellency the Most Hon'ble the Governor-General of India in Council.

I FORWARD herewith a packet of Regulations for the Matriculation Examination of the University of London, transmitted to this office by the Clerk to the Senate of the University, in order that candidates for the Gilchrist Indian Scholarship in the divisions of the Bengal Presidency may be informed of the requirements of that examination.

2. I take this opportunity of forwarding a copy of a letter received from the Secretary to the Trustees of the Gilchrist Educational Trust, in which it is stated that, owing to the very limited competition among natives of India for the Gilchrist Scholarships provided for their benefit, the Trustees have decided to admit candidates from Ceylon to compete with those of India for the single scholarship of £150 per annum to be henceforth annually awarded.

Dated 21st August 1883.

No. 4, dated Broad Sanctuary, London, the 21st August 1883.

From—W. B. CARPENTER, ESQ., Secretary to the Trustees of the Gilchrist Educational Trust,

To—Her Majesty's Secretary of State for India.

GILCHRIST EDUCATIONAL TRUST.

Trustees:

CHARLES HOLLAND, ESQ., M.D., F.R.S. | ROBERT VERITY, ESQ., M.D.
SIR JOHN BOWRING, LL.D., F.R.S. | WILLIAM BURNLEY HUME, ESQ.

GEORGE GROTE, ESQ., D.C.L., F.R.S.

Secretary:

W. B. CARPENTER, ESQ., M.D., F.R.S.

Standing Counsel:

F. H. BOWRING, ESQ.

Solicitors:

MESSRS. F. J. AND G. J. BRAIKENRIDGE.

I HAVE the honour of informing you that in consequence of the very limited competition among natives of India for the Gilchrist Scholarships provided for their benefit (only a single candidate having appeared at the last examination, although there were then two scholarships each of £100 per annum), the Trustees have decided to admit candidates from Ceylon to compete with those of India for the single scholarship of £150 per annum to be henceforth annually awarded in accordance with my previous communication to you.

In making the increase to the annual stipend of the single scholar, the Trustees desire to place him beyond the necessity of supplementing their allowance from private resources. They have no doubt that, with due economy, the sum of £150 per annum will suffice to meet the necessary expenses of their scholar's maintenance and education during his residence in this country.

EXAMINATIONS IN 1883-84.

THE following are the dates at which the several examinations in the University of London for the year 1883-84 will commence :—

MATRICULATION.—Monday, June 18, 1883; and Monday, January 14, 1884.
BACHELOR OF ARTS.—Intermediate, Monday, July 16; B.A., Monday, October 22.
MASTER OF ARTS.—Branch I, Monday, June 4; Branch II, Monday, June 11; Branch III, Monday, June 18.
DOCTOR OF LITERATURE.—Intermediate, Monday, June 4; D. Lit, Tuesday, December 4.
SCRIPTURAL EXAMINATIONS:—Tuesday, November 27.
BACHELOR OF SCIENCE.—Intermediate, Monday, July 16; B.Sc., Monday, October 15.
DOCTOR OF SCIENCE.—Within the first twenty-one days of June.
BACHELOR OF LAWS.—Intermediate and LL. B., Monday, January 7, 1884.
DOCTOR OF LAWS.—Tuesday, January 22, 1884.

BACHELOR OF MEDICINE.—Preliminary Scientific, Monday, July 16; Intermediate Monday, July 30; M.B., Monday, November 5.

BACHELOR OF SURGERY—Tuesday, December 4.

MASTER OF SURGERY.—Monday, December 3.

DOCTOR OF MEDICINE.—Monday, December 3.

SUBJECTS RELATING TO PUBLIC HEALTH.—Monday, December 10.

BACHELOR OF MUSIC.—Intermediate, Monday, December 10; B. Mus., Monday, December 17.

DOCTOR OF MUSIC.—Intermediate, Monday, December 10; D. Mus., Monday, December 17.

ART, &c., OF TEACHING.—Tuesday, March 4, 1884.

REGULATIONS.

MATRICULATION.

[CANDIDATES for any degree in this University must have passed the Matriculation Examination. No exemption from this rule is allowed on account of degrees obtained or examinations passed at any other University.

This examination is accepted (*a*) by the College of Surgeons, (*b*) by the incorporated Law Society, in lieu of their preliminary examinations. It also exempts candidates for admission to the Royal Military College from the preliminary test, except in Geometrical Drawing. And it is among those examinations of which some one must be passed (1) by every medical student on commencing his professional studies; and (2) by every person entering upon Articles and Clerkship to a Solicitor, any such person matriculating in the First Division being entitled to exemption from one year's service.

This and all other examinations of the University, together with the prizes, exhibitions, scholarships, and medals depending upon them, are open to women upon exactly the same conditions as to men.]

There shall be two examinations for Matriculation in each year—one commencing on the second Monday in January, and the other on the third Monday in June.[1]

No candidate shall be admitted to the Matriculation Examination unless he have produced a certificate showing that he has completed his sixteenth year.[2] This certificate shall be transmitted to the Registrar at least *fourteen days* before the commencement of the examination.

A fee of two pounds shall be paid at Matriculation. No candidate shall be admitted to the examination unless he have previously paid this fee to the Registrar.[3] If, after payment of his fee, a candidate withdraws his name, or fails to present himself at the examination, or fails to pass it, the fee shall not be returned to him, but he shall be allowed to enter for any subsequent Matriculation Examination upon payment, at every such entry, of an additional fee of one pound, provided that he gives notice to the Registrar at least *fourteen days* before the commencement of the examination.

The examination shall be conducted by means of printed papers; but the Examiners shall not be precluded from putting, for the purpose of ascertaining the competence of the candidates to pass *viva voce* questions to any candidate in the subjects in which they are appointed to examine

Candidates shall not be approved by the Examiners unless they have shown a competent knowledge in each of the following subjects, according to the details specified under the several heads:—

1. Latin.
2. Any two[4] of the following languages:—(*a*) Greek, (*b*) French, (*c*) German, and (*d*) either Sanskrit or Arabic.[5]
3. The English Language, English History, and Modern Geography.
4. Mathematics.
5. Natural Philosophy.
6. Chemistry.

The following are the particulars of the foregoing subjects of examination:—

LANGUAGES.

LATIN—

One Latin subject to be selected by the Senate one year and a half previously from the works of the undermentioned authors[6]:—

Virgil.—One book of the Georgics and one book of the Æneid.

Horace.—Two books of the Odes.

---

[1] These examinations may be held not only at the University of London, but also, under special arrangement (*see* Appendix IV.) in other parts of the United Kingdom or in the Colonies.

[2] A certificate from the Registrar General in London or from the Superintendent Registrar of the district, or a certified copy of the baptismal register, is required *in every case in which it can possibly be obtained.* In other cases a declaration of the candidate's age, and that he is unable to procure his certificate of birth or baptism, made before a Magistrate by his parent or guardian, or by himself if of full age, will be accepted. The certificate of each candidate is returned to him when he inscribes his name on the register of the University either in London or in the provinces. Information respecting the time for such registration will be sent to each candidate when the receipt of his certificate of age is acknowledged.

[3] The fee must be paid when the candidate inscribes his name on the register of the University, and should not be sent in advance.

[4] No credit will be given for more than two of these languages.

[5] Candidates desiring to be examined in either Sanskrit or Arabic must give at least *two calendar months'* notice to the Registrar, and must mention the other optional language which they select

[6] The Latin subjects for 1884 and 1885 will be—

For January 1884—*Sallust*, Catiline.

For June 1884—*Cicero*, De Amicitiâ, with Oration I against Catiline.

For January 1885—*Virgil*, Georgics, Book IV, and Æneid, Book I.

For June 1885—*Cæsar*, The Gallic War, Books V and VI.

Sallust.—The Conspiracy of Catiline, or the War with Jugurtha.
Cæsar—Two books of the Gallic War.
Livy.—One book.
Cicero.—De Senectute or De Amicitiâ, with one of the following Orations: Pro Lege Manilia, one of the four Catilinarian Orations, Pro Archiâ Pro M. Marcello.
Ovid.—One book of the Metamorphoses and one book of the Epistles or Heroides.

The paper in Latin shall contain passages to be translated into English, with questions in History and Geography arising out of the subjects of the book selected. Short and easy passages shall also be set for translation from other books not so selected. A separate paper shall be set containing questions in Latin Grammar, with simple and easy sentences of English to be translated into Latin.[1]

GREEK[2]—

One Greek subject to be selected by the Senate one year and a half previously from the works of the undermentioned authors[3]:—

Homer.—One book. | *Xenophon.*—One book.

The paper in Greek shall contain passages to be translated into English, with questions in Grammar,[4] and with questions in History and Geography arising out of the subjects of the book selected. Short and easy passages shall also be set for translation from other books not so selected.

FRENCH—

The paper in French shall contain passages for translation into English, and questions in Grammar, limited to the Accidence.

GERMAN—

The paper in German shall contain passages for translation into English, and questions in Grammar, limited (except when German is taken as an alternative for Greek[2]) to the Accidence.

SANSKRIT[5]—

One Sanskrit subject to be selected by the Senate one year and a half previously from the undermentioned works[6]:—

Hitopadésa, Books II to IV.
Pañchatantra, Books II to V.
Sâhityaparichaya, Parts I and II, pages 1-93
Râmâyana, Book I.
Mâhâbhârata (Story of Nala, Story of Sâvitrî, Bakavadhaparvan, S'akuntalopâkhyâna).
Manu, Books II to VII.

The paper in Sanskrit shall contain passages to be translated into English, with questions in Grammar. A passage or short passages shall also be set for translation from other books not so selected.

ARABIC[6]—

The paper in Arabic shall contain passages for translation into English, and questions in Grammar.

THE ENGLISH LANGUAGE, ENGLISH HISTORY, AND MODERN GEOGRAPHY—

Orthography: Writing from Dictation: The Grammatical Structure of the Language.
History of England to the end of the Seventeenth Century, with questions in Modern Geography.

MATHEMATICS.

ARITHMETIC—

The ordinary Rûles of Arithmetic.
Vulgar and Decimal Fractions.
Extration of the Square Root.

ALGEBRA—

Addition, Subtraction, Multiplication, and Division of Algebraical Quantities.
Proportion.
Arithmetical and Geometrical Progression.
Simple Equations.

GEOMETRY—

The first four Books of Euclid or the subjects thereof.

---

[1] Special stress is laid on accuracy in the answers to the Grammar questions and on the correct rendering of English into Latin.
[2] Candidates may substitute German for Greek.
[3] The GREEK subjects for 1884 and 1885 will be—
For January 1884—*Homer*, Odyssey, Book VII.
For June 1884—*Xenophon*, Cyropædia, Book V.
For January 1885—*Homer*, Odyssey, Book IX.
For June 1885—*Xenophon*, Hellenics, Book II.
[4] Special stress is laid on accuracy in the answers to the questions in Greek Grammar.
That is, on the Tuesday morning (*see* Time Table, page 58).
[5] See the third note in page 2.
[6] The SANSKRIT subjects for 1884 and 1885 will be—
For January 1884—Pañchatantra, Book IV; Mâhâbhârata, Nala, chapters 1-13; Manu, Book II.
For June 1884—Hitopadésa, Book II; Mâhâbhârata, Nala, chapters 14-26; Manu Book III.
For January 1885—Sâhityaparichaya, Part II, pages 20-51; Râmâyana, Book I, chapters 5-16; Manu, Book IV
For June 1885—Sâhityaparichaya, Part II, pages 52-93; Râmâyana, Book I, chapters 51-65 Manu, Books VI and VII.

NATURAL PHILOSOPHY.[1]

MECHANICS—

Composition and Regulation of Statical Forces.
Simple Machines (*Mechanical Powers*).—Ratio of the Power to the Weight in each.
Centre of Gravity.
General Laws of Motion, with the chief experiments by which they may be illustrated.
Law of the Motion of Falling Bodies.

HYDROSTATICS, HYDRAULICS, AND PNEUMATICS—

Pressure of Liquids and Gases, its equal diffusion, and variation with the depth.
Specific Gravity, and modes of determining it.
The Barometer, the Siphon, the Common Pump and Forcing Pump, and the Air-Pump.

OPTICS—

Laws of Reflexion and Refraction.
Formation of Images by Mirrors and Simple Lenses.

HEAT—

Its sources; expansion; thermometers—relations between different Scales in common use; difference between Temperature and Quantity of heat; Specific and Latent heat; Calorimeters; Liquefaction; Ebullition; Evaporation; Conduction; Conviction; Radiation.

CHEMISTRY.

Chemistry of the Non-Metallic elements; including their compounds as enumerated below—their chief physical and chemical characters—their preparation—and their characteristic tests.
Oxygen, Hydrogen, Carbon, Nitrogen; Chlorine, Bromine, Iodine, Fluorine; Sulphur, Phosphorus, Silicon.
Combining Proportions by weight and by volume; General nature of Acids, Bases, and Salts; Symbols and Nomenclature.
The Atmosphere—its constitution; effects of Animal and Vegetable life upon its composition.
Combustion; Structure and properties of Flame; Nature and composition of ordinary Fuel.
Water; Chemical peculiarities of Natural Waters, such as rain-water, river-water, spring-water, sea-water.
Carbonic Acid; Carbonic Oxide; Oxides and Acids of Nitrogen; Ammonia; Olefiant Gas, Marsh Gas; Sulphurous and Sulphuric Acid; Sulphuretted Hydrogen.
Hydrochloric Acid; Phosphoric Acid and Phosphuretted Hydrogen; Silica.

The examinations shall be conducted in the following order:—

MONDAY—

Afternoon, 2 *to* 4.—Latin.
4 *to* 6.—Latin Grammar and Composition.

TUESDAY—

Morning, 10 *to* 1.—Greek, German, Sanskrit, or Arabic.
Afternoon, 3 *to* 6.—French or German.

WEDNESDAY—

Morning, 10 *to* 1.—Arithmetic and Algebra.
Afternoon, 3 *to* 6.—Geometry.

THURSDAY—

Morning, 10 *to* 1.—English Language.
Afternoon, 3 *to* 6.—English History and Modern Geography.

FRIDAY—

Morning, 10 *to* 1.—Natural Philosophy.
Afternoon, 2 *to* 5.—Chemistry.

On Monday morning at 9 o'clock in the week next but two after the examination, the Examiners shall publish a list of the candidates who have passed, arranged in alphabetical order. And on the Monday morning next following at 9 o'clock, the Examiners shall publish a list of the candidates who have passed arranged in three Divisions—in the Honours Division in the order of proficiency[2]; in the First and Second Divisions in alphabetical order.

A pass certificate signed by the Registrar shall be delivered to each candidate who shall apply for it after the report of the Examiners shall have been approved by the Senate.[3]

[1] The questions in Natural Philosophy will be of a strictly elementary character.

[2] The places of candidates in the Honours Division are determined by their respective degrees of proficiency in the subjects of the examination taken collectively.

[3] Certificates cannot generally be issued until about three weeks after publication of the classified pass list of each examination. A candidate may apply for his certificate personally or by letter; or may furnish some other person with written authority (which must be produced) to receive it on his behalf.

If in the opinion of the Examiners any candidates in the Honours Division of not more than twenty years of age at the commencement of the examination shall possess sufficient merit, the first among such candidates shall receive an exhibition of thirty pounds per annum for the next two years; the second among such candidates shall receive an exhibition of twenty pounds per annum for the next two years; and the third shall receive an exhibition of fifteen pounds per annum for the next two years; such exhibitions to be payable in quarterly instalments, provided that on receiving each instalment the Exhibitioner shall declare his intention of presenting himself either at the two examinations for B.A., or at the two examinations for B.Sc., or at the INTERMEDIATE EXAMINATION IN LAWS, or at the PRELIMINARY SCIENTIFIC and INTERMEDIATE EXAMINATIONS IN MEDICINE, within three academical years[1] from the time of his passing the MATRICULATION EXAMINATION.

Under the same circumstances, the fourth among such candidates shall receive a prize to the value of ten pounds in books, philosophical instruments, or money; and the fifth and sixth shall each receive a prize to the value of five pounds in books, philosophical instruments, or money.

Any candidate who may obtain a place in the Honours Division at the MATRICULATION EXAMINATION in January shall be admissible to the INTERMEDIATE EXAMINATION either in ARTS or in SCIENCE in the following July.

APPENDIX.

I.

PROVINCIAL EXAMINATIONS.

THESE examinations are appointed by the Senate from time to time upon the application of any City, Institution, or College desiring to be named as a local centre for one or more examinations; and are carried on simultaneously with the examinations in London, under the supervision of Sub-Examiners also appointed by the Senate.

Candidates wishing to be examined at any Provincial centre must give notice of entry (naming the centre they select, and inclosing their certificates) to the Registrar of the University of London, who will make all necessary arrangements.

A fee varying from £1 to £2 is usually charged by the local authorities in addition to the University fee.

Both fees are payable on registration, which takes place at the Provincial centres at a time and place of which due notice will be sent to candidates.

The answers of the candidates at the Provincial examinations are reviewed by the Examiners at the same time with the answers of the candidates examined in London; and a list of the candidates who have passed at each Provincial examination is published, at the time fixed by the Regulations, at the place where such examination has been held.

The MATRICULATION EXAMINATION of JUNE 1883 was held at—

Aberystwith:—University College.
Birmingham:—Queen's College.
Bristol:—University College.
Cheltenham (for ladies only):—The Ladies' College.
Downside:—St. Gregory's College.
Eastbourne:—New College.
Edinburgh:—The Literary Institute.
Epsom:—The Royal Medical College.
Leeds:—The Yorkshire College.
Liverpool:—University College.
Manchester:—The Owen's College.
Newcastle-on-Tyne:—The School of Science and Art.
Sheffield:—Firth College.
Stonyhurst:—Stonyhurst College.
Ushaw:—St. Cuthbert's College.
Ware:—St. Edmund's College.

The MATRICULATION EXAMINATION of JANUARY 1884 will be held at—

Birmingham:—Queen's College.
Glasgow:—Anderson's College.
Leeds:—The Yorkshire College.
Nottingham:—University College.
Portsmouth:—The Grammar School.

The MATRICULATION EXAMINATION of JUNE 1884 will be held at—

Birmingham:—Queen's College.
Bristol:—University College.

The INTERMEDIATE EXAMINATION IN ARTS, 1883, was held at—

Birmingham:—The Mason Science College.
Cheltenham (for ladies only):—The Ladies' College.

[1] By the term "Academical Year" is ordinarily meant the period intervening between any examination and an examination of a higher grade in the following year, which period may be either *more* or *less* than a calendar year. Thus the interval between the *Intermediate* Examinations in Arts, Science, and Medicine, and the *Degree* Examinations of the next year in those Faculties, respectively, is about sixteen months; whilst the interval between the B.A. Examination and the M.A. Examination of the next year, or between the B.Sc. Examination and D.Sc. Examination of the next year, is less than eight months. Nevertheless, each of these intervals is counted as an "Academical Year."

Liverpool :—University College.
Manchester :—The Owen's College.
Ushaw :—St. Cuthbert's College.

The INTERMEDIATE EXAMINATION IN SCIENCE[1] and the PRELIMINARY SCIENTIFIC (M.B.) EXAMINATION,[1] 1883, was held at—

Birmingham :—The Mason Science College.
Liverpool :—University College.
Manchester :—The Owen's College.

The B.A. EXAMINATION, 1883, will be held at—

Liverpool :—University College.
Manchester :—The Owen's College.
Ushaw :—St Cuthbert's College.

II.

SCHOLARSHIPS, &c.

GILCHRIST SCHOLARSHIPS, EXHIBITIONS, AND PRIZES.

I.—BRITISH SCHOLARSHIPS, &c.

(*a*) *For male candidates.*

1. A scholarship of the value of fifty pounds per annum, and tenable for three years is annually awarded to the candidate from the ROYAL MEDICAL COLLEGE, EPSOM, who at the June Matriculation Examination stands highest among the candidates approved by the Head Master of that institution, and who passes either in the Honours List or in the First Division, on condition of his prosecuting his studies during the tenure of his scholarship with a view to graduation in one of the Faculties of the University of London.—Particulars may be obtained on application to the Secretary of the Royal Medical College, 37, Soho Square, W.

2. A similar amount is annually offered to candidates intending to pursue, at OWEN'S COLLEGE, MANCHESTER, their studies for graduation in one of the Faculties of the University of London, a single scholarship of fifty pounds per annum for three years being awarded to the highest of those candidates at the June Matriculation Examination who shall have been previously approved by the Principal of Owen's College, provided that he pass in the Honours Division; or, in case no candidate should so pass, two scholarships, each of twenty-five pounds per annum, being awarded to the two candidates as aforesaid who shall stand highest in the First Division.—Particulars may be obtained on application to the Principal of Owen's College, Manchester.

3. A scholarship of fifty pounds per annum, tenable for three years, is also annually awarded to that candidate in the Honours Division at the June Matriculation Examination who shall stand highest of the candidates previously approved by the Principal of UNIVERSITY COLLEGE, BRISTOL, and who intends to study at that College with a view to graduation in one of the Faculties of the University of London. [N.B.—This scholarship is open to women.] Further particulars may be obtained on application to the Principal of University College, Bristol.

(*b*) *For female candidates.*

1. Two exhibitions—one of thirty pounds, the other of twenty pounds per annum,—tenable for two years, will be awarded at the *June* Matriculation Examination to the two female candidates of not more than twenty years of age at the commencement of the examination who pass highest in the Honours Division to assist them in pursuing their studies at some collegiate institution approved by the Gilchrist Trustees.

2. Two exhibitions—one of forty pounds, the other of thirty pounds per annum,—tenable for two years, will be awarded to the two female candidates who pass highest at the Intermediate Examination in Arts (provided that they obtain in the one case at least two-thirds, and in the other at least three-fifths, of the total number of marks to assist them in pursuing their studies at some collegiate institution approved by the Gilchrist Trustees.

3. A gold medal of the value of twenty pounds (or a book prize of the same value) will be awarded to the female candidate who passes highest at the B.A. Examination, provided she obtain not less than two-thirds of the total number of marks.

[See also the BRISTOL Scholarship above.]

Further particulars may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S. W.

II.—INDIAN SCHOLARSHIPS.

Two scholarships, each of the value of one hundred pounds per annum, and tenable for four years, are annually awarded to the two native candidates who pass highest in the January Matriculation Examination carried on at CALCUTTA, BOMBAY, and MADRAS, provided that such candidates pass either in the Honours or in the First Division, are not more than

[1] With the exception of the practical examinations in Biology and Zoology which must be carried on at the University.

22 years of age, and are desirous of prosecuting their studies either at the University of Edinburgh or at University College, London, with a view to graduation in one of the Faculties of the University of London.

Further particulars of the *Indian scholarships* may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S. W.

III.—COLONIAL SCHOLARSHIPS.

1. A scholarship of the value of one hundred pounds per annum, and tenable for three years, is annually awarded to the highest among those candidates at the June Matriculation Examination carried on in the DOMINION OF CANADA who pass either in the Honours or in the First Division, are not more than 22 years of age, and are desirous of prosecuting their studies either at the University of Edinburgh or at University College, London, with a view to graduation in one of the Faculties of the University of London.

2. A similar scholarship, under the same conditions, is annually awarded to the candidate who passes the highest at the January Matriculation Examination carried on in the WEST INDIA COLONIES

3. A similar scholarship, under the same conditions, is biennially awarded to the candidate who passes highest at the June Matriculation Examination carried on at HOBART TOWN, Tasmania.

4. A similar scholarship, under the same conditions, is biennially awarded to the candidate who passes highest at the June Matriculation Examination carried on in NEW ZEALAND.

5. A scholarship of one hundred pounds per annum, tenable for three years, is biennially awarded to the Bachelor of Arts of the University of SYDNEY who may be nominated by the authorities of that University, and who is desirous of prosecuting his studies either at the University of Edinburgh or at University College, London, with a view to graduation in one of the Faculties of the University of London.

(*Note.*—Every candidate for a Colonial scholarship must either be a native of the Colony in which he presents himself, or have resided therein for the five years immediately preceding.)

Further particulars of the *Colonial scholarships* may be obtained on application to the Secretary to the Gilchrist Educational Trust, 4, Broad Sanctuary, Westminster, S. W.

WEST SCHOLARSHIP.

The scholarship, of the value of thirty pounds, and tenable for one year, is awarded by the Council of University College, London, to that candidate at the June Matriculation Examination who distinguishes himself the most in English.—Further particulars may be obtained of the Secretary of University College, Gower Street, London, W. C.

TUFFNELL SCHOLARSHIPS.

Two scholarships, of the value of about one hundred pounds each, and tenable for two years, are awarded by the Council of University College for distinction in Analytical and Practical Chemistry, and in General Chemistry, alternately, to that student of the College, *being an undergraduate of the University of London of not more than three years' standing*, who shall have passed the most distinguished examination in the subjects for which the scholarship is to be conferred, and shall have evinced sufficient merit to entitle him to the scholarship.—Further particulars may be obtained of the Secretary of University College, Gower Street, London, W.C.

REID STUDENTSHIPS FOR WOMEN.

One free studentship at Bedford College, value 30 guineas per annum, tenable for two years, will be awarded to the woman taking the highest place in the Honours Division of the June Matriculation Examination, 1883.

One free studentship at Bedford College, value 30 guineas per annum, tenable for two years, will be awarded to the woman taking the highest place in the Intermediate Examination in Arts, 1883.

One free studentship at Bedford College, value 30 guineas per annum, tenable for two years, will be awarded to the woman taking the highest place in the Intermediate Examination in Science, 1883.

For further particulars application should be made to "The Reid Trustees," Bedford College, York Place, Portman Square, London, W.

[NOTE. The Gilchrist and other Scholarships announced in this appendix are awarded by the respective Educational Bodies upon the result of the University Examinations; but the University has otherwise no control over, and is not responsible for such award.]

III.

INSTRUCTIONS TO CANDIDATES FOR MATRICULATION.

Care should be taken, in sending notice, to give a correct postal address, and the candidate's full name should be distinctly written.

Fees should not be sent by post.

Candidates entering their names for the examination for the first time should on no account send a notice of entry to the Registrar unaccompanied by the requisite document

giving proof of age. No candidate, however old, is admitted to the examination without the production of such a document.

A certificate must in all cases be accompanied by a letter stating that the person to whom it relates wishes to enter for the examination.

The age of a candidate with regard to entry is reckoned from the first day of the severa examinations, that day being computed to fall as late as the Regulations will possibly allow. The two dates, in the case of the Matriculation Examinations, are January 14th and June 21st. Candidates who *complete their sixteenth year* on either of those dates will therefore be admissible to the January or the June examination, as the case may be; but no further extension of time will be allowed.

Candidates who have previously presented themselves at the examination need not send in their certificates of age a second time; but should state, when giving notice of entry, that they have so presented themselves.

Notice of entry should not be sent earlier than six weeks before the commencement of the examination.

The full marks obtainable at the Matriculation Examination are 2,800. Of these 2,000 qualify for a Prize, 1,800 for Honours, and 1,400 for the First Division. There is no regulation fixing the number of marks required for a pass. No further details as to the marking at this or other examinations can be furnished.

The alphabetical pass list is sent, as soon as it is printed off, to every College or School from which any candidate (whether successful or not) has immediately proceeded to the Matriculation Examination.

The classified list is sent to every College or School from which a *successful* candidate has immediately proceeded. It is also widely circulated among the leading newspapers of the United Kingdom.

Lists cannot be supplied to individual candidates or their friends.

The examination papers of past examinations are not published separately; but the papers of the previous academical year are printed in the University Calendar of the current year, which is issued annually at the beginning of April, and is to be obtained (price 4*s.*) of the publishers, Messrs. Taylor and Francis, Red Lion Court, Fleet Street, E.C.

Subordinate Educational Service.

The 13th December 1883.—Baboo Makunda Chandra Vidyabagis, M.A., First Assistant Teacher, Rungpore Zillah School (class VII), was on leave of absence for a month, under section 127, chapter X of the Civil Leave Code, with effect from the 5th November last.

Baboo Kali Prasanna Bose, Second Master, Rungpore Zillah School, acted as First Assistant Teacher of the same institution in class VII, during the absence, on leave, of Baboo Makunda Chandra Vidyabagis, M.A.

The 14th December 1883.—Baboo Gopal Chandra Ghoshal, Deputy Inspector of Schools, Singbhoom (class V), is appointed Deputy Inspector of Schools, Hazaribagh, *vice* Baboo Becha Ram Ray, retired.

This cancels the orders of the 29th November 1883, appointing Moulvi Abul Khair, M.A., Superintendent of the Rajshahye Madrasah, to be Deputy Inspector of Schools, Hazaribagh.

Baboo Lal Mohan Vidyanidhi, Sub-Inspector of Schools, Burdwan (temporarily substantive in class VI), is appointed substantively to that class, *vice* Boboo Becha Ram Ray, retired.

Baboo Ram Taran Samanta, Sub-Inspector of Schools, Hazaribagh (class VII), is appointed temporarily substantive to class VI, *vice* Baboo Lal Mohan Vidyanidhi, and to be Deputy Inspector of Schools, Singbhoom, *vice* Baboo Gopal Chandra Ghoshal.

A. CROFT, *Director of Public Instruction.*

THE next Pleadership and Mookhtarship Examination will be held on Thursday, Friday and Saturday, the 14th, 15th and 16th of February 1884, instead of on Thursday and Friday, the 7th and 8th of February, as originally notified.

The written portion of the examination of the Mookhtarship candidates will be held on Thursday, the 14th, and the Pleadership candidates will be required to attend on that day for their *viva voce* examination only.

The written portion of the examination for the Pleadership candidates will be held on Friday and Saturday, the 15th and 16th of February.

HENRY T. HYDE,

Secretary to the Board of Examiner for Pleadership and Mookhtarship.

NOTIFICATION OF THE BOARD OF REVENUE.

No. 1305 B.

NOTIFICATION.

NOTICE is hereby given that the Provision Opium to be brought forward for sale by public auction in the year 1884 will consist of about 22,200 chests prepared at the Patna factory, each chest of which is believed to contain 1 maund 18 seers 12 chittacks of pure opium, besides 9 seers 6 chittacks used for pasting the leaves of the shell, and about 25,350 chests prepared at the Ghazeepore factory, each chest of which is believed to contain 1 maund 18 seers 12 chittacks of pure opium, besides 9 seers 6 chittacks used for pasting the leaves of the shell; being of the two seasons 1881-82 and 1882-83 in the proportion marginally noted.

OPIUM.

2. The dates on or about which the sales will be held, and the total quantity of opium as well as the respective quantities manufactured at the Patna and Ghazeepore factories, which will be brought forward for sale every month, are specified below. The Board of Revenue reserve to themselves the right of altering the dates should circumstances render it expedient to do so. In accordance with the notification of the Government of India, No. 1763, dated 30th June 1883, 2,000 chests of Patna and 2,450 chests of Benares opium will be sold monthly from January to March 1884, and 1,800 chests of Patna and 2,000 chests of Benares opium will be sold every month from April to December 1884, both inclusive:—

The following are the conditions of sale:—

1.—The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

2.—The opium will be ordinarily offered for sale at an upset price of Rs. 800 per chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by clause 13 of these Conditions of Sale. The bids must advance by Rs. 5 at a time.

3.—The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M.; but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or, if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale.

4.—Each lot shall contain five chests.

5.—A promissory note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such Promissory Notes shall be redeemed on the part of the purchasers at this Office by Bank of Bengal Receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M. in the afternoon of the fifth day after the sale provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

DEPOSIT.
When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest.
On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest
On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.
And so on, Rs. 100 being added to the deposit for every bid additional, to the extent of Rs. 400.

6.—The said promissory notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

7.—The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M. if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8.—No tender of money, Bank of Bengal Receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the fifth day following the day of sale, will be afterwards accepted. Provided always that money so subsequently tendered may be taken in payment of the said Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. 5 and No. 6.

9.—The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10.—Purchasers taking out certificates or orders for the delivery of opium after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots, or of a different number of lots or chests, whether more or less, than the number of lots or chests originally required to be included in each certificate or order.

11.—No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12.—The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand tender at the time a deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these conditions.

13.—With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained; and the first *bonâ fide* bidder for a lot after it has been offered for sale in the mode here described shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

14.—The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether twenty-five lots, provided always that there remain a sufficient number of lots of the opium to complete the said twenty-five.

15.—In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16.—The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Board of Revenue:—No. 1, certificate of the opium advertised for sale; No. 2, report of the examination of such opium.

17. The public are hereby informed that in providing the investment of the opium manufactured at the Patna factory and the opium manufactured at the Ghazeepore factory for the year 1882-83, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug when packed at the Patna and Ghazeepore factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue.

18. The public are hereby informed that the opium manufactured at the Patna factory in season 1882-83 consists of opium made at consistences of 73°, 74°, and 75°, and that the opium manufactured at the Ghazeepore factory in the same season consists of opium made at consistences of 70°, and 75°. The consistence of the opium which will be sold each month will be mentioned in the sale notification of that month.

19. Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

20. It is hereby further notified that under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand that out of the quantities of opium manufactured at the Patna and Ghazeepore factories declared as above for sale at the twelve sales of the year 1884, there shall be delivered to them, at the average of the particular sale or sales to which the opium so applied for may belong, a quantity not exceeding in the aggregate 300 chests, and the Agents of the French Government must make requisition specifying the quantity of opium required by them at any particular sale within thirty days from the advertisement of such intended sale: provided, however, that the Agent of the French Government may make such requisition for the whole quantity within thirty days from the publication of this notification. If the Agent of the French Government shall not make the requisition for opium within the time above mentioned, the entire quantity of about 47,550 chests of opium manufactured at the Patna and Ghazeepore factories, as above estimated, will be brought to sale in the usual manner; and if they shall make application for a quantity of opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve sales above-mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the opium which the French authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing after the date fixed for payment, or by selling such opium, or any portion of it, at any subsequent monthly sale in addition to the quantity which in this advertisement is approximately mentioned as the quantity to be sold at such sale; or by selling such opium at a sale to be held expressly for the purpose.

	Chests.
Opium manufactured at the Patna Factory	22,200
Opium manufactured at the Ghazeepore Factory ...	25,350
Total ..	47,550

Article of the Convention above referred to.

"*Article VI.*—With regard to the trade in opium, it is agreed between the high contracting parties that at each of the periodical sales of that article there shall be reserved for the French Government, and delivered upon requisition duly made by the Agents of His Most Christian Majesty, or by the persons duly appointed by them, the number of chests so applied for, provided that such supply shall not exceed three hundred chests in each year, and the price for the same shall be determined by the average rate at which opium shall have been sold at every such periodical sale, it being understood that if the quantity of opium applied for at any one time shall not be taken on account of the French Government by the Agents of His Most Christian Majesty within the usual period of delivery, the quantity so applied for shall nevertheless be considered as so much in reduction of the three hundred

chests hereinbefore mentioned. The requisitions for opium, as aforesaid, are to be addressed to the Governor-General at Calcutta within thirty days after notice of the intended sales shall have been published in the *Government Gazette*."

By order of the Board of Revenue, L.P.,
C. E. BUCKLAND,
Offg. Secretary.

FORT WILLIAM, *the 27th November* 1883.

No. 1306B.

NOTICE is hereby given that the First Sale of Opium, the Provision of 1881-82 will be held at the Government Opium Sale-room, No. 2, Bank shall-street, on Wednesday the 2nd January 1884, at 11 A.M., and will comprise 4,450 chests, viz.—

	Chests.
Opium manufactured at the Patna Factory of 77° consistence ...	2,000
Opium manufactured at the Ghazeepore Factory consisting of 1 chest of 70°, 426 chests of 72°, 1,978 chests of 75°, and 45 tin-lined chests, of which 23 chests are of 75° and 22 chests of 72° ...	2,450
Total ..	4,450

2nd. The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 27th November 1883, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd. The latest dates for deposit and clearance will be the 7th and 17th January 1884, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the Sale-room will be received after 3-30 P.M. of Monday, the 7th January 1884, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Thursday, the 17th January 1884.

4th. In addition to the quantity above advertised for sale, the following quantities, more or less, of the opium manufactured at the Patna and Ghazeepore Factories will be brought to sale in the ensuing year, about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates, should circumstances render it expedient to do so.

No. 1721.—The following Addenda and Corrigenda to the Codes of the Financial Department are published for general information :—

C. L. C.

Page 143.

Section 14.

Add the following to this Section :—

If the absence exceeds a month, an officer is not entitled to draw his local allowance for any part of the absence. This rule applies also to an officer in receipt of Presidency allowance at a Presidency town who is absent from the Presidency town on duty connected with his office ; but an officer in receipt of house-rent at a Presidency town may, during absence from the Presidency town, whether on other duty or on duty connected with his office, continue to draw his house-rent, provided the term of his absence does not exceed two months, exclusive of the months of departure and return ; if the absence exceeds this term, the house-rent is not admissible for any part of the absence. A claim to house-rent under thic rule must be supported by a certificate by the officer that his previous rate of expenditure for a house at the Presidency town continued during his absence.

Pages 164 *and* 165.

Section 75.

Insert the following as Rule 4A :—

4A. A local allowance may be drawn by an officer on privilege leave provided that it is not drawn by his *locum tenens.*

[NOTE.—An officer on privilege leave may draw Presidency allowance or Presidency house-rent, provided that no extra expense is thereby caused to the State.]

Cancel Rules 9 *and* 10.

J. WESTLAND,
Offg. Secy. to the Govt. of India.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below to the undermentioned land situate in the district of Hazaribagh will be put up to sale at the Hazaribagh Collectorate on Saturday, the 5th January 1884, corresponding with 22nd Pus 1291 Fasli. The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The land to be sold revenue-free to the highest bidder above the upset price. The purchaser of this land will be considered as the proprietor of the land, and the entire proprietary right of Government in such land will be transferred to him.

2*nd*.—If the amount of purchase-money do not exceed Rs 100, the whole amount to be paid down at once.

3*rd*.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government and the land to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

JAS. TAYLOR, Asst. Comptr.-Genl., in charge, Paper Currency.

PAPER CURRENCY DEPARTMENT, the 18th Dec. 1883.

Notification.

THE annual Chutia Fair will be held at Chutia, near Ranchee, the head-quarters of the Chota Nagpore Division. It will commence on the 11th February 1884, and continue for about a fortnight.

RAI CHARAN GHOSE, Persl. Asst. to Commr., for Commr. of Chota Nagpore.

Commissioner's Office, Ranchee, the 13th November 1883.

Notice.

WANTED for the Cadastral Survey of the town of Chittagong three Sub-Surveyors. Salary Rs. 35 a month. Both theoretical and practical knowledge of surveying with theodolite, plane table, and compass is absolutely necessary. Preference will be given to those who have served in a survey and settlement office. Apply without delay to the undersigned.

A. MANSON, Officiating Magistrate.

Chittagong Magistracy, the 4th December 1883.

Notification.

IT is hereby notified for information of the public that a duplicate receipt for an amount exceeding Rs. 20 is liable to a stamp duty of one anna under Article 23 (*a*), Schedule I of Act I of 1879, and should, under section 16 of the Act, be stamped before or at the time of execution. If the duty payable on the duplicate receipt is denoted by an adhesive stamp, such stamp should be cancelled *so that it cannot be used again*. Any person signing a duplicate receipt when the amount exceeds Rs. 20 without the same being duly stamped, is liable to be criminally prosecuted under section 61, Act I of 1879, and punished with a fine which may extend to Rs. 500; and any person neglecting or omitting *to effectually cancel the adhesive stamp* and in payment of stamp duty renders himself liable to a fine which may extend to Rs. 100.

The attention of banking, mercantile, and trading community is especially drawn to the requirements of the law on this point.

G. M. GOODRICKE, Collector of Calcutta.

Calcutta Collectorate, the 13th September 1883.

Bank of Bengal.

NOTICE is hereby given that the Transfer Books of the Bank will be closed from Wednesday, the 2nd, to Wednesday, the 16th proximo, both days inclusive.

J. H. Wheeler, attorney. (1775—2)

In the matter of RAM LOLL MULLICK of No. 12, Baranossee Ghose's Street, in the town of Calcutta, lately carried on business at Burra Bazar, in Calcutta aforesaid, as general merchants under the name and style of Ram Loll Mullick, an insolvent.

Notice that the petition of the said insolvent, seeking the benefit of the Act, XI Vic. Chap. XXI, was filed in the office of the Chief Clerk on Tuesday, the 11th day of December instant, and by an order of the same date the estate and effects of the said insolvent were vested in the Official Assignee.

J. H. Wheeler, attorney. (1776—1)

In the matter of RUSSICK LOLL CHUNDER and MOHENDRO NAUTH CHUNDER, insolvents.

On Wednesday, the 5th day of December instant, it was ordered that subject to payment to Albert Birmingham Miller, Esq., the Official Assignee of this Court, and the assignee of the estate and effects of the said insolvent, of his usual commission and all costs and charges lawfully due the petition filed by the said insolvent seeking for relief under the provisions of the said Act be withdrawn and the vesting order made thereon be discharged, provided always that all acts or things done by the said Assignee or other person acting under his authority prior to this order shall be good and valid and shall not be annulled or in any wise affected thereby and upon payment of his commission and all costs, charges, and expenses lawfully incurred by him as aforesaid the said Assignee do deliver over to the said insolvent upon his receipt all the estate and effects, moneys, goods, books, and papers now remaining in the hands of the said Assignee belonging to the estate of the said insolvent.

Kally Doss Bhunjo, attorney. (1777—1)

In the matter of PETER THOMAS MOORE PALMER, of No. 22, Khyroo Mohter's Lane, in the town of Calcutta, an agent in the service of the Calcutta Society for Prevention of Cruelty to Animals, an insolvent.

Notice that the petition of the said insolvent, seeking the benefit of the Act, XI Vic. Chap. XXI, was filed in the office of the Chief Clerk on Saturday, the 1st day of December instant, and by an order of the same date the estate and effects of the said insolvent were vested in the Official Assignee.

W. F. Gillanders, attorney. (1778—1)

In the matter of WALTER GRAY, an insolvent.

On Wednesday, the 21st day of November last, it was, on the application of Messrs. Dignam and Robinson, attorneys for the Official Assignee, ordered that the further hearing for proof of claims against the estate of the said insolvent (both joint and separate) be fixed for Wednesday, the 4th day of March 1884, and that such of the creditors as shall be required by the said Official Assignee to prove their claims do, on or before the 15th day of February 1884, send in to the said Official Assignee statements of their respective claims against the estate of the said insolvent, both joint and separate, duly verified by affidavit, and that such of the said creditors as shall fail to do so shall be liable to have their claims expunged from the schedule of the said insolvent.

Dignam and Robinson, attorneys. (1779—2)

Chief Clerk's Office, the 18th day of December 1883.

In the Court for the Relief of Insolvent Debtors at Calcutta.

In the matter of ROMA NATH CHATTERJEE, an insolvent.

NOTICE is hereby given to the creditors of the abovenamed insolvent that on the 9th day of January 1884, at the hour of 11 o'clock in the forenoon, an application will be made to the Insolvent Court for the withdrawl of the petition of the abovenamed insolvent for an order that his estate and effects, now vested in the Official Assignee, be handed over to the insolvent abovenamed less the usual fees of the Official Assignee.

AUCKHOY CHUNDER CHOWDRY, Insolvent's Attorney. (1754—2)

BERHAMPORE, the 17th December 1883.

The Indian Law Reports.

Published under Authority.

THE "Indian Law Reports," published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series

The Calcutta Series is distributed by the Office of the Legislative Department at Calcutta, except the copies for officials in the Bengal Presidency, which are distributed by the Bengal Secretariat, and the copies for subscribers registered by Messrs. Thacker, Spink & Co., which are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

On and from the 1st January 1884, the terms of subscription and sale will be reduced as follow :—

Terms of subscription, payable annually in advance

	Without postage.	With postage.
For the Calcutta Series...	Rs. 10 0	Rs. 12 8
„ Madras „ ...	„ 5 0	„ 6 0
„ Bombay „ ...	„ 7 8	„ 8 8
„ Allahabad „ ...	„ 5 0	„ 6 0
Complete set	„ 20 0	„ 22 8

A part of any series purchased separately, Re. 1

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
„ Thacker & Co., Bombay.
„ Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
„ „ Book Depôt, Allahabad.

Orders and subscriptions for 1884 *should be at once remitted.*

Notes on Forestry,

BY C. F. AMERY,

Deputy Conservator, Forests, N.-W. Provinces.

THIS little work, published with the approval of the Government of India, treats of the general principles of forest management in all its branches, and is recommended not only to forest officers, but to all who are interested in the progress of forest management in this country.

May be obtained of Messrs. King, King & Co., Bombay, and of Messrs. Wyman & Co., Calcutta. Price Rs. 3-8, or including postage, Rs. 4. Or of the publishers, Messrs. Trübner & Co., Ludgate Hill, London. Price five shillings.

☞ The following books may be purchased from the Office of Superintendent of Government Printing, India, No. 166, Dhurrumtollah Street, for private use only, which should be stated in the requisition.

No orders can be attended to unless accompanied by a remittance. When postage stamps are forwarded, one anna additional should be sent for every Rupee's worth of stamps for discount in exchanging them for cash. Service Labels or Court Fee Stamps are not received.

Books required for the public service cannot be supplied on payment; they are only issued on the authority of the Department to which the indenting officer is subordinate. Applications for them should be made through the Local Government under which the applicant serves.

Statistics of population of the Indian Empire, collected at the Census of 1881, Vol. II. *Price, Rs. 2-8; packing and postage, 8 annas extra.*

Statistics of British-born subjects recorded at the Census of India, 17th February 1881. *Price, annas 8; packing and postage, 1 anna 6 pie extra.*

Statistics of population in the Andamans 17th February 1881. *Price, 8 annas; packing and postage, 1 anna 6 pie extra.*

Pack Gear for Elephants. B. G. P. SANDERSON, Superintendent of Kheddahs, Dacca. *Price, Re. 1; packing and postage, 2 annas.*

A List of Agricultural Implements and Machines which have been experimented with and found efficient and useful in India. *Price, annas 8; packing and postage, 2 annas.*

Just published.

Report of the Indian Education Commission, with Appendices and Statistical Tables. *Price, Rs. 5; packing and postage, Re. 1.*

Just published.

Moore's Manual of Family Medicine for India. *Price—*

To Government Officers (except those mentioned below) and to the public at large, Rs. 4.

To all Officers employed in Government departments who are in receipt of salaries under Rs. 500 per mensem, on a certificate being furnished declaring that the book is to be purchased only for the personal use of the officer, *Rs. 3; packing and postage, 6 annas.*

Transport Regulations, Part II.

Transport of Troops, Inland. *Price, Rs. 2-8; packing and postage, 4 annas.*

Proceedings of the Council of the Lieutenant-Governor of Bengal for the purpose of making Laws and Regulations.

Saturday, the 15th December 1883.

Present:

The Hon. G. C. PAUL, *Advocate-General*, C.I.E., *Presiding*;
The Hon. H. L. DAMPIER, C.I.E.;
The Hon. H. J. REYNOLDS;
The Hon. C. P. L. MACAULAY;
Colonel the Hon. S. T. TREVOR;
The Hon. J. E. CAITHNESS;
The Hon. HARBANS SAHAI; and
The Hon. CHUNDER MADHUB GHOSE.

SUBURBAN WATER-SUPPLY.

The Hon. MR. MACAULAY moved for leave to introduce a Bill to provide for the supply of filtered water within the Municipality of the Suburbs of Calcutta. He said—"I have been entrusted with the duty of submitting to

the Council a Bill to provide for the supply of filtered water within the Municipality of the Suburbs of Calcutta, and I have now the honour to move for leave to introduce such a measure. I need hardly remind the Council that this is not the first occasion on which the subject of the metropolitan water-supply has engaged its attention, and Hon. Members who read their newspapers, though I cannot suppose that they have any very clear idea how matters stand at present, are doubtless aware that, at one stage or another, the question has been before the Corporations of Calcutta and the Suburbs for some years, and that a protracted, if fitful, battle of the schemes has been proceeding in the midst of this peace-loving community. The first chapter of its history,—a history extending over about three years,—was lucidly narrated by my Hon. predecessor, Mr. Mackenzie, in the debate of 2nd April 1881, when Act VI of that session of the Council was passed. The materials for a bulky second, and I hope last, chapter, extending also over about three years, are now available. I do not propose, however, to detain the Council with a review of this mass of fascinating literature, or to describe the circumstances under which the many Municipal Commissioners who have applied their minds to the subject have successively entertained a preference for a masonry conduit, an open cut and an iron main, discussed the merits of cement collar-joints, and weighed the respective advantages of masonry and earthen settling tanks. These monumental records now possess an antiquarian rather than a practical interest, and I may dismiss the historical part of the subject by congratulating the Council that, whereas in 1881 they had to deal with an unsettled question, we are to day in the satisfactory position of dealing with an accomplished fact. In April 1881, the Calcutta Municipality was still pondering the project of a masonry culvert. In December 1883, they have already obtained the sanction of Government to the purchase of a 48-inch iron main, which will provide a daily supply of 12,000,000 of gallons of filtered water, and the materials are, I understand, already on the way from Europe. I think, Sir, that the inhabitants of this great city may be congratulated that at last a really practical step has been taken towards the accomplishment of a measure which is essential to its well-being and salubrity. The youth of the water extension scheme has been one full of pain and peril; it suffered from many virulent attacks, chiefly of talk, which caused grave anxiety to its friends, and at times its condition was most precarious; but I am happy to say that it has at length emerged from this period of trial, and that we shall soon see it flourishing in the healthy and prosperous maturity.

The circumstances under which it has been found necessary to introduce a separate Bill for the regulation of the water-supply in the Suburbs are briefly these. Act VI of 1881 amended section 160 of the Calcutta Municipal Act by authorizing the Local Government to include any portion of the environs of the Town in the Calcutta system of water-supply, the Calcutta Corporation assessing a separate water-rate upon such portion, not exceeding the maximum leviable under the Act, and the Commissioners of the Municipality arranging for the detailed assessment and collection of the rate. The portion thus included would become, for the purposes of the water-supply, a part of Calcutta, and the Corporation of Calcutta would be responsible for supplying it with water like any other part of the Town; and inasmuch as the water-rate in Calcutta, after the extension of the new supply, will be assessed at nearly maximum rates, it would have to supply it on practically similar terms. The Calcutta Municipality was thus to be responsible, not only for bringing the water to the boundary of the affiliated tract, but for distributing the water throughout it. Mr. Harrison, in a very able memorandum, dated 31st October 1881, pointed out the objections to the latter portion of this arrangement. I cannot do better than, with the permission of the Council, read portions of Mr. Harrison's Minute. He said:

"In Calcutta the law requires us—(*a*) 'to cause such mains and pipes to be laid, and such tanks, reservoirs, or other works to be made or constructed as shall be necessary for the supply of filtered water in all the chief public streets;' (*b*) for fifteen hours every day, so far as may be reasonably practicable, to 'keep and maintain in the pipes and mains a sufficient supply of filtered water under a pressure of not less than 10 feet for the domestic use of the rate-payers;' (*c*) and for three hours daily to maintain a pressure

'sufficient to raise the water in all houses and places in which the same may be introduced to a height of not less than 50 feet.' The above are the chief liabilities which we should incur. That marked (*c*) we are not now able to discharge even in Calcutta, and I will assume that it would be a dead letter in the Suburbs. The liability to raise water 50 feet high in a house in Garden Reach is one which it would not be easy to enforce without a separate pumping station and reservoir for that Suburb only; but take the liability marked (*b*), that of keeping up 10 feet pressure throughout the day, and see what it involves. We are now only bound to keep up that pressure to the southern edge of Calcutta, but what would become of it by the time it reached Bhowanipore, Alipore, Kidderpore, not to mention Garden Reach! We every night now have to pump water from Tallah into the Wellington Square reservoir; and such is the effect of distance and friction in diminishing pressure, that I am informed that, if we pump through the independent 24-inch main only at the normal velocity, it takes a pressure of 40 feet at Tallah to yield 10 feet pressure at the reservoir. This one fact surely speaks volumes as to the difficulty of supplying the Suburbs to the south of Calcutta. Tallah is about four miles from Wellington Square, and the friction in a 24-inch main is much less at the same velocity than in the smaller distributing pipes which would be necessarily used in the Suburbs. I think I must be well within the mark in saying that Wellington Square would not only require to have its pumping power greatly increased, but also to pump all day at a higher pressure than it now does for five hours only in order to give the required pressure of 10 feet to the Suburbs, and even then it would fail in the more distant places."

"Mr. Harrison came to the conclusion that the community of system and control should terminate with the delivery of the filtered water at Tallah, each municipality sharing in this expenditure in proportion to the water required by it, and then undertaking the responsibility of its own distribution. This view has been accepted by Government, and the Bill, which I hope to have the honour of submitting to the Council, will provide that the Suburban Municipality shall pay the Calcutta Municipality for the water supplied to it, and shall take its own measures for distributing the water. There was, however, a very important point to be settled before legislation could proceed. Could the Suburbs on these terms afford to join in the scheme at all? Was Calcutta to look to such extension as might provide for its own wants only, or was it to make deliberate provision for the wants of the Suburbs also, and in the latter case how was it to be guaranteed against loss? The Suburbs could decide nothing until they should know approximately how much they would have to pay. The Calcutta Commissioners, not knowing what they were going to do for themselves, were naturally unable to say what they could do for any one else. As a contribution to the settlement of the difficulty, Sir Ashley Eden, just before he left the country, with the liberality which always characterised his action in regard to any question of municipal improvement, offered the Suburbs a contribution of Rs. 50,000 in the first year and Rs. 30,000 in each of the succeeding four years, on condition that the distribution works should be commenced by 1st January 1883, and that the Suburban Commissioners would consent to take the water from the Calcutta Municipality at prime cost as determined by arbitration. But at this time the Calcutta scheme was in what may be termed the "open-cut stage;" in fact everything connected with it was open; and so matters dragged on. The Suburban Commissioners could not tell how much water they could afford to take without knowing how much they would have to pay for it; the Calcutta Commissioners would not entertain the question of cost without knowing how much would be required. At length the matter was taken up in earnest by the new Commissioners elected in October 1882, the open cut and masonry culvert were both discarded, and it was decided that the wants of the Town could be fully provided for by a 42-inch iron main, which could produce 8,000,000 gallons a day. If the Suburbs required 2,000,000 a day, a 42-inch main must be laid; if they required 4,000,000 a day, a 48-inch main must be laid, and in either case the additional cost was indicated. Here at length the Suburban Commissioners had a definite issue before them, and they were at once able to say that their resources would not enable them to contract to take more

than 2,000,000 gallons a day. They would be very glad if a 48-inch main could be laid, so that hereafter they might be able to take more water; but as this would cost about Rs. 21,000 a year more than the 42-inch, it was out of their power to pay for it, even if Government would consent to keep open Sir Ashley Eden's offer. Now, Sir, Mr. Rivers Thompson considered that this would be a very regrettable conclusion. On the one hand the Calcutta Corporation could not be expected to construct for itself anything more than a 42-inch main, and there was no probability that it would require a further supply within any period to which reasonable anticipation could extend. On the other hand the Suburbs are rapidly increasing in importance, and it would be a grievous pity that they should be indefinitely restricted to a daily supply of 2,000,000 gallons only of filtered water. In these circumstances, Mr. Rivers Thompson determined to come to the assistance of the Suburban Municipality and place them in a position to guarantee the extra cost of providing a 48-inch main, so that they might be able, as their circumstances permitted, to pay for and distribute any quantity up to 4,000,000 gallons a day. He relieved them of police charges, amounting to about Rs. 35,000 a year, on condition that the sum to be paid to the Calcutta Municipality should be the first charge upon the income thus set free. These terms have been accepted, and, as I have said, the 48-inch main has been ordered from England. The Bill will provide for an arrangement such as was contemplated by Sir Ashley Eden when he made his offer of assistance to the Suburban Municipality. The principle upon which the price of the water is to be calculated will be settled between the municipalities, the Suburban Municipality will have power to raise a rate of 6 per cent., and to provide for the details of distribution and the like, and the payment to Calcutta will be the first charge on the net proceeds of the rate. Should any dispute arise regarding the amount claimed, or any other matter connected with the water-supply, it will be settled by three arbitrators—one to be appointed by Government, and one to be appointed by each of the municipalities. With these remarks, I have the honour to move for leave to introduce the Bill."

The motion was agreed to.

The HON. THE PRESIDENT, in adjourning the Council, said that in the ordinary course the Council would stand adjourned to Saturday next, the 22nd instant, but owing to there not being sufficient legislative work in hand, and to the approaching holidays, the Council would be adjourned to Saturday, the 5th January next. The interval covered by the postponement would, no doubt, be utilized in advancing the Bills now before Select Committees, in order that, when the Council next met, there might be one or more Bills ready to be dealt with.

STATE AND PROSPECTS OF THE CROPS.

REVENUE DEPARTMENT.

Calcutta, the 18th December 1883.

RESOLUTION.

READ—

Letter No. 1158T—R, dated 13th October 1883, to the Commissioner of the Burdwan Division.

Circular letter No. 9T—R, dated 23rd October, to all Commissioners of Divisions (except Burdwan).

Replies to the above from the Commissioners of Divisions.

Statistics of Rainfall in the Lower Provinces from May to October 1883.

IN the Rainfall Tables appended to this Resolution are shown the results obtained from the returns which have appeared weekly in the pages of the *Calcutta Gazette*. They show, first, the distribution of the rainfall resulting from the south-west monsoon of the present year; and secondly, how this distribution has varied from that of previous years. For the purpose in hand, however, it is only necessary to note the most important features of the monsoon, and to draw attention to its results. The returns refer to the period of six months from May to October. In May the principal characteristic was the prevalence of unusually strong south-west winds. Much aqueous vapour was brought up from the Bay, which was not, however, condensed over Lower Bengal, but was carried inland to the Garo and Khasia hills, showers only falling elsewhere Hence the result was excessive rainfall in Eastern and Northern Bengal, normal rainfall in South-West Bengal and Orissa, and deficient rainfall in Behar and Chota Nagpore. Showery weather continued in the early part of June, but the real monsoon rains began about the 13th, and towards the end of the month a cyclone was formed and gave heavy rain to Orissa. On the whole, the monthly rainfall was deficient in Bengal and excessive elsewhere. The July weather was, roughly speaking, not very dissimilar to the normal, except that in the northern districts there was now a decided deficiency. In August there appears to have been a generally feebler monsoon current than is usually the case, and a consequent deficiency in the rainfall, the only exception being Northern Bengal, where the rainfall this month showed a slight excess. September weather was practically a continuation of that of August, with the exception of slight breaks, during which the monsoon current became stronger and the rainfall heavier. The result was that at the end of the month there was again general deficiency of rain in all the districts except Chota Nagpore. The ordinary south-west monsoon rains appear to have ceased about the 29th of September, and though in October two small cyclonic disturbances were formed over the Bay, their influence was very slight.

2. The tables appended to this Resolution show that the importance of any given excess or deficiency is proportional to the average rainfall in the particular district, and the value of these variations is, therefore, shown better by the table of percentage variations (IV) than by that of actual variations. It is of importance, however, to notice that even in these cases any excess observable was due, not to continued steady rain throughout, but rather to exceptionally heavy falls in the early part of the season, which were not entirely counterbalanced by the subsequent drought. If the various Divisions are taken separately, it appears that in Orissa the July rainfall was up to, or exceeded, the average; but that in August and September there was slight, and in October very considerable, deficiency; that in South-West Bengal there was an excess of rainfall only in July, all the other months showing a deficiency; that in Eastern Bengal (with the exception of Mymensingh, where there was drought throughout) the rainfall of the earlier months was irregular, and that of the later months very deficient; that in Northern Bengal, except in the neighbourhood of the hills, there was deficiency throughout; that in

Northern Behar the earlier months showed irregular changes, and the later months decided deficiency; that in South Behar, with the exception of June, there was great deficiency; and that in Chota Nagpore there was great deficiency at the close of the period, and partial deficiencies previously. These results are shown upon charts which have been prepared by the Meteorological Reporter to this Government. The Lieutenant-Governor would have been glad had time permitted of these charts being lithographed and published with this Resolution; for an inspection of them, and a perusal of the correspondence published herewith, would have shewn in a striking manner the intimate relation which exists between deficient rainfall and crop failure. In fact, it may be said that the information supplied to Government by the Meteorological Reporter suggests practically the same conclusions which an examination of the local reports dictates.

3. In consequence of the defective rainfall, the attention of Commissioners was called to the prospects of the country by the circular letter of the 23rd October, which is cited in the preamble, the Commissioner of Burdwan having been previously specially addressed regarding the condition of the crops in parts of Hooghly. In that letter it was stated that the early cessation of the autumnal rains seemed to have had generally an injurious effect on the winter crops; that there were grounds for fearing that a continuance of dry weather might also affect the *rubbee* sowings injuriously. Reports on the state of the last autumn and on the prospects of the coming winter and spring crops were called for, and information on the general condition of the stocks and prices was also required from each district. There has been delay in the submission of some of the divisional reports, the last having reached Government on the 11th instant. This delay, however, is not without some counterbalancing advantage, in the fact that the reports bring down the information on the state of portions of the country to a very recent date. The Lieutenant-Governor will now separately consider these reports, which are published *in extenso* as an appendix to the Resolution.

4. *Presidency Division.*—The report submitted by the Commissioner states the facts as they existed in the beginning of November. The general conclusion Mr. Monro comes to is that, while there will be in some districts scarcity and pinching, there will not, as far as he could perceive, be any pressure as regards food amounting to famine, and such pinching as may ensue will be experienced chiefly among the labouring classes. Judging from the detailed information furnished by the local officers, the Lieutenant-Governor at present sees no ground for thinking that in the districts of the 24-Pergunnahs, Moorshedabad, Khulna and Jessore, the scarcity will be such as to call for any interference on the part of Government. In the remaining district of Nuddea, the tenantry in certain portions of which are in a somewhat depressed condition owing to the prevalence of epidemic fever and other causes, the outlook is less satisfactory. But even here the facts do not warrant an apprehension of famine, though some contributions from Provincial to Local Funds, for expenditure on district roads, may possibly be needed hereafter. The rain which has fallen since the submission of the Commissioner's report is stated to have done good to the cold-weather crops, some inconsiderable injury having, however, resulted therefrom to the *amun* crop which had been cut. With a view to Government being kept informed of the progress of events, the Lieutenant-Governor desires to receive copies of the bi-monthly reports which the Commissioner has called for, with such recommendations as he may desire to submit.

5. *Burdwan Division.*—The Commissioner, reporting on the 12th of November, gives it as his general impression that the division as a whole will not require any general measures of relief, though perhaps some slight assistance may be necessary here and there. Examining the detailed local information, the Lieutenant-Governor finds that in Hooghly, where much good has been done by irrigation from the Eden Canal, the crops are not so bad as had been at first reported, while the stocks of rice throughout the district, both in the hands of zemindars and ryots, are at present very large. The same remarks may be said to

apply generally to Howrah. The late rain has also improved the prospects of sugarcane, potatoes and the winter crops, and, as in both these districts crops other than rice are largely grown, a failure in that crop is not so severely felt as in other districts. It may be concluded, therefore, that the condition of neither district affords cause for anxiety.

In Burdwan it may also be stated that much good to the crops has resulted from irrigation from the Eden Canal and from tanks, while the late rains are reported to have greatly benefited the cold-weather crops. The late Collector, Mr. Larminie, while thinking that the labouring classes, and in some villages the ryots, will suffer pressure, does not consider that there will be any need for direct interference on the part of Government. In this view the Lieutenant-Governor, with the information before him, concurs.

The Commissioner, Mr. Beames, writing from Midnapore on the 12th November, stated as follows:—"I have been over a considerable tract of country in Midnapore, and have received verbal reports from several of the officers in charge of the canals and wards' estates in the interior. There will be a deficient crop in some parts, while in others it will, thanks to irrigation, be an average one. The low-lying deltaic portions of this district, which in years of ordinary rainfall are liable to suffer from floods and accumulation of rain water inside the intricate net-work of embankments with which the country is intersected in all directions, will, it is hoped, have a very fair outturn this year." In an unofficial letter of a later date, Mr. Beames also expresses his belief that there is no cause for anxiety regarding the Midnapore district. The Lieutenant-Governor accepts the Commissioner's view.

As regards Bancoorah, the Commissioner, reporting on October 24th, observed that the crops had been largely irrigated from reservoirs, while rain which had fallen in the north and west of the district on the 15th idem had also greatly benefited them. The Collector then hoped for a 10-anna crop. Writing later, the Commissioner reported that the crops had turned out better than had been expected, and that the Collector thought no aid from Government would be needed. Inasmuch as the late rains have extended to this district, the Lieutenant-Governor considers its condition satisfactory.

With respect to the remaining district of this division—Beerbhoom—the Commissioner, who in October considered prospects there rather gloomy, reported on the 12th November that the district would have from a 4 to an 8-anna crop of *amun*, the *aus* having been up to the average. In a later unofficial report of the 18th November, Mr. Beames, qualifying his previous views, stated that the condition of the crops was better than previously believed, and that the outturn would be up to an all-round average of 8 annas. The only portion of the district in which scarcity needing the attention of Government was apprehended was in the tract skirting the Sonthal hills and inhabited by Sonthals. In this tract, in the best of years, the crops are precarious; and, further special enquiries as to the state and prospects of the locality are being made. The Lieutenant-Governor will await the Commissioner's report on this point.

6. *Dacca and Chittagong Divisions.*—The reports from the Dacca Division show that, while short crops may be expected in certain portions of the division, the general outturn will be fair. From Chittagong the reports are more satisfactory, the Commissioner stating that the outturn of the *aus* was generally fair, while the early cessation of the autumnal rains had not generally affected the crops in the various parts of the division. From these statements the Lieutenant-Governor anticipates that the usual export of rice from the Dacca and Chittagong Divisions will suffer no great diminution.

7. *Orissa Division.*—Regarding the state and prospects of the crops in the Orissa Division, the Commissioner submits the following report, which satisfies the Lieutenant-Governor, not only that no difficulty will be experienced in Orissa itself, but that the province will be in a position to export largely:—

"The Collector of Pooree has not yet given any detailed report on the state of the crops in his district, but assures me that the main crop of rice is safe in consequence of the late rain, and that a fairly good average outturn may be expected. He adds that no famine or scarcity need be apprehended.

"The Collector of Cuttack reports that the only crop which suffered from want of rain was the *sarad* or chief rice crop, but that there has been no serious failure. Taking the *biali* and *sarad* together, the outturn will be, the Collector says, about 10 annas, or two annas less than an average crop. The prospects of the *rubbee* crop are reported to be favourable.

"The Collector of Balasore reports that in the southern part of the district there has been a full crop, but that outturn falls off gradually towards the north, and is worse in a tract called Bograi, which suffered from an inundation of the Subhanreka. Even there, however, there is no reason for alarm. The prospects of the *rubbee* crop are good; there is a larger demand for labour on account of the coast canal works, and there is a considerable stock of grain in the district.

"It is to be remembered that during the last three years there have been almost bumper crops in the greater part of the Orissa Division, and a large portion of these is doubtless still in the hands of the merchants.

"The range of prices during the coming year cannot be estimated even approximately. It must depend to a great extent on the demand for rice elsewhere.

"There is not, in my opinion, any present cause for anxiety in regard to the Orissa Division, and I do not think any special precautionary measures are now necessary."

8. *Chota Nagpore Division.*—The Commissioner's report, which deals in some detail with the various districts of his division, shows that, although in a few localities the crops may be short, there is nowhere any apprehension of scarcity, while generally throughout the division a fair outturn may be looked for. A great portion of the division was fortunate in an opportune fall of rain in the commencement of November, whereby the rice crop was benefited and *rubbee* sowings facilitated. Recent reports show, moreover, that the late rains have extended to the division to the great advantage of the *rubbee* crop; while the outturn of the winter rice is reported to give two-thirds of an average crop in Lohardugga, nearly an average crop in Singbhoom, from two-thirds to an average in some portions of Manbhoom, and a full average in others. From these reports the Lieutenant-Governor concludes that no difficulty need be apprehended in the Chota Nagpore Division.

9. *Rajshahye Division.*—In regard to Dinagepore, the Commissioner states that the prospect does not seem bad as a whole, and he thinks that the railway works in progress, and some expansion of district road and wards' estate work, will supply ample employment for labour throughout the district. The Collector takes a somewhat more gloomy view of the state of things, but even he does not anticipate any distress before March, and then only among a limited class of the population. During his recent tour in Northern Bengal, the Lieutenant-Governor made personal enquiries into the state of the crops in Dinagepore and the information he then received from well-informed sources did not lead him to apprehend anything like distress in that district. He desires, however, that fortnightly reports of the state of the district may be submitted to Government.

The Collector of Rajshahye, though reporting that on the whole he sees no reason for anxiety as to the supply of grain in the district during the coming year, fears that the inhabitants of the Bhurind may suffer some distress. The Bhurind is a tract of country about 350 square miles in extent, half unreclaimed, occupied by low-caste dhangurs who readily take to spade labour. For these ample employment will be provided on the western extension of the Dinagepore Railway, and the district officer should see that information as to employment being there procurable is made known in the tract in question.

In Pubna the Commissioner reports that things seem to be better than in either Dinagepore or Rajshahye, and as the Collector states that for the whole district the *amun* will be about an eight-anna crop, while the prospects of the winter crops owing to the recent rains are fair, it may be concluded that no difficulty will arise needing Government interference in this district.

In Julpigori the *amun* crop, according to the Deputy Commissioner, will be "the usual full crop," while the winter crops at present promise well. The condition of the Darjeeling district also is satisfactory.

There remain the districts of Bogra and Rungpore, in portions of which prospects are decidedly less satisfactory than in other districts of the division. The localities, however, in which the crops are reported to have failed to a considerable extent are limited in area, and to them special attention is being paid. Looking to the fact, however, that the rainfall this year has been better in the worst locality than it was in

1873, and that in the latter year there would have been no pressure in Bogra had the district stocks not been depleted by outside demand, the Lieutenant-Governor still hopes that both districts will escape any very considerable pressure during the coming year. Prospects, it may be added, have also been improved in these districts, as in the other parts of the division, by the late rain, which is reported to have done much good to the *rubbee* crops.

10. *Bhagulpore Division.*—In the Bhagulpore district the *bhadoi* crop, which gives ordinarily from 25 to 30 per cent. of the food-supply, was not far short of the average anywhere except in the Sudder sub-division, where it is reported to have been two-thirds of an average crop. The *aghani* rice is estimated to yield something over a half average in the Sudder and Mudheypurah sub-divisions, and half an average in the rest of the district. The *rubbee* promises at present to be half an average crop over the entire district, but with winter showers the prospects of this crop must greatly improve; and there has actually been some rainfall since the date of the Commissioner's report In forecasting the future, the Collector says he does not anticipate serious distress anywhere, although he believes that in certain portions of the district the labouring classes and cultivators will undoubtedly suffer privation after January, when the price of rice may rise to 11 seers for the rupee. The Commissioner, while concurring generally with the Collector, thinks it possible that the Banka sub-division may feel greater pinching than other portions of the district. In regard to this sub-division further enquiries are being made, and the results of these should be reported to Government. Should any pressure and demand for employment arise in the district, however, there will be, in the extension of the 'Assam-Behar' Railway, which has been sanctioned by the Secretary of State, a source of employment open to those who need it But on the whole the circumstances of this district do not at present give the Lieutenant-Governor cause for any serious anxiety.

Purneah.—The condition of the district is fairly satisfactory. The Collector reports that the *bhadoi* crop was "a very fair one over the whole district;" that not much damage was done to the *aghani* rice crop over an area equal to half of the district, while there will be very few places, except parts of thanas Gundwara and Dhurumpore, where half a crop will not be realized; and that, if there be seasonable rains about Christmas, there will be a fair *rubbee* crop throughout the district." Upon these facts, there are, in the Lieutenant-Governor's judgment, no grounds for any anxiety regarding the Purneah district.

From Maldah the reports show that the *bhadoi* crop, which forms one-fourth of the district food-supply taken as a whole, was this year above the average. The *aghani* rice is estimated generally at 4 annas of an average crop, while the Collector, writing on 13th November, thought that without rain the prospects of the *rubbee* were gloomy. Generally speaking the Collector was of opinion that the inhabitants of the Bhurind (which cover a portion of the Maldah as well as of the Rajshahye districts) would suffer pressure, and that some assistance may be needed there. The Commissioner, however, is not satisfied as to the correctness of the Collector's views and has called for fuller information. The Lieutenant-Governor will await the further report promised by him. Meanwhile, it is well that attention should be drawn to the fact that the inhabitants of the "Bhurind" are to a large extent aborigines of Santhal origin, and that for men of that class the railway works in the adjacent district of Purneah will afford remunerative occupation. The Lieutenant-Governor also desires to note the fact reported in the Famine correspondence in 1874, that the spring (*boro*) and autumn (*bhadoi*) rice crops seem usually to be largely retained for home consumption in this district; that the failure in this year's crops is not so great as was reported in 1873; and that in 1874 the Maldah district suffered more from high prices consequent on the depletion of stocks by outside demand than from any other cause. There are no reasons to anticipate that during the coming year prices will range so high as they did in 1874. The *rubbee* crops have been benefited by a recent fall of rain.

From the Sonthal Pergunnahs the reports, though somewhat defective, seem to show that the last *bhadoi* crop was inferior in the Doomka and Pakour

sub-divisions, though not far short of the average elsewhere. The *aghani* rice is estimated as close on an average crop in Deoghur, and at two-thirds of an average crop elsewhere, except in the Rajmehal sub-division, where it is stated to be half the average. The prospects of the *rubbee* were gloomy last month, but the recent rains must have materially improved them. The Commissioner does not think, judging from the high prices which prevailed last year, that the stocks in hand can be large; but he anticipates no difficulty, except possibly in the Rajmehal sub-division, which includes the Damin-i-koh. In regard to that tract further enquiries are being made, and the result of these the Lieutenant-Governor will await.

From the Monghyr district the Collector reports that in the Sudder and Jamui sub-divisions the *bhadoi* was a ten-anna, and in Beguserai an 8-anna crop (the average crop in such estimates being represented by 12 annas). The estimated outturn of the *aghani* rice is given at 5 annas, but no forecast is furnished of the prospects of the *rubbee*, though the remark is made that with rain it may yield from 8 to 10 annas. Some estimates of stocks in hand and of the probable outturn of the year's crops are given by the Collector. These estimates, however, tested by such information as the Government possesses on this difficult question, do not seem to the Lieutenant-Governor to call for serious notice. On the whole, the Lieutenant-Governor would say that, as far as a judgment can now be formed, there is no ground for any special anxiety on account of this district.

11. *Patna Division.*—The accounts from this division are recent, and enable the Government to form a fairly accurate conception of the situation as it exists at present. It is generally admitted that the fall of winter rain will improve the condition of things greatly. With regard, first, to the districts south of the Ganges, it may be stated generally that no cause for anxiety exists as to Shahabad. The *bhadoi* crop, indeed, was short, but it forms an inconsiderable proportion of the district food-supply, the bulk of which consists of winter rice. The outturn of this crop in the Sudder and Sasseram sub-divisions is estimated at 8 annas, or two-thirds of the average; and although the reports from Bhabuah represented what was tantamount to a total failure of the rice crop in that sub-division, the Collector's personal investigations have satisfied him that one-third of an average crop may fairly be expected there. It may be added that Mr. Macpherson, who has been prosecuting careful enquiries into the state of that part of the Shahabad District, takes an even brighter view of things. Finally, there seem to be ample stocks in the district; the price of wheat rules low, though rice is dear; the prospects of the *rubbee* crops are at present favourable, and if rain fall in due course a full crop may be secured.

From Gya the Collector sends a gloomy account. The portion of the district regarding which he is more seriously concerned is the extensive rice tract to the north; but in regard to this the Sub-Divisional Officer takes a brighter view of the prospects than the Collector, who has only recently joined the district. There is a good deal of irrigation done in Gya, both from the Sone Canal system and from wells and reservoirs; and it is to be remembered that where the people admit a 4-anna crop, it is very safe to rate the outturn at a higher proportion.

From Patna also the accounts are not very encouraging; but the Lieutenant-Governor does not forget that with as scanty a rainfall in 1873 there was no scarcity whatever in Patna. A very considerable portion of the district is inundated, the consequence being that there is always a fair *rubbee* crop. This year it is admitted that the *rubbee* has germinated fairly well, and with seasonable rainfall a good harvest may, it is stated, be looked for. No apprehensions are entertained of any immediate rise in prices, nor of any further rise unless the *rubbee* "totally or materially fails." On the whole, it seems to the Lieutenant-Governor that the Patna district will be well able to tide over the coming year.

Passing to the districts north of the Ganges, the Lieutenant-Governor notices that in Sarún the *bhadoi* crop, which seems to be the most extensive food crop grown in the district, was, if not an average crop, very near the average. The *rubbee* promises, with seasonable rain, to be fairly good; but the

winter rice is reported to have largely failed. The Collector does not think this crop can be estimated at more than a 2-anna crop. Looking to the fact, however, that considerable use has been made of the Sarun Canals, which run from the north to the south of the district, there are some grounds for thinking that the Collector may, as time goes on, find reason to take a more favourable view even of the winter rice crop. Meanwhile, it is satisfactory to know that the stocks in hand are probably large, and that, although the price of rice has risen, that of other edible grains is still moderate. From the state of the market no scarcity, amounting to distress, is to be at present apprehended in this district.

From Durbhunga the Collector reports that the last *bhadoi* was a poor one, not exceeding, on the whole, a 7-anna crop. The outturn of the winter rice is estimated as a 6-anna crop for the entire district, the crop in the Modhubani sub-division, which is a great rice-producing tract, being estimated at 8 annas of an average crop. The Lieutenant-Governor has, however, been informed (though the statement needs confirmation) that the rice crop in North-East Modhubani is very good; and if this be true, it may be safely stated that there will be no scarcity of food in the district during the coming year, unless stocks are exported When it is added that "the *rubbee* is still looking good everywhere, particularly in the Tajpore sub-division, in spite of the want of rain," and that in the extension of the Behar Assam Railway towards the Purneah boundary there will be ample employment, it may, the Lieutenant-Governor thinks, be fairly concluded that there are no grounds for present anxiety in regard to the district.

With reference to the Mozufferpore district, correspondence has already passed between the Government and the Local Officers. A portion of the district towards the north suffered seriously from inundations in August last, and accounts of a somewhat serious character regarding the distressed condition of the people in the affected tracts were forwarded to Government On full enquiry, however, by the Collector and the experienced Commissioner of the Division, Mr. Halliday, it turned out that the prospects were not so gloomy as had been at first apprehended, and all that it was ultimately found necessary to do was to make a small grant-in-aid of local funds for the construction of a much needed road, which will serve as a means of communication with, and a protective embankment to, the tract in question, which has suffered more or less from inundation every year.

Writing quite recently on the general condition of his district, in which it is estimated there has been only a 7-anna *bhadoi* and a 4-anna *aghani* rice crop, the Collector states. "No deficiency in supplies has occurred anywhere. Should there be rain within the next few weeks, a moderate outturn of *rubbee* may be expected, and in this case there are no grounds for anticipating any actual deficiency on the supply of food." Should the *rubbee* fail, however, Mr. Norman anticipates scarcity more or less severe. The Commissioner does not share these apprehensions, and the Lieutenant-Governor is bound to say, having regard to the character of previous local reports, on which presumably the Collector bases his opinion, that he agrees with the Commissioner. It is desirable, however, that the condition of the Mozufferpore district be watched, and the Lieutenant-Governor will be glad if the Commissioner will take an early opportunity of visiting it, and, in communication with the Collector, reporting the result of his observations.

Regarding Chumparun, which it is stated has had about three fourths of an average *bhadoi* crop, and about two-fifths of an average rice crop, the Collector reports that with seasonable rain there will be an average *rubbee* outturn. "Though the outlook," writes Mr. Henry, "is on the whole gloomy, the condition of the people of the Chumparun district does not afford any immediate cause for anxiety. We can only now look forward hopefully to the fall of seasonable winter rain. If this fails us, the condition of the poorest classes of the people will require careful watching, and the direct intervention of the Government will be required to a greater or less extent." Mr. Rivers Thompson hopes, however, that the downward tendency of prices, which the

Collector already notices, may indicate the revival of confidence among the people themselves.

12. The preceding observations give a general idea of the state of the country as reported in the appended correspondence. The impression which a perusal of this correspondence has produced on the Lieutenant-Governor's mind is that, although the monsoon has been deficient over the greater portion of the Lower Provinces, there is no reason, with a moderate *rubbee* harvest, to anticipate anything like general scarcity. The local reports estimate the outturn of the late rice crop in many cases at a very low figure, but it must be borne in mind that these quantified estimates of crops, based to a large extent on information received from cultivators and police officers of the inferior grades, usually understate the real outturn, and there is reason to think that the present estimates have been in some measure influenced by the same tendency to exaggerate failure. Prices may rule high in particular districts, and in a few isolated localities in North-East Bengal, and possibly also in a few portions of Behar, it may be necessary to offer employment to the poorest classes of the population. But such employment would even if there were no deficiency in the crops, be open to some extent on the lines of Railway in progress, and on those which it was intended to undertake. If additional works are to be undertaken, there will apparently be no need that they should be of greater magnitude than can be provided for by local resources, supplemented in some cases by moderate grants from Provincial funds. In conclusion the Lieutenant-Governor trusts that nothing in the nature of charitable relief will be found necessary in any district of Bengal.

By order of the Lieutenant-Governor of Bengal,

A. P. MACDONNELL,

Offg. Secretary to the Government of Bengal.

Note. + denotes excess, and
— denotes deficiency.

For example, — 96 denotes that there was a deficiency of 96 per cent. in the amount of the rainfall, or that only 4 per cent. of the average amount actually fell.

No. 1158T—R, dated Darjeeling, the 13th October 1883.

From—A. P. MacDonnell, Esq., Offg. Secretary to the Government of Bengal, Revenue Department,

To—The Commissioner of the Burdwan Division.

The Lieutenant-Governor's attention having been attracted to the scanty rainfall in the Hooghly district, particularly in the Serampore sub-division, I am to request that you will be good enough, after due enquiry, to submit to Government a special report on the condition and prospects of the crops there, and in any other portions of your division, where the year's rainfall has been insufficient.

I am to request that you will submit your report with as little delay as possible.

Circular No. 9T—R, dated Darjeeling, the 23rd October 1883.

From—A. P. MacDonnell, Esq., Offg. Secretary to the Govt. of Bengal, Revenue Department,

To—All Commissioners of Divisions (except the Commissioner of Burdwan).

I am desired by the Lieutenant-Governor to call your attention to the state of the crops in your Division. The apparently early cessation of the autumnal rains seems to have generally had an injurious effect on the winter or *khurreef* crops, and there are some grounds for fearing that the dry weather may, if it lasts, affect, also injuriously, the *rubbee* sowings. It is possible that timely rain may still remove all cause for anxiety; but if such rain does not fall before you are satisfied that the north-east monsoon has become established, or at any rate, before the end of the first week of November, you are requested to submit to Government, with as little delay as possible, a full account of the state and prospects of the last *bhadoi* and of the coming *khurreef* and *rubbee* crops in each district of your Division. Your report should consider the amount of grain stocks in hand in each district, and the probable range of prices of food during the coming year. For those districts in which prospects may not be bad, the information need not be detailed; for them a general statement is all that is needed. I am to add that your report should reach the Government before the end of November at the latest.

No. 73T, dated Camp Bankoora, the 24th October 1883.

From—J. Beames, Esq., Commissioner of the Burdwan Division,

To—The Secretary to the Government of Bengal, Revenue Department.

In reply to your No. 1158T—R, dated 13th October 1883, I have the honour to submit the following information regarding the state of the crops and prospect of harvest in this division.

2. I have already given a general idea of the state of things in my demi-official letter of the 18th instant. Since that date the Collector of Burdwan reports that there has been hardly any rain in that district for some time past, nor does there seem any sign of any. Prospects are worst in the Cutwa sub-division which has had inferior harvests for the last two years. In Culna matters are more promising, and there is likely in case to be a 6-anna crop. In the Sudder and Ranegunge sub-divisions the fields are in most cases dry, and unless rain falls there will be a very poor outturn. The Collector is

using his influence with the zemindars to induce them to allow of irrigation from tanks which are numerous and of large size. A considerable portion of the crop may be saved by this means.

3. In Beerbhoom irrigation from tanks is being resorted to. There has been very little rain during the present month, and the prospects are rather gloomy.

4. In Bankoora, where I am at present staying, storage of water in large reservoirs locally known as "bundhs" is facilitated by the undulating character of the country. The crop has been largely irrigated from these reservoirs, and this has to some extent compensated for the want of rain. In those parts which I have visited the crop is still looking healthy, and it is only on the higher lands which cannot be reached by irrigation that it is drying up. Heavy rain fell in the north and west of the district on the 15th, and the reports since received show that the crop has greatly benefited. In many places the Collector still hopes for a 10-anna crop: and does not now think 9 annas a too sanguine estimate for the district in general.

5. Both in Burdwan and Bankoora the Collectors report that stocks of grain appear to be plentiful, except perhaps in Cutwa. Purchases for export have been made in Bankoora and Sonamookhi towns lately to a considerable extent, and this while it has caused some rise in prices seems to confirm the reports of the local officers as to the existence of large stocks in those place.

6. Regarding Midnapore, Mr. Wilson informs me demi-officially that rain seems to be impending. If there is anything like a fair amount of rain there will be a fairly good outturn, but if there is no rain I fear the crop, especially on the high lands of the north and west, will be very poor indeed.

7. In Hooghly there was a fall of over two inches during the week ending 20th October 1883, and this must have very much improved the prospects of the crops in the Sudder sub-division and in parts of Serampore. Arrangements have been made for irrigation from the Kanna Nuddi and Kanna Damoodar rivers which are supplied from the Eden Canal, but I fear the supply from this source will not be very large. The Collector promises a further report shortly. Such a great variety of crops is grown in the Hooghly district that even the total failure of the *amun* rice crop would not result in such general distress as would be the case in other districts.

8. Further reports will be submitted as they come in from the Collectors; at present I consider that though there is some cause for anxiety the situation is very far from being hopeless. Any fall of rain within the next ten days would effect a very great improvement everywhere in the division.

No. 8570, dated Bankipore, the 29th October 1883.

From—C. T. METCALFE, Esq., C.S.I., Officiating Commissioner of the Patna Divn.,
To—The Secretary to the Government of Bengal, Revenue Department.

WITH reference to Government circular order No. 91—R., dated 23rd instant, I have the honour to submit as a preliminary report a statement giving a summary of the state of the prospects of the crops in the Patna Division for the week ending 27th October 1883.

A further and fuller report will be submitted on receipt of the district reports.

Return showing rainfall, character of weather, and prospects of the crops in the Patna Division for the week ending 27th October 1883.

District.	Rainfall at sudder station.		Character of the weather in the district as far as known.	State and prospects of the crops at date.
Patna ...	.....		.....	Not yet received.
Shahabad ...	Arrah	·55	Seasonable ...	The late rain has benefited the crops on the ground and improved the prospects of *rubbee* sowing; still much of the winter rice has been lost through previous drought.
	Buxar	1·03		
	Bhubooah	1 2		
	Sasseram not received.			
Gya ...	Sudder	0·52	Set fair, cool ...	The rice crop will be very bad. The late slight rain has done rice very little good, but has somewhat improved *rubbee* prospects. Prices rising.
	Aurungabad	0 41		
	Nowada	0·51		
	Jehanabad	0 82		
Mozufferpore...	Mozufferpore	0·08	Weather bright and rainless There has been no rain except a slight drizzle on the 20th.	The rice on high land has withered and in some place is being cut as fodder; that on low ground is better; the crop will not exceed five annas. *Rubbee* sowings are in progress.
	Hajipore	0·40		
	Seetamarhi	0 07		
Durbhunga ...		·13	Getting cool and pleasant.	The rice crops is irretrievably damaged throughout the district, and under no circumstances will it be more than an eight anna crop. *Rubbee* cultivation is progressing, but not under the most favourable circumstance. Prices of food-grains are steadily rising.
Sarun ...	Chupra	·36	Weather dry; days hot; night cool; no sign of rain.	Rain most urgently wanted; paddy crops suffering (except where irrigation is practicable), and *rubbee* sowings delayed for want of rain. It is doubtful whether a heavy fall would now be of much use to the paddy crop. Prospects bad; prices rising.
	Sewan	0·06		
	Gopalgunge	Nil		
Chumparun ...		Nil	Seasonable ...	Prospects of all standing crops bad. No rain has fallen since the beginning of September. If rain falls within a month the country will be covered with *rubbee*. If no rain falls most of the *rubbee* that has already germinated will die off.
				Generally the condition of the crops causes grave anxiety.

C. T. METCALFE,

Offg. Commissioner.

No. 1419, dated Hooghly, the 3rd November 1883.

Memo. by F. WYER, Esq., Collector of Hooghly.

COPY forwarded to the Secretary to the Government of Bengal, Revenue Department.

No. 1418, dated Hooghly, the 3rd November 1883.

From—F. WYER, Esq., Collector of Hooghly,
To—The Commissioner of the Burdwan Division.

As directed in your memorandum No. CV, dated the 17th ultimo, forwarding copy of Government letter No. 1158T—R of the 13th idem, I have the honour to submit the following report on the condition and prospects of the crops in this district, particularly in the Serampore sub-division.

1. On hearing from Mr. Collier of the great want of rain in Serampore sub-division, I wrote to the Superintending Engineer, South-Western Circle, asking him to aid the ryots by allowing cross dams to be put up and by increasing the water, if possible, in the Eden canal. He gave the required permission to the erection of the cross dams, and has sent more water down the canal, so as to save a good deal of the crops in Harripal and Singoor.

2. On the 20th and 23rd ultimo I went with Collier over Singoor and Harripal thanas, and from what I saw I agree with his estimate of the *amun* crop in these places; if anything I think the estimate is somewhat too high; but in thana Singoor for every beegha under *amun* cultivation there are about two beeghas under potato, and in Harripal the proportion is about 3 to 1; so that even with the gloomy prospects of *amun*, if the potato crop turns out well the people will not be very badly off. If rain falls within the next fortnight the potato crop may turn out a good one, unless there is no water for irrigating it; but this is not likely to happen.

3. The sugarcane crop at present has not suffered so much as the *amun*; this is owing to the fact that the ryots always irrigate their crop and plant it where water for irrigation is generally accessible. Where no water could be procured the crop has failed; but this is only in a few places: Mr. Collier's estimate of a 10-anna crop may be accepted.

4. Taking into consideration the fact that the ryots have had a fair average *aus* crop—though this is grown over a very small area compared with the *amun*—and that the sugarcane promises pretty fairly, while, if there is rain shortly, the potato crop may turn out well, and remembering that plaintains and vegetables are grown to a very large extent in Serampore sub-division for the Calcutta market, I do not think there will be any very great scarcity in this sub-division, or any relief measures will be called for. In case, however, any relief measure was required, I think that ample work would be provided along the Tarkessur Railway, which runs through the sub-division, and that thus it is not necessary to provide for relief works in this sub-division. I enclose a copy of Mr. Collier's report, from which you will see that he has himself been over the whole of his sub-division, and most carefully noted the state of the crops in it. I have not been over Chanditolla and Kristonagur thanas, but Mr. Collier's report gives all the information required.

5. In the sudder sub-division I have been through Polba, Hooghly, Bullaghur, and Pandooah thanas, and from what I saw I think the outturn of *amun* in those thanas may be half an average one if on the outside, and probably will be only one-third. If, however, rain fell within the next five or six days, I think a 6-anna crop would be assured, and in some places an 8-anna one. As instances in Dwarbasiny and Mahanad for the first four miles along the road from Pandooah to Inchura the rice crop promises very fairly, but for the last six miles it is almost a total failure, as, too, is the case along the high ridge of land along the road from Inchura to Tribeni. The early *amun* wherever it had not been drowned in the early rain, and the late *amun* wherever there was water for irrigation, will most likely yield from a 6 to 8-anna crop. The sugarcane is pretty good; what the *rubbi* will turn out depends on there being rain within the next eight or ten days. At present the land is generally too hard for ploughing, and unless rain comes it cannot be cultivated.

6. Though I have no doubt there will be some scarcity in the sudder sub-division, yet the scarcity will not be very pressing from the enquiries I made; while in the interior I have no doubt but the stock of rice throughout the district, both in the hands of the zemindars and ryots, is at present very large. There have been very fair crops for the last three years, and people have been holding back their rice with the hope of better prices, so much so that ryots who used formerly, as a matter of course, to take advances from their zemindars in *dhan* have taken none for the last two or three years.

7. In Jehanabad sub-division the sub-divisional officer reports that the prospects of the crops are most gloomy; what outturn there is will be due to irrigation. The excessive rains in the beginning of the year inundated the *amun* where it was first sown and transplanted, and so destroyed the crop: he estimates the outturn for Goghat thana at 6 annas, and for Kanacool and Jehanabad 4 annas.

8. The early cessation of the rains in this sub-division has greatly retarded the cultivation of the cold-weather crops, and the sub-divisional officer is afraid that subsequent rains may injure the crops which are now being sown by means of irrigation. He says that if rain were delayed beyond a week it would be of no service to the *amun* crop.

9. The price of rice has risen within the last ten days in Jehanabad; it has exactly doubled, being Rs. 1-5 a maund ten days ago, and Rs. 2-10 at present. At Serampore it has increased from Rs. 2-4 to Rs. 2-8 a maund, and at head-quarters from Rs. 2-8 to Rs. 3-4.

10. I do not think, however, that any aid will be required even in this sub-division. The store of rice is, as I observed in my 6th paragraph, large. The following is the opinion of the sub-divisional officer, which, from his intimate knowledge of the sub-division, is entitled to the greatest weight:—"This sub-division, as you are well aware, is mostly inhabited by people in poor circumstances, and I am not prepared to say that their condition is prosperous. Almost all the persons in this sub-division follow agriculture, and when the rice crop fails, the people, as a matter of course, suffer. The condition of the aboriginal class of men such as Haris, Bagdis, Doalays, Domes, &c., and that of the higher castes in poor circumstances is of a nature which might arouse anxiety in the mind of a keen observer; but on the whole it appears to me that the sub-division will of itself be able to tide over the emergency without any extraneous aid."

11. I find I have omitted to say that there was a very fair *aus* crop, and this, though only about one-eighth of the *amun* crop of the whole district, will be a great help to the people this year.

12. I send a copy of this letter direct to Government to save time. I had to delay its submission owing to Mr. Collier, from illness, being unable to send me his report before the 1st instant.

No. 436, dated Serampore, the 31st October 1883.

From—F. R. S. COLLIER, ESQ., Sub-divisional officer of Serampore,
To—The Collector of Hooghly.

I HAVE the honour to submit the report called for on the state of the crops in this sub-division.

2. The only crops of any importance now growing are *amun* rice and sugarcane. Potatoes are only just being planted. Hardly any other cold-weather crops have been sown yet, except a little *kalay*. The other cold-weather crops in this sub-division are not of much importance, and may be left out of consideration altogether. Their prospects will depend to some extent upon the amount of rain which falls in the cold weather. Unless

an unusually large amount of rain falls, they will certainly be short. However, they are not of much consequence one way or the other.

3. The circumstances of this sub-division, with reference to its crops, are somewhat peculiar. The soil of a large portion of it is exceptionally well adapted for the cultivation of sugarcane, potatoes, and plantains, while its proximity to Calcutta ensures a good market being available for these productions. The principal crops are therefore *amun* and *aus* rice, sugarcane, jute, potatoes, and plantains. I have placed them in the order of their relative importance. It will be as well perhaps to give some particulars with regard to the outturn of these crops, as you will then be in a better position to judge of the amount of distress which the comparative failure of the *amun* crop is likely to cause.

4. The *aus* crop was on the whole a good one, and may be put down as a 14-anna crop. The jute crop was also a good one, at least 14 annas—and the prices of jute have ruled unusually high. The plantain crop is not one which varies much as a rule, and it has been quite up to the average. In most districts it would be absurd to mention it as one of the important crops. You are well aware, however, how important it is here.

5. Until now therefore the ryots have had nothing to complain of. They have had a more than average *aus* crop and a good jute crop. They have also, I may add, been exceptionally fortunate in having excellent crops of almost every kind during the last two years. The *amun* crop now on the ground must, as you are already aware, be a very short one. It is much better in some parts of the sub-division than in others. There is no doubt, however, that on the whole the outturn must fall considerably below the average. I think that from my own personal inspections of the crops I shall be able to give a fairly correct estimate of the outturn for each thana, and also for the whole sub-division.

6. Besides seeing a large amount of the crops in each thana personally I wrote (on receipt of the orders of Government calling for the report) to the principal zemindars in the sub-division asking them for reports on the subject. I also deputed the canoongoe to make a tour all round the sub-division, and to submit a report on the prospects of the crops. The divisional police inspector who was on tour was also requested to submit a similar report.

7. The only zemindar who has submitted his report in time is Baboo Peary Mohun Mookerjee. He takes a somewhat gloomy view of things. With regard to the *amun* crop he says:—"We shall have barely a 4-anna crop. The crops on the low lands only will be preserved. There is no more hope for those on the high lands. Very great distress is apprehended." With regard to the sugarcane crop he says:—"I apprehend that we shall get barely an 8-anna of this paying crop. The loss to the ryots will be heavy, as the costs of cultivation have been mostly already incurred."

8. Baboo Prosanno Kumar Chukervarti, the sub-divisional canoongoe, is not much more hopeful. He estimates the outturn in Chanditolla at four annas, in Kristonagur at ten annas, in Harripal at four annas, and in Singoor and Serampore at two or three annas. He states that in his opinion "it may probably be feared that, owing to the shortness and early cessation of the rains, there will be a general scarcity throughout this sub-division, or of worse evils in some parts of it." I do not agree either with his estimates or with the conclusions which he draws from them. His estimate of the crop in Chanditolla is absurdly low, while that for Kristonagur is too high. The only one which is nearly correct is that for Harripal.

9. Baboo Ishur Chunder Chatterjee, the sub-divisional inspector of police, says:—"I have travelled through almost every part of the sub-division and found that the crops have suffered everywhere very badly from drought. Heavy rain is wanted throughout. The average outturn of paddy crop can hardly be expected to exceed four annas." He also remarks as follows:—"The agricultural population have become disheartened and melancholy. The expected appearance of famine is the common topic now. The gradual rising of the price of rice is looked upon as an unfavourable omen. The people in general have become greatly terrified, so much so that those who have means are gathering rice from this time. The precautionary steps on the part of the better-off class to save their families from starvation at the time of scarcity have increased the prices of rice considerably."

10. The inspector thinks the crops bad everywhere, except in Chanditolla. He does not think that there will be more than a 4-anna crop even in Kristonagur, which is certainly better off than the other remaining thanas. He appears to anticipate a great rise in prices, considerable distress, and even something like a famine. I cannot myself at present see any valid grounds for such gloomy forebodings.

11. Up to the middle of August the state and prospects of the *amun* crop were good. There had been the usual complaints of too little water at one time and too much at another. The plants were not planted until late in many places owing to want of water. In others they suffered from floods owing to the heavy rain which fell at the end of July. But when I was out in camp towards the end of August, and rode nearly all over the sub-division, I noticed that all the crops were looking well everywhere. On the 22nd August I rode through Sheakala to Deorhata with the District Superintendent, thus seeing the crops of some 20 miles of country. I noticed in my diary that "the crops of every kind are looking well, though some of the rice, both *aus* and *amun*, on the higher lands requires rain. On the 23rd we rode to Kristonagur and back, and I find the remark recorded." The crops of all kinds in the Kristonagur thana appear to be good. There is, however, very little moisture in all the paddy-fields which are at all high, and more rain will soon be required. On the 24th we rode to Campadanga, and I find the following remarks recorded:—"The crops about here (that is Campadanga) are said to be generally good. The *amun* was planted out

very late in many places, and is therefore backward. A bumper crop is not expected in any case. *Aus* is in ear and will be a good crop. Jute is very good, and sugarcane is doing very well." The crops in Harripal and Singoor, which thanas we rode through on our return to Serampore, were then very good.

12. From this time until now but little rain has fallen, and the crops have in consequence steadily got worse except in the beels. During the month of September the rainfall in the sub-division was as follows :—

Serampere	...	...	...	...	3·1
Chanditolla	...	...	...	...	4·25
Harripal	...	...	...	...	2·20
Kristonagur	...	...	...	...	2·32

13. The average rainfall in the sub-division for the month in question was only 2·94 inches.

14. During the month of October the following rain was recorded :—

Serampore	...	...	...	...	·14
Chanditolla	...	...	...	...	·10
Harripal	...	...	...	...	·0
Kistonagur	...	...	...	...	2·15

15. It appears therefore that in the greater portion of the sub-division only about three inches of rain fell during the months of September and October.

16. I shall now give some account of my inspections of the crops of the sub-division during the present month and of the estimates of the outturn which I have made.

17. On the 5th October I drove out to Bydobati and rode from there to Singoor *vid* Durgarampore and Telipokur, returning by the direct road—the Tarkessur road. I find the following notes in my diary :—"The country between Durgarampur and Singoor is very dry. Some of the villagers with whom I conversed stated that the *amun* crop on the high lands was as good as last. I am afraid that it is, as although it has hardly suffered as yet, there is very little moisture in the field; and they are rapidly drying up under a hot sun. Unless rain falls this month, which does not appear likely, I am afraid that all the rice, except upon the dowpright low lands, will perish. The land seems as dry as it was last cold-weather. I saw some ploughs turning up soil which looked like dry dust."

18. On the 8th I rode out to Boray and back. On the 9th I rode out to Janay *vid* Dankuni and Gobra, and from there to Boray by a cross road. "The ryots at all the villages I passed through said that the *amun* crop had perished altogether. This of course is a great exaggeration; but as regards the high lands I am afraid that it only anticipates the result which must happen unless we still get rain. At Jaykristopur some ryots with whom I conversed ascribed the failure of their crops to the Dankuni drainage scheme. They said that they would have had plenty of water if it had not been for the drainage, and remarked that it was very hard that they should be heavily taxed, distrained upon, and in many cases utterly ruined for a scheme which did their village more harm than good. I am inclined to think that there is a good deal to be said on their side of the question."

19. On the 12th I went by rail to Chandernagore and rode from there to Bhola on the Tarkessur road—a distance of about twelve miles—returning through Singoor to Serampore, about twelve miles further. "The rice is turning yellow on all the high lands, and leaves are getting brown at the tip. The fields are as hard and dry as in March. Unless rain falls soon the greater portion of the crop must go."

20. On the 14th I went out to the Government khas mehal at Belkuli, but there is not much rice in that direction.

21. On the 15th I rode out to Boray, and from there by a cross road to Nasibpur on the Singoor road. "The rice crop except in the beels is looking very yellow and stunted, and in many places is beyond help."

22. On the 20th I accompanied you to Bhola and Gopalpore, and you saw the state of the crops of a large tract of country. On the 23rd we went through the Singoor and Harripal thanas to Deorhatta, and disposed of several questions with regard to irrigation from the Kana Damudar. During the rest of the week I was only able to make short journeys in the neighbourhood of Serampore owing to press of work at head-quarters consequent upon the reopening of the courts. On the 28th, however (Sunday), I was able to make a long journey, and to see the state of the crops over some 35 miles of country.

23. Starting at 6 A. M. I drove out to Borah. From there I rode on to Sheakala. The crop between Serampore and Borah are fairly good, the rice land is all part of the Dankuni beel. Beyond Borah they are not so good; but towards Sheakala they are extremely bad. Round about the village of Bonomalipur in Sheakala the *dhan* is an almost entire failure. Throughout the Sheakala outpost the crops are bad. The outturn cannot possibly be more than a 4-anna one. After calling at the Sheakala outpost I rode on by the old Benares road to Chanditolla. Between Sheakala and Masat the crops are very bad—not more than four annas. After Masat, however, they improve very much, and in the large beels on both sides of the road are very fine. South of the old Benares road they are particularly good."

24. "From Chanditolla I drove to Uttarparah. There are some good crops in some of the beels within view of the road. On the high lands, however, the crops are dried up I was much struck by the enormous amount of sugarcane on this road. Some of it is suffering for want of water. From Uttarparah I drove back to Serampore, returning at 2 P.M." Altogether there can be no doubt that the crops in the south and south-west of Chanditolla are fully equal to the average. Notwithstanding therefore that there is only a 4-anna crop in the north of the thana, I should estimate the outturn of the whole thana at about nine annas.

25. I have not been able to see much of the Kristonagur thana. I am quite satisfied, however, that the crops to the south-east of it are on the whole good, while those on both sides of the Kana Damudar have been now almost all well irrigated. Moreover, two inches of rain fell over a considerable portion of the south of this thana on the 13th October, while only light showers fell over the rest of the sub-division. The crop on the high lands, where no rain fell in October, is of course burnt up like everywhere else. On the whole I think that the outturn of this thana may be estimated at very nearly eight annas. Seven annas, I think, may safely be reckoned on.

26. The Harripal and Singoor thanas are much the same. There are no very large beels in them, and there are no really fine crops anywhere. On the high lands the rice is quite burnt up. Even on the low lands the crop is stunted for want of sufficient moisture. Some of the crops in both thanas have been saved by irrigation from the Kana Nadi and Kana Damudar. In fact if it had not been for the water supplied by the Irrigation Department through these thanas there would have been an almost entire failure of the crops in these thanas with very few exceptions what has been saved by irrigation.

27. Taking into consideration how stunted the rice is in these thanas, where it has course to anything at all, and remembering that quite a third of it will not come into ear, I do not think that the local estimate of a 4-anna outturn is much too low. It is probably somewhat too low. I think that there will be at least a 5-anna crop. I do not think that there will be a 6-anna one. We cannot, I think, rely upon having more than a 5-anna crop in these two thanas.

28. The rice in the Serampore thana hardly calls for comment, as the extent of it is so small. The thana consists almost entirely of municipalities.

29. The following shews the above estimates in a tabular form :—

Thana.	Area in square miles.	Estimated outturn.
Chanditolla	72	Nine annas.
Singoor	71	Five ,,
Harripal	115	,, ,,
Kristonagur	63	Seven ,,

30. If we calculate the average outturn per square mile for the whole sub-division from this we shall find that it comes to 6·29 (nearly); we may say therefore that the outturn for the whole sub-division will be a 6-anna one.

31. The sugarcane crop is, as already remarked, an important one in this sub-division. In a special report submitted with regard to it this year, I estimated its average area at 8,000 standard acres, and its value as varying from Rs. 288 to Rs. 540 per acre. The average value per acre may therefore be taken as midway between these two extremes, or, say, at Rs. 414 per acre. The total value therefore amounts to Rs. 33,12,000, or to just over thirty-three lakhs of rupees. This crop has not as yet generally suffered to any very considerable extent from want of water, though it is beginning to do so in places where irrigation is not practicable. The crop is so valuable that the ryots are willing to go to almost any trouble to irrigate it. The water which has been sent down the Kana Damudar and Kana Nadi has been invaluable for this purpose.

32. Taking twelve annas as an ordinary crop, a ten-anna sugarcane crop is the utmost that can be expected. In places where there is absolutely no water available for irrigation, the crop must be a comparative failure.

33. Potatoes constitute a very valuable crop here, and one which requires a good deal of irrigation. The prospects of this crop will very much depend upon whether any rain falls in November or not. It would be premature to discuss them yet.

34. I do not think that it is possible at present to give any definite opinion on the question as to the probability of serious distress resulting from the comparative failure of the crops. The question turns very much upon the result of the crops throughout the country generally, and the consequent effect upon prices. The matter is one which I shall not lose sight of in my cold-weather tour, which I hope to be able to commence almost at once. At present, however, I do not see any grounds for concluding that there must necessarily be any serious distress, much less scarcity; or that any special action on the part of Government will be necessary.

No. 262T, dated Camp Midnapore, the 12th November 1883.

From—JOHN BEAMES, Esq., Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of my No. 73T, dated 24th October, I have the honour to submit further report on the prospects of the harvest in this division.

2. The Collector of Hooghly has submitted his report direct to Government for some reason, and I need therefore only say that I do not anticipate any serious scarcity in that district. The Hooghly ryot does not depend entirely on his rice crop; potatoes, sugarcane, and garden produce for the Calcutta market are so very largely grown that, as I remarked in my last letter, a failure in the rice crop does not entail such hardship as it would elsewhere. The same remarks applies to the sudder sub-division of Howrah, where there will be some loss of crops; in the Ooloberiah sub-division further south the crops seem to be in fair condition.

3. There are undoubtedly considerable stocks of grain in various parts of the Hooghly and Howrah districts, even in the hands of cultivators, and I am disposed therefore to think that even if there should be some shortness of crops, the people will be able to tide over the year without help from Government.

4. As regards Burdwan, I regret that I am still without official information. The Collector, however, reports demi-officially that he is making enquiries in all directions, and at present estimates that there will be from a 4-anna to 6-anna crop all round. In Raneegunge there has been very considerable loss. The Eden Canal in the south of the districts has been of very great service, irrigating 100,000 bighas of land, the crops on which would otherwise have been lost. Mr. Larminie thinks there will be some pressure on the poorer classes, but that no special measures on the part of Government will be needed.

5. My information from Beerbhoom is not as full as I could wish. The Collector is, however, now making a tour round the worst parts, and I hope for fuller details shortly. As far as I can see at present, I think Beerbhoom will have from a 4-anna to an 8-anna crop of *amun;* while the *aus* has been up to the usual average.

6. I have been over a considerable tract of country in Midnapore, and have received verbal reports from several of the officers in charge of the canal and wards' estates in the interior. There will be a deficient crop in some parts; while in others it will, thanks to irrigation, be an average one. The low-lying deltaic portions of this district, which, in years of ordinary rainfall, are liable to suffer from floods and accumulation of rainwater inside the intricate network of embankments with which the country is intersected in all directions, will, it is hoped, have a very fair outturn this year.

7. My general impression, up to date, is that the division will not require any general measures of relief, though, perhaps, some slight assistance may be necessary here and there.

No. 17M.—A., dated Calcutta, the 13th November 1883.

From—J. MONRO, Esq., Commissioner of the Presidency Division,
To—The Secretary to the Govt. of Bengal, Revenue Department.

WITH reference to your circular No. 9T.—R., of date the 23rd ultimo, I have the honour to submit the report therein called for, regarding the state and prospect of the crops in this division.

2. The report is not so full as might have been had I waited a little longer before submitting it. I am, however, shortly going on leave, and I thought it right to dispose of the matter myself rather than to leave it to my successor, who naturally could have acquired little or no experience of the circumstances of the districts of the division before the end of this month.

3. I am also glad to be able to submit a general rather than a detailed report, inasmuch as while there will be in some districts scarcity and pinching, there will not, so far as I can perceive, be any pressure, as regards food, amounting to famine.

4. The detailed reports of Collectors which have been furnished are sent herewith. I abstract the contents of each.

5. 24-*Pergunnahs*.—Agricultural prospects unfavourable. On the whole at least one-half of an average crop expected. Stocks of rice not ascertained with any degree of certainty. Prices expected to rise to Rs. 4 and in some cases Rs. 5 per maund.

6. *Moorshedabad*.—The *aous* crop was on the whole a good one, and in no places is the *amun* a complete failure. About a third of an average crop will be realized. High prices expected, but no apprehension of famine entertained. Stocks large and subject to replenishment by facilities of importation.

7. *Khoolna*.—The prospects of this district are not bad. The crops now coming on, the stock of food in hand, and the means of communication are sufficient for the requirements of the district.

8. *Jessore*.—About half an average crop may be expected. Sufficient food in hand for six months if supplemented by growth of new rice and importation. Prices expected to rise to Rs. 4 per maund.

9. *Nuddea*.—Prospects in Chooadanga sub-division, Teyhatta and Gangni in Meherpore, and Kaligunge in sudder, bad. On the whole the Collector thinks that amongst the labouring classes there will be unavoidable pinching, most of them already in Teyhatta living upon one meal a day. In the places above mentioned the *aous* crop did not amount to more than 8 to 10 annas, and the *amun* crop is not expected to reach more than two annas. The Subdivisional Officer of Chooadanga indeed reports that only one anna will be harvested.

10. From the above it will be seen that on the whole the districts of the division may expect to pull through with scarcity of food and pinching on the part chiefly of the labouring classes. In Nuddea, certain areas have been very prejudicially affected by the cessation of the rain, and a fuller report will be submitted with reference to them when further details are ascertained.

11. Meanwhile all that is required on the part of officers is to watch carefully the condition of their district, and collect information quietly as to stocks, imports and exports, prices, water-supply, &c., &c. I shall take steps to have a bi-monthly special report submitted from all districts, and, if any information of importance is received, shall communicate with Government.

No. 687G., dated Alipore, the 12th November 1883.

From—C. C. Stevens, Esq., Collector of 24-Pergunnahs,
To—The Commissioner of the Presidency Division.

With reference to Government Circular No. 9, dated 23rd October last, received with your endorsement No. 20M.—A. of the 27th idem, calling for a report in respect of the crops in this district, I have the honour to submit the following statement.

2. The head-quarter sub-division consists of the police stations Barripore, Tallygunge, Sonapore, Bistoopore, Achipore, Bhangore, Canning, Burranagore, Joynagore. The District Superintendent of Police, agreeably to my requisition, reports that in none of the tracts under these thanas is much *bhadoi*, or early paddy, grown, but what little of this crop was raised here gave a good yield. With regard to the late rice crop, he fears that, within the jurisdiction of the Tallygunge, Sonapore, Bhangore, Burranagore, Joynagore, and Barripore thanas, the outturn will not on the whole be more than one-half of an average crop, while in Bistoopore the prospect is somewhat better, the yield being estimated at ten annas. In the Achipore thana he expects only a six annas crop. In Canning the high lands, it is said, will scarcely produce "anything," but the crop on low lands "still promises a fair outturn" But little *rubee* is cultivated in these parts, and that little has been injuriously affected by the early cessation of rain. As to the amount of grain stocks in hand, the police have given no information beyond noticing that now it "is no way shorter than that of the last year at this period." The price of ordinary rice has already gone up from Rs. 2-8 to Rs. 3 per maund, and it is apprehended would rise still higher to Rs. 4 or even Rs. 5.

3. In the sub-division of Diamond Harbour, the officer in charge, in responding to the Government call, states that "in no part of the sub-division there will be anything like total failure of crops." He adds that tracts which have suffered much for want of moisture are places under the thanas Bankipore and Kulpi, which constitute about one-fifth of the entire area of his sub-division; but even in these parts he estimates the yield at about one-half of an average crop, and considering that the lands in most places of the sub-division are low, and that there are numerous khals and creeks to supply the fields with water, the people hope to

secure a full ten-anna crop. Nothing has been said by the Deputy Collector about the grain stock, the state of the *rubbee* crop and of the yield of the last *bhadoi* crop, as well as of the expected rise in the price of food-grains. As to the early paddy, I can, however, say, without any reference to him, that there is little or no cultivation of it in the sub-division.

4. In the Baraset sub-division the *aus* is always more extensively cultivated than in other parts of the district, and forms one-fourth of its entire rice crop. The outturn of the past season was fully up to the average. The prospects of the late rice are very unfavourable. On the high lands not more than from two to four annas can be hoped for, while in the bheel, or low-lying lands, the yield is estimated at eight annas, provided there be some rain within a few days; otherwise the Sub-divisional Officer fears it would dwindle down to a four-anna crop. As regards the *rubbee*, the outlook is equally bad. The short time that was allowed for the present enquiry has not enabled the Sub-divisional Officer to ascertain the amount of food-grain in hand. But he gives a table showing the prices of food-grains—

Food-grain.	Present price per rupee. Seers.	Price in Pous per rupee. Seers.	Price in rainy season per rupee. Seers.
Coarse rice	14	12	10
Good ,, ...	10	10	8
Moog	9	10	8
Khesari	16	16	12
Musuri	16	16	12
Kalai	16	16	12
Matar	16	16	12
Gram	16	15	12
Atta	9	8	6
Mustard	8-8	7	6

5. The next sub-division in importance is Busirhat, where the last *aus* crop is reported to have been three-fourths of the usual average, and the *amun* now on the ground is estimated to yield eight annas. No information as regards the amount of grain stock in hand has as yet been given; but, in the Sub-divisional Officer's opinion, "it may be sufficient for the local consumption under the existing state of things." His report is also silent about the *rubbee* crop, which, it is superfluous to say, cannot be good. In this sub-division ordinary rice is selling at Rs. 2-8 per maund, and there is no doubt that the price will considerably rise as the season advances.

6. With regard to the Barrackpore sub-division, Major Hopkinson reports that the *bhadoi* crop was "very bad indeed," and thinks that there may be a yield of eight annas of the late rice on low lands, but from "the high lands no outturn at all can be looked for." The prospect of the *rubbee* crop generally is also said to be "very bad." The Cantonment Magistrate estimates the grain stock in hand to be only 4,500 maunds. This is certainly very far below the truth, and moreover the grain merchants of Barrackpore being so near, as they are to Calcutta, often draw supplies thence. In Major Hopkinson's opinion, the price of rice may rise to Rs. 4 or Rs. 5 per maund in the coming year.

7. Major Creak, the Cantonment Magistrate of Dum-Dum, does not except more than six annas of the usual yield of *amun* in his sub-division, and fears the price of rice will rise up to Rs. 4-8 or Rs. 5 per maund. The *bhadoi* crop is stated to have been poor for want of rain, and the *rubbee* sowings for the same reason to have been entirely stopped. He estimates the grain in hand at 14,000 maunds.

8. It will thus be seen that the agricultural prospects of the district are not favourable. Yet, as matters now stand, I am justified in believing from existing data that there will be on the whole at least one-half of an average crop. The time allowed for the preparation of this report has been quite insufficient for ascertaining any details of the stocks of rice in hand, but the general impression seems to be that these stocks are considerable in quantity. One of the first symptoms of distress is a fall in the price of labour, but up to the present time nothing of this has been observable. It is probable that the Exhibition will have a material influence in keeping wages up. Altogether it does not at present seem likely that there will be any serious general distress in this district, although I fear that the poorer members of the upper and middle classes of society may suffer much inconvenience from high prices. Even in prosperous times many people of this sort obtain little more than a bare subsistence, and my experience is that, when the times become hard, they are among the first to feel the stress.

9. This report has necessarily been brief, as the Sub-divisional Officers and the police have not had sufficient time to make a more detailed enquiry; but further reports have been promised, and as soon as they come in, I shall lose no time in furnishing you with further information.

No. 1859G., dated Kishnaghur, the 9th November 1883.

From—W. V. G. TAYLOR, ESQ., Collector of Nuddea,
To—The Commissioner of the Presidency Division.

WITH reference to your No. 20M—A, dated the 27th ultimo, forwarding the Government Circular No. 9T.—R., dated the 23rd October 1883, I have the honour to report that the prospects of the district as regards the late paddy and winter crops, excepting only in the sub-division of Kushtea, are anything but favourable.

2. In Kushtea the lands are low, and there are several large rivers. Sugarcane, *teel*, *arahur*, turmeric, millet and jute have done well, and the price of the last-named has risen from 12 annas and 1 rupee last year to Rs. 2-8 and Rs. 3 this year. The winter crops, too, are all promising, and 10 annas *aus* and 12 annas *amun* crop is reported to have been harvested.

3. Throughout the remainder of the district the *aus* crop ranges from 8 annas in the Chooadanga sub-division and stations Gangni and Teyhatta in Meherpore to 10 annas, and in some parts of Ranaghat and sudder to even 12 annas. The *amun* has been destroyed on all high lands, and has been seriously injured even in the low, and not more than a two-anna crop is expected. Indeed the Deputy Magistrate of Chooadanga reports that not more than one-anna will be harvested in his sub-division.

4. The winter crops have every where been a failure, with the exception of *arahur* and *teel*. The latter, it is said, will be destroyed by insects unless we have rain, of which, however, I see but little prospect.

5. The portions of this district which have suffered most are the sub-division of Chooadanga, stations Gangni and Teyhatta in Meherpore, and Kaligunge in the sudder.

6. The time allowed for the submission of this report was too short to enable me to discover the actual amount of grain in stock within the district. I have, however, issued orders to my subordinates to obtain full and reliable information on this subject, and a further report will be submitted by me hereafter.

7. Considering however, that on the whole about 10 annas of the *aus* crop has been harvested, we may safely say that the stock will suffice for several months. It is reported, however, that the greater portion has found its way into the hands of the mahajans, who, in view of the certain very high rise in prices, are unwilling to part with any of it at present.

8. The price of rice has already risen to about 50 per cent., and there is every likelihood of higher prices being obtained shortly, more especially if the state of crops in neighbouring districts from which importations are received is as bad as is generally reported.

9. The classes who will suffer the most are the labourers, among whom, I fear, there will be considerable pinching. Indeed it is reported from Teyhatta station that most of them are now living on only one meal per diem.

10. I have issued instructions to the Joint-Magistrate of the sudder, who is in camp, and to all Sub-divisional Officers, to make personal enquiries, and periodically to submit reports with regard to the stock in hand and the condition of the people in general, and to test reports submitted by the police.

No. 1280G., dated Jessore, the 8th November 1883.

From—E. J. Barton, Esq., Collector of Jessore,
To—The Commissioner of the Presidency Division.

With reference to your memorandum No 20 Met., dated the 27th October last, forwarding a copy of the Government circular No. 9T.R., dated the 23rd idem, calling for a report on the state and prospects of the crops in this district, I have the honour to submit the following report.

2. I calculate that the rains virtually stopped in Jessore about the 8th of August What we had after that was small and did little good.

3. In the latter part of October, rain was expected, as the sky then appeared to be dark and cloudy; but the expectation was not realized, and there has been no rain up to date. The north-east monsoon has commenced and the cold weather set in, so there is hadly any expectation of our getting rain soon. Want of rain has injured the grown-up *amun* paddy, and retarded the sowing as well as the growth of the *rubbee* or winter crops. The *amun*, which is the principal paddy crop in this district, was partly sown and partly transplanted; and although there was a scanty fall of rain in the first instance, the occasional showers we had from time to time proved conducive to the growth of the crop. But it is to be regretted that when this crop was almost in ear, the early cessation of rain caused great damage to it. The rain ceased in August. The *amun* on high lands withered and was to a large extent used as fodder for cattle. The *amun* on low lands also partially suffered from want of rain, but was saved from the great injury done to the *amun* on high lands. A fair outturn of *amun* grown on low lands is expected. Taking the present state of both the *amun* on high and low lands into consideration, the general or average outturn is estimated at about eight annas

4. The last *aus* or *bhadoi* crop, which had the benefit of the early rain, yielded a fair harvest. The *aus* on high lands did not, owing to the scanty fall of rain, yield a good harvest; but this partial failure was to some degree compensated by the good harvest which the people reaped from the *aus* that grew on those low lands which escaped the injuries usually caused by high inundation. It is to be remembered that in this district the area of the land on which *aus* grows is much smaller than that on which *amun* grows. The proportion is estimated at 4 and 12 annas respectively. It is therefore evident that the *aus*, which yielded a fair harvest, cannot be expected to make up the deficiency likely to result from the failure of the *amun*, more especially as the people could not reap a bumper harvest of *aus*. This, as well as the fact of the great injury that has been caused to the *amun* crop in consequence of want of rain and absence of inundation, has created some alarm among the people, who apprehend, if not a famine, a great increase in the price of food.

5. No hope of a good or even a fair outturn of the *rubbee* crops can now be entertained. Those that were sown early could not thrive. In some places the lands were ploughed and ready for the seed; but there was no moisture in the soil, and the sowing could not proceed. It is premature now to say what the outturn of this crop will be. If there be rain soon, a fair outturn on the whole may be expected. A kind of winter crop called *Gusi*, grown in the Magoora sub-division, is reported to have been injured by an insect called "*jab poka.*"

6. With regard to the enquiry ordered in the Government circular, as to the amount of grain stocks in hand in the district, I beg to submit that it is difficult to give correct figures, which would require an elaborate enquiry, involving much more time than is allowed in the present case. The stock in hand may, on a rough calculation, meet the demand for about six months; but it is probably not sufficient to meet the requirements of the people till the next *aus* is harvested. In my opinion, if the stock which is already in hand is supplemented locally by the growth of new rice and by imports from elsewhere, there need be no apprehension of distress. This district is not, strictly speaking, a rice-exporting one; yet a portion of its harvest is usually sent to Nuddea, while, on the other hand, it receives a supply of *balam*, or good rice, from the districts of Backergunge and Khoolna. Now, if the rice is not exported from this district elsewhere to a large extent, and if it receives a moderate supply from Backergunge and Khoolna, there is no apprehension of famine, though I am afraid prices will increase greatly.

7. With regard to the price of range of food-grains in the coming year, I beg to say that as rice and other food-stuffs are getting daily dearer, there is every reason to believe there will be a considerable increase in prices as the year advances. Rice is now selling at Rs. 2-8 to Rs. 3-4 per maund. It may rise up to Rs. 4, but this cannot be said with any degree of certainty, as it chiefly depends on the amount of exportation from, and importation into, the district.

8. I am afraid there may be in the next hot weather distress from want of water in some places, because the rivers and tanks are low, and khals, water-courses and village ponds are almost dry.

No. 1761G., dated Berhampore, the 7th November 1883.

From—F. H. B. SKRINE, ESQ., Officiating Collector of Moorshedabad,
To—The Commissioner of the Presidency Division.

I HAVE the honour to submit the report called for by Government circular No. 9T.R., dated the 23rd ultimo, received with your memorandum No. 20M.A. of the 27th idem, on the state and prospects of the crops of this district, as affected by the early cessation of the autumnal rains.

2. Under demi-official instructions from yourself, I had, as far back as the 18th ultimo, requested the Sub-divisional Officers and the police to furnish replies to questions on the same lines as those raised by the Government circular above quoted. I am therefore in a position to afford tolerably accurate information as regards the larger portion of the district.

3. *Physical aspect of the district as affecting crops.*—Moorshedabad is divided into two unequal parts by the river Bhagirathi. The larger portion on the west or right bank of the river is locally known as the "*Rarh*" or mainland, and is principally an *amun*, or late rice-raising tract, producing but little *aus*, and less of the crops known as "cold-weather." Indeed the proportion of land under *amun* to the whole area is not less than seven-eighths, the remainder being devoted to *aus* rice and the cold-weather crops.

4. The tract on the left or east bank of the Bhagirathi is locally known as "*Baghri*" or "*Banga*" (Bengal Proper). It is mainly an *aus* or early rice district; the proportion of the latter crop to *amun* being not less than three-fourths. The proportion would indeed be larger but for the existence on this side of an extensive marshy tract known as the "*Kalantar*," and devoted exclusively to *amun* cultivation.

5. As the portion to the west of the Bhagirathi is the larger of the two, I would estimate that, taking the district as a whole, the proportion of *amun* to *aus* is as 5 is to 3.

6. It is universally admitted that the *aus* crop has been a fair average one. In some parts, indeed, it is reported to be a "bumper." On the whole, we may safely estimate it at a 12-anna crop all round, 16-annas standing for a bumper harvest.

7. *The amun rice crop.*—The accounts of the *amun* or late rice, as might be expected, over an area so large and with such diversified material condition, vary considerably in character. As it is a crop for which moisture is absolutely essential, it is necessary to supplement any deficiency of rainfall by irrigation, and in this view energetic efforts were made last month to induce recourse to irrigation. Leave was freely given to ryots to cut through embanked roads for such purposes. Stringent orders were issued to landholders to allow recourse to tanks, and the Sub-divisional Officers and the police were directed to use their utmost efforts to induce the people to irrigate. Immense labour has consequently been devoted by the cultivators to this work, and their efforts have been, in the majority of cases, crowned with success.

8. The Sub-divisional Officer of Kandi writes: "The injury was much averted by irrigation, and except on lands remote from tanks or khals, the *amun* in all other lands throughout the sub-division promises well;" and again, "the outlook is much improved since irrigation was had recourse to." The Sub-divisional Officer of Lalbag informs me that "wherever there is any water 200 or 300 yards off, the people have by great labour dug

trenches to the fields, and have scoped out the water into these trenches, and from one level to another until it reaches the field." I have myself observed the extended recourse to irrigation in the sudder sub-division, and my experience is confirmed by police reports and the numerous petitions daily presented for my influence with zemindars to induce them to allow irrigation from their tanks.

9. It is only on the north of the district, where the people are always in great straits for drinking-water, that irrigation has not been largely practised, and the *amun* will probably be a failure.

10. *Estimated outturn of "amun"* rice.—Generally the *amun* rice may be fairly expected to afford a third of the average crop, the range being from a half crop in the Kandi sub-division to a sixth in Jungipore. In the "*Kalantar*," which, as remarked above (paragraph 4), is a tract of exceptional physical features, the crop is by no means so backward as one would suppose. In the *bheels*, or marshes, it promises splendidly; on the higher lying lands it partakes of the general failure, the result of the drought. I would estimate the *amun* in this tract as rather less than half an average one.

11. *Cold-weather crops.*—The *amun dhan* brooks no rival, and cold-weather crops are only extensively grown in tracts suitable for the early variety of rice. Generally speaking, they have perished beyond recall in the heavy loams (*matyal*), while in the sandy loams (*rashi*) they are looking very much better than one would expect.

12. *October indigo.*—The October indigo is one of the most important, and regarding this crop I feel bound to modify a statement made in my weather and crop report of the third current, and which was based on imperfect information. I now learn on trustworthy authority that where recourse has been had to deep cultivation, in accordance with the modern system, the October plant is looking remarkably well. Indigo, as you are aware, has an enormous tap-root, which if the soil be well loosened, can penetrate to depths comparatively unaffected by the drought, and still retaining a certain degree of moisture.

13. *Sugarcane.*—Sugarcane is not largely grown here, and this is to be the more regretted as the crop is most promising at the present season. Mulberry is fair average crop, having been largely irrigated.

14. *Cereals.*—The other cold-weather crops may be classed as (*a*) cereals, (*b*) oil-seeds, (*c*) pulses. The cereals, comprising wheat and barley, where sown at all, have only just sprouted, and it is impossible to afford an approximate forecast of their outturn. They are suffering to some extent from the attacks of insects; but these would disappear with a rainfall; and generally it may be said that rain between this and February would prevent a total failure, and that, if it fell within the next fortnight, a fair crop might still be expected.

15. *Pulses.*—Pulses comprise *arhar*, *kalai*, peas and gram; but the first two only are sufficiently advanced to admit of a forecast as to their outturn. *Arhar* has an enormous tap-root and is really independent of the autumnal rain. It will retain a three-quarter average crop, as well as *kalai*, which is generally grown with indigo on low lying and alluvial lands. Peas and gram are barely above the ground, and the remarks made regarding cereals apply here.

16. *Oil-seed.*—Oil-seed comprising linseed [teel and sunflowers (*sakurguji*)] will retain about two-thirds of an average crop.

17. Speaking generally of the cold-weather crops, they are most largely cultivated in the eastern portion of the *district*, generally after the early rice, but occasionally alone. Their prospects depend in a great measure on the rainfall. Should the drought continue till the end of January, when the harvest begins, the outturn all round will not exceed one-third of an average, and may be even less. Heavy rain within a fortnight would result in a three-quarter crop.

18. *Stock of rice.*—The question of stocks is a delicate one to handle. My experience in two famines has warned me of the danger of inquisitorial proceedings as regards this point, as I have known such to culminate in an absolute panic on the part of holders. Government officers should maintain a calm and confident attitude in crisis such as this and should remember that their demeanour is narrowly watched, and exercises a certain influence over the public. From all I can learn, there is not the slightest reason to anticipate any universal depletion of stocks.

19. *Prices.*—Last year, and still more so its predecessor, were years of plenty, and there is an abundant store of old rice in the mahajans' and wealthy agaleultrists' graneries. The holders are, however, discounting the continuance of the drought, and are "holding up;" thence the sudden rise in prices, which indeed is quite abnormal, and was not justified by circumstances.

20. The larger towns have been the heaviest sufferers, as stocks are always low at such places at a time when the new *amun* comes into the market; hence the enormous rise (from 21 seers to 12 seers 14 chittacks per rupee) in the price of coarse rice at Berhampore and Moorshedabad that marked the close of last month. Immense importations have since been made from Cutwa and Rajshahye and Maldah, and an equilibrium between supply and demand has been re-established.

21. *Forecast as to the range of prices.*—It is not very difficult to afford a forecast as to the range of prices during the next few months. Generally speaking, the tendency will be upwards. The present average is 14 seers per rupee. I am inclined to think that each succeeding month will show a progressive increase until February, when the average price of coarse rice may be expected to be as high as 10 seers per rupee. It will, of course, be

understood that this estimate is subject to considerable modification should rain fall during the current month, which would swell out the grain of rice now forming, and add perhaps 25 to the outturn, besides greatly benefiting the cold-weather crops. In such a case prices would fall to perhaps 17 seers.

22. In February the cold-weather crops came into the market, and are extensively bartered against rice from the "rash." Should no rain intervene, these crops will be almost total failures, and the price of rice will undergo a further rise. If heavy rain falls between this and the end of the year, the cold-weather crops will (as remarked above) give a "fair return," and will bring a large amount of rice into the market, when prices will naturally fall to perhaps 18 seers, or even lower.

23. As to prospects generally, the outlook is by no means such as to cause any serious apprehension of a famine or scarcity approaching the famine limit. Last year, and more especially its predecessor, were years of splendid harvests, causing proportional rise in the resources, and consequently the purchasing power of the cultivating class.

The district is well provided with road and river communication, and is fairly well served by the railway. The *aus* crop has been rather above than under the average, while the *amun* will nowhere be a complete failure. Thus, while we may expect high prices, pressure on the labouring class, and a consequent increase in crime, any apprehension of a famine, as far as this district is concerned, may fairly be scouted.

24. A much more serious result of the drought is to be looked for in the shape of a failure of the water-supply during next hot-weather. The south of the district is fairly well supplied with tanks; but the north and portion of the centre are miserably provided in ordinary times, and the effect of any marked failure in the rainfall is absolutely disastrous in these localities. Epidemics of cholera, small-pox, and virulent types of malarious fever may be expected. Indeed, as I write, I have under consideration a report from the Sub-divisional Officer of Jungipore, to the effect that an outbreak of malarious fever, causing 38 deaths, has occurred in the villages round Lalgola.

25. *Prophylactory measures.*—I have requested Sub-divisional Officers, the police Court of Wards' managers, and tehsildar in charge of khas mehals to report promptly and minutely requirements of each village in respect of an improved water-supply. The Road Cess Committee have resolved to expend all available funds in this direction. I would urge that zemindars and committees of ryots, in cases where the need is very great, be encouraged to take tuccavi loans for the purpose of re-excavating tanks, &c.

26. Finally, I have deputed Baboo Jagat Chandra Roy, Sub-Deputy Collector, to ascertain the condition and requirements of the western half of the head-quarter sub-division, while Baboo Rajendro Nath Banerjee, canoongoe, has a similar mission for the eastern portion, including the "*Kalantar.*"

No. 953G., dated Khoolna, the 8th November 1883.

From—W. CLAY, Esq., Collector of Khoolna,

To—The Commissioner of the Presidency Division.

WITH reference to your No. 20M.A. of the 27th ultimo, I have the honour to state that rain fell continuously, though in small quantities, till the 19th September last, when there was a break of five days. Then there was rain for five days, and after that there has been no rain except a slight drizzle. There appears at this moment no prospects of rain, and if it were to fall, the crops on the ground would not benefit to any extent; but the rain would be useful for the preparation of the ground for winter crops.

2. There is very little *bhadoi* or *aus* crops in this district. The only part where such crops are reported to be grown are in thanas Satkhira and Kalaroa, in the Satkhira sub-division. The outturn there is said to be fair, but I have no details.

3. As regards the *khurreef* (if this means the late rice crop), such part of the rice crop as is grown in high lands is totally lost; but at a rough guess I should suppose this to be six annas only out of sixteen of the whole rice crop of the district.

4. The remainder of the rice crops, which includes almost all the crops grown in the Bagirhat sub-division and three-quarters of the crops of the other two sub-divisions, may be taken to be in a fair condition, likely to yield a ten-anna crop.

5. Of winter crops it is not possible to say much; almost nothing has been sown yet in consequence of the absence of rain, and this crop is not much cultivated in the district, the ground being almost entirely taken up with late rice.

6. I have not got accurate accounts of the grain stocks, but I am informed that there is in the district, including private stocks, sufficient for six months' consumption. There do not appear to be large stores of grain locally stored by mahajuns in any place.

7. As regards prices, I find that the price of common rice has risen in the past month from about 20 seers to 16 seers, and the price is still rising.

8. I may say of this district that the prospects are not bad. The crops now coming on and the stock of food in hand, and the means of communication are sufficient for the purposes of the district.

9. If things appear to grow worse, I shall of course inform you.

No. 419Ct., dated Camp Ramgurh, the 23rd-24th November 1883

From—G. N. BARLOW, Esq., C.S.I., Commissioner of the Bhagulpore Division and Sonthal Pergunnahs,

To—The Secretary to the Government of Bengal, Revenue Department, Famine.

I HAVE the honour to reply to your circular No. 9T—R, dated 23rd October 1883.

2. From the beginning of the month of October, in consequence of the abnormal conditions of the season's rainfall, I had warned all officers to be upon the look out to ascertain and note the state and prospects of the crops. On receipt of your circular, reports were called for, and I asked for information in a tabulated form, which would have disclosed the conditions of each district at a glance. Replies from some districts only have come in to-day, when I commence my report. The statement also has not been understood in some cases. I deal with the case of each district, therefore, separately, and if I can get a correct statement prepared for all districts, it shall follow hereafter.

3. Table A annexed shows the rainfall registered during the year at each head-quarter and sub-division station, compared with the average of the previous three years. The remarkable features of the past season are (1) the variation of the rainfall in adjacent localities, and (2) the general failure of rain in the months of September and October. As regards the first point, the statement shows (as in the case of Banka, Jamui, Godda, and Rajmehal sub-divisions) a marked deficiency of the total fall in certain places. The variation, however, has extended beyond this, and in the same neighbourhood will be found tracts of land, the one yielding a fair outturn, while the crops upon the other have almost entirely failed. As regards the short rainfall in the last two months of the rainy season, there has undoubtedly been a great deficiency, but it is not to be forgotten that the figures shown in statement A, for the purpose of comparison, include the years 1881-82 and 1882-83, when the rainfall at the close of the season was unusually heavy.

4. *Bhagulpore district*.—The ordinary proportion of harvest to food-supply here,* and the estimated outturn in 1883-84 (in annas), is shown thus—

* The figures for this purpose for all districts are taken from Appendix B attached to the General Administration Report of the Division for 1882-83.

SUB-DIVISION.	ORDINARY PROPORTION OF HARVEST TO FOOD-SUPPLY.			ESTIMATED OUTTURN IN 1883-84 IN ANNAS.		
	Bhadoi.	Aghani.	Rubbee.	Bhadoi.	Aghani.	Rubbee.
	Per cent.	Per cent.	Per cent.			
Sudder sub-division	25	38	37	8	7	7
Banka ditto	33	56	14	10	6	6
Muddehpurah ditto	25	60	15	10	7	6
Sboopole ditto	25	50	25	12	6	6

5. The following are details :—

SUDDER SUB-DIVISION. *Bhadoi crop*.—In western portion fair. In pergunnahs Jahangeerah, Bhagulpore, and Colgong, eight annas.

Rice crop.—In eastern half of sub-division, generally speaking, bad; yield will not exceed four annas, and in many places *nil*.

Rubbee crop.—In south-eastern portion, near Sonthal Pergunnahs, there has been more rain; crops have germinated, and there is sufficient moisture. The large tracts south and north of the railway, between Bhagulppore and Colgong, usually flooded by the Ganges, have sufficient moisture. On the high lands generally, where there has been no rain, the *rubbee* crops have germinated; but unless there are good showers before December, the yield will be very poor.

BANKA SUB-DIVISION. *Bhadoi crop*.—Fairly good generally, with yield from 8 to 12 annas.

Rice crop—Most damage done to the east of the Bowsi road, although miles of bare ground are to be seen on both sides of the road; estimate of four annas crop of the eastern portion of the sub-division and eight annas for the west.

Rubbee crop.—Not promising in the east; mustard, linseed, and gram have come up in about half the area, but the yield will not be good. *Koorthi* not good; *rahar* and sugarcane will be a full crop; cultivation of latter has very much increased.

MUDDEHPURAH SUB-DIVISION. *Bhadoi crop.*—10 annas.

Rice crop.—High lands drying up everywhere except where irrigation available. Yield estimated at six annas. Low lands better, but outturn not likely to be over eight annas.

Rubbee crop.—Results could not be estimated by Sub-divisional Officer; but although *koorthi* plants were looking healthy, and mustard and linseed coming up slowly, prospects are not considered hopeful.

SOOPOLE SUB-DIVISION. *Bhadoi crop.*—Yield 12 annas out of an "average yield of 16 annas" (*sic*).

Rice crop.—Eight annas from the low lands and four annas from high. Area of latter exceed that of former.

Rubbee crop.—Estimated at two annas with no rain, and six annas if rain falls. *Koorthi*, an important crop, still looking well.

6. The Collector expresses himself as unable to estimate the amount of stocks available; but he has ascertained by personal enquiries that the cultivators have lately stopped selling their grain, and he is inclined to believe that generally they have kept a fair stock in hand. The people show no signs of distress as yet.

7. The Collector thinks that prices will not fall below 11 seers (80 total weight). For three weeks past the price has stood at 15 seers, the lowest point yet touched.

8. In forecasting the future, the Collector says that he does not anticipate serious distress anywhere. The labouring classes and the cultivators in those parts where the *dhan* crop has utterly failed and the *rubbee* crop not yet germinated will undoubtedly suffer privation after January next. He proposes to urge the zemindars to take, where necessary, tuccavi advances for construction of new or repair of existing *bundhs* and *daurs*. Then, again, there is a much used road which passed through the very heart of the Banka sub-division, where the crops have suffered most, which he proposes to repair at a cost of Rs. 3,000 to Rs. 4,000, to be obtained from the road cess.

9. PURNEAH DISTRICT.—

Sub-division.	ORDINARY PROPORTION OF HARVEST TO FOOD-SUPPLY.		
	Bhadoi.	Aghani.	Rubbee.
	Per cent.	Per cent.	Per cent.
Sudder	31·25	40·25	28·5
Kishengunge	30	55	15
Arrareah	31·25	56·25	12·15

The Collector has not furnished the estimated outturn of 1883-84 in such a shape that I can make use of it.

10. His estimates regarding crop for the whole district are as follows:—

Bhadoi crop.—A very fair one over the whole district.

Aghani rice crop.—Not much damage done over an area equal to half of the district. Elsewhere there will be very few places where a half crop will not be realized, except in parts of Gondwara thana and Dhurumpur pergunnah, both in the sudder sub-division.

Rubbee crop.—Sowings in progress, and if there be seasonable rains about Christmas or before, the outturn will be fair throughout the district.

By sub-divisions, details are—

SUDDER SUB-DIVISION.—*Bhadoi*, average 10 annas; *aghani*, nearly a full crop in places subject to inundation, and elsewhere 4 to 10 annas; *rubbee* will be a good crop if there be rain within a month, and, if not, a six-anna crop.

KISHENGUNGE SUB-DIVISION.—*Bhadoi*, almost a full crop; *aghani*, 12 to 14 annas crop everywhere except to south of Asuragudh; *rubbee* will be a full crop. This is not grown in two thanas; a larger area than usual has, however, been sown, and there is sufficient moisture

ARRAREAH SUB-DIVISION.—*Bhadoi*, nearly a full crop; *aghani*, 8 to 12 annas; *rubbee*, 8 annas.

11. *Stocks*.—The Collector has offered an estimate of his own upon this head. He sets the stocks, in the hands of the mahajuns and ryots together, at—Sudder sub-division, 13 lakhs of maunds; Kishengunge 15 lakhs; and Arrareah 14 lakhs.

12. As regards prices, the Collector remarks as follows:—

"I confess myself unable to predict from the data before me the probable range of prices. On the Caragola and Darjeeling road, where prices are always high, and notably along the part north of Kishengunge, where prices are equalized with those of Darjeeling and Calcutta, prices have already gone up to 10 seers per rupee. Considering the large extent of partial failure of crop, even Burma being threatened and parts of the Benares Division at least, if not other parts of the North-Western Provinces, I think it quite possible prices may rise to almost famine rates before the next *bhadoi* comes in, though I hardly think this likely, considering that there must be comparatively large stocks all over the country, for last year's harvest was by no means deficient.

"I have put down the range for the whole district as from 15 to 10. Lower than that I hope it will not go; probably the rate will be soon established."

13. MALDAH DISTRICT—

DIVISION.	ORDINARY PROPORTION OF HARVEST TO FOOD-SUPPLY IN ANNAS.			ESTIMATED OUTTURN OF 1883-84 IN ANNAS.			REMARKS.
	Bhadoi.	Aghani.	Rubbee.	Bhadoi.	Aghani.	Rubbee.	
Whole district	4	8	4	13	4	6*	* Outturn on the lands cultivated, which are only half the usual area.
Thanas.							
English Bazar	7	5	4	12	4	6*	
Shibgunge	6	2	8	12	4	6*	
Kaliachuck	8	.....	8	12	.....	6*	
Ratnah	7	1	8	12	2	6*	
Khurba	2	11	3	14	6	4*	These thanas form what is called the "*Barinda*" tract, lying east of the Mahanunda river.
Maldah	4	10	2	16	4	8*	
Gazole	2	12	2	8	4	8*	
Gomastipore	2	12	2	11	4	2*	
Nawabgunge	2	12	2	14	4	6*	

I reproduce the figures given by the district officer for each thana, because they supply separate information for the "*Barinda*" tract, which forms the subject of chief anxiety.

14. The *bhadoi* crop was a success, and above the average throughout the district. The estimated area of this crop in the "*Barinda*" thanas was—Maldah, 31,000 bighas; Nowabgunge, 20,000 bighas; and 3,000 bighas for the other two thanas conjointly.

The *aghani* rice crop is generally given at only a four-anna outturn. In Ratnah and Khurba, where it is shown at two and six annas, the area of land so cultivated is given at 700 and 68,000 bighas respectively.

The rice country area in the "*Barinda*" is—Maldah, 85,000 bighas; Gazole, not given; Gomastipore, all except 2,200, which are under *rubbee*; and Nawabgunge, 1,50,000 bighas.

Rubbee crop.—The Collector's report is dated 13th instant. It states that at that time only about one-half of the lands usually sown with this crop had been planted. The rest were waiting for rain, and without rain in a fortnight would not be sown. There is no reason to suppose that there has been rain, or that there will be within the time named. The areas for this crop in the "*Barinda*" are—Maldah, 11,000 bighas; Gazole, 1,500; Gomastipore, 2,200; and Nawabgunge, 25,000.

15. *Stocks*.—The Collector says that it is roughly estimated that the stocks in hand amount to 3,80,000 maunds of *dhan*, 15,000 maunds of rice, and 1,80,000 maunds of other grains. He adds that these figures are probably far

under the mark. The police inspectors, after visiting the localities and enquiring, state that stocks are held by the ryots in Nawabgunge, Gomastipore and Ratnah, while they are fairly well off in Khurba and parts of Maldah. It is said that in English Bazar, Kaliachuck and Shibgunge, people are in a position to purchase supplies owing to the fine mulberry crop. In Gazole, however, there is likely to be scarcity.

16. The Collector reports that rice is now selling at 13 to 15 seers for the rupee, and *dhan* at between 22 to 30 seers; wheat is 18 to 20 seers; and barley, pulse and peas, at 25 seers. Prices are higher at Gazole and Gomastipore than elsewhere, the reason being that stocks in hand are small. Taking the coming months of December, February, and May for comparison, the Collector forecasts the range of prices as follows. The figures below the line in each case are for 1873, 1874 and 1875:—

Coarse rice	...	14 / 13	12 / 12	13 / 10	Seers of 80 tolas per rupee.
Gram	...	18 / 11½	18 / 12½	13 / 12½	Ditto.
Wheat	...	18 / 12½	14 / 12	14 / 13	Ditto.

17. In speaking of the condition of the people, Mr. Porch reports as follows:—

"East of the river Mohanunda, in parts of the "*Barinda*" tract most affected by the loss of the *amun* or late rice, their only crop, the poorer people are suffering to some extent at present, and it appears to be advisable to arrange for opening relief works in suitable localities in that tract, viz. in Gazole, Bamongola, Nawabgunge and Gomastipore. The Bunnas and other aborigines who inhabit parts of this tract of country are suffering most from the present failure of the crops and the dearness of prices of food-grains in view of badness of prospects.

"I have during the past five weeks visited various places in thanas English Bazar, Ratnah, Gazole and Bamungolah ("*Barinda*"), Old Maldah ("*Barinda*"), Gomastipore ("*Barinda*"), and made special enquiries on these subjects from the local police and punchayats and chowkidars and leading residents and from the zemindary amla at the local tehsil cutcherries.

"By personal communication with Mr. W. Price, who has charge of property bordering the "*Barinda*" in Nawabgunge thana, I have ascertained that the circumstances of the poorer classes of ryots in those parts, viz. south Nawabgunge, as reported by the police, are not immediately pressing."

The Collector closes with asking for a grant of Rs. 20,000 for relief works to be opened at once in the thanas of Gazole, Old Maldah, Gomastipore and Nawabgunge. This would be supplemented by Rs. 5,000 from road cess and Rs. 5,000 from zemindars, promises of assistance having been, it is said, made. The works contemplated are roads and repairs, and construction of tanks in places already selected. I shall refer to this matter again.

18. SONTHAL PERGUNNAHS DISTRICT.—

SUB-DIVISION.	ORDINARY PROPORTION OF HARVEST TO FOOD-SUPPLY.			ESTIMATED OUTTURN OF 1883-84 IN ANNAS.			REMARKS.
	Bhadoi.	Aghani.	Rubbee.	Bhadoi.	Aghani.	Rubbee.	
	Per cent.	Per cent.	Per cent.				
Dumka	25	60	6	7	8	¼	* There is some doubt about this figure owing to the mode of calculation followed by the Sub-divisional Officer. The Deputy Commissioner believes what I have given to be correct. Further enquiry will be made.
Deoghur	18	70	12	10	11	4	
Godda	31·25	50·25	12·5	10	8	Not yet sown.	
Rajmohal	18·75	68·75	12·5	13*	6	¼	
Jamtara	15	75	10	8	8	4	
Pakour	Not received.						

Respecting the district as a whole, it is only stated that the *bhadoi* crop was not good. The early rains caused some of the *bhadoi* lands to be sown with *aghani*, reducing the area. The heavy and continuous rains of July and August caused the *bhadoi* plants to be stunted and the cobs exceptionally small and light.

19. THE SUB-DIVISIONAL DETAILS.—

DUMKA SUB-DIVISION.—*Bhadoi* (Indian-corn) crop, seven annas; *aghani* eight annas or less.

Rubbee.—There was rain outside the registering area on 14th and 15th October, which saved the crops in much *bari* land; otherwise mustard, the chief rent-paying crop, will yield very little. *Koorthi* will be below the average, and no extra crops, such as wheat, barley, or carrots, will be sown, the tanks being dry.

RAJMEHAL SUB-DIVISION.—It is stated that the Sub-divisional Officer has not furnished a full report, and another is promised. It is thought that the *dhan* crop throughout will yield about four annas. The spring crops in the Damin will yield nothing, while they promise better in the zemindari portion of the sub-division.

For the remaining sub-divisions the figures in the table above furnish the information which I have received.

20. *Stocks.*—The Deputy Commissioner observes that the crops of 1882-83 were generally favourable, and therefore it may be assumed that the district commenced the present season with a surplus. The crops of last season were, however, bad in Rajmehal,* and it is here unfortunately that present prospects are worst.

* According to the report of 1882-83, *bhadoi* 6 annas, *aghani* 4 annas, *rubbee* 9 annas.

Some figures have been furnished showing the estimated stocks in certain sub-divisions. They are 4,00,000 maunds of food-grain for Deoghur and 10,000 maunds for Jamtara. I regard such estimates as useless. The Deputy Commissioner, basing his calculation upon the consumption of the population, and assuming that there are three months' supplies in hand, excluding the crops on the ground, places the available stocks at 22 lakhs. In addition to this, there is the fruit supply to be taken into account, that yielded by the *mahua* trees being very important.

21. The settlement statistics enable us to make something more like a correct estimate of the prospects of the large portion of the Rajmehal sub-division included in the Damin. There were, in 1879, *dhan* lands 1,79,000 bighas, and *bari* lands 1,60,000 bighas, say 1,13,000 acres in all. Taking an average yield for different classes of land (*vide* Food-supply of Bengal, page 7), the full product would be 7,20,000 maunds+1,44,000 maunds; and assuming the Sub-divisional Officer's appraisement of the current season's crops to be correct, the outturn would be 1,80,000+4,00,000= 5,80,000 maunds. This tract of the Damin contains 24,000 occupied houses, consuming 8,85,000† maunds annually. The deficiency would, therefore, be about two lakhs of maunds, liable to reduction by the amount of stocks in hand and the rations of those who may go elsewhere in search of work.

† This calculation is based upon six persons to a household—
One seer each for two adults.
Two seers for four children.

22. The range of prices is thus estimated—

SUB-DIVISION.	Month.	1883.		1884.	
		Common rice.	Indian-corn.	Common rice.	Indian-corn.
Doomka ...	November ...	17	30	.....	.....
	January ...	.....	.....	13	25
	March ...	.....	.....	11	20
	May ...	.....	.....	11	14
	July ...	.....	.....	11	25
	September-October ...	.....	.....	10	35
	November ...	.....	.....	12	32
Deoghur ...	April ... / May ... / June	.....	.....	13	14
Godha ...	April	.....	.....	14	20
	May ...	.....	.....	13	19
	June ... / July	.....	.....	12	18
Rajmehal ...	January ...	.....	.....	12	20
	June ... / September	.....	.....	16	32

23. Before leaving this part of the subject, I may say that if I can succeed in sending up to Government the statements referred to in paragraph 2, these figures for estimate of the range of prices will be more clearly given.

24. I cannot venture any opinion as to the stocks of food-grain available. Figures in such a case are useless. I notice that between April 1882 and March 1883 prices rose considerably in every district in the division (*vide* tables C to G attached to the Administration Report of 1882-83), and therefore I do not think any large stocks can be in hand. I do not see how there can be any stocks in Rajmehal, taking last year's crops into account.

25. I have now furnished such information as was called for in your circular under reply for all districts expect Monghyr. The report for this district will follow as soon as I receive it from the Collector. I shall of course enter into communication with each district officer separately regarding the condition of his district, and anything of importance that may arise will be promptly reported to Government. I may conclude with a few general remarks expressive of my own opinion upon the outlook. The year will be a prosperous one for the cultivators and others who have superfluous grain to dispose of, as prices will be high. It will as certainly be one of privation and difficulty to all who have short supplies, and to the labouring classes. The tracts in regard to which I at present feel anxiety are the sub-divisions of Banka and Rajmehal, and the "*barinda*" tract in Maldah. For the first of these, I have reasonable hopes that we shall get on. We fortunately have a Sub-divisional Officer who knows his sub-division well. He has been, and is, going round village by village, making notes of the condition of affairs, and he states (and I believe him) that he will have early knowledge of the approach of any distress. The estates in this part to a considerable extent belong to well-to-do people, and it may be expected that, at the instance of the Collectors, assistance will be forthcoming towards carrying out works of improvement, which will at once afford relief to the poorer classes, and give us time to organize larger works, if such are required.

26. I need a fuller report before I can say what may be required in Rajmehal. The Deputy Commissioner will be asked to ascertain and report upon the actual present condition and future prospects of the people of that sub-division, especially in the Damin. He will be told also to consider what useful works could be undertaken, should such form of relief prove to be required. In this connection it seems to me that the works upon the Purneah and Dinagepore Railway, at the Manibari end, should be useful both as a test of the state of the people if it draws them in large numbers and also as a means of relief when they apply themselves to labour in order to obtain food. I beg, therefore, that effort may be made to expedite the opening of the works in that locality, and that, as soon as may be, intimation may be given me of the time when the engineers will be prepared to employ a large quantity of labourers. District officers may then be told to inform the people of their districts where work can be found.

27. For the "*Barinda*" tract in Maldah, I have told the Collector that I must have clearer information as to the real necessity of the case before I can ask Government for a grant for the immediate opening of relief works here, as proposed by him. There is some portion of the rice crop admittedly to be reaped, and the general cutting of the crop throughout Maldah and adjoining districts will afford temporary employment and living for the poor. I cannot at present, therefore, see that relief works need be started. If, however, conditions are found to be otherwise, some of the work proposed to be done by the road cess, as also by the zemindars who are willing to assist, can be tried first by way of experiment. I believe the Purneah Railway should help this part also.

28. In no place is it at all likely that there will be found any difficulty in selecting works for execution, as may be necessary. There is a general outcry about the drying up of the water in tanks, &c., the means of supply of drink for man and beast. The excavation of these reservoirs would be everywhere useful.

29. I would suggest that the application of Act XIX of 1883 (Land Improvement Act) and the publication of rules under its different sections may be expedited.

30. Since writing the above report, the Monghyr Collector's letter No. 1430R, dated 21st November, has come to hand. The following are the conditions of that district as therein disclosed:—

Division or sub-division of district.	Ordinary proportion of harvest to food-supply.			Estimated outturn in 1883-84 in annas.			
	Bhadoi.	Aghani.	Rubbee.	Bhadoi.	Aghani.	Rubee.	
	Per cent.	Per cent.	Per cent.				
Sudder sub-division	10	60	30	10	4 to 5	Not given.	
Jamui ditto	15	60	25	10	4 to 5	ditto.	
Begusarai ditto	30	5	65	8	Not given.	8*	* Will be 10 annas if there be rain within a month.

It is stated that the *aghani* in Khurrukpore is better on account of the irrigation there This may raise the average yield of this crop to five annas for the whole district, including the small area sown in Beguserai. The Collector gives the average of *bhadoi* for the whole district at eight annas, and *rubee* for the same at five to six annas. He adds that the bulk of this crop is grown upon dearah lands which retain moisture. It is too soon accurately to forecast the prospects of *rubbee*, as sowings are still going on. He thinks that if rain falls within the next month or so, the district average for *rubbee* will be eight to ten annas.

31. *Stocks.*—The Collector's estimate is as follows:—

	Stock in hand.	Estimated outturn of crops.	Monthly consumption of population at half seer daily.	Period food-supply will last.
	Mds.	Mds.	Mds.	Months.
Sudder sub-division ...	3,59,000	24,40,310	3,12,860	7½
Jamui ditto ...	1,25,000	17,72,150	2,07,673	8½
Beguserai ditto ...	2,50,000	11,66,000	2,19,493	5½

These estimates are based upon the acreage under each crop, ascertained by enquiry made in former years in connection with the famine of 1874. They pre-suppose no exportation. It is added that the district does export wheat, *maki* and grain.

32. *Prices.*—I am unable to understand the figures supplied by the Collector under this head. I will submit the information required as soon as possible.

A.

No. 68, dated Burdwan, the 28th November 1883.

Memo. by—J. BEAMES, ESQ., Commissioner of the Burdwan Division.

COPY forwarded to the Secretary to the Government of Bengal, in the Revenue Department, in continuation of this office No. 262T of the 12th instant.

No. 1274G, dated Burdwan, the 17th November 1883.

From—W. R. LARMINIE, ESQ., Collector of Burdwan,
To—The Commissioner of the Burdwan Division.

I HAVE the honour to reply as follows to your circular No. 75T, dated the 25th October 1883.

2. I have obtained reports from the different sub-divisional officers, and have myself been over a considerable part of the Raneegunge sub-division. I have enquired also from various persons who had opportunities for judging as to the state of the crops, &c.

3. The rains, as you are aware, practically ceased about the middle of September, and a crop which promised to be a bumper one has been injured to a very serious extent. That on high lands, except where artificially irrigated, is a total failure, and that on low lands, except where enjoying similar benefits, is reduced to about half an average crop. A great deal, however, has been done by irrigation. About 100,000 bighas have been irrigated from the Eden canal, and the owners of tanks have, as a rule, promptly responded to the call I made upon them to give as much water as they could for irrigation purposes. The crop on the whole may be estimated at about one-third a full crop. In some villages it is less, and in others it is more, but the average is, I think, as stated above.

4. It is not easy to arrive at any conclusion regarding stocks. A good deal of rice was exported in October, the ryots being tempted to sell by the rise in price. Since that time some rice has been imported, and there is doubtless sufficient rice in the district to feed the people for several months. At all events means of communication are so good that if rice be anywhere to be had in sufficient quantity it will find its way here.

5. The labouring classes, and in some villages the ryots, will suffer pressure, but I don't think there will be any need for direct interference on the part of Government.

6. I shall urge landholders and others to take advantage of the provisions of the Land Improvement Act, and thus provide labour where required.

7. The *rubbee* crop will be a very poor one.

No. 3T, dated Calcutta, the 29th November 1883.

From—W. R. LARMINIE, ESQ., Offg. Commissioner of the Orissa Division,
To—The Secretary to the Government of Bengal, Revenue Department.

WITH reference to your famine circular No. 9T—R, dated 23rd October 1883, I have the honour to report as follows.

2. The Collector of Pooree has not yet given any detailed report on the state of the crops in his district, but assures me that the main crop of rice is safe in consequence of the late rain, and that a fairly good average outturn may be expected. He adds that no famine or scarcity need be apprehended.

3. The Collector of Cuttack reports that the only crop which suffered from want of rain was the *sarad*, or chief rice crop, but that there has been no serious failure. Taking the *beali* and *sarad* together, the outturn will be, the Collector says, about 10 annas, or two annas less than an average crop. The prospects of the *rubbee* crop are reported to be favourable.

4. The Collector of Balasore reports that in the southern part of the district there has been a full crop, but that outturn falls off gradually towards the north, and is worse in a tract called Bograi, which suffered from an inundation of the Subhanreka. Even there, however, there is no reason for alarm. The prospects of the *rubbee* crop are good; there is a larger demand for labour on account of the coast canal works, and there is a considerable stock of grain in the district.

5. It is to be remembered that during the last three years there have been almost bumper crops in the greater part of the Orissa Division, and a large portion of these is doubtless still in the hands of the merchants.

6. The range of prices during the coming year cannot be estimated even approximately. It must depend to a great extent on the demand for rice elsewhere

7. There is not, in my opinion, any present cause for anxiety in regard to the Orissa Division, and I do not think any special precautionary measures are now necessary.

No. 617G, dated Dacca, the 28th November 1883.

From—N. S. ALEXANDER, Esq., Offg. Commissioner of the Dacca Division,
To—The Secretary to the Government of Bengal, Revenue Department.

WITH reference to your circular No 9T—R, dated 23rd October 1883, I have the honour to submit in abstract the reports of the Collectors of this Division as to the state and the prospects of the crops in their districts.

2. The Collector of Dacca reports that the outturn of the last *bhadoi* or autumn rice crop was about 12 annas, and that the *amun* or winter rice crop is likely to be an average one in his district. The stock of grain in hand is not large; it is probable, therefore, that the prices of food-grains will range from 11 to 12 seers for the rupee. Mr. Staley writes: "From enquiry made in my own tour, I believe there is no ground to apprehend any scarcity in this district. There was less than half the usual area under jute cultivation, and rice was grown in its stead, yielding a good crop. The day-labouring class is small, and finds ample and highly paid employment on the railway, at the jute presses, in the loading and unloading of boats and ships, and in harvesting. I believe that, so far from the scarcity being injurious to the people of this district, it will add to their prosperity by giving them high prices for their good crops."

3. The Collector of Furreedpore states that the outturn of the *aus* or autumn crop throughout the district may be estimated to have been about 10 annas, while that of the *amun* is likely to be 8 annas; that the spring crops will be very bad and the outturn next to nothing, unless rain falls before the end of the year; and that there are no large grain stocks in hand in his district. He thinks "that prices may be expected to remain about the same as now (14, 15, or 16 seers of common rice to the rupee) till January, when they may perhaps fall, probably to rise again in April to 10 or 11 seers of common rice for the rupee." "On the whole," says Mr. Sharp, "if there be not large exportations, I believe that there is quite enough in the district to supply the people well till next year's crop come in, but not much more."

4. The Collector of Backergunge writes that the average outturn of the crops in the district for the present year will not be more than 10 to 12 annas, and that the price of rice has already risen by one rupee this year. The Collector has not furnished information on the other points required by the Government circular.

5. The Collector of Mymensing reports that in the Jamalpore sub-division the last *bhadoi* crop was good, but the *amun* or *khurreef* is not expected to be more than a 6 annas crop; in the Attia sub-division the *bhadoi* was about 3 annas, but the *khurreef* and the *rubbee* are likely to yield only 6 annas and 10 annas; in Kishoregunge the *bhadoi* was 8 annas and the *khurreef* is expected to give 12 annas; in the Nitrokona sub-division the *khurreef* is expected to be a little better than the average, viz. 13 annas. On the whole, there is likely to be an 8 to 9 annas crop of *amun* or winter rice in the district. The stock of grain in the district is reported not to be large, but the Collector thinks that prices will not rise higher than 10 seers per rupee.

6. Mr. Manisty writes: "There seems to be no reason for apprehending any serious scarcity, as the ryots are too well off to really suffer by the prices anticipated, and there are but few labourers without land."

7. There does not appear to me to be any likelihood of any great distress at all. Prices of food-grains will no doubt rise high, but they will not be higher than they were in 1878-79—probably not so high—and only those will suffer who are generally the object of charity—beggars, lame, blind, widows, &c., and their support must be borne by their well-to-do neighbours and the wealthy public generally.

No. 929G., dated Bankipore, the 1st December 1883.

From—F. M. HALLIDAY, Esq, Commissioner of Patna,
To—The Secretary to the Government of Bengal, Revenue Department.

WITH reference to the Government of Bengal orders contained in your circular No. 9T.—R., dated 23rd October last, calling for a full account of the state and prospects of the last *bhadoi* and the coming *khureef* and *rubbee* crops in each of the districts of this division, I have the honour to submit the following.

2. No rain fell during the first week of November, nor has any fallen up to date.

3. *Shahabad.*—The Collector of Shahabad writes that the *bhadoi* crop is not of the first importance, being about 10 per cent. of the whole produce of the year, and that Mr. MacDonnell, in his statistical work on food-grain supply, estimates the yield of *bhadoi* at 68,500 tons out of a total of 670,000 tons of food-grain. He had an estimate of the outturn made shortly after the harvest, and reported it to be a 5 annas crop. It was a little better in the two eastern sub-divisions, which yielded about 6 annas each, and somewhat worse in the two western sub-divisions, which yielded only 4 annas.

The winter rice crop is estimated at 342,857 tons, or a trifle more than half the annual food-supply. One effect of the extension of irrigation has been the conversion of *rubbee* land into rice fields, and another the increase in the produce of rice lands; and the Collector thinks it may now be said that the winter rice crop yields about 60 per cent. of the whole food-supply. The reports received from the sub-divisions are to the effect that in Sasseram there will be an 8 annas rice crop, in Buxar an 8 annas crop on the irrigated land, and in Bhaboora 1½ annas. But from the inquiries made by the Collector during his visit to the Bhaboora sub-division it appeared to him that a 4 annas rice crop may fairly be expected in Bhaboora, which has no canal irrigation worth consideration. Mr. Nolan estimates that the irrigated lands will produce throughout the district a 12 annas crop, the unirrigated a 4 annas crop. As one-third of the produce is derived from irrigated land, it may be said that the yield will be, for the district generally, 7 annas or 6 annas.

With regard to the prospect of the *rubbee* crop, which forms nearly 30 per cent. of the whole food-supply, the Collector says it is as yet early to speak. In the Sudder sub-division, Bhaboora and Sasseram it is at present as forward as at this season it could be, having benefitted by the most opportune rains in October. From Buxar the Sub-Divisional Officer reports that only 75 per cent. of the *rubbee* land has been sown, the rest having been rendered unfit by previous drought, but the crop has germinated well in this sub-division. The prospect of the *rubbee* crop seems favourable, but rain is everywhere wanted to secure a full crop. Even without rain an 8 annas crop is expected.

With regard to grain stocks, Mr. Nolan writes that Shahabad in ordinary years imports rice in moderate quantities, and does not export. Last year the rice crop was only 9 annas, or a third less than the normal yield, and rice has been continuously imported during the present year. It may therefore be assured that the stock in hand in Shahabad is only sufficient for consumption until the new rice is ready, or rather a little less than this, as the imports will go on in the interval. Such is the general opinion among the natives.

A great part of the *rubbee* harvest is exported, and the export still continues. The Collector thinks that there is in the district a sufficient stock for consumption until next *rubbee* season, with a slight surplus corresponding with the deficit in the rice.

With reference to the question of the probable range of prices of food during the coming year, Mr. Nolan writes:—"I am not in a good position to judge of the probable range of prices during the coming year, as this will depend, not on local, but on general causes, which are best understood at commercial centres." On reference to the price-current I find that the price of common rice is rising. On the 15th November the average price was 14 seers against 19 seers of the corresponding period of last year. There was no change, however, in the prices of wheat.

4. *Gya.*—The Collector of Gya states that a complete report cannot be given yet, and that he will probably have to supplement and correct his report before we can have an adequate notion of the state of affairs. He reports that the *bhadoi* had already failed. The best information shows it to have been only a quarter of an average, or 3 annas of the standard scale, and he states that the rice is being cut for fodder.

The reports of the *khureef* are not so decided, of course, as the crop has not yet ripened. Mr. Boxwell, however, states he cannot hold out any hopes of the crop being more than a third of an average, or 6 annas of the standard scale.

The *rubbee* prospects are of course still uncertain so far, as less than half the lineal area has been sown; but rain may do much for the next three months. On the 24th the Collector reports:—"Prospects continue very bad. *Rubbee* crops, where sown, are suffering for want of moisture in the soil. Further sowings deferred. The rise in prices continues." There is not much likelihood of the crop exceeding two-thirds of an average, or 8 annas of the standard scale. The Collector does not report as to the correct amount of grain stocks in hand in his district and the probable range of prices of food during the coming year. He writes that the Sub-Divisional Officer of Aurungabad estimated the stocks there, on the 11th ultimo, at 7,00,000 of maunds. But Mr. Boxwell does not place any reliance on the figures, either as excessive or otherwise, for it is impossible to obtain accurate, or even approximately accurate, information as to stocks. I have called on him to submit a more detailed report after further investigation in both the Aurungabad and the Sudder sub-division; and he has stated that he will take care the best attainable information shall be submitted.

5. *Sarun*.—The Collector of Sarun reports that the *bhadoi* crop may be estimated at 12 annas, or perhaps slightly less: say 11 annas all round.

In the high lands paddy has been entirely destroyed from the want of moisture, and is being cut for fodder or cattle. In some of the low lands, and in places where irrigation has been practicable, a fair crop has been obtained. Paddy has reached that stage at which no improvement nor further deterioration is expected. He does not think that the rice harvest can be estimated at more than a 2 annas crop.

The *rubbee* promises to be fairly good, provided there be a good fall of rain in December, as was the case last year. If sufficient rain falls, a 10 annas or even 12 annas crop may be expected; but if there be no rain, or only a scanty fall, it will probably not exceed a 4 annas crop. Under no circumstances, however, does Mr. Quinn apprehend a total failure of the *rubbee* crop, as much of this crop is always irrigated, and in cool and moist soils a harvest of some kind will be obtained even without irrigation.

The Collector has annexed to his report a statement of the prices of the principal food-grains during the current year, as compared with the year preceding and the last famine year. These I append to this report. It will be seen from this that prices, though considerably higher than they were last year, still fall short of those which ruled in the famine year. The great rise is in the price of rice, but Indian-corn is still sold at a moderate price.

A further gradual rise may be expected as long as rain keeps off; but the Collector does not expect at present that rice will fall below 12 seers or Indian-corn below 20 seers per rupee.

As regards grain stocks, the Collector writes:—"I regret that I am unable to furnish any trustworthy statistics. The figures which I have obtained are merely conjectural; but having regard to the abundance and cheapness of the *bhadoi* and *rubbee* grains during the past two years, it can hardly be doubted that the better class of cultivators, as well as the grain-dealers, hold considerable stocks. As regards rice, the district is never self-supporting, and the quantity in stock is, I believe, small. I can only say that the general opinion, in which I concur, is that there is a sufficient supply of food available to carry on the people until the *rubbee* crop is harvested."

6. *Chumparun*.—From the report received from the Collector of Chumparun it appears that the *bhadoi* crop will yield three-fourths of an average outturn in the Bettiah and two-thirds of an average outturn in the Sudder sub-division. The outturn of the whole district has been estimated at 8 or $\frac{8}{12}$ths of an average yield.

As regards the prospect of the rice harvest, the average outturn will be 6 annas in the Bettiah sub-division and one-third or one-fourth of an average in the Sudder sub-division. The Collector estimates the outturn of the winter rice crop all over the district at about 5 annas, or two-fifths of an average harvest.

Like other Collectors, Mr. Henry states that it is not possible now to make any satisfactory forecast as to the prospects of the *rubbee* crops: everything depends upon the winter rain. If this rain falls, the *rubbee* harvest may be expected to yield an average outturn.

The Collector has submitted a comparative statement of prices current for food-grains in 1873, 1882 and 1883, which are appended. It will be seen that the present rates for common rice and maize, though high, are considerably lower than they were in 1873. Of late the rice market has again become easier, and the Collector does not anticipate any marked fluctuations in the prices of food-grains between this and the end of January. The Terai districts are said to have suffered from capriciousness and scantiness of the rainfall, and exportation, it is said, has been forbidden by the Nepal Durbar.

There appears to be little doubt that there are considerable stocks of grain in the district. The fact that prices have become easier, though there is no importation from Nepal, and the winter harvest has failed to the extent of three-fifths, is satisfactory proof that there is no scarcity of grain.

The Collector reports:—"Though the outlook is, on the whole, gloomy, the condition of the people of this district does not afford any immediate cause for anxiety. We can only now look forward hopefully to the fall of seasonable winter rain. If this fails us, the condition of the poorest classes of the people will require careful watching, and the direct intervention of the Government will be required to a greater or less extent."

7. *Mozufferpore.*—The Collector of Mozufferpore submits the following estimate of the outturn of the three harvests of the year:—

Bhadoi	...	...	...	...	7 annas.
Aghani	..	...	...	...	4 „
Rubbee	...	...	...	...	From 3 to 10 annas, according to the future rainfall.

The principal causes of injury to the crops have been:—

First.—The cyclone vortex of the 16th and 17th June, which was attended by about 15 inches of rainfall during those two days, swamping the rice tracts and flooding the newly-sown crops.

Secondly.—The inundations of August, which caused extensive damage to the *bhadoi* and *aghani* crops.

Thirdly.—The drought which set in in the middle of September, and has prevailed to the present time. The following table shows the rainfall during September and October in each sub-division, as compared with the preceding year:—

	Suddur.		Hajipore.		Sertamurhee.	
	1882-83.	1883-84.	1882-83.	1883-84.	1882-83.	1883-84.
September	10·62	6·11	5·62	3·76	5·56	5·56
October	3·21	0·13	5·40	0·40	2·89	0·07

On the subject of the exceedingly difficult question of the amount of grain at present held in stock, Mr. Norman states that attempts have been made by some officers to estimate the proportion of last year's harvests consumed and number of maunds in stock, but mere guesses of this sort are obviously unreliable. It is, as he rightly says, at best possible only to form a rough judgment upon the subject, guided by such sources of information as are available, such as the visible stocks exposed at the principal marts and bazars, the course of prices, and the general opinion of the people. Judging them in this way, the Collector has arrived at the following conclusion:—No deficiency in the supply has occurred anywhere. Should there be rain within the next few weeks, a moderate outturn of *rubbee* may be expected, and in this case there are no grounds for anticipating any actual deficiency in the supply of food. Should the *rubbee* unfortunately fail, it will be our duty to take another forecast of the situation, guided by the then existing circumstances. At present it is impossible confidently to predict the result; but Mr. Norman urges his opinion that there are good grounds for the general impression that a failure of the *rubbee* will result in a famine more or less severe. I own I am unable to anticipate so gloomy a conclusion as actual famine, though it is possible that, upon the worst realization of the failure of crop, the intervention of Government will be to some extent required.

On the subject of importation and exportation, this district usually imports food-grains largely from Nepal and Chumparun, last year's imports from Nepal having been registered at the five frontier registering stations as amounting to 5,41,000 maunds. The sub-division of Hajipore, which does not grow sufficient food-grains for its own supply, is to a great extent dependent upon importation. It is reported that little or no importation from Chumparun has taken place this year, owing to the dearness of grain there. Exportation from Nepal commenced briskly; but having myself, in the course of a recent tour, been informed by two bodies of cartmen that the Nepal Government had forbidden exportation of food-grains (though owing to the venality of the officials, the prohibition had been in some cases ineffective, except in enhancing the cost of purchase), I am in demi-official communication on the subject with the Resident in Nepal.

With reference to the probable range of prices during the ensuing months, this will depend chiefly on the rainfall of the next few weeks. Mr. Norman estimates that about five-sixths of the *rubbee* land has already been sown, while one-sixth remains unsown for want of moisture. From all sub-divisions *rubbee* on high lands is reported to be withering; but as a general rule, though stunted by want of rain, the heavy dews have enabled it to preserve its vitality. Should the crop fail altogether, it is probable that famine prices will result. Should rain within the next few weeks afford the prospect of a moderate harvest (anything higher than 10 annas being already hop less), it is possible that prices may gradually rise to the following points up to the end of January 1884:—

	Present value. Seers per rupee.	Probable value Seers per rupee.
Common rice	17	9
Murwa	28	17
Maize	27	15
Barley	28½	14
Wheat	18½	12
Gram	23½	15

These prices, as Mr. Norman says, imply privation and hardship to the landless classes, but not actual famine.

8. *Patna*.—The Collector of Patna reports that for the whole district there was little or no *bhadoi* crop. It either failed or was destroyed by inundation. The rice, again, except where the *ahars*, or irrigation reservoirs, have stood, will be a very poor harvest. Speaking generally, he estimates the yield of the *bhadoi* to be 2 annas of the ordinary crop, that of rice 4 annas, and of *jonera*, or Indian-corn, about 8 annas. The paddy, he states, is being reaped.

The *rubbee* has germinated fairly well, but the hopes of a good harvest must depend upon a seasonable fall of rain. In the head-quarters sub-division, including Dinapore, the prospects are better.

Captain Boileau, Sub-Divisional Officer of Dinapore, writes:—"The total estimated outturn of the *aghani*, or winter rice, including those grown on the irrigated area, is 30 per cent. of an average crop. The *bhadoi* (monsoon) crops, which consist chiefly of Indian-corn as a principal crop, have also suffered a loss to the extent of 75 per cent. The prospect of the *rubbee* crops in places other than dearah (lands liable to flood of Ganges) are in general far from good. On the dearah the *rubbee* crop will be fairly good. The outturn of the *rubbee* crop will, on the whole, it may be expected, be 25 per cent. of the average crop. If the rain falls at all, it will, I believe, increase the outturn by about 20 per cent."

In the Behar sub-division there is about 1,60,000 maunds of grain in stock. In the Dinapore rural tracts there are large quantities buried, estimated at about one lakh of maunds. At present throughout the district there is an ample supply of grain, the Collector thinks. The Sub-Divisional Officer

of Dinapore reports that the prices of food-grains are at present as follows, as compared with the corresponding period of last year :—

	Per rupee.					
	Present year.				Last year.	
	s.	c.		s. c.	s.	c.
Rice	11	12	to	12 12	18	0
Wheat	15	0	to	18 8	17	8
Barley	23	0	to	24 0	20	8
Indian-corn	20	0	to	21 0	35	0
Gram	20	0	to	21 0	27	0

Many of the grain dealers state that the prices of food-grains are not likely to rise further unless the *rubbee* crops totally or materially fail. If this is the case, ordinary trade will not be interfered with, so that large stocks of grain will not be kept by dealers, but such grain will be sent to places where prices are still higher. The Collector does not entertain any apprehension of scarcity in his district.

9. *Durbhunga.*—The Collector of Durbhunga reports that the last *bhadoi* crop was a poor one owing to excessive inundation. Nowhere throughout the district was it in excess of 8 annas, and in places very much less, if not entirely destroyed. On an average, all round, it may be taken to have been a 6 or 7 annas crop.

With regard to the rice crop, the Collector says that, under no circumstance, can there be more than 6 annas of the crop throughout the district. If in some places a 12 annas crop is reaped, in others a 2 or 4 annas crop only will be the yield. There is very little paddy grown in the Tajpore sub-division, and he says, from his personal observation, that most of it would be a 10 or 12 annas crop. Throughout the Madhubani sub-division it will scarcely be an 8 annas crop, and not so good in the Sudder sub-division. On the low lands of the district it is good—sometimes very good; on high lands very bad.

The *rubbee* is still looking good everywhere, in spite of want of rain, particularly in the Tajpore sub-division; but if rain does not fall soon, at any rate in December, the outlook will be very serious, he considers.

The stock of food-grains in the district has been estimated to be seven or eight lakhs; but these figures do not include the hoards of grain in the houses of the zemindars and rich cultivators, to get at which is not easy. But a very good idea may be formed of the stocks by the prices that food-grains have already reached, as noted below, and are reported to be stationary up to the 24th November 1883 :—

	Seers per rupee.
Rice	13 to 17
Gram	20
Dál	13 to 15
Mukai and murwa	30 ,,

It will be seen that prices are high, but not so high as to cause any immediate anxiety. Doubtless, as the year advances, prices will be still higher than they are now; but the Collector does not, with the prospect immediately in view, anticipate that rice can possibly sell for less than 11 seers for the rupee, *dál* for 12 or 13½, and *mukai* and *murwa* at 20.

10. I have already, in my demi-official communications, after my visit to Mozufferpore, stated that, with regard to the tract of country in that district which had suffered severely from the floods of the Bagmutty and Gunduck rivers, the prospects were not so gloomy as had been at first apprehended. The area affected is comparatively small; and though individual villages may suffer considerably, and the ryots have hard times, from the prospect of failure of the *rubbee* sowings owing to drought, the supply of grain will be supplemented from other parts of the districts.

It will be seen that the reports from the Gya district are the least assuring as to the coming prospects. Along the west of the district, along its whole length, runs the Soane canal of the Patna and Gya line, from which irrigation is available, so that the *rubbee* crops should not suffer there. A great portion

of the north of the district is similar in character to the Patna district; and the floods in the rainy season, which did damage to the *bhadoi* crops, should have secured considerable moisture in the soil for the fairly successful cultivation of succeeding crops. In the southern and eastern parts of the district irrigation by means of *ahars*, or reservoirs, is very extensively carried on; and the crops, the cultivation of which is always to a greater or smaller degree precarious, depend greatly upon this irrigation. Though the Collector does not mention it, I learn that, owing to heavy rain and inundation, many of these reservoirs burst and were rendered useless for the purposes of future irrigation for the winter crops and the *rubbee*. It is in this part of the country where so much must depend upon the next fall of rain. Mr. Boxwell mentions that the tracts he is afraid for are the extensive rice plains of the north of the Gya district; but he admits that Mr. Jenkins, the Sub-Divisional Officer of Jehanabad, took a brighter view of the outlook than he did. Mr. Jenkins' report had not been received, however, and I expect it shortly: it will relate to the part of the country which I have mentioned above as being most probably favourably affected by the inundations of the rainy season.

11. I propose to submit a further report at the end of December, after ascertaining a more complete position of the state of affairs up to that period. Should, however, the circumstances call for it, I will of course submit further particulars within that period. I think it advisable to urge on Government the question of the very early construction of the line of railway from Hajipore to Mozufferpore. Its completion will materially serve to aid in meeting the necessity for the transit of grain into the three northern districts, should such necessity arise later on. I am aware that, owing to the construction of several bridges, the line cannot be made open for general traffic for some little time; but I would suggest that the earthwork and laying down of rails might advantageously be pushed forward, and the bridge gaps could be easily made passable hereafter by temporary crossings.

In the same way the construction of the Chupra and Sewan line might, under the pressure of Government instructions, be carried on perhaps more expeditiously, though I am aware that the company are carrying on their work with considerable vigour already.

No 330Met, dated Bogra, the 1st December 1883.

From—Lord H. Ulick Browne, Commissioner of the Rajshahye and Cooch Behar Division,

To—The Secretary to the Government of Bengal Revenue Dépa tment.

I have the honour to enclose the replies of the District Officers of this division to Government Famine Circular No. 91—R, dated 23rd October 1883, calling for a report on the state and prospects of crops, the probable stocks of food-grains, and the probable range of prices during next year.

2. As officers seldom adopt the same basis when reporting that a crop is represented by so many annas, I instructed the District Officers of this division to adopt, when replying to the circular, not a bumper or 16 annas crop, such as is obtained about once in 15 or 20 years, as a basis, but to take an average crop, viz. three-fourths or 12 annas of a bumper one, so that, if an officer should report an eight-anna rice crop, it would mean half of an average one, and not half of a bumper one, so rarely obtained. This should be remembered when reading the reports.

3. I have myself seen a little of the Dinagepore and Bogra districts, and have passed through 60 miles of the northern half of the Rungpore district in different directions. In these three districts I have of course endeavoured to obtain from all classes of people, officials and others, as much information on the subject of this letter as possible by verbal enquiries, and I am consequently in a position to judge better in the case of those three districts (as well as Darjeeling) than in that of the others.

4. In regard to the question of stocks in all the districts, of course a general idea of the habits of the people is obtainable, and may be generally relied on, such as, for instance, that it is the custom of this class to store grain for so many months of the next year; but I think all estimates of quantities in maunds in the hands of ryots and dealers are worthless. It may be remembered that on the last occasion of scarcity in Bengal the leading men of the British Indian Association, and notably the late Rajah Degumber Mitter, wrote an elaborate letter on the subject of the stocks then believed to exist in the country, giving reason at length, and the conclusions were alarming, but happily they turned out to be incorrect.*

5. Another point that may be dealt with generally is the probable range of prices. I do not see how any District Officer or Divisional Commissioner can form an estimate of these that would be of the least value. Now that the country has some main lines of railway, with road communications much improved, with some water communication in the dry season, and excellent water communication in many parts during the rainy season, and grain can be sent wherever it is most wanted within a reasonable distance, and it seems to me that prices in any given district or division will in a great measure depend on the condition of the districts in other divisions. Thus, while no single Commissioner or District Officer can form an opinion of any value on the point, Government will have materials for doing so in the reports received from all the divisions. But even the opinion so formed will probably only be good for some months, as the actual outturn of the *rubbee* crops, and the fall of rain from June, will affect prices later.

6. *Dinagepore.*—It will be perceived that almost all the more detailed information reported came from three managers of Wards' estates, of whom the manager of one (Sunkerpore) has only lately arrived in the district. I attach little value to his opinion and estimate, and I must say the same of the manager of Hurripore. The manager of Chooramon knows that estate well, and is a superior officer, so I am inclined to rely a good deal on what he says. The Collector has, however, himself been to the north of the district, and the Sub-Deputy Collector has been over a good deal of it, and though he does not say so, the Collector has of course borne in mind what he has heard from the police of every quarter of the district. In Dinagepore the prospect does not seem bad on the whole, and in so far as an opinion can be formed in regard to a period of twelve months just about to commence (a very difficult matter), I am inclined to think that the reaping of the rice on the ground, work on the district roads paid for by road cess funds, work on the line of

* Anything more absurd than the estimate of the stocks in the Rajshahye district now given can scarcely be conceived.

railway from Dinagepore to the west, and a grant from Government for work in the south of the district, with some small works in the Wards' estates will suffice for the needs of this district.

7. *Rajshahye.*—On a consideration of the Collector's report, I think relief works in the Bhurind tracts, where there is but one crop, which was an indifferent one last year, and is a bad one this year, will be necessary, and there may be a demand for employment before very long. The road cess funds will be quite inadequate, and a grant from Government will be necessary. The owners of Wards' estates in this district are not rich, and little can be expected from them.

8. *Pubna.*—This district seems to be in a better condition than Dinagepore or Rajshahye. It seems doubtful whether any special measure will be required. I may mention that information received from Bogra by no means confirms the report that reached the Sub-Divisional Officer of Serajgunge as to the existence of considerable stocks in the part of the Bogra district bordering on Serajgunge.

9. *Bogra.*—There will probably be a small demand for employment on roads, tanks, &c., in the north and north-west of the district some three months hence; but there is a tract in the south, bounded on the north by the road from Sooltanpore Railway Station to Bogra, and on the east by the road from Bogra to Sherepore (and on to Serajgunge) which covers about a sixth of the area of the district, in which, from the information I have received, there will not only be distress and need for relief works, but the need will come pretty soon. There is in the greater part of this tract only one crop annually, which has been indifferent for two years, and is very bad this year. While on tour here, I have received more than 100 petitions from several hundred ryots of this tract, and from a few of the Rajshahye district bordering on it, asking in general terms for assistance in consequence of the failure of their crops and their distressed condition; and in this instance I think some charitable relief in the way of spinning thread, &c., will certainly be necessary, where there is no able-bodied male relative of the family to work. There is a small fund, being the surplus of the subscriptions raised for the reception of the Lieutenant-Governor on the occasion of his visit to Bogra in September 1882, which has already been set aside for charitable relief, and it will have to be supplemented. It so happens that the Road Cess Committee propose to spend Rs. 6,500 on the Sooltanpore and Bogra road, and work will be offered there and on village roads in the tract at once; but very little can be done with the limited road cess funds, and there are two works in regard to which I recommend Government to take preliminary steps at once, so that they may be available when a substantial demand for employment sets in. One is a railway bank from Sooltanpore to Bogra, the survey of which has, I understand, just been completed though not yet worked out on paper. The other is the construction of a road on a break of eleven miles between Gobail and Doorgapore, places in the south of the unfortunate tract. To the east of Gobail there is a road to Shereporo, and to the west of Doorgapore there is another to the railway, and while the Sherepore people now have to make a long detour by Bogra to get to the railway, the filling up of the gap would be a great public convenience and make a feeder to the railway complete. The Road Cess Committee have been unable to take up the work for want of funds, and Government must find the money for it now if it is to be carried out.

10. *Rungpore.*—I doubt if any measures will be required to the north of Rungpore sudder station, or near it on the south; but in the tract in the Gyabandah sub-division, mentioned by the Collector, the ryots are poor, the soil indifferent or bad, and the present winter rice crop a very bad one. In this tract relief works will doubtless be required at the cost of Government, and probably some modified form of charitable relief for those who cannot work on roads, &c. But I shall know more about this tract when the Collector, who has now gone there, reports again about it. The zemindars and others of Rungpore tell me that well-to-do ryots in the northern part of the district store rice, but that the poorer classes do not, and I agree with the Collector in thinking there are no stocks in the hands of the ryots in the bad tract.

11. No relief measures will be required in Julpigoree and Darjeeling.

12. *General.*—I think, where relief measures are required, little or nothing beyond subscriptions towards a modified form of charitable relief can be expected from the zemindars, as, speaking generally, the worst tracts in the division are owned by men who are not rich, and as they will get little or no rents, their resources will be required to pay the Government revenue. The road cess funds that will be available are very limited, being the balance available after meeting the requirements of the law as regards some repairs to all the roads in the district whether in a distressed tract or not, and the cost of establishments and supervision. Thus, where anything but small relief works are necessary, they must be carried out at the cost of Government.

13. My experience is that there is a very good test which will answer the question whether there is not real distress among ryots. It is a test that can be easily applied, and I have never known it fail. It is to offer them work on roads or tanks at two annas a day for able-bodied men, and at lower rates for working women and children. If ryots are really in distress they will work on the roads for that small wage, but they will not do so till they *are* in distress. It is of course necessary to be on the watch for cases of respectable women who cannot do such work, and to give in such cases light spinning, &c., to be done at home. On hearing that ryots would be ready to work for the two annas, I instructed the District Officers of Dinagepore and Bogra to offer it, and to report the result. The offers are now being, or are about to be, made. In many cases they will not be accepted now, but I think they will be accepted in two or three months' time. I am now about to instruct the District Officers of Rajshahye, Pubna and Rungpore to be on the alert in the matter, and to be ready to make the offer tentatively when they hear of distress. The District Officers of Dinagepore, Rajshahye, Bogra, and Rungpore will be asked to be on the alert for cases requiring a modified form of charitable relief, to exhort the Road Cess Committees to give no earthwork this year to substantial contractors, but to be prepared to get less for their money by giving employment by the day or petty contract under the Committee's officers, to divert as much money as can be spared (it will be very little indeed) from bridges and works in the tracts where the people are well off, to work on village and other roads near the homes of the people in the tracts where distress may be expected, and to give no employment to coolies from far off districts on the smaller local works, as such people, being absent from their homes, can as well work at railway banks in Dinagepore and Bogra (assuming that the latter will be made) as at other works in those and other districts, while ryots of Dinagepore and Bogra, who apply for work on the railway banks, should have the preference over outsiders.

14. I shall take care to keep myself informed how matters are going on, and address Government whenever it is necessary.

REPORT OF THE COLLECTOR OF DINAGEPORE.

I WILL take the questions asked in their order, and begin by saying that you are correct in assuming the failure of the rainfall to have chiefly occurred in September and October. The subject of the earlier rains will be dealt with in its place.

The loss to the crops in various parts of the district has been reported upon by the managers. I give an analysis of their reports

Loss of crop.—I have assumed, as directed in your paragraph 5, that a 12-anna crop is an average one, and all the calculations I have made are based upon that assumption. Thus, when I say that so many annas are injured, I am to be understood as meaning that so many annas of the average 12 annas crop are injured, the 12 annas being converted into 16 annas for the purpose of this calculation; the loss will therefore not represent the loss on the convertional 16 annas, but will be that calculated upon a 12 annas average crop. Thus, a reported outturn of an 8-anna crop will really equal but a 6-anna outturn according to the usual calculation.

Chooramon.—The manager of Chooramon reports that the paddy crop in his estate has been injured to the extent of 9 annas, or in other words that three-fourths of the paddy crop is affected. This is a greater loss than I anticipated, but my instructions were so clear that I am convinced the calculation has been arrived at after due enquiry by Mr. French. That officer also reports that but 10 annas of the *rubbee* crop has been sown owing to want of rain. The *bhadoi* on the Chooramon estate yielded fairly in parts, but in others the yield was poor, the entire outturn being 10 annas of an average crop, reckoning 12 annas crop as the unit of calculation. The cold-weather grain crops are grown to but a small extent on the Ganges

Mehals, but they do not enter into our calculations in estimating for this district. This estimate for Chooramon may be taken as pretty generally applying to that portion of the district which lies due west of Kaliagunge.

Hurripore.—This estate embraces lands situated in the Ranisankoil, Hemtabad, Kaliagunge, Peergunge, and Thakurgaon elakas. The manager reports that the outturn of *bhadoi* in all parts of this estate was a poor one; he reckons it to have been but half the outturn of an average crop of 12 annas, or but a 6 annas crop according to convertional calculation. I must confess that this surprises me. One did not hear of any general failure of the *bhadoi* crop such as this report would pre-suppose at the time. The manager also makes a most gloomy report of the state of the *amun* prospects. I directed him to enquire personally, and the result of his observations is that in pergunnah Kholerah, which is situated in thannas Ranisankoil, Hemtabad, Kaliagunge, and Peergunge, the outturn will be but three annas of the average 12 annas crop. In lot Madhobpore, which lies in Peergunge and Kaliagunge, it will be 4½ annas of the average. In another part of Peergunge and Ranisankoil it will be but six annas, whilst in Thakurgaon alone it reaches the average of nine annas of an average crop. This is much worse than I had anticipated, or in fact than the manager himself led me to believe when he was in the station, and before I ordered him to go through the State and see for himself the state of things.

Sunkerpore.—Mr. Ricketts has, as you are aware, but a short time ago joined his appointment. He has, however, been round a great part of the estate since the receipt of your letter under reply, and his report is by no means cheering. His estate is almost entirely an *amun* growing estate. Mr. Ricketts reports on three elakas in his estate. In the Jahangirpore elaka, which has for its centre the Mahadebpore thanna, he reports that the prospects are gloomy in the extreme, and he mentions fifteen villages in which he considers, from personal observation, that a one-anna crop is doubtful, and he names two where the seedlings were never transplanted at all, and where he saw them dried up on the ground.

Of the Baloorghat circle he only reports at second-hand, and mentions that three annas will be the probable outturn; and of Badalgachi, which he has himself visited, and which has facilities for irrigation, he estimates eight annas of an average crop. Taking it altogether, and dividing the estate into the three natural geographical divisions into which it falls, Mr. Ricketts estimates—

Baloorghat	3 annas
Mahadebpore	6 ,,
Badalgachi	8 ,,

or on an average a little under a six annas crop all round.

I have not received the Sub-Deputy Collector's report in time to incorporate with this I will, however, send its substance separately when I receive it.

I may mention, as I have already informed you demi-officially, that I have been fortunate enough to be encamped near a large mehal at Kantanuggur, where I had an opportunity of conversing with people from all parts of the district. I spoke to them on the road and in the mehal, and without their having the least opportunity for making collusive statements.

They nearly all said the same that the paddy on the high lands is totally destroyed; that on the lower grounds will yield about a four-anna crop, whilst the paddy in the *bhils* will be fairly good. I think myself that, taking good lands with bad lands, the outturn of the district will be half an average crop or a 6-7 annas crop on the usual estimate. This is taking the entire outturn of the district altogether, but I fear that in some parts, where *bhil* land is scarce, the outturn will be only about a four-anna one. I have made, as far as I can, allowances for exaggeration, and this is the result at which I have arrived.

Stocks.—In your letter under reply, you desire me to consider how far this failure of the crop may tend by means of increased prices to increase the comfort of the ryot, and to render him better able to meet the demands against him. On this point I will quote the various managers first before giving my own opinion.

Chooramon.—Mr. French reports that on this estate there are 22,200 tenants holding jummas. Of these, about 5,550 are likely to hold about one-fourth of the rice they will require for their own consumption. About 16,650 are pretty well to do, and are likely to have enough paddy with the crop they are about to reap to keep them going until the *bhadoi* comes in the September. The manager estimates the stocks as follow:—

	Mds.
In the hands of well-to-do ryots	299,700
Poorer ditto	24,975
In golahs partly owned by head ryots and partly by outsiders ...	50,000
Total ...	374,675

It has been reported to me, with what truth I know not, that some of our Chooramon ryots took their rice for sale to Maldah, but were obliged to bring it back, as orders had been issued in that district fixing a rate above which paddy was not to be sold. It is a fact that they brought their grain back, and it is also a fact that I myself saw and spoke to cartmen coming to the north of this district from the south of Maldah with grain for sale, and these men gave me the same reason for being at such a distance from their homes. High prices

of course will increase the ability of the better class of the ryots to pay, but this will be materially interfered with if the course of trade is checked by any artificial means. Whatever may have been the reason of these Chooramon tenants returning from Maldah, it is certain that the expenses of the journey to and fro will affect the profits they will make on their paddy. Mr. French says that some 1,390 men have been reported to him as willing to come on road work. He doubts the fact himself, and is about to put it to a practical test, the result of which will be duly communicated to you. Mr. French is inclined to the opinion, in which I also concur, that nothing but sheer starvation will bring ryots on to road work, and that we are safe from such a state of things in his part of the country until March or April next, or even until May. They will sell everything first before they will turn out as coolies.

Sunkerpore.—The manager of this estate goes into an elaborate though fallacious calculation to show that 87 per cent. of his ryots have no stocks at all. I presume he means no stocks beyond what will feed themselves: but, as this is what we wanted to find out, his calculation is comparatively valueless, seeing that he calculates the maintenance of a family, adult and infant, at Rs. 2 per head per month; the calculation is worthless. I, however, met several ryots from that part of the country, and they said that all the ryots, except those who were just above the status of day labourers, had supplies to last them for three months, and that the stocks ranged (apart from those in the golahs) from a three months' supply in the hands of the poorer ryots up to a full year's supply in those of the well-to-do men. This bears out Mr. French's observations that for three months at least the worst classes of ryots have what will feed them. I have been told that in this part of the district there are men willing to work on the roads. It may be so; but I have subjected the theory to a practical test, and will communicate the result. I have also directed the manager further to enquire and report on stocks in the hands of ryots.

Hurripore.—The manager of Hurripore is somewhat contradictory in his statements. He first says that until May next there will be no pressure on the people. In this he is probably right; but he then goes on to say that after careful enquiry he can only ascertain that some 5,000 maunds of paddy are in the hands of the ryots and some 45,000 maunds stored in mahajans' golahs. He verbally propounded what he considered a simple solution of the difficulties with which we are threatened by requesting me to stop exportation. My own impression is that there are, as far as I can make out, two classes of ryots in this district. The one is comparatively well to do; those who compose it first store what rice they think they shall require for the year and sell the balance. These are men who will benefit by the misfortune of their neighbours. They will sell their surplus grain at high rates. They will always be in a position to borrow. These men may safely be left out of count in reckoning for any future distress. They form 75 per cent. of the Chooramon ryots, and I think the calculation may be accepted for the rest of the district. In this district there is land and to spare, and the cultivators are alive to the fact. They have hitherto held lands on easy terms, and if they have not put by money or grain, there credit is sound and they can tide over one bad year. There is another class, those who put by from crop to crop. They do not live an exactly hand-to-mouth it is true, but they save from one crop what will tide them over the next. These are the men amongst whom distress will appear, if it appears at all, and it will appear after they have sold all their belongings and have no other means of livelihood apart from daily labour. I write under a deep sense of responsibility for what I am writing. Two out of the three managers under me report the existence of no stocks between the people and starvation. But giving every weight to the opinions of those gentlemen, I cannot but think that they have been led away by compassionate zeal for the ryots of the estates which they manage, and that things are not so bad as they really seem. I have seen ryots at this very Kantanaggar fair coming from these tracts where famine is supposed to be imminent. They are, it is true, the better classes of ryots, whom, as I have been informed, a sense of gratitude for high prices has induced to pay their thank-offering to the Thakoor. My observations induced me to believe that they are well off, and are prepared to bring the various piece and other goods which I saw exposed for sale. However it may be, I take the responsibility of saying that, apart from the coolie class, of whom there are very few in this district, we shall have no distress amongst the cultivators before the end of March; that then we shall have distress only amongst the class of ryots immediately above the status of coolies; and that, unless a failure of the *bhadoi* and another drought takes place, this will be the extent to which famine will touch this district. Prices will undoubtedly be light, luxuries will have to be curtailed, but anything like absolute starvation will not prevail. I am as it were forecasting events according to my lights. I do so after much reflection. I shall not, however, hesitate to report later on if I find my ideas have been wrongly reasoned out, and that I have erred on the side of caution in my reply to your letter.

I am asked by the letter of Government under reply to state what the probable price of food-grain will be during the coming year. The question is one which no man can answer. One of the managers puts down 8 seers to the rupee as the probable selling value of rice in the estate under him. He gives no data for his opinion, and apparently answers to fill up the column under which his answer is required. In this district there is one cause influencing prices—that is the payment of grain wages for reaping the *amun* harvest. Hitherto this has been reaped by Nagpories and Beharies, and these men at the end of their service rush all the dhan that they earn on the market and convert it into rupees to take home with them. It remains to be seen whether local labour will not this year take the place of this foreign labour, and whether the grain, so much as it is, will not be taken home by local labourers and consumed

in their own houses. This influence is, however, but temporary, and is seen in January. I cannot forecast prices, and I do not wish to do so on guess-work which may be found to be utterly fallacious. The prices prevailing now on an average 25 30 for paddy and 10—12 for rice. I see no immediate cause for a rise or for a fall, and that is all I will say. It is simply impossible to make a further forecast The circumstances of neighbouring districts, the influx of foreign competition in the shape of merchants coming into this district, tend to bring up the prices of grain In fact, all the accidents of trade render it impossible for me to fix any rate at which rice will presumably sell during the year, and so I consider that any opinion I might express would be mere guess-work, and useless to Government for the purpose of the enquiry it has on hand.

Your paragraph 3.—Rain undoubtedly failed throughout the district, notably in Chooramon and Sunkerpore, for transplanting. Transplanting had to be done at the last moment.

Since writing the above, I have received the Sub-Deputy Collector's report. He has been over a greater part of the district and has arrived at the same conclusion as I have regarding the probable outturn. He estimates that four houses in every village have a 12 months' supply, and that altogether there are 11 lakhs of maunds in the hands of the cultivators, and, taking all the grain in the golahs, there are 36 lakhs of maunds in the district. This is, I think, a fair estimate.

He reports distress amongst the labouring classes in Porsha and Neetpore, and in the south-west corner of the district generally. I have taken measures to provide labour on surface repairs to main roads and on village roads.

Thannas Birgunge, Thakurgaon, Peergunge, and Ranisankoil are fairly well off, as are parts of Chintamon, Nowabgunge and Gangarampore.

REPORT OF THE COLLECTOR OF RAJSHAHYE.

I HAVE the honour to report that the *bhadoi* crop suffered in June and the commencement of July from short rainfall, but improved towards the middle of the latter month. It is considered to have yielded three-quarters of an average crop in Nowgong, where, however, the cultivation is not extensive.

In the head-quarters and Nattore sub-division the outturn was smaller, probably not more than three-eighths of the average.

Although the rainfall was scanty, its early distribution was such that nearly a full *amun* paddy crop was planted out. The almost entire absence of rain in September and October has caused the destruction of the greater part of this.

The *amun* paddy of the district may be divided, broadly speaking, into two varieties—one planted in the *bhils*, of which the largest lie in the Nattore or eastern side; the other on the terraced uplands of the Bhurind, which runs from the west of the district in the Godagary thanna round the north through thannas Panchoopore and Manda as far east as Singra.

The *bhils* were not fully flooded this year, but Nattore was not so much affected as the head-quarters and Nowgong. Its *bhil* crop is said to be an average one, while in the two other sub-divisions only the paddy of the deeper *bhils* survived, and not more than one-fourth to three-eighths of an average crop can be reaped. All over the Bhurind the crop which could not be watered from the shallow tanks studding the higher lands gradually withered off. The general estimate in each of the sub-divisions is four annas of an average I have myself verified this in the Godagary thanna.

The failure of rain has affected the *rubbee* both as regards the quantity of lands sown down and the probable outturn. The deficiency in quantity of land in the head quarters and Nowgong is about three-eighths; for Nattore it has not been stated. Without rain the total crop is not likely to exceed half the average.

Boro dhan seedlings have not been transplanted as yet. There is nothing against the crop being a good one. As bearing on the general wealth of the district, I note that the jute crop has been good, and the trade active. The silk factories have had an unusual season, working almost without intermission. Sugarcane is said to promise well, and ganja, although a smaller area than last year has been planted, will be an average crop if the Christmas rain falls.

With the short notice given, it is not possible to hazard more than a rough guess at the stocks of grain in the district. The police have given returns obtained by sending constables round to all the hauts to enquire, but these are on the face of them obviously incorrect.

They make out the entire stock of the district to be only—paddy 2,13,677 maunds, rice 6,143 maunds. There is no doubt these are largely under-estimated.

The Sub-Divisional Officer of Nattore puts the stocks of his side at a lakh-and-a-half of maunds. In the Bhurind the crop last year was short, and though in some cases the villagers in that direction are at present refusing to part with their grain, and carts return empty, export to other districts still continues. On the whole, from the general enquiries made, I see no reason for anxiety as to the supply of grain for the district during the coming year.

It is impossible to predict the range of prices beyond next June, when everything will depend on the regularity or otherwise of the monsoon. As far as can be judged at present, I should say the highest prices have been already reached, and that, if anything, they will have

a tendency to fall after the reaping of the *amun* paddy. There may again be a partial rise in February and March, but it is not likely to overtop the rates now ruling. These are—

	Common rice. S. ch.	
Nattore	13 8	per rupee.
Nowgong	14 0	ditto.
Sudder sub-division	14 0	ditto.

With regard to paragraph 4 of your letter, the Bhurind is the only part of the district in regard to which there appears reason for anxiety. Its inhabitants are almost entirely dependent on the one crop of *ropa amun*. Last year the crop was not a good one, and this year there will be only about four annas. The people are of low castes very improvident, and the dhangars do not invest in ornaments, so that they have nothing beside their cattle to carry to their mahajans. They will not be able to repay their last year's advances and mahajans in many cases will not give further advances until they see next year's crop on the ground. On the other hand they take readily to spade labour, and can be easily provided for by excavating tanks and on road work. I have called on the Sub-Divisional Officers to impress on local landowners the advantage of having the half-silted up tanks dug out during the coming season of cheap labour. The matter has been taken up in the Ward's Department, and I have, in consultation with the District Engineer, kept back funds allotted to roads in that part of the district until we can see where they will be most required.

REPORT OF THE MAGISTRATE OF PUBNA.

THE rainfall this year has been abnormal. It has not been deficient to any great extent, but while in May and July we had excessive rain and heavy floods in the former month, in August, September and October the fall was scanty. The early cessation of the rains—very little having fallen in September and hardly any at all in October—combined with a deficient supply of spilt water from the rivers, has had a very bad effect on the *amun* rice crop. I send a statement of rainfall month by month for 1882 and 1883 for comparison.

The *aus* rice crop reaped in July and August is not an important one in this district, as the bulk of the land is kept for *amun* rice or jute. The floods in May and the irregularity in the season generally damaged it, and the outturn is estimated at 10 annas.

The most important crop is that of *amun* rice reaped in November and December. There is very little transplanting in this district, the greater part of the crop being sown and reaped on the same ground. The area under transplanted rice has not suffered specially, as there was sufficient rain in the early part of the season for sowing and transplanting operations.

The *amun* crop has suffered from the early cessation of the rains, and the want of spilt water from the rivers; which is depended on over a great part of the Serajgunge sub-division for the successful cultivation of this crop. The parts worse affected are the high lands on the northern borders of the district in thanna Baigunge. Here the outturn is not expected to exceed 6 annas. Elsewhere we estimate that half an average crop or 8 annas may be housed. For the whole district this would give us slightly under 8 annas, but nearer 8 than 7.

The prospects of the winter crops are so far fairly good, but much depends on whether we get a fall of rain before the end of the year. There is at present a want of moisture in the ground, but a few light showers would set this all right.

Stocks are not large in the district owing to the extensive cultivation of jute. Rice is also always imported from Bogra and elsewhere for the supply of food to the people. The larger ryots have a certain amount of reserve in stock, but as a rule the people, it is said, are now subsisting on their current year's harvest, which may last them till March, and from that time till they reap next year's *aus* crop in June and July they will have to depend on the sale of such winter crops as they may get, or on advances for their future rice crop. Nothing, however, is definitely known about stocks, and as prices rise hidden supplies will doubtless be brought to light. The Joint-Magistrate of Serajgunge, who is now encamped on the borders of the Bogra district, from which we always get a large supply, reports that there are said to be extensive stocks there. The earliest millets which are sown on the eastern churs in February become available in April.

As regards prices, this must necessarily depend very much on those ruling in other districts from which we get much importation. It is estimated that in the Sudder sub-division prices will range from Rs. 2-12 to Rs. 3-12 a maund. In Serajgunge sub-division they will probably go higher and reach Rs. 4 a maund.

The jute crop this year has also been a bad one, and prices have risen from Rs. 2-8 to Rs. 6 a maund. This ought to have put the cultivators in sufficient funds to tide over a bad rice season, but Mr. Farrer reports that old stocks were generally sold at Rs. 3 before the late rise, and so the ryots did not get the full benefit of it. This may be so to some extent, but I expect a fair share of the profits has found its way into the possession of the cultivators, and in any

case I do not suppose they will have any difficulty in borrowing what money they need as advances on future crops.

Rainfall—January to December.

REPORT OF THE MAGISTRATE AND COLLECTOR OF BOGRA.

I HAVE consulted all the leading zemindars of the district, the agent of the great Dighapatia Estate, and some of the principal merchants, jotedars, and legal practitioners. I have also made enquiries through the police, the education, and other inspecting officers, and the following is the result.

Outturn of the aus *crop.*—In the aluvial (Poli) tract to the east of the Karatya, the area of *aus* cultivation to that of *amun* is about 10 to 6. The extent of *aus* in that part was somewhat larger this year than usual, owing to the low prices of jute last year. This year less of that crop was cultivated than in former years. Taking 12 annas as the yield of an average crop, I estimate the outturn from that part of the district as 12 annas, and had it not been for want of rain at the earing of the crop, it would have been a bumper crop of 16 annas. In the part of the district west of the Karatya, and locally known as the Khair (stiff clay soil) tract, the proportion of *aus* to *amun* may be approximately estimated at 3 to 13, and the outturn of the crop was about 8 to 10 annas. The average yield of *aus* crop for the whole district I estimate at about 11 annas, or nearly an average crop.

The outturn of the amun *crop.*—Judging from the above-mentioned reports received from those I consulted, as well as the result of my personal inspection, it appears to me that the outturn in the worst parts of the district will be about 2 annas, and that of the best about 10 annas. In the low lands near the rivers and *bhils* in the eastern part of the district the crop will be an average one, and generally there will be an 8 or 10 annas crop in thannas Shariakandi and Shibgunge. In the Panchbibi and Badalgachi thannas, and all along the southern portion of the district, the outturn will be only about 2 annas and 3 annas about Bogra town and neighbourhood. On the whole, I estimate the *amun* outturn for this district taking 12 annas as an average crop, at about 4 annas; consequently at about one-third of an average crop. The police estimate is considerably higher, namely about 6 annas, and Baboo Rada Raman Moonshi gives also that figure; but the other persons consulted estimate the outturn at 4 annas or less. I myself am quite satisfied, from what I have seen and heard, that this district's outturn cannot be so high as half of an average crop. The police estimate is as follows:—

	As.
Bogra thanna	5
Sherepore ditto	3
Shariakandi ditto	8
Shibgunge ditto	10
Khitlall ditto	6
Panchbibi ditto	6
Adamdighi ditto	4
Badalgachi ditto	4
Doopchanchia outpost	6
Madhupore ditto	6
Dhunat ditto	2

Some of these figures are obviously wrong and in excess; for instance, in Panchbibi, which is estimated at 6 annas, the manager's estimate is only 2, and Mr. MacDonald, Mr. Wyndham's agent, estimates at only 1 anna. In connection with the matter I would beg to call your attention to the fact that, though the Shariakandi and Shibgunge outturn is considerable in comparison to the rest of the district, yet it should be remembered that the principal crop of Shariakandi is the *aus*, not the *amun*. There is also a good deal of *aus* in Shibgunge, and the total area of that thanna is very small. Again, in many of the fields ears have formed, yet for want of moisture there is no grain.

The rainfall during the last rains was much below the average as is well known. In thanna Panchbibi, from the 1st of June up to date, there were only about 28 inches. The

rains commenced unusually early, and generally speaking the rain was sufficient for sowing and transplanting, but the latter operation was much retarded for want of sufficient rain in the month of June and the first half of July. In thanna Panchbibi and outpost Dhunat especially there was a want of rain at the transplanting time, the result being that much of the land there remained unsown.

The state and prospects of rubbee *crop.*—This crop is grown only to a very limited extent in the Khiar portion of the district, and owing to the want of moisture in the soil, caused by the early cessation of the rains, the state and prospect of the crop are reported as very unfavourable, except in thanna Shariakandi and outpost Madhupore. In some places the seed sown has not germinated. The outturn cannot now so early be ascertained with any accuracy, but it is not at all likely in any case to exceed 8 annas. The sugarcane also is stated to have suffered a good deal from the want of rain.

Grain stocks.—The merchants of this district usually sell off their stored rice in the rainy season; very little remains in their hands after the poojahs. Cultivators and ryots of the better class sold a great deal of rice to great advantage when the prices rose to 16 local equal to 12 Calcutta seers after the last Doorga Poojah. The stocks now in the district according to those best calculated to judge are only small, and on the whole are not likely to exceed two months' consumption. The quantity required for two months' consumption is about 10,00,000 local 7,50 000 Calcutta maunds. It is not at all probable that at present there is more than this quantity in the hands of the people. It may be expected that with the outturn of the *amun* those persons who have stocks, but who are the minority, will be able to manage till the next *bhadoi* crop. It should be remembered that the late export of rice has considerably reduced the stocks in the district, and that the poorer class of ryots have suffered proportionally more from the failure of the *amun* crop than the well-to-do ones. For this latter class generally has the best rice lands, namely the low lands, while higher rice lands are generally owned by the poorer ryots. In the Poli tract, where several kinds of crop are cultivated, the failure of the *amun* will not so much affect the people, and nearly half of the district is composed of this description of soil; but in the Khiar tract, and especially that part of it where the *amun* failed last year for those ryots who have no stocks, for the labouring classes, and the beggars, the prospects, owing to the failure of the *amun* crop and the high prices of food, are very gloomy, and I much fear that later on extreme want and scarcity will be felt by them, and complaints of want have already reached me.

Probable range of prices during the ensuing year.—Before the Pous kist, which falls due on the 12th of January, prices will fall, as the ryots will sell a portion of their produce to pay their rents; but after that prices will again begin to rise. Early in January the prices of rice will be about 18 to 22 Calcutta seers; in March and April they will probably rise to 12 or 14 seers; and in May and June they may even reach 9 or 10 Calcutta seers per rupee.

REPORT OF THE COLLECTOR OF RUNGPORE.

1*st.*—*The* bhadoi *crop.*—The early rain enabled the *bhadoi* sowings to begin in unusually good time. The crop had the most favourable alternations of sunshine and rain, and wherever I saw it was a decidedly good one. The crop was harvested for the most part in fine weathere so very little of it was damaged.

This remark applies to the sudder sub-divisions, the Nelphamaree sub-division, and th northern portion of the Kurigram sub-division.

A smaller proportionate area of the Gaibanda sub-division and of the southern portion of the Kurigram sub-division is devoted to *bhadoi* crops; consequently those portions of the district, although they had the same favourable weather as the rest of the district, are not so well stocked with food-grains produced in the *bhadoi* crop.

I should therefore estimate the outturn of the *bhadoi* crop for the whole district as a 10-anna crop at the least.

2*nd.*—The *khurreef* had a very favourable sowing time, but then there was a break in the rains, so that the transplanting was very much delayed, so much so that the seedlings in the nurseries had in many instances grown too large to be transplanted with success. When at last rain did come the transplanting was hurried on, but for lack of suitable seedlings the area transplanted was under the average.

Now, the rice on the higher lands has completely dried up, so much so that the cultivators have given up all hopes of saving it, and have turned in their cattle to graze it down.

The crop in the low lands is stunted in growth and very yellow. Rain *now* would hardly save it. The outturn of this crop on the low lands will be a 4-anna one at the outside.

3*rd.*—The present dry cold weather is favourable to the *rubbee* sowings, but to ensure germination and a good crop we must have rain before the end of November.

4*th.*—The jute crop has been small in quantity, but good in quality. The fall in price last year frightened many of the cultivators into sowing down a much smaller area with jute than usual.

5*th.*—Whether ryots in this district have or have not stocks of rice, I am not in a position to say; if they have such stocks, they are carefully buried out of sight, and the owners positively deny the possession of any such stocks.

The well-to-do ryots in the north and west of the district *may* have such stocks, but I think, I may say, I am *sure*, that those in the southern and eastern portions of the district have nothing of the sort.

The large dealers have stocks quite sufficient, I believe, to feed the people if they do not combine to raise the price beyond the reach of the poor. In the southern portion of the district, and notably in Gobindgunge thanna, the ryots at the best of times are miserably poor, in spite of low rents and good landlords. They seldom have more than one meal a day. Their clothing is of the scantiest description, and very few possess such a thing as a brass *lota* or *thali*.

6*th*.—The coarsest rice is now selling at Rs. 4 per maund, whereas the average price in 1873-74, the famine year, was Rs. 3 per maund.

7*th*.—Under the circumstances, though I have reason to believe that the ryots in the north and west of the district will be able to tide over this bad season, I fear that those in the south and east will be reduced to great straits.

8*th*.—Immediately your inspection of my office is over, I shall start down for Gobindgunge, Gaibanda, and Walleepore, and shall then be able to report to you more fully from my own personal observation.

REPORT OF THE DEPUTY COMMISSIONER OF JULPIGOREE.

The rains do not appear to have ceased earlier than usual, except in the parts of the district comprised in the thanna of Shikarpore and outpost of Tetuiya, and in pergunnahs Boda and Patgram, where it commenced late and ceased earlier than usual. In the Alipur sub-division and Mynagori tehsil the rains continued even later than usual, though in the latter it commenced a little behind the usual time. There was no want of rain for sowing or the transplantation of the seedlings, except in pergunnah Boda, where the transplantation of the seedlings was somewhat delayed. The actual area under the *amun* rice, however, does not appear to be smaller this year than usual. There was an entire absence of the usual rainfall in the early part of November, when it is of the greatest benefit to the paddy in high land in forming up the grain in the ear and in generally giving vigour to the maturing plants. This, it is feared, has tended to diminish the quantity of produce on high lands. This, however, has protected the crops on the low lands from such damages as these rains would have caused, and it is expected that the increased outturn of produce on low lands will nearly balance the deficiency of the outturn on the high lands. From the reports received it appears that the *amun* rice crop is expected to be an average one, *i.e.* about 12 annas of an usual full crop. In the Alipur sub-division slight injury by caterpillars is reported, but otherwise the crops are stated to be good.

The late *bhadoi* crop was throughout the district a short one. It was almost everywhere below the average, the proportion ranging from 6 to 8 of an average crop. This was due to heavy and continuous rains during the weeding season and scanty rainfall in September.

The reports received from different parts of the district show that there are not any considerable stock of rice in the hands of the people except in the pergunnahs of Boda and Patgram, where some of the ryots have large stores of grain. The *bhadoi* crop being a short one and insufficient to meet its share of demand for home consumption, the people have used up their little stores in making up the deficiency, and those who have had no occasion to use up their store for home consumption have sold it, being induced to do so by the high prices prevailing since some time, and by the prospects of the *amun* crop which appeared promising in its first stages. It may be safely stated that there is not much of the old stock in the hands of the ryots except in a few cases, and of what there is very little is likely to be available for sale.

Of the winter crops the *kalai* and the mustard can only be taken into account. The *kalai* is not extensively grown in this district, but its prospect up to this time is good, though it will suffer if there be no rain on an early date. As regards the mustard, it is not yet possible to say anything, as it is still being sown. If the rains hold off, the mustard crop will also be a short one. There is not much vegetable grown in this district, but as far as they go they are reported well.

The price of rice has been steadily rising since August last. The price generally rises from March to August when, with the harvesting of the *bhadoi*, it falls and remains almost stationary till December, when it begins to fall with the *amun* harvest, and by February reaches the lowest limit. This year it had no perceptible fall with the *bhadoi* harvest, and it is feared it will remain 25 to 50 per cent. higher than the usual ruling price during the cheapest season, *i.e.* in January and February next. The usual price for ordinary rice when it is cheapest ranges from Rs. 1-4 to Rs. 1-8; during the ensuing season it is likely to range from Rs. 1-8 to Rs. 2. In considering the price of rice the influence which the state of the market in other districts bear upon it here need be taken into account, and, therefore, as far as the quantity of outturn is concerned, the price is not a proper index to it. If the present high prices continue in other districts it is unlikely that it will be otherwise here: but as the price is a matter of no consideration to the great majority of the cultivating classes who use their own produce, no general hardship is likely to be felt even if the high price is maintained. On the other hand, as the yield of the ensuing harvest is not likely to be short of all local requirements, there is no ground to fear that there will be any actual hardship consequent on any slight deficiency which may occur. As to the temptation of selling off the produce without regard to their own need, it is to be hoped the ryots generally have had a lesson during the scarcity of 1873-74 which they have not yet forgotten. Upon the whole there does not appear to be reason for any anxiety as regards this district.

The above has been completed from answers to questions sent by the Deputy Commissioner from the Sub-Divisional Officer, Alipur, the District Superintendent of Police, the Tehsildar of Mynagori and the Manager of the Chaklajat Estates, as well as from such information as I (the Deputy Commissioner) myself was able to gather in course of conversation with people I happened to meet.

REPORT OF THE DEPUTY COMMISSIONER OF DARJEELING.

I DEAL with the Hill Tracts and the Terai separately.

In the former there is certainly no cause for anxiety. The rainfall of the past season has, it is true, been abnormal, being excessively heavy in June and unduly light in September and October; but the crops have not suffered to any dangerous extent. The principal crop of the rainy season is Indian-corn. This was about a 10-anna crop all round. The price of *makai* has risen in the Darjeeling market very rapidly in the course of this month, and is now quoted at 16 seers to the rupee; but this sudden rise is due, I believe, chiefly to the determination of the cultivators to hold this year's stocks having declared itself rather suddenly. *Murwa* or the lesser millet is another principal food-crop of the hills. Some of it is grown early, some late; and neither crop is said to have suffered much. The rice of the hills is grown chiefly on terraced fields subject to irrigation, and though it would of course have been better for rain in October, it is not likely to be much, if at all, below a 10-anna crop. The rice grown in the hills, however, bears a very small proportion to the consumption of these tracts. The bazar rate will depend entirely on the prices which may rule in Northern Bengal. The price now quoted is ten seers to the rupee. My office records show this to have been the price in November 1874. Allowing for the improvement of communications, one would hardly have expected it to have reached this rate already; but I see no cause for anxiety in this. The mass of the population of the district is located on tea-gardens, the owners of which will take very good care that their coolies get supplies at a rate which will prevent their leaving the gardens. All that is perhaps necessary is that Government should keep the planters informed of the stock of rice in North Bengal so far as this can be ascertained, and of the probable range of prices throughout the year.

As to the Terai, the remarks at the end of the last preceding paragraph apply to the northern part of this tract which is studded with tea-gardens. The central and southern portions of the Terai require most attention as under native cultivation. The rainfall in this tract, from April to October of this year, was 96·63 against 128·99 in 1882. In September and October it was only 5·87 against 35·52 in the previous year; so that the deficiency occurred almost entirely at the end of the season.

Two rice crops are reaped in the Terai, but the early or *bhadoi* harvest is a very small one, contributing, in the opinion of the Deputy Collector, who has been many years there, hardly 1-16th of the whole outturn. Excessive rain in June damaged this crop by preventing weeding, and the yield is reported as not having exceeded 12 annas of an average crop. The main rice crop known as *haimanti* is reaped in the course of the next two months. As regards this, the Deputy Collector reports that on irrigated and low land the crop is likely to be about 10 annas of an average crop, and on other lands 6 to 8 annas. Fortunately, the irrigation channels in the Terai, except in two central mouzahs, are numerous, and altogether, I think, we may safely hope for a 9-anna crop.

This, I hope, means that the jotedars will have enough grain for themselves and their ticcadars and adhyadars, but they will have none for export. Storing rice from year to year is almost unknown in the Terai; and I agree with the Deputy Collector and Mr. Norton in thinking it unlikely that there are any stocks to come out. Common rice is now quoted at 11 seers to the rupee. This was the price at this season in 1873, but it is, I think, likely to fall directly the new crop comes in.

The cold-weather crops of the Terai are unimportant and contribute but little to the food-supply.

Altogether, I agree with the Sub-Divisional Officers in thinking that there is no cause for serious anxiety in the Terai. In two or three mouzahs we may have to be somewhat lenient in our collections, but this, I hope, is all the help our ryots are likely to want.

I have confined myself to a "general statement" of the outlook in accordance with the circular, as the prospect cannot be considered really "bad."

No. 7160C, dated Chittagong, the 1st December 1883.

From—E. E. LOWIS, Esq., Commissioner of the Chittagong Division,
To—The Secretary to the Government of Bengal, Revenue Department.

WITH reference to the Government circular No. 97—R, dated 23rd October last, calling for a report on the state and prospect of crops, I have the honour to report that the early cessation of autumnal rain this year has not generally affected the crops in the districts of this division.

2. On receipt of the circular, I called for reports from all the district officers of this division. From the reports received, it appears that the outturn of the last *aus* crop was generally fair. The state and prospect of the coming

amun crop are also satisfactory at present, although there has been no rain within the last six weeks or so. It may be anticipated that, on the whole, the outturn of this crop will be an average one if no accident happens. No apprehension of any scarcity is felt in any of the districts of this division.

3. The people of the districts of this division are reported to possess sufficient stocks of grain in store. In consequence of the extensive purchases made in the market, the price of rice is gradually rising.

4. There has been some delay in submitting this information, owing to delay in obtaining an answer from Noakholly Collector, who was absent on the islands.

No. 96R—T, dated Camp Bhagwanpore, the 28th November 1883.

From—J. F. K. HEWITT, Esq., Commissioner of the Chota Nagpore Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to submit the folllowing report regarding the prospect of the crops in this division, called for in your No. 9T—R, dated 23rd October 1883.

2. The Deputy Commissioner of Hazaribagh reports that there has been a partial failure of the *bhadoi* crops along the northern portion of his district, from thanna Huntergunge on the north-west to Gawan on the north-east. He states that the *dhan* on the low lands has not been injured and is estimated to yield a 12-anna crop, but that the upland *dhan* has partially failed, and is estimated to yield not more than 8 annas. The effect the late rainfall has had on the prospects of the *rubbee* crops is not yet reported to him. He also states that the cultivators will suffer some scarcity, but there can be no apprehension of its approaching to anything like famine. The price of common rice at Hazaribagh is from 13 to 14 seers per rupee, and a few miles out of the station it is 15 to 16 seers.

3. The Sub-Divisional Officer of Giridih states that the early cessation of autumnal rain has affected the *dhan* crop on the high lands more or less all over his sub-division, and will also affect the *rubbee* crop to a certain extent. The *bhadoi* crop this year was a full one. A good deal of *dhan* on the deep low lands will be saved, and at least a 4-anna crop will be realized in the worst parts. The worst reports are from thannas Khurruckdiha and Gawan. Baboo Satya Tarun Mookerjee, Sub-Deputy Collector, was deputed to make special enquiries in these thannas, and also in Kodurma, and he reports that the rice crop in Gadi Domchanchi in Kodurma, in the Kodurma Government villages, in Satgawan, and in the west part of Gawan is a total failure, but the east part is not so bad. He also reports that in Gadi Satgawan the last year's rice crop was a total failure, and that this year only an 8-anna *bhadoi* crop has been reaped.

4. The distress in the sub-division is apparently limited to Kodurma, Gadis Domchanchi and Satgawan and part of Gawan. The Deputy Commissioner says that road works are necessary in the affected parts, and that the roads most required are from Domchanchi to Gawan *vid* Dhorinji, Khurjori, and Khurruckdiha, and from Gawan *vid* Dorunda to Dhunwar.

5. Rain fell all over Dumri, Giridih and Kodurma thannas on the 31st October and 1st, 2nd, and 3rd November last, and is considered sufficient for sowing *rubbee* crops. Considering the excellent outturn of all harvests last year, and the full *bhadoi* crops this year, the sub-divisional officer is of opinion that the partial failure of the rain and *rubbee* crops will nowhere amount to famine, so as to necessitate relief works, and that it will not affect the cultivating population, but only the labouring classes who, however, have the option of working in the coal mines where there is room for great increase of work. The partial scarcity will probably affect payment of rents and prices of food. The local grain stock is considered sufficient to meet local requirements in the coming year.

6. The Deputy Commissioner of Lohardugga reports that very little *rubbee* is grown in the Sudder sub-division. The *bhadoi* crop was under an average, having suffered from too much rain in July and too little in August. The winter rice has partially failed, the loss being most severe in the tracts about Lohardugga, Chundwa and Kuree. Within a radius of six or seven miles

of the town of Lohardugga, the destruction of the crops has been widespread, but Mr. Officiating Deputy Commissioner Mackie, who has visited these parts, reports that no anxiety need be felt, as the comparatively high prices now ruling have already stimulated emigration.

7. In pergunnah Tori the manager of the Chota Nagpore estate estimates that an 8-anna crop will be reaped Mr. Power has just visited parts of Ranchi, Tamer, and Khuti police jurisdiction, and he says the inhabitants there expect a 10-anna crop.

8. The prices of rice range from 16 seers at Ranchi to 30 seers at Beeru. They are lower than in November 1873. The failure of the rice crop in the tracts about Lohardugga will affect payment of rents by the ryots. He cannot give any information about food stocks in the district.

9. In the Palamow sub-division the prospects of crops were gloomy until 31st October, but the heavy rainfall of the 1st and 2nd November completely altered matters. It saved the winter rice which was beginning to wither in parts and enabled the *rubbee* to be sown. Mr. Kenny estimates about a 10-anna rice crop will be reaped all round. In the driest parts of Palamow (Gurwa and Majheawan thannas) at least an 8-anna rice crop will be reaped. The *rubbee* is the most important crop in Palamow, and considering the good seasons of the past few years, and the prospect of a good *rubbee* crop this year, there is no cause for anxiety, and the prices which had greatly risen are expected to be steadier before long.

10. The Deputy Commissioner of Manbhoom reports that the *bhadoi* crop was an average one. The *khureef* (winter) crops have suffered from want of rain late in the season, but some good was done by the rain which fell in the beginning of November. Taking upland and low land rice together, not more than 4 to 6 annas loss is anticipated. The *rubbee* crop is a very unimportant one in his district. No information of grain stocks has been given. The prices range from 18 to 20 seers A good deal of export to the eastward has forced up prices, but it is expected the market will soon become steadier and the prospects more defined.

11. The Deputy Commissioner of Singbhoom reports that regular rains ceased practically by the middle of September. The rice crops have suffered from want of rain more or less all over the district. The estimated loss, taking one part of the district with another, is from 4 to 6 annas; allowing for exportations to other districts, the outturn of rice and other food-grains will more than suffice for local requirements. Heavy exportation of rice is expected during the next several months, and prices have commenced to rise. The present price of common rice is 24 seers the rupee. The Deputy Commissioner thinks that before the next year's crops are ready rice will probably be selling from 15 to 16 seers per rupee. He has no reason to think that the prices will be higher.

12. I myself have gone through many of the villages of Tori in the Lohardugga district, and through a considerable part of Palamow. In many of the villages of Tori I doubt whether there will be 8-anna rice crop, but in Palamow the crops are generally quite as good as they are about Ranchi, where there is quite a 12-anna crop. I have written to the Deputy Commissioner about the villages in Tori, where I have found the crop to be a failure, and they will be carefully watched; but the population there is everywhere scanty, and the people did not seem to apprehend any great distress. In Serguja, where I am now, the crops in the north are generally good, but they are reported to be worse in the south, which I shall visit in a few days.

13. With regard to the remarks of the Deputy Commissioner of Hazaribagh about Gawan and Kodurma, I would say that the Gawan zemindar wrote to me at the end of October, saying that the rice crop in his estate was a total failure, and that unless there was rain there was no hope of a *rubbee* crop. He has, however, since written to me to say that sufficient rain for sowing *rubbee* has fallen, that rice is being freely imported into Gawan, and that he has now no apprehensions of any distress. I will myself visit this part of the country in the beginning of February next, when it will be possible to judge better of the prospects of the people than one can do at present.

INTERNATIONAL EXHIBITION AT THE CRYSTAL PALACE, SYDENHAM, 1884.

The 17th December 1883.—The following Resolution, recorded by the Government of India, in the Revenue and Agricultural Department, is republished for general information.

A. P. MACDONNELL,

Offg. Secy. to the Govt. of Bengal.

CIR. No. 89Ex.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department,—dated Calcutta, the 11th December 1883.

MUSEUMS & EXHIBITIONS.

RESOLUTION.

READ the following despatch—

No. 185 (Statis. & Comce.), dated India Office, London, the 18th October 1883..

From—Her Majesty's Secretary of State for India,
To—The Government of India.

I ENCLOSE a copy of a letter from the Crystal Palace Company with reference to an International Exhibition proposed to be held at Sydenham next year.

Dated Crystal Palace, London, the 12th September 1883.

From—G. G. CLEATHER, ESQ., Manager, Crystal Palace Company,
To—Her Majesty's Secretary of State for India.

I HAVE the honour to inform you that the Directors of the Crystal Palace propose to hold an International Exhibition of arts, manufactures, and scientific, agricultural, and industrial products at the Crystal Palace next year, commencing about April 3rd, and closing the end of October.

The Directors have appointed as Executive Commissioner Mr. G. C. Levy, C.M.G., a gentleman who has had considerable experience in the management of exhibitions.

The Directors venture to hope that your Lordship will notify to the Governor-General of India the fact that such an exhibition is to be held, with the view to his bringing it under the notice of the various Governments.

As it is important that no time should be lost, I shall be obliged by your giving the subject of this letter your earliest consideration.

ORDER.—Ordered that copy of the foregoing papers be forwarded to the Local Governments and Administrations noted in the margin, with a request that publicity may be given to them in the Local Government Gazettes.

Madras.	Punjab.
Bombay.	Central Provinces.
Bengal	British Burma.
North-Western Provinces and Oudh.	Assam.

Ordered also that the papers be published in the Supplement to the *Gazette of India.*

EXHIBITION OF SILK COCOONS AT BERHAMPORE.

The 18th December 1883.—The following notice relating to an exhibition of silk cocoons to be held at Berhampore, in the district of Moorshedabad, from January 14th to January 26th, is published for general information :—

NOTICE.

1. With the sanction of Government, an *exhibition of silk cocoons* will be held at Berhampore on the 14th January 1884 and 12 following days.

2. The following prizes will be awarded to successful competitors :—

2	prizes of	Rs.	75	each.	20	prizes of Rs.	16 each.
4	,, of	,,	50	,,	32	,, of ,,	10 ,,
8	,, of	,,	30	,,	64	,, of ,,	5 ,,
16	,, of	,,	20	,,			

Provided that the exhibits be sufficiently numerous and of sufficiently good quality to warrant the distribution of the prizes.

3. To each prize-holder a certificate signed by the Magistrate-Collector will be awarded.

4. All classes of silk cocoons (not Tassar) will be admitted to the exhibition.

5. Competitors must submit not less than 10 and not more than 40 kahans of dry cocoons. They should be sent or taken to the manager at the Government barracks at Berhampore, any day between the 2nd and the 12th January 1884, between the hours of 9 A.M. and 3 P.M. *None will be received after the 12th January.* Receipts will be given for those that arrive in time, and they will be kept by the Committee at the risk of the exhibitors. On the 28th January, *i.e.*, after the exhibition, the cocoons will be returned to the exhibitors.

6. No cocoons over 3½ pun chit will be accepted for exhibition.

7. Every lot of cocoons for exhibition must bear a chalan stating the owner's name, village, and thana, and the weight, chit, and estimated quality of the cocoons.

8. The exhibition will be open to the public, free, between the 14th and 26th January, from 10 A.M. to 5 P.M. (Sunday, the 20th January, excepted). Visitors will on no account be allowed to handle the cocoons.

9. Persons bearing special tickets signed by any of the Committee will be admitted to handle and examine the cocoons between 8 and 10 A.M. daily under special rules.

10. No claims for loss or damage will be entertained, and the judges' decision on all points will be final.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 15th December 1883.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
Burdwan Divn. 1	Burdwan, Dec. 15 '83	Nil	Weather—fine and cool. *Amun* crop is still being harvested with generally poor returns. Prospects of *rubbee* crops apparently improved in most places by the late slight rain. Public health fair.
Burdwan Divn. 2	Bankoora, „ 15 „	Nil	Weather—very cold. Harvesting of *amun* is going on; the outturn, as previously estimated, is eight annas on an average. Spring crops doing well. Public health good. Fever at Bishenpore reported to be abating.
Burdwan Divn. 3	Beerbhoom, „ 15 „	Nil	Weather—very seasonable. Harvesting of *amun* is still going on. Rain wanted for the *rubbee* crops. Price of rice rather lower. General health satisfactory.
Burdwan Divn. 4	Midnapore, „ 15 „	Nil	Weather—seasonable. Rice crop is being harvested. Cold weather crops in the Ghatal sub-division promise well. Public health improved.
Burdwan Divn. 5	Hooghly, „ 15 „	Nil	Weather—cold and clear. Outturn of the paddy crop about six annas. Prospects of the *rubbee* crops generally favourable No disease prevalent in any part of the district, except fever in the Jehanabad sub division.
	Howrah, „ 17 „	Nil	Weather— cool and fine. *Amun* is being reaped. Winter crops unfavourable. Public health good.
	Central Districts.		
Presidency Divn. 6	24-Pergunnahs, Dec 17 '83	Nil	Weather—cool and pleasant. Prospects of late paddy continue unfavourable. The late rain has done some good to the winter crops. Public health generally good, though there are some cases of cholera and fever in most parts of the district.
Presidency Divn. 7	Nuddea, „ 15 „	Nil	Weather—cold and clear. The winter crops, which had before germinated, are doing fairly well since the late rain, and other crops have been sown. *Amun* continues bad. Fever on the whole stationary.
Presidency Divn. 8	Khoolna, „ 15 „	Nil	Weather—cold and dry. Rice harvest has begun. Winter crops are in a fair condition. Fever is severe in places, and a few cases of cholera have been reported.
Presidency Divn. 9	Jessore, „ 15 „	Nil	Weather—seasonable. Outturn of *amun* estimated at eight annas. Harvesting continues. The late rain has improved a little the prospects of the winter crops already sown. Coarse rice selling at from 14 to 16 seers per rupee in the district. Fever prevalent in the district. Cases of cholera here and there.
Presidency Divn. 10	Moorshedabad, „ 15 „	Nil	Weather—warmer than last week. Harvesting of *amun* proceeding; outturn will be rather more than half the average. *Rubbee* crops looking well. The rainfall of last week has allowed of large additional areas being sown with *rubbee*. The October indigo is very fine indeed. Prices easier. Public health good.
Rajshahye Divn. 11	Dinagepore Dec. 14 '83	Nil	Weather—cloudy on the 14th. Harvesting of *amun* has begun in the north of the district with a good outturn. Rice selling at from 12 to 16 seers per rupee.
Rajshahye Divn. 12	Rajshahye, „ 15 „	Nil	Weather—cool and pleasant Reaping of *amun* still going on. Prospects of winter crops generally favourable. Public health fair.
Rajshahye Divn. 13	Rungpore „ 15 „	Nil	Weather—seasonable. Harvesting of *amun* in progress; outturn short. Sugarcane promises well. Mustard in flower Other minor crops doing well. Fever still prevalent Cholera reported from the Dimla and Barabari thanas.
Rajshahye Divn. 14	Bogra, „ 15 „	Nil	Weather—cold and bright. Outturn of *amun* about 4 annas. Pulses and sugarcane doing fairly well. Fever in parts of Shibgunge and Dhunat; otherwise public health generally good.
Rajshahye Divn. 15	Pubna, ...	.....	Report not received.
Rajshahye Divn. 16	Darjeeling, Dec. 15 „	Nil	Weather—seasonable. Reaping of late paddy has commenced in the Terai. The rice harvest on the hills has been completed with an average outturn. Rain wanted for the crops on the ground.
Rajshahye Divn. 17	Julpigoree, „ 15 „	Nil	Weather—cold and seasonable. Harvesting of *amun* is general. The outturn is likely to be about 12 annas of an average crop. Cold-weather crops still continue to be in a hopeful state, but the want of rain will affect them injuriously
	Eastern Districts.		
Dacca Divn. 18	Dacca; Dec. 15 '83	Nil	Weather—seasonable. Cutting of sugarcane and paddy continues, *Mug*, *maskalai*, mustard, chillies and tobacco doing well. The late rain has done much good to the winter crops. Prospects good.
	Manickgunge ...	0·25	
Dacca Divn. 19	Furreedpore, ...	.....	Report not received.
Dacca Divn. 20	Backergunge, Dec. 13 „	0·43	Weather—cloudy with slight rain on the 6th and 7th; otherwise seasonable. Prospects of crops fair. Some damage has been done to the paddy crop by the late wind and rain. Cholera and fever reported from some thanas of the district.
Dacca Divn. 21	Mymensingh, „ 14 „	0·71	Weather—now cool and pleasant. State and prospects of crops not encouraging. Rain this week may do good to the winter crops. Fever prevalent everywhere, except in the Netrokona sub-division.
	Jamalpore ...	0·83	
	Kishoregunge ...	1·68	
	Atia ...	1·2	
	Netrokona ...	0·68	
Chittagong Divn. 22	Chittagong, Dec. 18 '83	Nil	Weather—seasonable. *Anun* is being harvested with an indifferent outturn. Prices stationary. General health good.
Chittagong Divn. 23	Noakholly, „ 13 „	3·98	Weather—cloudy and rainy during the first two days of the week; since then no rain, but the sky has been cloudy occasionally. *Amun* is being reaped with a fair outturn *Rubbee* crops have been damaged to some extent by the late heavy rain. *Amun* also has suffered from the rain, but the extent of the injury done cannot easily be estimated.
Chittagong Divn. 24	Tipperah, „ 14 „	1·96	Weather—seasonable. The rain has caused some damage, but not so much as was expected. Public health good.
	Brahmunberiah ..	3·03	
	Chandpore ...	3·35	
Chittagong Divn. 25	Chittagong Hill Tracts, „ 11 „	6·01	Weather—cloudy throughout the week; incessant fall of rain during the first three days. Gathering of cotton still continues. The heavy rain and the south wind have caused a great deal of damage to the paddy and sugarcane crops. Sowing of mustard and other cold-weather crops stopped on account of the rain.
	Hill Tipperah „ 12 „	4·17	Weather—for the first three days of the week rainy, afterwards seasonably cold *Shail* paddy is still being cut. The late rain has partially damaged the paddy crop, but has benefited the pulses and other winter products. Public health good.

No.	District, and date of return.	Rainfall at Sudder Station in inches	Character of the weather, state and prospects of the crops, and state of health at date
BEHAR.			
Patna Divn. 26	Patna, Dec. 15 '83	Nil	Weather—cold and seasonable. Harvesting of paddy still going on. Rain much wanted for the *rubbee* crops. *Rahar* and cotton looking well. Poppy growing splendidly. Public health good.
27	Gya „ 15 „	Nil	Weather—cold and dry. Paddy crop is being reaped. Rain wanted for the *rubbee* crops. Prospects bad. Sugarcane is yielding a fair outturn. Health g od
28	Shahabad, „ 15 „	Nil	A marked deficiency in dew *Rubbee* crops suffering from want of moisture, still the ryots do not generally apply for irrigation from the canals.
29	Durbhunga, „ 15 „	Nil	Weather—seasonable. Harvesting of paddy proceeding; outturn poor. *Rubbee* suffering from want of rain. Fever decreasing. Prices stationary.
30	Mozufferpore, „ 15 „	Nil	Weather—dry and cool Rice harvest still in progress. Extent of land under rice small. *Rubbee* generally suffering from want of rain. Fever still prevalent in Sitamurhee.
31	Saran, „ 15 „	Nil	Weather—cool and clear, no sign of rain. Paddy is being harvested. *Rubbee*, doing well where irrigation is practicable. On the unirrigated lands, it is backward and suffering from want of moisture. Rain much wanted. Prices stationary. Public health good.
32	Chumparun, „ 15 „	Nil	Weather—cool. *Rubbee* crops in most parts of the district are suffering from want of rain, but in a few are reported to be still healthy. Public health fair.
Bhagulpore Litn. 33	Monghyr Dec. 15 '83	Nil	Weather—cold and cloudy at the latter part of the week. Prospects of crops continue unfavourable Harvesting of winter rice in progress; average outturn expected to be from 4 to 5 annas. Rain urgently wanted for the *rubbee* crops. Prices of food-grains slightly decreased. Public health good.
34	Bhagulpore, „ 15 „	Nil	Weather very cold; seasonable *Aghani* crop is being harvested with a poor outturn. Rain much wanted for *rubbee*. New rice is selling at 15 seers per rupee A large exportation is being made from the north into Durbhunga. Public health good
35	Purneah „ 15 „	Nil	Weather—cool, and cloudy at intervals. Prospects of crops continue unfavourable. Public health fair, though cases of fever continue to occur in almost all parts of the district.
36	Maldah, „ 15 „	Nil	Sky clear. Prevailing wind north-north-west. Late paddy is being harvested; yield expected to be about 4 annas. Mustard in flower. Prospects of other *rubbee* crops, viz. wheat, *matar*, *musuri*, &c., have improved. Common rice selling at 13 seers per rupee. An outbreak of cholera in Tulsigunge, and sporadic cases reported throughout the district; otherwise public health good.
37	Sonthal Pergns., „ 15 „	Nil	Weather—clear and very cool. Harvesting of paddy in full progress everywhere. The rain at the beginning of the month has improved the *rubbee* prospects, but it was too late to benefit the winter rice, the outturn of which will be only about 8 annas.
ORISSA.			
Orissa Divn. 38	Cuttack, Dec. 14 '83	Nil	Weather clear and cold. Harvesting of *sarad* rice on high lands continues; on low lands it has commenced. Winter crops doing well. Lands are being prepared for the *dalua* rice crop. Common rice selling at from 18 to 24 seers per rupee. Public health generally good.
39	Pooree, „ 13 „ Khoorda ..	Nil 1·48	Weather—seasonable *Sarad* rice is being harvested in places. Prospects generally good. Cold weather crops doing well Small-pox reported from Bhanpur and cholera from Gop. Common rice selling at from 21 to 32 seers 12 chittacks per rupee.
40	Balasore. „ 14 „	Nil	Weather—seasonable, sky clear, no fogs *Rubbee* crops doing well in the north and middle of the district. *Sarad* rice is being gathered. Price of rice steady. Public health generally good.
CHOTA NAGPORE			
South-West Frontier Agency.			
41	Hazaribagh, Dec. 14 '83	Nil	Weather—very cold. Rice harvest nearly finished. Rain still wanted for the *rubbee* crops. They are doing well in places where irrigation is available. Small-pox still prevalent in the Sudder station of the district. Public health generally good.
42	Lohardugga, „ 15 „	Nil	Weather—cold and bright. Rain would benefit the *rubbee* crops near Lohardugga. General health good. Prices unchanged.
43	Singbhoom, „ 14 „	Nil	Weather—cold and seasonable. Harvesting of paddy on low lands continues. *Rubbee* crops have benefited by the late rain. Sugarcane doing well. Price of rice stationary at 28 seers per rupee. Public health good.
44	Manbhoom, „ 15 „	Nil	Weather—fine and cool. Reaping of paddy continues vigorously. The late rain has done good to the standing *rubbee* crops throughout the district. Coarse rice selling at 22 seers per rupee in the Purulia market. Public health generally good

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓ dew; ≡ fog.

Explanation of Summary.—The normal means of air pressure and temperature are the arithmetical averages or means of the readings during the same week for the last 10 years. The *humidity* of the atmosphere is expressed as a percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. In the case of *rainfall*, the normal means are the numerical means or averages of the rainfall in that district determined from the returns sent in by the sub-divisions from that district, (i.e.) the total rainfall at the sub-divisional stations in the district sending in returns, divided by the number of stations. A rainy

for the week ending Friday, the 14th December 1883.

period for the past one year. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater of 10. The number denoting cloud amount represent the part of the sky covered, the whole sky being denoted by 10. Under the head "district observational stations for the period in question during the past 12 years. The "means for the district" are the numerical averages of the rainfall returns received day is one on which at least an hundredth of an inch fell.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending 14th December 1883 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean week.	Of week.			Rainy days.			Since 1st of month.		Since May 15th.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number.	Variation.	Average.	Normal average.	Average.	Normal average.

	°
The mean temperature of the seven days	64·0
The extreme variation of temperature during the seven days	25·3
The maximum temperature during the seven days	77·7
	%
The mean relative humidity during the seven days	68
	Inches.
The total fall of rain from 9th to 15th December 1883	Nil.

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

Meteorological Office, India,
The 17th December 1883.

W. L. Dallas,
Asst. Meteorological Reporter to the Govt. of India.

MEMORANDA.

THE mortuary statistics of the districts in Bengal, for the month of October 1883, disclose the following results :—

(1). That 108,138 deaths were recorded among a population of 66,162,926 representing a death-rate of 19·56 per 1,000 of population per annum, against 18·36 per 1,000 during the preceding month, and 20·52 per 1,000 during the corresponding month of 1882.

(2). That the highest death-rates were returned from the following districts. For comparison the mortality in them during the corresponding month of the preceding year is also exhibited.

	Ratio per mille during—	
	October 1883.	October 1882.
Nuddea	37·44	43·08
Rajshahye	34·44	30·60
Birbhum	31·20	36 96
Murshidabad	29 64	35·16
Patna	26·28	33 72
Pubna	25 92	35 52
Howrah	25·80	15·84
Jessore	25 80	34·68
Burdwan	25·44	38 16
Hazaribagh	24·96	14·88
Gya	24·12	24·36

showing that the mortality was lower in all the abovenamed districts from which greatest proportions of deaths were reported, except in Rajshahye, Howrah and Hazaribagh.

(3). That the principal death-causes presented the mortality exhibited below, in comparison with the returns of the preceding month and of the corresponding month of 1882 :—

	Ratio per mille during—		
	October 1883.	September 1883.	October 1882.
Cholera	·36	·36	1·20
Small-pox	·02	·03	·02
Fever	15·48	13·92	15 72
Bowel-complaints	·72	·84	·84
Injury	·36	·48	·36
Other causes	2·10	2·40	2·16

The noticeable features disclosed by the above figures are that cholera was considerably less fatal during the month under review as compared with the corresponding month of the preceding year; that there was a rise in the death-rate from fever as compared with the preceding month; and that the mortality from the other death-causes presents no marked variation as contrasted with both the periods with which comparison is instituted.

(4). That, referring to the local distribution of the diseases, it is observed that, while small-pox and injury proved nowhere markedly fatal, cholera, fever and other causes displayed their severest activity in the following districts :—

Cholera.

	Ratio per mille.
Cuttack	2·16
Mozufferpore ...	2·04
Serampore ...	1·56
Howrah ...	1·56
24-Pergunnahs ...	1·44

Fever.

	Ratio per mille.
Rajshahye ...	33·12
Nuddea ...	32·04
Murshidabad ...	27·84
Birbhum ...	26·88
Jessore ...	24·12
Pubna ...	23·52
Burdwan ...	21·60
Hazaribagh ...	21·48
Bankura ...	20·52
Bogra ...	19·68
Gya ..	19·44

Other causes.

	Ratio per mille.
Poori	9·96
Sarun	7·56
Howrah	6·60

(5). That distributed under the heads of *Sex*, *Class* and *Age*, the mortality of the month under notice stands as indicated below :—

According to Sex.

	Ratio per mille.
Males	20·88
Females	18 24
Ratio of male deaths to every 100 female deaths ...	112

According to Class.

	Ratio per mille.
Christians	11·40
Hindus	19 44
Mahomedans	20·04
Buddists	9·36
Other classes ...	17·16

According to Age.

	Ratio per mille.
Under 1 year ...	103·68
1 and under 5 years ...	21·84
5 „ 10 „ ...	12·36
10 „ 15 „ ...	10·68
15 „ 20 „ ...	14·16
20 „ 30 „ ...	13·32
30 „ 40 „ ...	14 28
40 „ 50 „ ...	18·96
50 „ 60 „ ...	28·20
60 years and upwards ...	45·84

R. LADDERDALE, M.D,
Sanitary Commissioner for Bengal.

The 17th December 1883.

Statement showing the Results of the Registration of Deaths in the Districts in Bengal for the month of October 1883.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,
The 17th December 1883.

R. LIDDERDALE, M.D.,
Sanitary Commissioner for Bengal.

MEMORANDA.

THE returns of the first class Municipalities in Bengal for the week ending 1st December 1883, yield the undermentioned results :—

(1) That the mean birth and death-rates stood respectively at 26 and 38 3 per 1,000 of population in opposition to 27·1 and 37·4 per 1,000, respectively, during the preceding week ending 24th November, indicating improvement in the registration of deaths with a falling off in that of births.

(2) That the highest proportions of births and deaths were returned by the following Municipalities :—

Births.

	Ratio per mille.
Naraingunge	78·6
Serampore	53·0
Uterparah	47·2
Comillah	42·4
Dacca	39·6
Burdwan	38·1
Bhagulpore	33·5
Hooghly	32·2

Deaths.

	Ratio per mille.
Suburbs of Calcutta ..	68·3
Serampore ..	58·9
Bhagulpore	52·5
Pooree	51·4
Burdwan	50·4
Santipore	49 6
Midnapore	44·9
Jessore	42·8
Purneah	41·6
Hooghly	38·9
Kishnaghur	37·5
Dacca	37·0
Naraingunge ..	33·1
Patna	31·2
Gya	30·7
Ranaghat	29·9

(3) That the diseases, classified in the usual manner, furnished the death-rates indicated below, in contrast with the results of the preceding week :—

	Ratio per mille during the weeks ending—	
	1st December.	24th November.
Cholera	3·5	2·7
Small-pox	·1	·1
Fever	19·0	19·9
Bowel-complaints	5 9	5·2
Injury	·3	·2
Other causes	9·5	9·3

The above figures indicate that there was no marked difference in mortality from any of the diseases, except cholera, the death-rate from which is seen to be slightly higher.

(4) That of the above-mentioned death-causes, while small-pox and injury were not noticeably severe anywhere, the rest of them proved conspicuously fatal in the following Municipalities :—

Cholera.

	Ratio per mille.
Bhagulpore ..	13·6
Suburbs of Calcutta	11·8
Beauleah ..	7·9
Purneah ..	6·9
Burdwan ..	4 6

Fever.

	Ratio per mille.
Santipore ..	45·2
Jessore ..	42·8
Ranaghat ..	29·9
Suburbs of Calcutta ..	29·6
Serampore ..	29·4
Kishnaghur	28 8
Purneah ..	27·7
Burdwan ..	27·5
Midnapore ..	24·8
Bhagulpore	21·7
Hooghly ..	20·1

Bowel-complaints.

	Ratio per mille.
Serampore	15·7
Suburbs of Calcutta ..	9·5
Hooghly	9·4
Bhagulpore	9·1

Other causes.

	Ratio per mille.
Pooree ..	32·1
Dacca ..	19·5
Suburbs of Calcutta ..	16·8
Naraingunge ..	16·6
Midnapore ..	13·9
Burdwan ..	13·7
Serampore ..	11·8

(5) That the death-rates under the heads of *Sex*, *Class* and *Age* stand as follows :—

According to Sex.

	Ratio per mille.
Males ..	41·5
Females ..	34 7
Ratio of male deaths to every 100 female deaths ..	135

According to Class.

	Ratio per mille.
Christians ..	37·8
Hindus ..	38·7
Mahomedans ..	37·4
Budhists ..	24·2

According to Age.

	Ratio per mille.
Under 1 year ..	244·2
1 and under 5 years ..	45·4
5 and under 10 „ ..	24·9
10 and under 15 „ ..	16·2
15 and under 20 „ ..	29·8
20 and under 30 „ ..	24·4
30 and under 40 „ ..	29·1
40 and under 50 „ ..	34·4
50 and under 60 „ ..	47·0
60 years and upwards ..	85·8

R. LIDDERDALE, M.D.,
Sanitary Commissioner for Bengal.

Increase. Tons.

Firewood 37
This increase is due to greater import at Basra and better working of wagons.

Hay 184
This increase is due to favourable market.

Straw 14
This increase is due to greater demand at the selling stations.

Wooloo 46
This increase is due to greater demand at the selling stations.

Decrease.

Rice 423
This decrease is due to the mills at Canning not working fully.

Building materials 201
The decrease is due to works for the extension coming to a close.

Railway materials 293
This decrease is due to works for the extension coming to a close.

Sundries 83
This decrease is due to works for the extension coming to a close.

Calcutta, the 11*th December* 1883. R. G. Mookerjee, *Manager.*

Increase. Tons.

Coal 64
This increase is due to one of the coal merchants stacking up for sale.

Edible grain 81
This increase is due to high rate in the market.

Decrease.

Cotton 17
This is due to last month's stock not yet exhausted.

Piece-goods 18
This is due to last month's stock not yet exhausted.

Sundries 27
This has probably taken this year river route.

Salt 20
This has probably taken this year river route

No. 117.—*The 14th December* 1883.—Mr. C. J. Lyall, on return from privilege leave, resumed charge of the office of Secretary to the Chief Commissioner of Assam, from Mr. W. C. Macpherson, in the forenoon of the 13th December 1883.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 18th December 1883.—In supersession of paragraph 2 of the Resolution dated the 30th April 1883, fixing the dates for the examination of candidates for admission to the Subordinate Executive Service, it is hereby notified that the examination will be held in Calcutta in the Senate House of the Calcutta University on the 15th, 16th and 17th January 1884, instead of on the 14th, 15th and 16th idem, as previously notified. The number of appointments to be competed for at the ensuing examination will be six. The hours of examination will be from 10 A.M. to 1 P.M., and from 2 P.M. to 5 P.M. on each day. The subjects of examination on each day will be the following:—

First Day—15*th January* 1884.

Morning ... Arithmetic.

Afternoon ... Drawing (scales and geometrical drawing.)
Surveying (with the chain only and with the prismatic compass and chain.)

Second Day—16*th January* 1884.

Morning ... *Law.*—A paper of questions on Regulations I and VIII of 1793, the Penal Code, the Code of Criminal Procedure and the Evidence Act.

Afternoon ... *Law.*—A second paper of questions on the following Regulations and Acts:—

Regulation VII of 1822.
Regulations IX and XI of 1825.
Regulation IX of 1833.
Act IX of 1847.
„ XI of 1859.
„ III (B.C.) of 1862.
„ VII (B.C.) of 1868.
„ VIII (B.C.) of 1879.
„ IX (B.C.) of 1879.
„ VII (B.C.) of 1880.
„ III (B.C.) of 1881.

Third Day—17*th January* 1884.

Morning ... An essay on some simple every-day subject, to be given out at the time of the examination. In awarding marks the following points will be taken into consideration:—

(1) The general treatment of the subject.
(2) Spelling.
(3) Hand-writing.
(4) Composition.

No marks will be allowed for quotations from standard or other works.

Afternoon ... Letter-drafting, précis-writing and a short translation from Bengali into English.

The maximum number of marks for each subject will be as follows:—

	Marks.
For English	800
„ Law	800
„ Surveying, drawing and arithmetic	400
Total ...	2,000

No books of any description will be allowed.

Candidates may, with the permission of the Examiner, use their own drawing instruments during the afternoon examination on the 15th January 1884.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 18th December 1883.—The following revised rules to facilitate the supply to the public of one-anna revenue stamps, through the agency of the Sub and Branch Post Offices, are published for general information :—

RULES.

I.—Stamp vendors' licenses in the prescribed form should be issued to every Sub or Branch Post Master in the Lower Provinces of Bengal by the Collector or Deputy Commissioner, for the sale of one-anna revenue stamps, ordinarily called receipt stamps.

II.—Immediately after the issue of the license, a supply of one-anna revenue stamps, up to the value of Rs. 25, should be advanced to the Sub or Branch Post Master from the nearest Treasury, and be sent to him in an insured parcel at the cost of the Revenue Department. For all subsequent supplies the Sub or Branch Post Master should send a requisition through his Head Office to the officer in charge of stamps at the sudder or sub-treasury as the case may be, and remit with it the value of the stamps required in an insured parcel, or by money order, at the cost of the Revenue Department.

III.—The requisition should be forwarded whenever the stock of stamps in store of the Sub or Branch Post Master is not more than the local demand for one week, and should be promptly complied with by the Treasury Officer, who should send the stamps in the manner laid down in the preceding rule.

IV.—Every Sub or Branch Post Master shall be allowed discount at the following rates on the value of the one anna revenue stamps sold by him :—

Sub and Branch Post Masters in Calcutta and at the sudder stations of Howrah, 24-Pergunnahs, Burdwan and Hooghly	$3\frac{1}{8}$	per cent., or two pice in the rupee.
Sub and Branch Post Masters of all other places ...	$4\frac{11}{16}$	per cent., or three pice in the rupee.

V.—Copies of the Stamp Act and Rules for the sale of stamps, in English and in the vernacular language of the district, and a signboard, should be supplied by the district officers to each Sub or Branch Post Master appointed under these rules to be a vendor of revenue stamps.

VI.—A monthly account of the sale of revenue stamps should be submitted in English by every Sub or Branch Post Master through the Head Office to the Officer in charge of the Treasury from which he receives his supply of stamps.

VII.—When the Superintendents and Inspectors of the Postal Department are on tour, they should require the Sub or Branch Post Master to produce his advance in stamps and in cash, as is done in the case of postage stamps. Any deficiency which may be discovered should be immediately reported to the Collector or Deputy Commissioner of the district.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 20th December 1883.—It is hereby notified for general information that, in exercise of the power conferred on him by section 39 of the Cess Act IX (B.C.) of 1880, the Lieutenant-Governor has determined that the rate at which the Public Works Cess shall be levied for the year which commenced on the 1st October 1883, in all the districts to which the said Act has been extended, shall be one-half of an anna in the rupee on the annual value of lands, and on the annual net profits from mines, quarries, tramways, railways, and other immovable property, ascertained respectively as in the Act prescribed.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 18th December 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the powers conferred on him by section 1 of the Bengal Vaccination Act, V (B.C.) of 1880, to extend the provisions of that Act to the thanas named in the margin, in the district of Tipperah, unless good reasons be shown to the contrary within six weeks from the date of publication of this notice in the Calcutta Gazette.

NOTIFICATION.

The 20th December 1883.—It is hereby notified that, under the powers vested in him by section 1, Act V (B.C.) of 1880 (the Bengal Vaccination Act), the Lieutenant-Governor intends to extend the provisions of the said Act to the Municipalities of Deoghur and Sahibgunge and the towns of Dumka and Rajmehal in the district of the Sonthal Pergunnahs.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 22nd December 1883.—The Lieutenant-Governor is pleased to make the following rules in exercise of the powers conferred upon him by sections 143 and 144 of Act I of 1882 (the Inland Emigration Act). They will take effect from the 1st January 1884.

CHAPTER I.

GENERAL RULES.

Rules, Schedules, and Forms under the Inland Emigration Law.

Inclusion of schedules and forms in the rules.

1. The schedules and forms attached to these rules are prescribed for the several purposes specified in the heading of each, and shall be taken as part of the rules.

Fees payable under the Act.

2. The following shall be the amount of the several fees payable under the provisions of the Act:—

Under Section 13, the fee for a contractor's license (form No. 1) shall be Rs. 100 and that for a sub-contractor's (form No. 2) Rs. 50.

Under Section 24, the fees for a recruiter's license shall be Rs. 16.

Under Section 30, the fee payable to a medical officer for each labourer or dependent placed before him for examination under certificate (form No. 8) shall be two annas from the Inland Labour Transport Fund.

Under Sections 35 and 68 and 111 and 112, the fees for each person produced before a registering officer for the purpose of being registered as a labourer (forms Nos. 9 and 26 respectively) and (employers form No. 2 and Inspector's form No. 2 for use in Chittagong and Chittagong Hill Tracts) shall be one rupee.

Under Section 71, the fee payable to a medical officer for each labourer examined by him shall be eight annas.

Under Section 90, the fee payable on a license for a vessel to carry passengers for not more than one voyage shall be Rs. 16, provided that the fee shall not exceed four annas per head of the total number of passengers which the vessel is capable of carrying; and that for the license of a vessel to carry passengers for any term not exceeding one year shall be Rs. 50.

Under Section 109, the rate payable by an employer shall be eight annas on the 1st day of January and eight annas on the 1st day of July in respect of each labourer in his employ on those dates.

3. The same provision in every respect shall be made for the dependents of labourers as for the labourers themselves, and all rules regulating the treatment and transport of labourers shall be applicable to their dependents also.

Subordination of emigration officers.

4. Every Superintendent of Emigration, Embarkation Agent, and Medical Inspector appointed by the Lieutenant-Governor of Bengal under section 8 of the Act, shall act under general instructions received through the Superintendent of Emigration, Calcutta, and all reports and returns shall be made through such Superintendent.

Annual reports of emigration officers.

5. Every Superintendent of Emigration, Embarkation Agent, and Medical Inspector (appointed by the Lieutenant-Governor of Bengal), shall forward, as early as possible, and not later than two months after the close of every calendar year, an annual report reviewing all the operations of that year connected with the recruitment, accommodation in depôt, and transport of emigrants within the local limits of his jurisdiction to the Superintendent of Emigration, Calcutta; and such Superintendent shall, not later than two months thereafter, submit to the Government of Bengal his annual report for the same period. Such reports shall be based on the information available in his own office, and on that furnished by the aforesaid officers in their respective reports, and shall treat of the following points, viz. the management and condition of the depôts licensed under the Act, the conduct of recruitment, the sickness and mortality in depôt, the number of emigrants despatched to the tea districts, the results of the passage thereto with special reference to mortality, and such other subjects as may be prescribed by the Government of Bengal.

Annual reports of Inspectors of Labourers.

6. Every Inspector of Labourers appointed under section 8 shall submit his annual report (to the Government of Bengal), through the Commissioner of the (Chittagong Division), and the report shall be based on the information supplied by the returns of employers of labourers under section 113, and on the results of his personal periodical inspections of labourers. The annual report shall treat of the following points: viz. the number of labourers of different classes on each plantation during the year under report, distinguishing between the labourers of the preceding year and fresh arrivals, those imported and those locally engaged under the Act, and between labourers as defined by Act I of 1882 and persons otherwise engaged; the extent to which employers of labour avail themselves of local labour contracts under sections 111 and 112, particularly in the case of newly-imported labourers; the causes and extent of sickness and mortality amongst the labourers of different classes; the number of births; the average amount of the earnings of labourers under contract and others; the number of convictions for crime, and the nature of the crimes committed; the number of arrests made under section 172,

and the manner in which the law has operated; the treatment and condition of labourers and their families located on each plantation; the nature of the house accommodation assigned to labourers; the degree of medical care bestowed on the sick, and the nature and extent of the hospital arrangements; the number of labourers under the Act whose contracts may have determined during the year, and generally of the working of the Act, and the position of the labourers in his jurisdiction.

Section 2 — Depôts.

Sites of depôts.

8. The site of every depôt shall be cleared, levelled, and drained; and all exposed wells and tanks shall be properly fenced in and protected from surface drainage, which, if necessary, may be required to be effected by the construction of masonry drains.

Depôt sleeping sheds.

9. Sleeping sheds shall be distinct from cooking sheds, and shall be provided with raised platforms or *machans*, high enough to admit of the ground below being readily cleaned; and mats shall be supplied in all cases where such platforms or *machans* are not boarded.

Sleeping shed accommodation according to depôt license.

10. In each sleeping shed the number of emigrants to be accommodated shall be calculated at the uniform rate of not less than fourteen superficial feet of space to each person; and shall never exceed that specified in the depôt license (form No. 7) granted by the Superintendent of Emigration, a copy of which shall be posted in a conspicuous place for the information of visiting officers.

Ventilation of depôt sleeping sheds.

11. Air and light shall be admitted freely into sleeping sheds through large openings for doors and windows, and through open spaces sheltered by the eaves, and moveable *jhamps* shall be fitted to all openings intended for doors and windows.

Depôt cooking sheds

12. Cooking sheds, with fireplaces or *chulas* arranged in a row, shall have mud-plastered walls, and, wherever possible, tiled roofs; and a proper receptacle for rice-water and other kitchen refuse shall be provided.

Depôt water-supply.

13. A plentiful supply of the purest water obtainable shall be always provided for drinking, cooking, and washing in clean iron tanks to be approved by the Medical Inspector. Each tank shall be fitted with a padlocked cover, and with two or more large strong taps of simple construction; and in all cases where any doubt exists in the opinion of the Medical Inspector as to the uniform purity of the water supplied, each such tank shall be fitted also with a suitable and sufficient filtering apparatus.

Depôt latrines.

14. Latrines shall be separately provided for males and females, properly roofed, thoroughly well ventilated and lighted, and placed in an accessible position. The plan of the latrines, and the system adopted for the daily removal of night-soil and other refuse matter, shall be subjected to the approval of the Medical Inspector.

Depôt hospital.

15. A hospital for ordinary cases, with separate wards for male and female patients, shall be provided. The ward shall be dry, well raised, thoroughly ventilated, well lighted, and furnished with a separate platform or *machan* for each patient, which, when not boarded, shall be covered with matting.

Depôt dispensary.

16. A dispensary, with accommodation for the resident medical officer of the depôt, shall be placed in a convenient situation, and provided with such fittings and furniture as the Medical Inspector may deem necessary.

No. 7.

FORM OF DEPOT LICENSE.

depôt at *, contractor, is hereby authorized to accommodate in each shed of his the number of emigrants entered against it.*

N. B.—Space in sleeping sheds is calculated at 14 superficial feet, and in hospital sheds at 28 superficial feet to each emigrant. A fresh license will be required if the sheds are increased in number or size.

DATED AT
The 188 .

Superintendent of Emigration at Calcutta.

Section 3.—Places of Accommodation.

Places of accommodation in recruiting districts.

17. The establishment in the several districts of recruitment of places for the temporary accommodation of emigrants, previous to their despatch to the depôts of contractors, shall be regulated generally by the rules relating to such depôts, subject to such modification as the Magistrate of the district may with reference to the temporary nature of such accommodation consider necessary.

Inspection of places of accommodation by district officers.

18. The Magistrate of every district of recruitment shall, in respect of all places for the accommodation of emigrants within such district, exercise the powers vested in the Superintendent for the supervision of depôts. All such places shall be regularly inspected by the Magistrate, and by the officers authorized in that behalf by such Magistrate under the Act.

Responsibility of persons in charge of places of accommodation.

19. The sub-contractors, or recruiters in charge of places for the accommodation of emigrants, shall be responsible for any irregularities that may be committed in connection with the management of such places; and they shall keep such registers, and submit such reports and returns to the Magistrate having jurisdiction as he may require.

Section 4.—Depôt management.

Supervision of depôts by Superintendent.

20. The Superintendent, or his assistant, shall regularly visit every depôt when accommodating emigrants, and shall see that the provisions of the Act are fully carried out in the case of all labourers and their dependents arriving at such depôt, and that the terms of their engagement to work in the labour districts are thoroughly understood by them.

Supervision of depôts by Medical Inspector.

21. The sanitary state of the depôts shall be the special care of the Medical Inspector. He shall visit the depôts regularly, and see that all necessary precautions are taken against communicable disease; that the hospital and other medical arrangements at the depôts are sufficient; that all emigrants unprotected against small-pox are properly vaccinated, and that the depôt arrangements generally for the keep and health of emigrants are satisfactory from a medical point of view. At the close of every month he shall submit a report of his inspections in the prescribed form (No. 10) to the Superintendent.

Visitors' book for inspecting officers.

22. At each depôt there shall be kept a visitors' book, in which the Superintendent and the Medical Inspector shall enter their orders or remarks, and the dates of their visits. During such visits the contractor or his agent shall, without fail, place the depôt and hospital registers before the Superintendent and the Medical Inspector respectively for inspection, and shall on no account alter or correct any entries made therein without their knowledge and sanction.

Facilities for inspection of depôts.

23. Depôt gates shall be in charge of a *darwan*, and shall be open from 6 A.M. to 6 P.M. Every facility shall be given by the contractor and his employés to the inspecting officers when visiting the depôt at any time.

Compliance with orders of emigration officers.

24. All orders of the Superintendent and the Medical Inspector shall be carried out by the contractors and their employés on pain of cancellation of license, or loss of appointment respectively. Should a contractor consider that any order given to him by the Superintendent or Medical Inspector is unreasonable, he shall be at liberty to appeal against such order if passed by the Superintendent and Medical Inspector at Goalundo or Kusteah, to the Superintendent of Emigration, Calcutta, or if passed by the Superintendent of Emigration, Calcutta, to the Government of Bengal. Until, however, the order shall have been reversed by a higher authority it must be carried out.

Appointment of depôt agent.

25. If the contractor does not himself live in his depôt premises, he shall appoint, subject to the approval of the Superintendent, a proper person as his agent, who shall reside there constantly, and conduct the business on the contractor's responsibility. Every such agent shall be registered in the Superintendent's office.

Infringement of rules by contractor's agent.

26. Every contractor shall be responsible for any offence against the rules committed by his agent at any place in the same manner and to the same extent as though he himself had committed such offence.

Depôt registers and returns.

27. The contractor or his agent shall keep depôt registers in the prescribed forms (Nos. 11, 14, and 21 respectively), and shall punctually and accurately make the required entries therein. Monthly returns of accommodation and of sickness in depôt shall likewise be prepared in the prescribed forms (Nos. 12 and 13 respectively), and punctually forwarded to the office of the Superintendent by the 15th of the month following that for which they become due. Any default in these respects, or in the submission of prescribed returns generally when due, shall render the agent liable to loss of his appointment, and the contractor failing to adopt promptly the necessary remedial measures to cancellation of his license.

Appointment of depôt medical officer.

28. A resident medical officer to be licensed by the Medical Inspector shall be appointed by each contractor to his depôt, and his name shall be registered in the Superintendent's office. He shall be paid by the contractor, but shall be directly responsible to the Medical Inspector, who shall give him written instructions for his guidance. He shall not be dismissed without the consent of the Medical Inspector. He shall keep a hospital register in the prescribed form (No. 14), and shall, besides his other duties, assist in making out the monthly returns of sickness and mortality.

Responsibility of contractors in caring for emigrants.

29. The contractor, either directly or through his agent, shall be responsible for the good treatment and care of the emigrants, none of whom shall be discharged from the depôt without the permission of the Superintendent. He shall, moreover, be responsible to the Medical Inspector specially for the sanitary state of the depôt, and for the feeding, clothing, and medical treatment of all the emigrants accommodated therein.

Quality of clothing according to approved sample.

30. The clothing and blankets to be supplied to emigrants shall be according to scale, and of a quality equal to samples to be approved by the Superintendent and retained in his office.

Repairs of depôt sheds.

31. The sheds, hospitals, latrines, drains, &c., shall be constantly inspected, and any defects in them shall be immediately remedied. Mud-plastered walls shall be white-washed once a month.

Procedure on arrival of emigrants in depôt.

32. On arrival of emigrants at the depôt, they shall be inspected by the contractor or his agent, and by the resident medical officer; their names shall be entered in the depôt register, and their arrival reported in the prescribed form (No. 15) in the forenoon of the next day to the Superintendent. Any casualty occurring in depôt shall be reported in the prescribed form (No. 16).

Irregularities of recruiters.

33. The contractor shall ascertain that those sections of the Act which provide for the registration, and for the proper care and treatment of emigrants previous to their entering the depôt, have been complied with, and shall immediately thereafter submit a report regarding any recruiter, or other person in charge, who may be found to have infringed the law.

Clean clothing for emigrants.

34. Excepting those whose state of health may prevent it, all emigrants shall be compelled to bathe on their arrival in depôt, and shall thereafter be decently and cleanly clothed according to the scale laid down in schedule A appended to the rules. Every article of clothing belonging to emigrants that is soiled, whether new or old, shall be thoroughly washed and dried before it is issued; and cast-off ragged clothes shall be gathered up and destroyed at once.

Daily muster-roll of emigrants.

35. A muster-roll of the emigrants in depôt shall be called every morning; and the resident medical officer, after careful examination, shall enter the names of the sick in his diary, which shall be countersigned by the contractor or resident agent.

Personal cleanliness of emigrants.

36. Emigrants shall wash their clothes at least twice a week when possible, and shall bathe daily. A liberal supply of soap shall be provided for the purpose.

Appliances for ablution purposes.

37. Emigrants shall not be permitted to wash their clothes and persons in the depôt tanks, but approved appliances for ablution purposes shall be specially provided on a suitable site so drained as to prevent the waste water from returning into the tank or other sources of water-supply. The water for all purposes shall be frequently examined by the Medical Inspector, and the contractor or his agent shall be held responsible for any failure in providing good, wholesome water.

Airing of emigrants' clothing.

38. Emigrants shall be compelled to dust out and air their clothes and blankets daily, and shall not be allowed to remain in damp clothes.

Cooking and feeding arrangements.

39. Regular hours shall be set apart for cooking and feeding; and no cooking shall be allowed at any other time except for invalids, nor in any place except the cooking sheds, where alone emigrants shall feed and smoke.

Daily inspection of meals by depôt medical officer.

40. The rations issued daily to each labourer and dependent in depôt shall be according to the scale laid down in Schedule B; and the meals and drinking water shall invariably be examined by the resident medical officer before being served out. When necessary, food suitable for infants and invalids (fresh milk, soup, sago, &c.,) shall be freshly prepared and regularly supplied throughout the twenty-four hours. Any neglect of infants or invalids on the part of the contractor, his agent, or resident medical officer, shall render such contractor liable to cancellation of license, or such agent or medical officer to the loss of appointment.

Cleaning of cooking utensils.

41. After meals the resident medical officer shall see that the cooking sheds are carefully swept out, that all cooking utensils are thoroughly cleaned, and that no stale food is secreted either by the cooks or emigrants.

Employment of emigrants.

42. Excepting the hospital, latrines, drains, and receptacles for kitchen and other filth, which shall be kept constantly cleaned by the sweepers, the garden, sheds, and every part of the depôt shall be kept clean and in good order by the emigrants. The emigrants if they consent to work shall be regularly employed, but without fatigue, and kept as much as possible in the open air.

Cleanliness of depôt premises.

43. The peons on duty shall be constantly about the depôt and shall preserve order and cleanliness everywhere, especially during cooking and feeding and inspections. They shall see that no jungle or rubbish is permitted to accumulate in the depôt compound; that the spaces under and around the sleeping and other sheds are kept clean; and that the sweepers do their work regularly.

Prevention of other use of sleeping sheds.

44. No cooking, feeding, or smoking shall be permitted in the sleeping sheds, which shall be kept thoroughly clean, well ventilated, and water-tight.

Prevention of overcrowding in sleeping sheds.

45. The emigrants shall be properly distributed at night in their sleeping sheds, according to the number each shed is licensed to accommodate, and shall be prevented from crowding together.

Extinguishing of lights at night.

46. Excepting locked lanterns hung in the dispensary, hospital, and at the entrance of every sleeping shed, and a light in the durwan's room, all lights and fires shall be put out by 9 o'clock at night.

Disposal of excreta.

47. Excreta from the hospital or latrines, and filth of any description, shall not be buried within at least one thousand feet of any source of drinking water; nor be thrown into stagnant pools and *nullahs*, which may happen to be near the depôts.

Vaccination of emigrants.

48. The contractor or his agent shall arrange with the Vaccination Department for the vaccination of every emigrant unprotected from small-pox as soon as possible after admission into the depôt.

Treatment of sick emigrants.

49. Sick emigrants, excepting those suffering from cholera or other dangerously communicable disease, and otherwise provided for, shall not be sent to any other than the depôt hospital; nor be removed thence, nor from the depôt, without the written permission of the Medical Inspector.

Procedure on outbreak of serious communicable disease.

50. In the event of cholera or small-pox or other dangerously communicable disease appearing in the depôt, every labourer or dependent attacked shall immediately be sent to the authorized hospital for treatment, and the relatives of the affected persons, if any, not accompanying the patient shall at the same time be placed in the segregation shed situated in an isolated part of the depôt compound, and shall not be removed thence without the written permission of the Medical Inspector. A report of the case shall then be submitted to the Medical Inspector, and within twenty-four hours the Superintendent shall be furnished with a descriptive statement, in the prescribed form (No. 17), of every emigrant sent to the authorized hospital, together with the reason for such removal. In the event of any emigrant sent to hospital dying or being permitted to return to the depôt, the death or re-admission of such emigrant shall be similarly reported to the Superintendent in form (No. 18).

Destruction of infected clothing.

51. Clothing, blankets, and mats that have been in contact with persons suffering from dangerously communicable disease (*e.g.* small-pox or cholera), hospital dressings, foul rags, and all combustible filth, shall be regularly and thoroughly burnt in a safe and suitable place, and in the presence of the resident medical officer. The segregation shed, immediately it ceases to be occupied, shall be carefully cleaned out and disinfected by fumigation or other efficient means.

Disposal of property of deceased emigrants.

52. On the death of any intending emigrant, the contractor, or agent, or medical officer shall immediately make an inventory of the property of such emigrant in a register in the prescribed form (No. 21), to be kept for the purpose, and shall forward such property as early as practicable to the office of the Superintendent for disposal. The claims made by relatives in depôt, if any, shall duly be communicated to the Superintendent, who shall, after making enquiry as to the heirs, dispose of the estate as circumstances may render necessary.

Procedure on contractors failing to provide contract.

53. Emigrants who are not engaged within thirty days of their arrival at any depôt shall be returned through the Superintendent's office to the districts where registered at the expense of the contractor, except when such emigrants elect to continue in such depôt in the hope of being ultimately engaged, or desire to be transferred to the depôt of some other contractor, or prefer to be discharged from the depôt; in which last case they shall, previous to discharge, be paid such compensation as may be ordered by the Superintendent. At the close of every month the contractor or his agent shall forward to the Superintendent's office a statement in the prescribed form (No. 22) of all the emigrants remaining in depôt over thirty days without execution of contract.

Disposal of rejected emigrants.

54. All emigrants that are declared by the Medical Inspector to be unfit to emigrate, and are finally rejected by the contractor or his agent, shall be returned through the Superintendent's office to the districts of registration at the expense of the contractor, unless they of their own accord insist on being discharged on the spot, when they shall be treated, save in respect of compensation in the same manner as emigrants for whom contractors fail to find employment.

Medical examination of rejected emigrants.

55. All rejected emigrants shall be examined by the Medical Inspector on the day that they are to be returned to their districts; and only those that are certified by him to be able to travel shall be forwarded to the Superintendent's office for disposal, while the rest shall be detained in depot under treatment until the Medical Inspector certifies to their being in a fit state to undertake the journey.

Application for execution of labour contracts.

56. When the employer or his agent has selected in any depôt the labourers required by him, a written application for the placing of such labourers on contract shall be sent by the contractor concerned or his agent to the Superintendent of Emigration at least one day before the date fixed upon for execution of contract.

Arrangements for examination of labourers.

57. Labourers intending to execute contracts, when placed before the Superintendent, shall have their copies of registration in their hands; and their blankets, clothing, and utensils, according to the scale prescribed in Schedule A, arranged beside them for inspection.

Knowledge and acceptance of terms by labourers.

58. The Superintendent, when placing labourers on contract, shall invariably satisfy himself that the employer or his agent has affixed his signature to all the contract papers, and that the labourers thoroughly understand and accept the terms and conditions of the contract they are executing. An abstract of every such contract shall be entered in a register to be kept by the Superintendent in the prescribed form (No. 19).

Medical inspection of contract labourers.

59. Labourers who have executed contracts shall be inspected by the Medical Inspector before despatch from the depôt with reference to their fitness to travel; and to that end a written application for such final inspection shall be forwarded by the contractor concerned or his agent to the Medical Inspector at least one day previous to the date of the intended despatch of such labourers to the districts for which engaged.

No. 10.

FORM OF MEDICAL INSPECTOR'S INSPECTION REPORT.

Report of Medical Inspector on the sanitary arrangements in the contractors' depôts at for the month of 188 .

QUESTIONS.	ANSWERS. NAMES OF CONTRACTORS. 1	2	3	4	5	6	7	REMARKS.
1. *Sleeping sheds.*								
(*a*) Whether kept clean and in proper repair?								
(*b*) Whether satisfactorily fitted and furnished?								
2. *Cooking sheds.*								
(*a*) Whether in proper repair and satisfactorily fitted and furnished?								
(*b*) Whether any complaints were preferred as to the quality or quantity of food issued?								
3. *Water-supply.*								
(*a*) Whether iron tanks are in proper order and filled with a sufficiency of clean water for drinking and cooking purposes?								
(*b*) Whether tanks are fitted with filtering apparatus?								
(*c*) Whether the bathing arrangements are in working condition, and secure a supply of clean water in sufficient quantity for the number of emigrants accommodated in depôt?								
4. *Latrines.*								
(*a*) Whether condition of building and ablution arrangements are satisfactory?								
(*b*) Whether cleanliness is secured and maintained?								
5. *Hospital.*								
(*a*) Whether hospital for ordinary disease is kept in thorough repair, and properly fitted and furnished to receive patients?								
(*b*) Whether segregation shed is clean, and fitted and furnished for immediate use?								
(*c*) What number of patients were treated in hospital during the month, and what number remained under treatment at its close?								
(*d*) Whether any patients suffering from contagious diseases were sent to any authorised hospital; and if so, what number and to what hospital?								
6. *Dispensary.*								
Whether sufficiently provided with requirements?								
7. *Depôt tanks.*								
Whether properly cleaned and secured against accidents and the resort of emigrants for purposes of bathing and drawing water?								
8. *Depôt compound and drains.*								
Whether kept clean and in proper order?

Mug	Men and women	Quart	To be of tin.
	Children	Pint	
Plate	Men and women	12 inches in diameter	
	Children	9 ditto	

N.B.—All the above articles must be equal in every respect to the samples approved and retained in the office of the Superintendent of Emigration.

Section 5.—*Despatches.*

Arrangements for despatch of emigrants.

60. Every contractor preparing to despatch emigrants to Assam, Cachar, Sylhet, or Chittagong shall ascertain whether other contractors purpose despatching at the same time; and shall in communication with them, and subject to the Superintendent's approval, fix the date of despatch and arrange accordingly, allowing ample time for the discharge of all duties connected with the transport of emigrants under the Act.

Supervision of despatch of emigrants.

61. The Superintendent or his assistant, and the contractor or his agent, shall be present at every despatch of emigrants by train, steamer, or boat, and the contractor or his agent shall give timely notice to the Superintendent or to his assistant of every such intended despatch.

Provision for emigrants on the journey.

62. The contractor shall be responsible for the making of all necessary provision to ensure the health, safety, and comfort of emigrants during transit to the place of embarkation, or to their final landing place when despatched in country-boats. He shall supply the clothing according to scale in all cases; but in the case of boat despatches, he shall also supply the provisions, medical stores, medical officer, and attendants as prescribed in the schedules annexed to the rules.

Provision of way-bill for journey.

63. Every batch, prior to despatch from depôt, shall be provided with a way-bill in the prescribed form (No. 20), and the contractor or his agent shall caution the person in charge to take care of the document; to make it over to the Emigration Agent concerned on arrival at the place of embarkation; and, if returned to him by that officer, to observe strictly the instructions therein laid down for his guidance.

Feeding of emigrants before journey.

64. Emigrants when about to proceed on a journey shall be provided with a cooked meal before they start.

Supply of food against a long journey.

65. If the journey be likely to occupy more than six hours, a supply of biscuits and sugar shall be distributed to the emigrants before they leave depôt in the proportion of two biscuits and an ounce of sugar to each emigrant, computed with reference to section 92 of the Act, and the agent or peon in charge shall under any circumstances provide milk for infants or young children that require it during such journey.

Attendance of establishment.

66. In the case of boat despatches, provisions and the establishment of cooks and topasses shall either precede or accompany the emigrants on their way to the place of embarkation.

Early arrival of emigrants at railway station.

67. If the journey be by train, the emigrants, accompanied by the contractor or agent concerned, shall be at the railway station fully half an hour earlier than the time fixed for departure, and shall be seated in their carriages at least five minutes before the train starts. Every batch shall be accompanied by the peon or other person in charge as appointed by the contractor or his agent.

Return to hospital of sick emigrants.

68. Any emigrants suddenly taken ill at the railway station shall be sent immediately to the depôt or other authorized hospital accompanied by his relatives and dependents.

Supply of water for the journey.

69. The purest drinking water obtainable shall be supplied for the journey by train in a sufficient number of suitable vessels conveniently placed with the emigrants in each carriage.

Alighting at railway station *en route*.

70. The agent shall arrange with the railway guard in charge to inform emigrants of the opportunities, as they occur on the journey, of leaving their carriage for a time, and to warn them as to the time by which they should return to their carriages.

Telegram advising despatch of emigrants.

71. The contractor or his agent, when despatching emigrants by train, shall, immediately on arriving at the railway station, send a telegram to the contractor's agent at the place of embarkation, intimating the intended despatch, and ordering a cooked meal to be prepared against the arrival of the batch.

Communication of telegram to Embarkation Agent.

72. The contractor's agent at the place of embarkation shall immediately on receipt of the telegram notifying despatch forward it for information to the Embarkation Agent.

No. 20.

	Total												

NOTE.—(*a*) Columns under heads A to E, excepting 15 and 19 of the latter head to be filled in by the Superintendent of Emigration and Medical Inspector respectively, should be filled in by the contractor concerned in the despatch; those under head F, excepting column 25, to be filled in by Medical Inspector, by Embarkation Agent concerned: those under head G, together with the health certificate and abstract, by medical officer and master of vessel or by final inspecting officer concerned; and those under head H by debarkation or final inspecting officer concerned, who should thereafter return the way-bill to the peon or other person in charge of the batch to which it relates for delivery to the employer for perusal and return as indicated in the annexed instructions.

(*b*) Inspecting officers should write any special remarks they may wish to make in regard to the batch on the form provided on the reverse.

INSTRUCTIONS.

1. *Dhubri route to Assam.*—If the batch proceeds to Assam *vid* Dhubri, the person in charge, if taking the Magra and Kanchrapara route, must place the emigrants for inspection with this way-bill before the Magistrate of Hooghly, and on arrival at Dhubri before the Embarkation Agent at that place, who will endorse his remarks on the way-bill, and then either make it over to the master of the steamer, should the batch proceed to destination by water, or return it to the person in charge, should the batch proceed to destination by land. In the former case the master must, after complying with the requisition at foot of way-bill, make over the document to the debarkation or final inspecting officer concerned, to be returned with his remarks endorsed thereon to the peon or other person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta. In the latter case the person in charge must, on arrival in the district or sub-division in which the garden where the labourers are to work is situate, place the emigrants with this way-bill before the Magistrate, who will, after endorsing his remarks on the way-bill, and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta.

2. *Goalundo route to Assam, Kachár, or Silhat.*—(*a*.)—If the batch proceeds to Assam *vid* Goalundo, the person in charge, if taking the Magra and Kanchrapara route, must place the emigrants for inspection with this way-bill before the Magistrate of Hooghly, and on arrival at Goalundo before the Embarkation Agent, or in his absence the Magistrate at Goalundo, who will endorse his remarks on the way-bill and then make it over to the master of the steamer in which the batch is embarked. The master, on the steamer's arrival at Dhubri, must place the way-bill before the Embarkation Agent at Dhubri for his endorsement after inspection of coolies; and on the completion of the voyage must, after complying with the requisition at foot of way-bill, make over the document to the debarkation or final inspecting officer concerned, to be returned with his remarks endorsed thereon to the peon or other person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent at Goalundo for information and transmission to the Superintendent of Emigration at Calcutta.

(*b*) If the batch proceeds to Káchár or Silhat, the person in charge must place the emigrants with this way-bill before the Embarkation Agent or Magistrate at the place of embarkation, and also before the Magistrate or Sub-divisional officers of all stations passed on the way, where such officers are readily accessible, and also before the debarkation officer at the place of their final landing, or should this not be possible, then, without fail, before the Magistrate of the district or sub-division in which the garden where the labourers are to work is situate, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Embarkation Agent or Magistrate concerned in the embarkation for information and transmission to the Superintendent of Emigration at Calcutta.

3. *Calcutta route to Chittagong.*—If the batch proceeds to Chittagong or the Chittagong Hill Tracts the person in charge must place the emigrants with this way-bill before the Magistrate at the place of disembarkation, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who in turn should forward it to the Superintendent of Emigration at Calcutta for information.

4. *Treatment of emigrants on the journey.*—The person in charge must take every care of the emigrants during the journey. He must give them a cooked meal before they start; and if the journey is likely to occupy more than six hours, he must distribute biscuits and sugar in the proportion of two biscuits and one ounce of sugar to each emigrant of and above ten years of age, and one biscuit and half an ounce of sugar to each emigrant under the age of ten years; and if more than eight hours, dry provisions must be supplied, such as choora, suttoo, and the like, in such quantity as may be determined by the Superintendent of Emigration or other authorized officer. It must be seen that the clothing provided is worn by the emigrants whenever the weather renders such a precaution necessary. At the close of every day's march, or of a train journey, the emigrants must be properly housed, and provided with a cooked meal and wholesome supply of water for drinking and ablution purposes.

5. *Any special instructions.*—

6. *Obedience to instructions.*—The instructions on the way-bill must be strictly complied with; and any failure to do so, or ill-treatment of any emigrant, will render the person in charge of the batch liable to punishment under the provisions of section 148 of Act I of 1882, or, in case he is a licensed person, to cancellation of license if needed.

Name of Station.	Date.	Remarks which inspecting officers may desire to record.

CHAPTER III.

GARDEN-SARDARS' SYSTEM OF RECRUITMENT.

Application for local agent's license.

73. Every employer of labour, in charge of any estate in a labour district, desiring to obtain, under section 59 of the Act, a license (form No. 24) for any person to be a local agent for the purpose of representing him in the recruiting districts, and supervising the collection of labourers by his garden-sardars, shall apply to the Superintendent of Emigration authorized to grant such license, either directly or through his agent.

Application for local agent's special license.

74. If any employer applies for a special license under section 62 (form No. 25) on behalf of any local agent, in order to enable him to engage labourers without the intervention of a garden-sardar, and such local agent is at the time representing other employers by virtue of a license under section 59, the written consent of all such other employers to the grant of such special license shall invariably be obtained and furnished with the application.

75. Every local agent shall be held responsible for the proper conduct of recruitment by garden sardars working under his supervision; and shall see that their recruiting operations are in all respects distinct and apart from those of contractor's and their employés.

Responsibilities of local agents in respect to selection of labourers.

76. In every case in which the physical fitness for labour of intending emigrants is required by any employer in his sardar's certificate (form No. 23) to be determined previous to registration, the local agent, if any, or the sardar of such employer, shall ensure the necessary medical examination in form (No 27) and be otherwise directly responsible for the class of labourers engaged to proceed to the labour district.

Inspection of places of accommodation for sirdari labourers.

77. It shall be the duty of the District Magistrate to see that every place approved for the accommodation of intending emigrants recruited by garden-sardars is regularly and thoroughly inspected by the officers charged with that duty.

Provision of way-bill for journey.

78. The way-bill (form No. 28) required by section 76 to be provided for the journey shall be carefully and correctly filled in with all the necessary particulars regarding the labourers forming the batch by the sirdar or other person appointed to accompany them to their destination; and local agents, if any, shall be held responsible for the garden-sirdar's fulfilment of this duty.

Return of way-bills by employers.

79. On the arrival of a batch of labourers at its destination, or port of disembarkation as the case may be, the sardar or other person in charge shall make over the way-bill of the batch to the employer of such labourers, who, after endorsing thereon his remarks, shall forward it to the district or sub-divisional magisterial officer for information and transmission to the Embarkation Agent, or the Superintendent of Emigration concerned, in the despatch of the labourers.

No. 23.

FORM OF GARDEN-SARDAR'S CERTIFICATE.

Certificate authorizing the garden-sardar to enter into labour-contracts with intending labourers recruited on behalf of his employer.

Name of garden sardár.	Father's name.	Caste.	Age.	HEIGHT.		Full particulars as to general appearance and characteristic marks, for purposes of identification.	Name of place, and description of lands on which labour is to be performed.	Local area of recruitment.	Number of natives the sardár is authorized to engage.	Name of local agent, if any, to whom garden-sardár is to report himself for orders.	The time within which the sardár is to return to the garden of his employer.	Any special instructions that employer may desire to give to sardár for his guidance.	Whether emigrants are to be medically examined as to fitness for labour under section 70.	Signature of sardár in acceptance of certificate.	REMARKS.
				Feet.	Inches.										

N.B.—This certificate shall not be considered to be in force unless or until it has been accepted and signed by the garden-sardár, and countersigned by the Inspector of Labourers or Magistrate of the district.

THIS certificate may at any time be cancelled by any Magistrate, Superintendent, or Inspector within the local limits of whose jurisdiction the garden-sardar is employed, if the holder contravenes any of the provisions of the Inland Emigration Act, 1882, or is guilty of any other misconduct.

Countersigned (under section 58) on the 188 .

This certificate will cease to be in force on the expiry of twelve months from the date of countersignature.

NOTE.—Columns 1 to 9 should be filled in by the registering officer; column 10 by the local agent, if any, or garden-sardar; and column 11 by the inspecting officers *en route*, who should enter in that column the names of those lost to the batch, and the causes of the losses as ascertainable from an examination of the batch and person in charge. Each inspecting officer recording an entry should sign the way-bill.
The abstract should be filled in by the employer, who thereafter should dispose of the way-bill as indicated in the annexed instructions.

INSTRUCTIONS.

1. *Dhubri route to Assam.*—If the batch proceeds to Assam *vid* Dhubri, the person in charge, if taking the Magra and Kanchrapara route, must place the emigrants for inspection, with the way-bill, before the Magistrate of Hooghly, and on arrival at Goalundo, before the Embarkation Agent at that place, who will endorse his remarks on the way-bill, and then either make it over to the master of the steamer, should the batch proceed to destination by water, or return it to the person in charge, should the batch proceed to destination by land. In the former case, the master must be careful, when emigrants are being finally landed, to make over the way-bill to the debarkation or final inspecting officer concerned, to be returned with his remarks endorsed thereon to the sardár or other person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Embarkation Agent at Dhubri, for information and transmission to the Superintendent of Emigration at Calcutta. In the latter case, the person in charge must, on arrival in the district or sub-division in which the garden where the labourers are to work is situate, place the emigrants with this way-bill before the Magistrate, who will, after endorsing his remarks on the way-bill, and filling in abstract, return it to the person in charge of the batch for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Embarkation Agent at Dhubri, for information and transmission to the Superintendent of Emigration at Calcutta.

2. *Goalundo route to Assam, Káchár, or Sylhet.*—(*a*) If the batch proceeds to Assam *vid* Goalundo, the person in charge, if taking the Magra and Kanchrapara route, must place the emigrants for inspection, with the way-bill, before the Magistrate of Hooghly, and, on arrival at Dhubri, before the Embarkation Agent, or in his absence the Magistrate at Goalundo, who will endorse his remarks on the way-bill, and then make it over to the master of the steamer in which the batch is embarked. The master, on the steamer's arrival at Dhubri, must place the way-bill before the Embarkation Agent at Dhubri for his endorsement after inspection of the emigrants, and on the completion of the voyage, or when any batch is about to be landed at its destination, make over the document to the debarkation or final inspecting officer concerned, to be returned with his remarks endorsed thereon to the sardár or other person in charge of the batch, for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must forward the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Embarkation Agent at Goalundo for information and transmission to the Superintendent of Emigration at Calcutta.

(*b*) If the batch proceeds to Káchár or Sylhet, the person in charge must place the emigrants, with this way-bill, before the Embarkation Agent or Magistrate at the place of embarkation, and also before the Magistrate or Sub-divisional Officers of all stations passed on the way, where such officers are readily accessible, and also before the debarkation officer at the place of their final landing; or should this not be possible, then, without fail, before the Magistrate of the district or sub-division in which the garden where the labourers are to work is situate, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch, for delivery to the employer. After perusal and entry of casualties on the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Embarkation Agent or Magistrate concerned in the embarkation, for information and transmission to the Superintendent of Emigration at Calcutta.

3. *Calcutta route to Chittagong.*—If the batch proceeds to Chittagong or Chittagong Hill Tracts, the person in charge must place the emigrants, with this way-bill, before the Magistrate at the place of disembarkation, who will, after endorsing his remarks on the way-bill and filling in abstract, return it to the person in charge of the batch, for delivery to the employer. After perusal and entry of casualties in the journey to garden, the employer must return the way-bill to the Magistrate of the district or sub-division, who, in turn, should forward it to the Superintendent of Emigration at Calcutta for information.

4. *Treatment of emigrants on the journey.*—The person in charge must take every care of the emigrants during the journey. He must give them a cooked meal before they start; and if the journey is likely to occupy more than six hours, he must distribute biscuits and sugar in the proportion of two biscuits and one ounce of sugar to each emigrant of, and above, ten years of age, and one biscuit and half an ounce of sugar to each emigrant under the age of ten years; and if more than eight hours, dry provision must be supplied, such as chioora, sutto, and the like, in such quantity as may be determined by the Superintendent of Emigration or other authorized officer. It must be seen that the clothing provided is worn by the emigrants whenever the weather renders such a precaution necessary. At the close of every day's march, or of a train journey, the emigrants must be properly housed, and provided with a cooked meal and wholesome supply of water for drinking and ablution purposes.

5. *Any special instructions.*—

6. *Obedience to instructions.*—The instructions on the way-bill must be strictly complied with, and any failure to do so, or ill-treatment of any emigrant, will render the person in charge of the batch liable to punishment under the provisions of section 153 of Act I of 1882, or, in case he is a sardar, to refusal of certificate thereafter.

And by boat to Silhat, from November to May 25 days, and June to October 20 days, and to Káchá 30 days and 26 days respectively.

N.B.—In provisioning vessels extra stores should be shipped for at least one-fourth of the above length of passage.

CHAPTER IV.

TRANSPORT.

Section 1.—General Rules.

Supervision of embarkation depôts.

80. The Medical Inspector at every place of embarkation shall see that the embarkation depôts are kept in proper order, and shall exercise the same powers in respect of them as are exercised in respect of depôts by Medical Inspectors, reporting, for the information of the Superintendent concerned, any failure of contractors or their employés to attend to his orders. Water and conservancy arrangements shall receive special attention.

Measurement of deck space.

81. Exclusive of hospital, gangways, ventilating hatches, and space for crew and attendants, and in respect of boats for rowing and bailing out, properly sheltered deck space shall be provided on board steamers, flats, or boats at the rate of ten superficial feet to each emigrant, computed with reference to section 92 of the Act, during the months of November, December, and January, and of twelve superficial feet for the remaining months of the year. In steamers of the daily mail service, besides suitable and available space on main deck, fore and after cabins also may be measured for the accommodation of emigrants, at an increased rate per emigrant of twelve and fourteen superficial feet respectively.

Measurement of hospital space.

82. Hospital space shall be provided for five per cent. of the total number of emigrants to be carried, computed with reference to section 92 of the Act, but such space shall be allotted at double the rate allowed for healthy adults, viz. twenty or twenty-four superficial feet to each statute adult, according to season, making reasonable allowance for space occupied by other requirements.

Section 2.—Fittings of Steamers and Flats.

Engineers and shipwright surveyors' certificates.

83. It shall be ascertained that the term for which the engineers and shipwright surveyors' certificates were granted to the vessels has not expired, or will not expire during the passage.

Situation of fittings of emigrant vessels.

84. All fittings shall be provided entirely on board that vessel which is to convey the emigrants to their destination; but, if necessary, and with the Medical Inspector's consent, the hospital may be provided on an upper deck of the adjoining flat or steamer, if it accompany for the entire journey.

Roofs of emigrant vessels.

85. The roof of every vessel shall be strong, watertight, and not less than five feet in height at its junction with the stanchions on either side. If of corrugated iron, the roof must not only be lined or thatched with matting, &c., as a protection against heat, but, on steamers, must also be fitted either with skylights or ridge-ventilators, which shall have a ventilating area of not less than ten superficial feet to every hundred emigrants, computed as in section 92 of the Act, accommodated on board, and shall be so constructed as to exclude rain and allow the free escape of heated air. In steamers of the daily mail service, the ventilating area may be reduced to not less than six superficial feet to every hundred emigrants.

Enclosure of deck space for emigrants.

86. The space measured off for emigrants shall be fitted along the sides of the vessel, with a boarding three feet high, rising from the plank sheer of the vessel, and with thick and sound canvas curtains hanging from roof to deck, with ventilating space under the eaves, and fastening closely to the deck below. But from the months of October to March, both inclusive, the three feet boarding shall completely enclose the emigrants' deck space, and, besides the side curtains, there shall be similar curtains hung, one at each end of the deck, so as to convert the entire space allotted to emigrants into a thoroughly sheltered compartment, with ventilating spaces near the roof for the exit of heated and unwholesome air. This large compartment shall, moreover, be subdivided into three smaller compartments by a couple of intermediate curtains stretched right across the deck space, from one side of the vessel to the other; but these two curtains, instead of extending almost up to the roof, as those at the sides and ends must do, shall be raised to a height of six feet only, measuring from the deck upwards, the space above being left clear and open for the purposes of free ventilation. In steamers of the daily mail service, the height of the boarding may be reduced to not less than two feet nine inches, and such boarding may not be continued round the stern of the vessel; but a suitable removable curtain following the iron rail may be substituted therefor.

Protection of emigrants' deck space against wet.

87. The space for emigrants shall be protected also against spray from the paddle-wheels; otherwise the space opposite the paddleboxes on both sides of steamer, and on one side of a flat, if it is to be lashed alongside during the voyage, shall not be measured for the accommodation of emigrant passengers.

Casing of funnel.

88. In order to prevent the heat of the funnel from raising the temperature of the emigrants' deck, in all steamers, in which the space immediately over the engines is neither excluded and railed off, nor ventilated above by skylights or other means, that portion of the funnel between such passengers' deck and the roof shall be enclosed at a distance of at least eighteen inches all round, by a strong wooden air-shaft or casing, which shall be carried through the deck at the lower end, and through the roof at the upper, so as to afford free exit above the roof for the body of warm air immediately surrounding the funnel. In steamers of the daily mail service, such

wooden casing may be dispensed with, if the iron casing provided for exit of warm air is found to be sufficiently protective, but not otherwise.

Situation of hospital.

89. The space intended for hospital purposes shall be provided on the upper deck of the steamer or flat, and a canvas screen shall divide it off from the rest of the deck space.

Compartment for dispensary.

90. A suitable compartment, approved by the Medical Inspector, shall be set apart for a dispensary; and bamboos shall be fastened, fore and aft, along the central stanchions within the emigrants' deck space, in order to enable the emigrants to hang up their bundles and blankets for the day.

Railing in of unprotected openings.

91. All dangerously exposed places near hatches, ladders, bathing places, latrines, communication and landing stages, shall be securely railed in against accidents.

Embarkation and landing stages.

92. Embarkation, landing, and all communicating stages likely to be used by emigrants, shall be at least three feet wide, well fastened, and provided with hand-rails—a requirement that shall be strictly complied with whenever emigrants are to be embarked or landed. In steamers of the daily mail service, the width of the stages may not be less than two feet.

Cabooses for emigrants.

93. One or two fire-proof cabooses, fitted inside with brick and plaster, and sufficiently large to accommodate the full number of boilers, according to scale, shall be firmly secured in the after part of the vessel, and so placed as to prevent any risk of contamination from the hospital.

Iron tanks for drinking water.

94. Four iron water-tanks, each capable of containing four hundred gallons of water, shall be provided on board, and each such tank shall be fitted with at least three moderate-sized taps, of simple construction, capable of being secured against use when desirable, and with a paolocked iron cover, besides a canvas over-all to exclude dust, &c. A ship's force-pump, with hose complete shall also be provided for the exclusive purpose of supplying water to the tanks, and shall on no ground whatever, excepting an outbreak of fire on board, be otherwise used. These tanks shall be conveniently placed, and filled before the arrival of the steamer at the place of embarkation, with the best water available, for the exclusive use of the emigrants. The water of two of the tanks only shall be in use at the same time, the remaining two tanks being reserved as settling tanks. In steamers of the daily mail service, the tanks may be reduced to two, each capable of containing 200 gallons of water, and may be placed below, with a pump arrangement on deck, for the supply of water for drinking and cooking purposes through three moderate-sized taps.

Troughs for washing purposes.

95. Every vessel licensed to carry emigrants shall be provided with a covered trough, fitted with at least six large and simple taps, placed at such distances apart as to admit of six persons abreast washing their clothes at the same time, and connected with a fixed pump for the constant supply of water therein. Two such troughs shall be provided when the number of emigrants to be carried exceeds three hundred, computed with reference to section 92 of the Act.

Arrangements for bathing of emigrants.

96. A sufficiently large and well protected space for bathing shall be set apart for the use of the emigrants, and shall be fitted with a suitable showerbath of simple construction, and capable of distributing the shower over a large area, with a moveable canvas screen, to be invariably used when women are bathing, and with a suitable pump for supplying water thereto, which may be utilized also for filling the trough.

Latrines for emigrants.

97. Latrines with doors in front shall be securely fitted as far aft as possible, and at some distance from the deck space for emigrants from their drinking water, and from the cooking places, &c., and in every compartment a metal vessel, secured by a chain, shall be provided for drawing river water for washing purposes. The inside of every compartment, as well as the metal vessel and chain, shall be painted with coal-tar—a process that shall be repeated at the close of every trip after the compartment has been thoroughly cleaned. In steamers of the daily mail service, three latrines may be provided in one of the sponson-deck houses, to be set apart exclusively for the purpose.

Size and number of latrines.

98. There shall be two separate sets of latrines for males and females respectively placed, if possible, on opposite sides of the deck, and each set shall consist of at least four compartments for the use of any number up to two hundred emigrants, and of one additional compartment for every hundred in excess of the first two hundred, reference in counting numbers being had to section 92 of the Act. In steamers of the daily mail service, the deck-house set apart for the latrines shall have at least three compartments for males and three compartments for females.

Lanterns.

99. Lanterns shall be hung up in their places ready for use.

Boats and life-buoys.

100. Two life-buoys shall hang over or near the stern of every vessel, and the boats shall be in good working order, and fitted with requisites for immediate use, when necessary. In steamers of the daily mail service, the number of buckets may be reduced to ten.

Provision of fire-engine and appliances.

101. All emigrant passenger vessels shall have on board a fire-engine, with a sufficiently long flexible hose, that would be capable of discharging water over every part of the vessel; fire-buckets, and all other appliances needful in case of fire. The fire-buckets shall be twenty in number, and they, as well as all other fittings, shall always be kept in a proper place, in good order, and be ready for use on the shortest notice.

No. 33.

FORM OF SHIPMENT AND ISSUE OF MEDICAL STORES AND COMFORTS.

Statement of medical stores shipped and issued on board *for the use of emigrants proceeding to*

NAMES OF ARTICLES.	Quantity prescribed for the first 100 persons calculated as in section 92 of the Act.	Quantity shipped for — persons.	Quantity expended during voyage.	Quantity left at end of voyage.	REMARKS.
Adhesive plaster	1 yard.				
Acetate of lead	½ oz.				
Calomel	4 oz.				
Castor-oil	2 quarts.				
Chiretta	3 lbs.				
Cholera pills	200				
Chalk, prepared	1 oz.				
Compound jalap powder	1 ,,				
Oil of peppermint	½ ,,				
Carbonate of soda	4 ,,				
Carbonate of ammonia	½ ,,				
Dysentery pills	200 ,,				
Ipecacuanha powder	1 ,,				
Gregory's powder	1 ,,				
Linseed meal	2 lbs.				
Bazar sulphur (for fumigating)	2 ,,				
Dover's powder	½ oz.				
Chlorodyne (Collis Brown's)	4 ,, bottles.				
Mustard	½ lb.				
Laudanum	3 oz.				
Quinine*	½ ,,				
Sweet spirits of nitre	2 ,,				
Sulphuric ether	4 ,,				
Simple ointment	½ lb.				
Sulphur ointment	1 ,,				
Sulphate of copper	½ oz.				
Ditto of zinc	½ ,,				
Tincture of steel	1 ,,				
Ditto of kino	2 ,,				
Turpentine	4 ,,				
Tincture of camphor, compound	1 ,,				
Disinfectants.					
Disinfecting powder (Calvert's or McDougal's)	10 lbs.				
Common carbolic acid or coal-tar, chiefly for latrines	1 gallon.				

* Cinchona alkaloid can, if desired, be substituted for three-fourths of the quantity of quinine in the above scale.

When the number exceeds 100 statute adults the following quantities to be supplied, viz :—

For over 100 statute adults one-third of the above scale in addition.
Ditto 200 ditto half of the above scale in addition.
Ditto 300 ditto twice the above scale.
Ditto 400 ditto three times the above scale.

N.B.—There should be a separate form in duplicate for each separate batch of emigrants, and the particulars under each head should be carefully filled in by the officer concerned. One of the statements should then be forwarded by the debarkation or inspecting officer to the Magistrate of the district for his countersignature and submission to the Emigration Agent at Dhubri, for information and transmission to the Superintendent of Emigration concerned, and the other (duplicate) should be delivered to the peon or sardar in charge of the batch for delivery to the contractor concerned, if a contractor's batch, or to the manager of the garden, if a sardar's batch.

SCHEDULE B.

Scale of provisions for emigrants in transit in steamers.

ARTICLES.	DAILY ALLOWANCE TO EACH EMIGRANT. Of and above 10 years of age.	DAILY ALLOWANCE TO EACH EMIGRANT. Between 2 and 10 years of age.	Mode of shipment in bulk.	REMARKS.
	Srs. c.	Srs. C.		
Rice	0 0½	0 4¼	In bags	Quality to be that ordinarily eaten by labouring classes.
Arhar dal	0 2	0 1	In barrels or bags ...	To be given to flour-eaters in lieu of rice.
Flour	0 8	0 4	... ..	Such as are ordinarily eaten by labouring classes and are obtainable in the markets.
Vegetables	0 3	0 1½	In bags.	
Salt	0	0		
Mustard oil (October to March) .	0	0	In tin.	
Ditto (April to September)	0	0		
Condiments: Onions, and garlic	0	0	In bags, separately.	
Condiments: Tamarind ...	0	0		
Condiments: Coriander seed ...	0	0		
Condiments: Turmeric ...	0	0		
Condiments: Chillies	0	0		
Tobacco (for smoking)	0	...		
Firewood	1 8	0 12	.....	Coal may be substituted for firewood in the ratio of one to two of wood.

N.B.—(*a*) *Rice* in the case of emigrants located in depôt, or marched to garden, or place of labour, should be increased to 12 and 6 chittacks respectively per emigrant; and *firewood*, in the case of emigrants conveyed to destination in boats, should be increased to 2 seers and one seer respectively per emigrant; but *tobacco* in the case of emigrants while located in depôt should be decreased to ½ chittack per emigrant of and above 10 years of age.

(*b*) The above scale should not be deviated from except under the orders and on the responsibility of the medical officer.

To every additional hundred persons ...	1	For every additional hundred persons ...	2

Tow (country), a sufficient quantity, to be approved by the Medical Inspector.

c.—Scale of medical comforts for emigrants in transit.

ARTICLES.	Quantity.	Mode of shipment.	REMARKS.
Arrowroot ...	5 lbs. } every 100 persons.	In tin ...	To be of ordinary quality but good and clean.
Sago ...	5 lbs. }		
Sugar ...	2½ lbs. }	In wooden case.	
Liebig's extract of meat	3 lbs }		
Rum ...	Nine pints }	Bottles in wooden case	To be of good country manufacture.
Preserved milk ...	One tin to every 10 persons ...	In wooden case ...	One pound mixed with half a gallon of tepid water makes good milk for use with or without sago, &c., for infants nursing mothers, or invalids. If under exceptional circumstances an extra quantity be needed, the Master may be required by the medical officer to supply it.
Feeding bottle ...	One to every four infants.		
Nipples ...	Four to each feeding bottle.		

SCHEDULE D.

a.—Scale of cooking utensils, &c., for emigrant vessels.

ARTICLES.	Quantity to every 100 persons calculated as in section 92 of the Act.	REMARKS.
Soap (Country)	100 balls.	
Boilers with covers (iron)	2	To be used on steamers only.
Rice pans (iron)	25	Ditto on boats only.
Ladles (iron)	2	
Spoons (iron)	2	
Rice drainers (iron)	1	
Soop (bamboo)	4	Ditto for cleaning rice.
Buckets and ropes	2	
Curry-stone with muller	1	
Knife	1	
Broom	1	
Scale and weights	1 set	Ditto generally.
Saucepans	2	Ditto for hospital purposes only.
Metal spoons	2	Ditto for hospital purposes only.
Hookahs	25	
Chillums	50	
Lanterns with wicks (European)	2	To be supplied to steamer. One extra lantern to be shipped for every additional 100 persons.
Ditto ditto (Country)	1	To be supplied to boats only.
Lamp oil	2 chittacks per lantern per night according to length of passage.	Extra oil to be supplied for at least one-fourth of the prescribed length of passage.

SCHEDULE E.

Scale of attendants for emigrants in transit.

ATTENDANTS.	Number to every 100 persons calculated as in section 92 of the Act.	REMARKS.
Sardárs	4	Accompanying emigrants to garden.
Peons	2	Appointed by contractors to proceed with emigrants.
Cooks	2	Provided by the master of the steamer, or in the case of boat despatches, by the contractor concerned.
Topasses	2	Provided by the master of the steamer, or in the case of boat despatches, by the contractor concerned.
Mehtaraees	1	Provided by the master of the steamer, or in the case of boat despatches, by the contractor concerned.

Section 3.—Embarkation Agent.

Notice of readiness to embark emigrants.

102. Emigrants shall not be embarked unless everything is perfectly ready, and the vessel is prepared to start, of which timely notice shall be sent to the Embarkation Agent.

Presence of emigration officers at embarkation.

103. The Embarkation Agent, the Medical Inspector, the contractor concerned or his agent, the medical officer, and the peon or other person in charge of labourers, shall be present at every embarkation of emigrants. If the number to be embarked be small, a competent assistant may be deputed by the Embarkation Agent and the Medical Inspector to supervise the embarkation.

Stoppage of traffic during embarkation.

104. During embarkation, all traffic, unless carried on by means of a separate stage and gangway, and every kind of work interfering with embarkation, shall be stopped.

Tally of emigrants at embarkation.

105. Two men shall be stationed at the gangway, one to count and the other to keep a careful tally of the number of emigrants as they come on board, one by one, in answer to their names.

Examination of emigrants on board in bad weather.

106. The emigrants shall be mustered and examined under shelter on board, if the weather at the time of embarkation be unfavourable.

Identification of emigrants with their way-bills.

107. The emigrants, divided into batches under their peons and sirdars, shall be called on board by name, one at a time, and identified with those on the way-bills of the batches to be embarked.

Detention of sick emigrants.

108. Any emigrant taken ill and unfit to go shall be detained and sent to the hospital depôt, and such of his relatives and dependents, if any, as desire to remain, or whom it is, for sufficient reason, deemed proper to retain, shall be detained.

Mustering of establishment on board.

109. When all are on board, the embarkation stage shall be removed, and the establishment of peons, sirdars, and topasses shall be mustered in order to see that they are present according to scale. Then all embarkation papers shall be carefully corrected, signed, and delivered; after which the vessel shall leave as speedily as possible, the Embarkation Agent or his assistant remaining at the ghât till she starts.

Despatch of copies of way-bills to officers concerned.

110. As soon as possible after a vessel leaves, the Embarkation Agent shall forward, duly completed up to date of embarkation, the copies of the way-bills of the despatched batches to the Labour District Officer and to the Superintendent of Emigration respectively for information. The Embarkation Agent shall also forward a deferred telegram to each head-quarter station of a district or sub-division, within whose jurisdiction any emigrants are to be disembarked, informing the Magistrate of the name of the steamer, name of the debarkation port, the number of emigrants to be landed there, and the names of gardens of destination.

Section 4.—Masters of vessels.

Provision of fittings in licensed vessel.

111. The master of any vessel intending to apply for a license to carry more than twenty emigrant passengers shall provide the permanent fittings as prescribed in the rules 81 to 101; and shall thereafter apply in writing to the Superintendent of Emigration, or other officer duly empowered by the local Government for an inspection of such fittings, and of the legal capacity of the deck space for the accommodation of such passengers.

Superintendent's certificate of approval of fittings.

112. The Superintendent or other officer shall thereupon examine the fittings; and, after satisfying himself that the requirements of the rules have been complied with, shall grant a certificate of approval in form (No. 29), specifying the number of emigrant passengers that the vessel may carry.

Provision by master against carrying labourers.

113. The master of any vessel intending to carry labourers as emigrant passengers under his license shall provide the following:—

(*a*) Stores, medicines, medical comforts, and cooking utensils in accordance with the requirements of Schedules B, C, and D.

(*b*) A medical officer licensed by the Medical Inspector or other officer so empowered.

(*c*) The establishment of attendants as prescribed in Schedule E.

Master's application for license.

114. On arrival at Goalundo, the master desiring a license shall make a written application to the Embarkation Agent, or other officer duly empowered by the local Government, and shall in such application state the following particulars:—

(*a*) Whether the terms for which the shipwrights and engineer surveyor's certificates were granted have expired, or will expire during the passage.

(*b*) Whether any accident to the vessel for which license is desired, or epidemic among the passengers, occurred during the previous trip.

(*c*) Whether the permanent fittings prescribed by the rules governing transport have been provided, and the requisite certificate of their approval obtained from the officer so authorized.

(*d*) Whether it is intended to carry labourers, and if so, whether the medical officer, the establishment of attendants, and the stores as prescribed in the rules and schedules have been provided.

(*e*) Whether the deck space intended for the accommodation of native passengers has been cleared of cargo; and the stores for labourers, if any, conveniently arranged for survey.

He shall at the same time be prepared for survey by clearing the whole or such portion of the deck space as may be intended for the accommodation of emigrant passengers; and, if labourers are to be carried, by having the prescribed provisions and other stores arranged conveniently for examination.

Survey of vessel's fittings and stores.

115. The Embarkation Agent or other officer as aforesaid, on receipt of the application for license, shall, in consultation with the Medical Inspector, hold the survey of the vessel's fittings and available space; and, if labourers are to be carried, of the requisite stores, at which both master and medical officer are to be present. The certificate of approval granted under Rule 80 shall be produced by the master at such survey; and the Embarkation Agent or other officer as aforesaid shall accept the permanent fittings as therein described, on satisfying himself that they have not since been altered or damaged. He shall also, in the event of the entire deck space being reserved for emigrant passengers, accept and enter in the prescribed form of license (form No. 30 or 31), which he may in his discretion grant to the master, the number such space is stated in the certificate to be capable of accommodating; but if only a part of such space be reserved, he shall, after ascertaining the number that may be accommodated therein, specify in the license such number only.

Special examination of unhealthy vessels.

116. A special examination shall invariably be made by the Medical Inspector of any vessel in which much sickness has occurred on the voyage immediately preceding; and the license applied for by the master shall not be granted unless the master carries out such measures of cleaning, disinfecting, deck-caulking, &c., as the Medical Inspector may think

necessary. If a vessel is found to be recurringly unhealthy for emigrants after material alterations and improvements have been made in her accommodation, a license shall be refused her.

Grant of licenses on approval of arrangements.

117. After everything has been examined and approved, the master and the medical officer shall sign the prescribed provision and medical store lists and final landing statements (forms Nos. 32, 33, and 34 respectively), and when the Embarkation Agent is satisfied that all is correct, and that the master of the steamer has a copy of the Act and Rules, he shall license the vessel.

Location of all passengers on the same deck.

118. Free emigrants and passengers other than labourers may be accommodated on board the same vessel with labourers, and on the same deck, provided that the total number under conveyance does not exceed the maximum number specified in the license: but such passengers shall on *no consideration* be permitted to locate themselves within the spaces specially allotted for the use of emigrant passengers proceeding under the Act.

Exclusion of animals from the emigrants' deck.

119. Horses, pigs, and other animals shall not be allowed on the same deck with the emigrants. Vicious animals shall not be allowed on the same vessel with the emigrants.

Freedom of emigrants' deck from cargo.

120. Masters shall see that the deck space for emigrants is kept clear of cargo, &c., so long as emigrants are under conveyance, and that ladders, stages, &c., are safely secured and railed with a double railing.

Joint responsibilities of master and medical officer.

121. The master of an emigrant vessel and the medical officer in charge, whose professional training and capacity must be equal to that of an apothecary or Assistant Surgeon, shall conjointly be responsible for the care and good treatment of the emigrants during the passage. The medical officer shall strictly carry out the special instructions contained in the form (No. 35) delivered to him by the Embarkation Agent for his guidance.

Assistance of master to medical officer.

122. The medical officer shall insist upon the establishment specially entertained for attendance on the emigrants discharging their duties punctually and properly; and the master shall render all the assistance in his power to the medical officer, in order that he may maintain discipline on board, and conform strictly with all the requirements of the rules regulating transport.

Duties of establishment for emigrants.

123. Peons, garden-sardars, or other persons in charge of emigrants, shall obey the instructions of the master and the medical officer, and shall immediately report to them any neglect of duty or occurrence of disease, or accidents or disagreements affecting the emigrants. The master and the medical officer shall thoroughly investigate the matter under report as soon as possible thereafter.

Appointment of watchers for hospital.

124. Peons and sardars shall have their day and night duties fairly divided and clearly defined. When there are sick emigrants in hospital, peons, sardars, and topasses shall be deputed to hospital duty, so that the sick may constantly be cared for; and the attendants on duty shall be regularly relieved by others in rotation. Careful night-nursing of the sick by the attendants shall be strictly insisted on, and looked to by the medical officer.

Destruction of objectionable articles found with emigrants.

125. As soon after the embarkation as possible, the emigrants shall be comfortably berthed, and their bundles searched for any indigestible food, grain, or old rags they may have contrived to take with them, all of which shall be thrown overboard. This precaution shall receive repeated attention throughout the passage.

Protection of emigrants against interference by crew.

126. The emigrants' deck space shall not be encroached upon in any way by either crew or passengers other than emigrants, nor shall they be permitted to interfere with the emigrants. The topasses shall sweep the decks morning and evening and after every meal, and shall keep them always clean and dry.

Cleaning of emigrants' deck.

127. The decks shall be cleaned by the emigrants daily; but shall be washed only when weather, time, and other circumstances permit, the emigrants being landed or accommodated on another deck till their deck is thoroughly dry.

Disinfection of latrines.

128. The latrines shall be constantly cleaned and disinfected, and occasionally fumigated. Attention shall also be paid to the cleanliness and disinfection of the bed-pans when in use.

Promotion of ventilation of emigrants' deck.

129. Whenever the weather permits, the side curtains shall be raised to admit of free perflation of air, and under all circumstances thorough ventilation shall be promoted by every available means.

Disposal of emigrants' blankets.

130. The emigrants on rising in the morning shall, after well shaking them, fold and sling their blankets out of the way.

Daily mustering of emigrants.

131. The emigrants shall be mustered every morning, and examined by the medical officer. Those who are well shall, weather permitting, bathe daily, and wash their clothes at least twice a week.

Airing of emigrants' clothing.

132. Emigrants' clothes, mats, and blankets shall be aired and put in the sun as often as possible, especially after damp weather.

133. Rations shall be issued daily by the medical officer according to the scale prescribed in schedule B, and sufficiently early to admit of the food being prepared for distribution punctually at 9 o'clock in the forenoon and 4 o'clock in the afternoon; and all such issues, as well as those of medical comforts, shall immediately thereafter be entered by such officer in the prescribed provision and other lists, and certified by him and the master concerned. Boiling rice in bad water shall not be permitted; and when the food is ready, the medical officer shall invariably satisfy himself as to its being properly cooked, and shall see that it is fairly distributed. Stale food shall not be kept by either cooks or emigrants; and all utensils shall be cleaned out and shewn to the medical officer after each meal. Motherless infants and invalids shall have suitable and freshly prepared food (milk, soup, sago, &c.) ordered for them every three or four hours.

Attention to emigrants' food by medical officer.

134. In the event of any pilfering of stores being detected, immediate enquiry shall be made by the medical officer and master, and the offender prosecuted at the first convenient station arrived at thereafter.

Prosecution for theft of stores.

135. A constant supply of good drinking water shall be kept up in the tanks. These shall be used alternately, the water in each being allowed to settle after the addition of alum in the proportion of six grains to the gallon; and every effort shall be made to prevent emigrants from drinking the river water fresh drawn from the side of the vessel. The water shall be pumped directly into the tanks from the river in mid-stream, and clear from all possible risk of pollution from the latrine, &c.

Drinking water for emigrants.

136. Emigrants on board steamers and flats shall not be allowed to draw water from the river over the sides of the vessels, and thereby to incur the risk of accidents.

Protection against emigrants drawing river water.

137. The master of every steamer towing a flat and the medical officer in charge shall strictly prohibit all emigrants or other native passengers from crossing over from one vessel to another; and, with this object in view, shall not permit communicating stages between the vessels to be placed where they favour ready intercourse. Any communicating stages that may be absolutely necessary for the use of the officers and crew shall be constantly watched, in order to prevent accidents and the spread of disease.

Prevention of passengers from crossing over to another vessel.

138. The emigrant passengers as a rule shall not be required to labour during the passage, but in exceptional cases of urgent necessity only such of them as are considered by the medical officer to be well fitted for work may be employed, provided that such work is free from extraordinary risk to life, and that the master supplies those so employed with extra rations at the rate of two and a half chittacks of rice and half a chittack of dâl for each man *per diem*. The emigrants should always be encouraged to occupy their time with reasonable amusements.

Engagement of labourers in work.

139. They shall be properly arranged at night, and prevented from crowding together: and padlocked lanterns shall burn all night in the dispensary, and near latrines and gangways.

Distribution of emigrants at night.

140. The master of every licensed vessel, on arrival at every place where a Magistrate is stationed, shall report to such Magistrate the number of passengers and crew on board, the general state of their health, and the number of deaths that occurred on the passage; and omission to do so shall entail prosecution or refusal of license to carry emigrants thereafter.

Intimation of vessel's arrival at each station to Magistrate.

141. The master or the medical officer shall place the way-bill (form No. 38) of the vessel received from any Embarkation Agent before the inspecting officers at each station, in order that they may enter their remarks on the several points indicated in such way-bill.

Remarks in vessel's way-bill by inspecting officers.

142. The master and the medical officer shall furnish to inspecting officers all necessary information, and shall afford them every facility for the satisfactory discharge of their duties under the provisions of the Act and rules.

Facilities for inspection of vessels.

143. After the last official inspection at the place of final debarkation, the master or medical officer shall forward the vessel's way-bill, in original, together with the medical diary, cholera register, and issue lists of provisions and medical comforts relating to the emigrants embarked at Goalundo to the Emigration Agent at that place for his remarks, and for transmission to the Superintendent of Emigration, Calcutta, for submission of the way-bill with his remarks to the local Government.

Disposal of vessel's way-bill after last inspection.

144. Emigrants shall not be permitted by the master to land finally at any place excepting that named in the vessel's way-bill as their destination, save under circumstances of necessity provided for in the Act and rules.

Landing of emigrants as per vessel's way-bill.

145. The master of a licensed vessel at the close of every trip shall forward to the Emigration Agent at Dhubri for information and transmission to the Superintendent of Emigration at Calcutta a mortality return in the prescribed form (No. 39) shewing the deaths that occurred during the trip among the crew and passengers other than emigrants under the Act.

Report of mortality by master.

No. 35.

FORM OF INSTRUCTIONS TO MEDICAL OFFICER.

Instructions to medical officer proceeding in charge of labourers to labour-districts.

, in view of his appointment by , to proceed in medical charge of emigrants under conveyance to , per , is requested to strictly carry out the instructions hereto subjoined for his guidance.

DATED AT
The 188 .

Emigration Agent.

INSTRUCTIONS.

The memorandum on the reverse should be accurately filled in for the information of the Emigration Department.

2. All the noteworthy events, occurrences, and incidents of the voyage should be duly reported to the officers who may visit the vessel for the purposes of inspection.

3. A journal recording accurately and briefly the daily occurrences of the voyage should be daily written up, and the initials of the master obtained at the close of each day, and those of the inspecting officers on the dates of their inspections. Such journal, together with the special cholera report, if any, a complete way-bill of the Goalundo and Dhubri shipments, and any other papers relating to the passage, should be posted under cover of a forwarding letter to the Emigration Agent last concerned in the emigration of the emigrants under conveyance for endorsement of any remarks he may desire to offer and for transmission, through any other Emigration Agent concerned, to the Superintendent of Emigration at Calcutta.

4. The emigrants during the winter months should be made to wear their warm clothing, whenever the conditions of the weather render such a precaution necessary.

5. The effects of the emigrants under conveyance to the labour-districts should be searchingly examined under personal supervision after embarkation and at intervals during the voyage, and all improper articles of food and dirty rags found amongst them should be at once removed and destroyed.

6. Every care should be taken to secure the serving out of properly cooked food to the emigrants, and special and continuous attention should be paid to the regular and proper feeding of infants and children and the sick with milk and other suitable and nourishing diet. Strict attention should also be paid to the maintaining of a constant supply of good drinking water, as well as to the carrying out of the arrangements for the supply of water for bathing and washing purposes.

7. At the close of the voyage the debarkation officer should be requested to examine the quality of the stores supplied on the passage, and to countersign the provision and medical stores lists, if satisfied that the stores have been issued according to scale.

8. On the landing of emigrants at their destinations the medical officer should see that disembarkations are not effected at any but authorized landing-places, and should also carefully fill in health certificates and the abstract on the way-bill of each batch.

9. When cholera or any other disease in an epidemic form breaks out, a special report should be prepared showing, if possible, the probable cause of such an occurrence. The prescribed register of cholera cases should be carefully filled in, and the medical diary should show the details of treatment of each case from day to day. Every precaution should be taken to prevent the spread of the disease, and its occurrence should be reported to the Magistrate of the first station arrived at thereafter.

10. Any emigrant attacked by small-pox on the passage should be landed at the first opportunity, unless there are strong reasons to the contrary.

DATED AT

The 188 .

Medical Officer.

Section 5. Medical Officers.

Keeping of medical diary and ordinary journal by medical officer.

146. Every medical officer proceeding in charge of emigrants shall keep a medical diary in the prescribed form (No. 37), as well as a journal of the principal events of the passage, and shall write them up daily and carefully. He shall, moreover, on arrival at every inspection station place the above documents before the inspecting officers for their initials against the latest entry. Every death shall be reported immediately to the master of the steamer, who, if there be no relatives on board entitled thereto, shall take over charge of any property or money left by the deceased, and shall deliver the same to the Magistrate at the next station, or at the last place of debarkation for disposal.

Liability of medical officers to dismissal.

147. Every medical officer proceeding in charge of emigrants shall, in case of misconduct or neglect of his duties, or of the requirements of the rules regulating transport, be liable to dismissal on the requisition of any Medical Inspector or other officer so empowered.

Regulation of change of diet by medical officer.

148. All extra food and any change in diet shall be regulated by the medical officer only on his own responsibility.

Utilization of deck of flat in case of epidemic.

149. In the event of an epidemic of dangerously communicable disease occurring on the passage, the master, if required by the medical officer, shall give up the upper deck of an available flat for the better distribution of the emigrant passengers.

Treatment of sick emigrants.

150. Emigrants suffering from slight illness may be attended in their berths; but all serious cases shall be treated in hospital. Patients attacked by cholera or small-pox, or other dangerously communicable disease, with all that belongs to them, shall be instantly and thoroughly isolated from the healthy; and the family or batch in which such disease occurred shall be kept on another deck, or as far apart as possible from the rest of the emigrants without exciting alarm.

Measures of disinfection of deck.

151. Places originally occupied by emigrants removed on account of communicable disease shall be instantly cleaned, and the deck shall be thoroughly scraped and scrubbed with hot sand and disinfecting powder, and, if circumstances admit, fumigation with burning sulphur shall also be carried out.

Measures for prevention of an epidemic.

152. Besides the immediate isolation and treatment of the first case of dangerously communicable disease, every precaution shall be taken to prevent an epidemic, strict attention being paid to premonitory symptoms, general and personal cleanliness, careful disinfection and disposal of excreta, disinfection and destruction of infected articles, free ventilation, and care of the healthy. On the occurrence of cholera a register of the cases shall be kept in the prescribed form (No. 36).

Destruction of infected clothing.

153. All clothes, blankets, mats, &c., that have been in any way in contact with those suffering from serious communicable disease, or have been soiled, or are suspected of infection or impurity, shall be burnt on shore in the presence of the medical officer, who should take special care to have them burnt invariably to leeward; or thrown overboard, whenever burning is impracticable.
